Word has it that the idiot K1TP has been jamming on twenty and seventy five meters as well. He is the latest moron to fall under the spell of jammers AF2Y, N9PGE, and the rest of the bad seed Goodfellows. Even his stupid webpage at http://members.aol.com/jcunham/ shows the control this jamming bunch of malcontents have over this moron. Riley has already received jamming reports from the Massachusetts area, and hopefully this libeling, jamming idiot will be busted soon as well.

2. AF2Y: leave Elian BE.

Newsgroup: rec.radio.amateur.misc

Here I sit at my desk, doing paperwork with the Kenwood R1000 tuned to .313 and guess whom I'm hearing? That windbag KT4TR telling everyone that little Elian Gonzalez MUST go back to Cuba with his red herring poppa. Like hell...send Harrison to Cuba and leave that kid here! Wanna know why? Here's some reasons. First of all, the kid's mother DIED bringing the child to freedom? The U.S.A. is to let her die in vain? Since when doesn't this country recognize the valiant attempt at escaping from oppression? Next, how about the theologic angle? Consider this: that little boy can now go to church. I assume he's a Roman Catholic as are 99.9% of Cubans and now he can go to Mass without Fidel's sonofabitch red secret police watching who enters and leaves churches. We call ourselves good Christians, good Jews etc. Are we to therefore deny that God in his infinite wisdom had no purpose in allowing that child to LIVE and live FREE while all the others on the raft perished? Is there not a possibility that Elian was SENT HERE by the hand of God almighty to mature in a free land and to later on pay back this country with greatness in a certain field of endeavor? Think about it folks..you think things happen by accident? Thirdly, since the Mariel boatlift was encouraged and since we hardly ever send back illegal immigrants from the Caribbean and Mexico, why then does the State Department have such a "thing" for little Elian's return? Has Reno and Clinton lost their minds making such an issue over a six year old kid? Why not let the kid decide? Who says he's so close to daddy? Who says he can't stand his guardians in Miami and the atmosphere and the toys and games and kids who are now his friends? Although the Miami Cuban population has no right in threatening riots if Elian is forced out of the U.S.A., they still have a good reason to be mad as hell and so does every person in this nation who loves and respects liberty. There's only one person who has gained from this travesty-lousy Castro which is exactly what he seeks. You think he really cares about the welfare of Elian's father or of Elian himself? All Fidel seeks is the same type of embarrassment for the USA that we suffered when he stuffed some of his Mariel boatlift vessels with criminals and dregs of society. By sending that kid back we play right into the hands of the bearded one and we suffer a black eye. Keep Elian here IF HE HIMSELF WANTS TO STAY, with or without poppa. And if he stays, on April 15th take him to a VEC to make him an Extra and we'll all be able to talk to him a day later.
AF2Y,Doc

```
: > You sound like a bleeding heart liberal with a touchy, feely
: > story to whip up emotions.
:
: Actually, I'm a Libertarian trying to get people to use their
: thought processes and wake up before it's too late. When you
: can just shrug off a homicide committed by the police against
: an absolutely innocent citizen, it may be too late to save the
: country from becoming a fascist police state. Next time it may
: be you or me.

But you use the emotional twisting style. Cops make mistakes,
mistakes that are costly. But they are not just running out killing
people at will. And we are still a long way towards becoming a
police state. All that is happening is that we are returning to the
more conservative values we used to have. Unfortunately those
individuals on the edges of society are pushing limits. These individuals
must be reeled in and brought under control. Thus we send more
to prison where we used to use other means of discipline. For
one thing, those on the edges of society have abused the rest
of us, especially when we give them another chance.
```

: > difference."
:
: Want to wager some money on who has the higher IQ?
:
: Our argument was not over abortion. Our argument was over the
: foundations of the scientific method. Scientifically speaking,
: elective abortion is killing a fetus.

True.

: Is it legal to kill a fetus during the third trimester?
: Yes, it is presently perfectly legal.

Currently it is. Roe vs Wade did allow
for regulation of third trimester abortions,
as the proceedure is as harmful as giving
birth. Also abortion is the least regulated
surgical procedure.

: Is it wrong to kill a viable fetus during the third trimester?
: My personal opinion is, yes, it is wrong and I would vote to
: change the law.
:
: See how easy it is to be rational and logical without having
: to resort to obfuscation?

Just as with gun control, there are moderate regulations
that could be applied in order to limit abuse.

John, either you are a troll looking for a fight, or you are badly misinformed. The fact that you compare cellular privacy to listening to police communications on a scanner is absurd.

The Communications Act of 1934 specifically affirms the right of the public to have access to the radio frequency spectrum it owns. That means you and me John.

We are the people who own the spectrum, not the CTIA and not the local police department. The Communications Act re-write of 1998 again reaffirmed public safety comms are in the public domain. Every bill that has been voted on specifically leaves that portion of the spectrum intact for public access. You don't think encryption is practical? You obviously haven't talked to anyone using Astro digital trunked systems, for instance. Is your cellular phone digital? Try to hear it with ANY scanner! You can't, period.

Besides, most law enforcement agencies realize the value of having extra eyes and ears in the scanning public helping them identify and locate criminals. Of course sensitive comms should be secure, but even the military realizes that secure comms are the responsibility, and indeed the burden, of the sender. Making something "illegal" never has, and never will, guarantee that is cease to exist.

Do you think for one minute the ECPA of 1986 and subsequent legislation really gives cellular customers REAL privacy? Of course not, but idiots like Tom Wheeler of the CTIA keep wasting money on ridiculous political solutions to the issue of privacy when that issue could have been solved long ago by spending that money on going digital, which they have done anyway, making all that legislation a moot point!

I agree that phone calls should be private, but telling people they cannot listen in on a scanner is simply avoiding the real issue.

You want privacy? Tell your cellular provider that you won't settle for anything less than full digital! Don't shove the issue back on scanner owners, bitching about it doesn't make it reality!

As far your opposition to listening in on police, it doesn't take a whole lot of smarts to know what every single totalitarian regime has ever done first, limit the public's information. The rest is real easy to figure out. Thank God, your opinion is a minuscule minority, and common sense has prevailed. Let's all hope it continues to do so.

Jon

John,

I said it once, and I'll say it again! WELL DONE!

Also, I'll say it once, and again and again...these newsgroups are loaded with BOOBS, who NEVER have a clue as to what they are talking about.

Let's ban everything, scanners, books, you name it...ban it all.

BTW, I grabbed a SONY as well....HELL OF A DEAL....enjoy yours, and shoot me a line in between blasting the morons here.

Dan :)

Doc,
Sorry, but your argument is based on emotion, not
logic or law. What is the 'line' of responsibility
when one parent dies? If I'm not mistaken, first in
line is the surviving parent, right? (common law)
Another 'law' thats being broken deals with 'kidnapping',
and the U.S. is guilty of that if we do not return the
boy to his father.(federal statute)
Aside from all that, had any 'Moon Pies' lately?

If I've said it once, I've said it a thousand times, if you want to have a
private conversation, keep your waves out of my body!
Any radio waves caught invading my personal human body WILL BECOME MY
PERSONAL PROPERTY! After all it is giving me cancer.
>
> For example, using a scanner to listen to cordless telephone
> conversations is not only a bit sick, it is also the ethical equivalent
> of tapping the victim's telephone directly for no other reason than that

No one tapped your phone, you chose to blast your message out into the open,
not me. Use your wired phone if you want to be private.
And thanks for dropping in to a newsgroup to enlighten the little people.
You can go back to ripping the wings off flys now, if your mama doesn't
catch you!
Are you constipated, or just an asshole?

17. Antenna range program...Anyone????

Newsgroup: rec.radio.amateur.misc

From: Daniel nicholson <dnicholson@socket.net>
Message-ID: <sed278le9121@corp.supernews.com>
Source record: 115300

I am looking for a program that will let me figure general range of an antenna system in the VHF/UHF range based on output power, antenna type, and height of antenna. Anyone know of such an animal? I have ASA for antenna gain and also a program for antenna patterns but I need one for range figures....Trying to see what the best locations for my ham repeaters and remote receivers would be.

Thanks Dan

In the case of guns, a good start would be to enforce the
laws we already have and keep the armed criminals in jail.

Of course they are, just like they did during prohibition. We
never learn. Adults using drugs in the privacy of their own
homes have a perfect right to do so and a large percentage of
the population do just that. Many entertainers and even
politicians smirk and admit doing such when they were young,
but not presently (yeah, right). The war on drugs is a
ploy by the government to take away the individual rights
of the citizens and it is working.

I use drugs every day - caffine to wake me up, St. John's Wort
to stabilize my moods, and scotch to calm me down. Marijuana would
be a lot better for my health than scotch but it seems the government
would rather I have liver problems than smoke a God-given weed.

Dan,
I don't think there is one, too many variables, the
'biggest' being propagation. You might try a 'line of
sight' program(distance to horizon based on ant.height).
That ought to give you a 'ball-park' figure to play
with.
'Doc

Exactly. If I am willing to commit murder and break a law that has the possible penalty of life in prison or death, why would I not also be willing to break 100 laws that lead up to that.

"I was going to shoot the MF in the head but he was on private property so I couldn't get near him."
"I was gonna rob the bank but I didn't have change for the parking meter and couldn't park out front."
"I was going to mow down a crowd of people at the mall with gunfire but I only had hi capacity mags. and my firearm wasn't registered so I couldn't do it."

If violent criminals are released back into the population they have only been delayed from their violent crimes. Not stopped
Sorry a little ot but I had to say it and here seemed like as good a place as any.

The problem is related to the PASCAL compiler used in the design of MP.
If you check with the author -- W6EL - he will be able to assist you. While
the product is no longer marketed, Shel supports registered users.

Yeppers.
I don't know about the 212, but the 242 has two little blue jumbers
(marked 000) on them.
if you snip the one closest to the VFO knob, it'll open it from 136 to
174 fer ya.

Hello,

a fellow Ham is in need of the Mic pin out -- which pin is for what function? He'd like to connect a mic, as well as a TNC, and does not have this information.

If you have the mic pin-out information, and perhaps TNC connection information, would you please email this to me? (Change the email address by removing the right part). I'll forward this info to him (N7ZJJ). We appreciate any help you might be able to offer.

(remember to change my email address when replying direct)

41. ALERT New Law! Stop Bad Laws wrongly attacking Scanners! CTIA, Senate, and House.

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-01 00:00:00 UTC
From: money@corrupts.laws
Message-ID: <38E59D72.CA6E3709@corrupts.laws>
Source record: 115394
Cross-posted to: rec.radio.scanner,alt.radio.scanner,rec.radio.amateur.misc

Here we go again! The Cellular Telecommunications Industry Association (CTIA) strongly supports the Wireless Eavesdropping Protection Act of 2000, introduced March 29, 2000 by U.S. Senators Ron Wyden (Oregon) and Conrad Burns (Montana)of the 106th Congress. It bans scanners regardless of what type of technology is used.

http://thomas.loc.gov/cgi-bin/bdquery/z?d106:s.2326:

S.2326 : A bill to amend the Communications Act of 1934 to strengthen and clarify prohibitions on electronic
eavesdropping, and for other purposes.
Sponsor: Sen Wyden, Ron - Latest Major Action: 3/29/2000 Referred to the Senate Commerce, Science, and Transportation

Here is another older bill(H.R.3489)from the House of the 106th Congress anti-scanner members.
12/14/1999: Referred to the Subcommittee on Telecommunications, Trade, and Consumer Protection.

http://thomas.loc.gov/cgi-bin/bdquery/z?d106:h.r.03489:

And another older anti-scanner bill that has not died (H.R.514).

http://thomas.loc.gov/cgi-bin/bdquery/z?d106:h.r.0514:

I think they have gone nuts. It really is about covering censorship being forced on you by the bogus phrase of eavesdropping protection. Wireless business, money, and lawmakers and you pay the price for airtime and the hidden price of lost freedom. Restricted airwave monitoring laws helped insure the growth Nazi Germany before World War II.

I have done some research with the manufacturers and this is a problem with most keyboards. Change your keyboard. Short of spending more money than the keyboard is worth in filtering and sheilding, you won't be able to fix it. Some hams have mentioned keyboards that are particularly immune. You might want to ask a question about keyboards.

Also, make sure your antenna and ground are good. Up in the attic, you could be too close to even the wooden beams and metal nails to cause your antenna to be mismatched or radiate into nearby metallic objects. You should have a balun on the antenna feedpoint, even if it is just 5 -7 turns about 5" in diameter, do you? Do you have a good RF ground? A wire running 30 feet to the ground isn't enough if you have that far to go to ground. You could try taking some coax at 1/4 wave for 10 meters and run that off your transmitter or tuner ground point. Check this out in the ARRL Handbook. You are basically making an RF stub. That is a start. :)

(from www.artbell.com) 3/31/2000

The Announcement:

"In order that you all understand the gravity of the announcement I'm about to make, it's going to be necessary for me to repeat some very painful events that have occured to my family over the past several years.

On May 16th of the year 1997, my son, Art Bell IV, was kidnapped, transported across state lines and raped by a substitute teacher from his own high school. The assailant was HIV positive. My son was a minor. He was only 16 years old at the time.

The teacher involved was tried, convicted and is now serving a life sentence. My son though, as you might imagine, was sent into a psychological tailspin which continues to this very day. We are trying very very hard to help him recover and lead a more normal life. Some positive events have occurred toward that end and your prayers are welcome. Please keep them coming.

While the police work and the trial of my son's assailant were underway, difficult as it was for me to continue my daily radio programs, I did so. Because my son was a minor at the time of the crime, the records were sealed, his name was not made public, something our society does to protect its own, its future, its young people.

As our family was working through this trauma in private, an event beyond all bounds of decency and humanity occurred. On December 9th of 1997, just a few months after my son's ordeal, my own began. Ted Gunderson, a retired FBI agent, along with David Hinkson and the assistance of others, aired a broadcast which - incredibly, absolutely incredibly - accused me of committing the very same crime my son had suffered, child molestation. The program further stated that I had paid to cover up an indictment in Nye County, Nevada, my home. It further urged listeners to call me "on air" and ask if I had been indicted. Of course, these accusations were entirely false. But, never the less the calls poured into my open line unscreened program, asking if this was true. I had no choice but to block out all these calls and keep my silence for fear of my son's situation becoming public. This broadcast was made on WWCR, world wide shortwave radio, in Nashville, Tennessee. This station has been described by newpapers and civic minded organizations as one of the country's leading broadcasters of hate radio. The individuals, WWCR and its sister-station WNQM, have allowed to broadcast over the airwaves, include a man who wrote a book entitled "The Hitler We Loved And Why" and another man who stated over the airwaves that Jews are the children of Satan and that African-Americans are "mud people".

In addition to broadcasting these proponents of hate and violence, this radio station has consciously decided not to spend money on a delay switch, not to conduct a careful background check of the people it places on the air and to allow individuals to say almost anything they want in foreign languages without having staff on duty who can even understand what they are saying.

In my opinion, WWCR is one of the most irresponsible stations permitted to broadcast over the airwaves of this country.

Now the fallout from that broadcast has been unbelievable. Besides the unrelenting accusatory calls, others repeated this false rumor as though it was fact, resulting in several related lawsuits. Many of you may have heard my defense played out on the airwaves and the Internet.

No matter how hard I have tried to set the record straight, my torment and that of my family continues. Recently, a radio host in Toronto, Canada opened his morning show with the words "I am Art Bell and I molest little children". All of this sent me into a psychological tailspin. I felt I had been dealt a blow I might not recover from. Still I continued my nightly broadcasts as best I could.

In October of 1998, my son came to a crisis point, a situation so critical that nothing but my full-time attention would help. So, on that fateful day, October 13th of 1998, I resigned on air with no intention of returning. But thanks to the efforts of my network, my best friend Alan Corbeth, Kraig Kitchin (CEO of Premiere Networks) and Randy Micheals [CEO of Clear Channel], I was able to return, but the pressure of having to defend myself against baseless, vile claims that I was a child molester eventually forced me to reduce my on air hours. Why the individuals behind the December 9, 1997 broadcast by WWCR decided to make such a patently false and harmful broadcast remains for the courts to decide. A major moment in this litigation is going to occur April 28th in Nashville, Tennessee. If justice prevails, a trial, perhaps a protracted one, may follow. It would be untrue for me to say this has not affected my air work, it has. It would be unfair to all of you, not to give you my full-time best. I can no longer do that. The reality that after suffering the fate of my son's own molestation, I now stand destined to be tainted for life as a child molester, has proven simply too much to bear. God knows, I have tried.

For my Son, I pray that somehow his wounds will heal, his mind's troubles fade into something of a normal life. For myself an ordeal looms ahead to clear my good name of accusations I committed a crime, committed against my own son. Nobody ever said life would be fair, only to be lived as the hand is dealt to you. For all the years of joy my work has provided, I want to thank all of you and whatever creative force allowed it.

I have decided to retire from the broadcast business at the end of this month, my last show to be April 26, 2000.

I will not do any media interviews on this subject. I have already said more than any private person would have said, a private world I now look forward to returning to. Any further questions should be addressed to my attorney

Gerard Fox at the law firm of Fox, Siegler & Spillane in Los Angeles at
(310) 229-9300."

-- Art Bell

47. FCC Reverses in Partial Update

Looks like complaints work. Or don't -- depending on your view of things. News bulletin is out regarding the latest FCC changes to the Amateur licensing.

Are you ready for your retesting for code?

I've listed the latest news at http://hfradio.org - right on the main page you'll find the link to the latest on the FCC decision.

Guess I have to brush up now.

Who cares if it is a hobby or a service? I do not participate in any service aspect and have had my license revoked in 30 years. I guess the FCC must see it as a hobby. Besides other services have been eating away at Ham radio spectrum for years to provide their services for a fee to the public.

Let's face reality of the two basic truths about mankinds endevors:

1. MONEY TALK AND BS WALKS

2. "THE GOLDEN RULE" - He who has the gold makes the rules

So who cares about all the inane arguements any way as the FCC and people with bucks will do what they want without everyone elses consent!

This law smells fishy. If an industry association supports this kind of bill,
then of course corporations may have bribed those two senators. This is also what
happened to the Digital Millennium Copyright Act, the Motion Picture Association
of America bribed Congress to pass this law. We are now just feeling the effects
of this law.

In both laws, there is the proposed "intention" of protecting themselves from the evil
"hackers". In reality, they just can't get enough money, and want to ensure that
everyone goes through them first for communications. They're probably already
making lots of money, but feel like they can't compete with a hobby!

We need to be more involved in government. Everyone should know what laws are
in Congress and have plain-English descriptions of them.

I suggest a group which mobilizes for a protest every time a certain law comes out.
Maybe about five to ten thousand people, protesting at several US government buildings
for as long as necessary until the general population gets what is going on and decides
to take action themselves.

Subject: Great DX conditions or "don't look now but you S-units are showing"

Did anyone else catch the fantastic band opening last night? I could not sleep so I was up late and was tuning
around 20 meters when I heard the clock strike midnight. Suddenly the band really came to life with some great
DX stuff. First I heard Romeo Germany 8 Uniform really banging in from somewhere in the south Atlantic with a
big pile-up on the frequency. I picked a spot and dropped in my call. "Mike India Lima go ahead". "Germany 8
Uniform, you are 70 over 9, QSL info please." "Not to worry India Lima, my card 63% to you via burro."
"Aw-Right, got him!"
Next Papa Hotel 0 Nancy Echo gave me a call on CW running a modified HW-8 at a KW output with a re-worked
cash register as a keyboard keyer. Maybe try a little more CW action. Called CQ on CW and answered by BIG
CARRIER, weak audio from Victor 0 India Charlie Echo. "Your audio is very week, OM, try turning up the gain."
Found out the audio section of his transmitter was not working and he was modulating by screaming at the final
tubes. Swung the beam further south and there was Charlie 0 Alpha X-Ray in the Feedline Islands. Gave him a
call. "Kilo 5 Mike India Lima you are pinning my S meter, do not transmit again I am afraid you may damage my
rig." "Roger roger Alpha X-ray, what is QSL info please?" He didn't reply. OK, lets see what's going on in
the Pacific. Swing the beam on around. Wow! there is Fox Ocean 0 Lima running 80 over 9! "Fox Ocean 0 Lima
this is Kilo 5 Mike India Lima you are 80 over 9, what are you running?" "Ok Mike India Lima, rig here is a
converted cordless phone running 1.63 watts using lamp cord feedline to a chicken wire fence." Now this is
great, lets see what is going down on the European front. Swing the ole beam on around past north. Man listen
to those signals! Better catch this one. Dropped in my call. "Mike India Lima go ahead." "Roger roger,
Germany 0 Tango Charlie Hotel Alpha, you are 62.3 db over S9, Q5 copy. What is my report?" "Mike India Lima,
you are minus S8, can only copy on negative voice peaks, try again." "MINUS S8!!, WHADDYAMEAN MINUSE S8? Im
running 14 bazillion watts to a 42 1/2 element Thunder Stick at 163.42

feet!! Minus S8 my Aunt Fanny!" Wait a
minute, what's that call again? G0TCHA? What's today? Let's

see that calendar. Aw rats!

His problem is that he will lose a lot of his puff rights when we all become 5 WPM Extras.

Funny how none of the competent Extras who I know personally are upset about this -- one said simply "if I need to prove anything, I'll just send the phone book at 35 WPM."

Jeffrey probably isn't sure that he can prove competence at 20 WPM (much less high speeds), so his only "proof of skill" is that Extra ticket.

58. Art Bell blasting and suing WWCR

> Loved And Why" and another man who stated over the airwaves that Jews are
> the children of Satan and that African-Americans are "mud people".

That's quite a shocker about Art Bell but he hit the nail on the head. WWCR
is nothing but filth hate radio, period. But of course we must appreciate
how clever they are besides being dangerous. It works like this:they call
themselves World Wide CHRISTIAN Radio for a reason-by covering themselves in
religious vestments and pretending to be elders, they automatically garner
support where otherwise they wouldn't. Christians are proud of being
Christian; it's quite normal therefore to many listeners, any hatemongering
piece of machinery would be accepted if the word Christian is in
association. WWCR is no more Christian than Adolf Hitler who seems to be
their hero. Timothy McVeigh is Christian so what can be bad about him
despite his killing all those people in the O.K.C. Murrah building? Isn't
David Duke one too? And how about all white extremists who might parade
around holding crosses or wearing them silk screened into T shirts? And the
ones burning down Black churches and so forth and so on? How bad can these
people be when eveyyone knows they're Christians? The truth is that WWCR and
everyone who believes the garbage they put out in the name of Christ are the
ANTITHESIS of what Christianty stands for. All a filthmongering WWCR
broadcaster has to do is to come out with something like, "Jesus told me to
tell everyone about Art Bell. The Lord demanded it..." and all the rest of
that bullbleep. The gullible but otherwise well meaning will be easily led
into believing anything hateful said by these WWCR cronies. They will take
slander to be fact. Based upon what I myself heard, they will believe that
Bill Clinton is a communist and that we don't have to pay any income taxes
and that Hilary had multiple affairs and that foreign troops are here to
slaughter us Americans and that a One World Government is going to take us
over and all the rest of the crap that innundates the ears of listeners in
an attempt at making them lose confidence in America, her pluralism,
diversity and greatness. WWCR plays on the fact that lies repeated will
catch on especially when painted on a canvas portraying Jesus Christ.
Art Bell is suing WWCR and I hope he takes them to the cleaners. GO ART GO!

Boyd,
Yes, an external tuner can be used with a radio with
an internal tuner. There may be an advantage at times,
most internal tuners don't have much 'matching' range.
Don't try using both at the same time, just 'confuses'
the internal tuner, serves no useful pupose.
'Doc

: down in a hail of bullets. The police said, Oops, sorry, wrong address.

You sound like a bleeding heart liberal with a touchy, feely
story to whip up emotions. Yes the cops do make mistakes.
And the family sues for a shit load of money, more than that
man could have made in a lifetime.

We are dealing with the results of liberalism (over a 30 year
period). Society is over reacting nowadays. We used to give
people a break, a second chance. But the extreme edges of
society have pushed the limits so hard that people are reacting
by being hardnosed. In a few years it will come down. We
just need to rein in the extremists.

> II

This law is bad and there are already existing laws, which should be repealed, that block scanners. It does add to the prevention of anybody's American right to have unblocked scanners, the right available to people in other countries.

I know of no scanner with unblocked frequencies that can eavesdrop on my digital cellular or my PCS and do not see future products for non-government average Americans that can possibly do so.

This bill should be argued because Public-Safety also uses digital specialized mobile radio services and paging services for emergency and routine communications. Government must remain open to the public. They can close government more by pouring out these communication laws.

S. 2326
First, it would more then expand the definition of the frequencies that may not be scanned to include digital Personal Communications Service (PCS) frequencies as well as cellular ones. Second, the bill would strengthen that it is just as illegal to modify scanners as it is to manufacture or import unblocked scanners.

Excerpts of SEC. 2.
(a) Prohibition on Modification: modify any such device, equipment, or system in any manner
that causes such device, equipment, or system to fail to comply with such regulations.

(1) The Commission shall prescribe regulations, and review and revise such regulations as
necessary in response to subsequent changes in technology or behavior, denying equipment authorization for any scanning receiver that is capable of--

(A) receiving transmissions in the frequencies that are allocated to the domestic cellular radio telecommunications service or the
personal communications service;

(B) readily being altered to receive transmissions in such frequencies;

(C) being equipped with decoders that--

(i) convert digital specialized mobile radio service transmissions to analog voice audio; or

(ii) convert paging service transmissions to alphanumeric text; or

(2) The Commission shall, with respect to scanning receivers capable of receiving transmissions in frequencies that are used by commercial mobile services and that are shared by public safety users, examine methods, and may prescribe such regulations as may be necessary.

(3) Tampering prevention: 'capable of readily being altered' to require scanning receivers to be manufactured in a manner that effectively precludes alteration of equipment features and functions.

(c) Implementing Regulations: Not later than 90 days after the date of the enactment of this Act, the Federal
Communications Commission shall prescribe amendments to its regulations for the purposes of implementing the amendments
made by this section.

SEC. 3. UNAUTHORIZED INTERCEPTION OR PUBLICATION OF COMMUNICATIONS.

The 106th Congress Bills H.R.3489 and H.R.514 are very similar to S.2326.

We that understand the wireless radio technologies know better than what Congress has to tell you about it.

Have a stand alone terminal for sale. Sends and receives CW, RTTY, and who knows what else. Includes the manual (not sure if it is original or copy). Haven't tried the unit out yet but cosmetically it is in excellent condition. Part of an estate sale, all the other gear worked so I'm assuming this will too. All you need is an external source of 12vdc, and a composite monitor. Both of these are readily available at hamfests or surplus houses quite reasonably ($5-20). This is a stand alone unit and does not require one to tie up a computer. Asking $75 which is a shipped price, CONUS only.

Thanks for reading the ad and 73.

Evan

RADIO TALK SHOW HOST ART BELL RESIGNS, BLASTS WWCR FOR BROADCAST

W8MMQ - Radio talk show host and amateur radio operator Art Bell has said that he is leaving radio broadcasting. Citing certain family problems, Bell announced his retirement on his Coast to Coast AM radio show, heard in over 400 markets around the country.

Art Bell: "In order that you all understand the gravity of the announcement I'm about to make, it's going to be necessary for me to repeat some very painful events that have occured to my family over the past several years.

On May 16th of the year 1997, my son, Art Bell IV, was kidnapped, transported across state lines and raped by a substitute teacher from his own high school. The assailant was HIV positive. My son was a minor. He was only 16 years old at the time.

The teacher involved was tried, convicted and is now serving a life sentence. My son though, as you might imagine, was sent into a psychological tailspin which continues to this very day. We are trying very very hard to help him recover and lead a more normal life. Some positive events have occurred toward that end and your prayers are welcome. Please keep them coming.

While the police work and the trial of my son's assailant were underway, difficult as it was for me to continue my daily radio programs, I did so. Because my son was a minor at the time of the crime, the records were sealed, his name was not made public, something our society does to protect its own, its future, its young people.

As our family was working through this trauma in private, an event beyond all bounds of decency and humanity occurred. On December 9th of 1997, just a few months after my son's ordeal, my own began. Ted Gunderson, a retired FBI agent, along with David Hinkson and the assistance of others, aired a broadcast which - incredibly, absolutely incredibly - accused me of committing the very same crime my son had suffered, child molestation. The program further stated that I had paid to cover up an indictment in Nye County, Nevada, my home. It further urged listeners to call me "on air" and ask if I had been indicted. Of course, these accusations were entirely false. But, never the less the calls poured into my open line unscreened program, asking if this was true. I had no choice but to block out all these calls and keep my silence for fear of my son's situation becoming public.

This broadcast was made on WWCR, world wide shortwave radio, in Nashville, Tennessee. This station has been described by newpapers and civic minded organizations as one of the country's leading broadcasters of hate radio. The individuals, WWCR and its sister-station WNQM, have allowed to broadcast over the airwaves, include a man who wrote a book entitled "The Hitler We Loved And Why" and another man who stated over the airwaves that Jews are the children of Satan and that African-Americans are "mud people".

In addition to broadcasting these proponents of hate and violence, this radio station has consciously decided not to spend money on a delay switch, not to conduct a careful background check of the people it places on the air and to allow individuals to say almost anything they want in foreign languages without having staff on duty who can even understand what they are saying.

In my opinion, WWCR is one of the most irresponsible stations permitted to broadcast over the airwaves of this country.

Now the fallout from that broadcast has been unbelievable. Besides the unrelenting accusatory calls, others repeated this false rumor as though it was fact, resulting in several related lawsuits. Many of you may have heard my defense played out on the airwaves and the Internet.

No matter how hard I have tried to set the record straight, my torment and that of my family continues. Recently, a radio host in Toronto, Canada opened his morning show with the words "I am Art Bell and I molest little children". All of this sent me into a psychological tailspin. I felt I had been dealt a blow I might not recover from. Still I continued my nightly broadcasts as best I could.

In October of 1998, my son came to a crisis point, a situation so critical that nothing but my full-time attention would help. So, on that fateful day, October 13th of 1998, I resigned on air with no intention of returning. But thanks to the efforts of my network, my best friend Alan Corbeth, Kraig Kitchin (CEO of Premiere Networks) and Randy Micheals [CEO of Clear Channel], I was able to return, but the pressure of having to defend myself against baseless, vile claims that I was a child molester eventually forced me to reduce my on air hours. Why the individuals behind the December 9, 1997 broadcast by WWCR decided to make such a patently false and harmful broadcast remains for the courts to decide. A major moment in this litigation is going to occur April 28th in Nashville, Tennessee. If justice prevails, a trial, perhaps a protracted one, may follow. It would be untrue for me to say this has not affected my air work, it has. It would be unfair to all of you, not to give you my full-time best. I can no longer do that. The reality that after suffering the fate of my son's own molestation, I now stand destined to be tainted for life as a child molester, has proven simply too much to bear. God knows, I have tried.

For my Son, I pray that somehow his wounds will heal, his mind's troubles fade into something of a normal life. For myself an ordeal looms ahead to clear my good name of accusations I committed a crime, committed against my own son. Nobody ever said life would be fair, only to be lived as the hand

is dealt to you. For all the years of joy my work has provided, I want to thank all of you and whatever creative force allowed it.

I have decided to retire from the broadcast business at the end of this month, my last show to be April 26, 2000.

I will not do any media interviews on this subject. I have already said more than any private person would have said, a private world I now look forward to returning to. Any further questions should be addressed to my attorney Gerard Fox at the law firm of Fox, Siegler & Spillane in Los Angeles at (310) 229-9300."

Art Bell holds the amateur radio callsign, W6OBB, and has often been heard each night after his show on 3820 or 3830-kHz.

HAMS PITCH IN AS TORNADOES RAKE DOWNTOWN FORT WORTH

ARRL - Dozens of Amateur Radio volunteers were on duty this week in the Fort Worth, Texas, area in the wake of tornadoes Tuesday night that claimed several lives and left downtown Fort Worth a shambles.

The twisters hit around suppertime, during the tail end of the afternoon rush hour. Eyewitness accounts said it looked like a bomb had exploded, shattering glass in high-rise buildings and leaving debris everywhere. With power out to thousands of customers in a wide area and telephone service -- including cellular -- interrupted, Amateur Radio has been able to fill its more traditional role of providing emergency and backup communication. Hams reportedly have been assisting local and emergency officials in tracking damage resulting from the severe weather as well as helping to coordinate shelters.

Dallas County RACES Officer Johnny Davis, K5JD, said amateurs were handling traffic on VHF and UHF repeaters as well as on simplex frequencies. Davis said he expected that amateurs could be involved in the tornado for several more days. "In the pictures I saw there are wires everywhere, there's debris, it's just mass destruction in some areas," he said.

SKYWARN nets in Tarrant and Dallas counties were activated in advance of the storms, and the National Weather Service already had warned of the possibility of tornadoes. Fort Worth RACES reported a tornado on the ground at 4th and 6th streets in downtown Fort Worth at 6:18 PM Central Time.

SKYWARN member Rick Moran, KC5STX, said amateur spotter reports were able to add an extra 10 to 15 minutes warning for those in the path of the tornadoes. As described it, the tornado "raced through Fort Worth proper, piling cars like cord wood and sucking windows from high-rise office towers." Moran said the city was plunged into darkness "as hundreds of power transformers popped in the path of the storm." For a while, it appeared as though Dallas might also be hit. A twister also caused extensive damage in Arlington, Moran said.

Denton County SKYWARN Coordinator George Lindley, WA5HKW, said Fort Worth RACES requested its assistance with communications after the twisters had

blasted through the city. Ten operators took an emergency communications van to Fort Worth and assisted for several hours in the search for missing or unaccounted for people, using the van as a command post.

SATERN Southern Coordinator Jerry Jennison, N5OKQ, from San Angelo, reports that the Salvation Army had set up two temporary shelters, and the City of Fort Worth and the Red Cross have set up one shelter apiece to house those left homeless or without a place to go. Downtown Fort Worth was closed off to the public, and several buildings there were said to have been heavily damaged -- possibly beyond repair. Hams have been helping to provide communication at shelter sites and are expected to be used during the damage assessment.

From the ARRL Letter, March 31, 2000

THE NATIONAL CONTEST JOURNAL LAUNCHES NEW WEB SITE

W8MMQ - The National Contest Journal has launched a new web site, featuring information and articles on current and upcoming amateur radio contests. The web site also has an extensive 12-month Contest Calendar, compiled by Bruce, WA7BNM.

Be sure to visit the site at http://www.ncjweb.com/. The National Contest Journal is published bi-monthly by the American Radio Relay League.

THE WEEKLY DX REPORT

The IOTA operation from Abokwa Island is confirmed as taking place from the 1st until the 6th of April, but the operators may leave the island on the 5th if there are no more requests for QSOs. Please do not attempt multi-band QSOs during the first two days. The callsign has not yet been announced, but the QSL routes are as follows: direct cards should go to G3OCA, whose address is correct in the RSGB Yearbook 2000: direct Russian cards should be sent to UA4SKW; bureau cards from all stations should be sent to G3OCA.

Denise, F6WHU, is active until the 12th of April as FO0HWU from Tubuai Island in the Australes. She operates mostly CW, with some RTTY. A contact with her counts as OC-152 towards the RSGB Islands on the Air awards programme.

RTTY enthusiasts will already be looking for Hans, DL7CM, who is signing TA4/DL7CM from Turkey until the 4th of April.

DF8AN is touring Africa until the 12th of April, and will be using 100 Watts of CW. Between the 3rd and 5th of April he will operate from the Ivory Coast, prefix TU, and from Togo as 5V7MN between the 6th and 12th of April. QSL direct to his home call, or via the bureau.

The Orkney Amateur Radio Club are activating the Orkney island of Copinsay this weekend. The callsign will be GB5RO and operation will be on all bands. It is expected that the station will be on air from lunchtime on Saturday, probably on 40 metres. 80-metre operation on 3,772kHz will be in the evenings, or as propagation permits. Copinsay counts as OR19 for the Islands of Scotland Award, and as EU-009 for IOTA. The operation is heavily

weather-dependent. If local inclement weather makes the sea trip impossible on the 1st of April, the expedition will be re-scheduled for each successive weekend until Man triumphs over Nature!

From RSGB News and 425 DX News

UPCOMING AMATEUR RADIO CONTESTS AND EVENTS

Visit the ARRL Contest Calendar at http://www.arrl.org/contests/ for more contest information.

The Japan International DX Contest, CW high-band portion, will run from 2300-Z April 7 until 2300-Z April 9. Work JAs only. High bands are 20, 15, and 10. Operate no more than 30 hours (JAs operate full 48).

The VHF/UHF Spring Sprints, sponsored by the East Tennessee DX Association, 144-MHz portion, will run from 7 PM to 11 PM, local time, on April 10.

AND ... IN CLOSING

Thanks for reading this edition of the W8MMQ Wire! This newsletter is produced and distributed each week by Dan, W8MMQ, and is available free to all radio amateurs.

One of the "common" methods of tracking a ground signal from a
satellite is to observe the signal from a satellite tasked in a polar
orbit. These craft are in an orbit that brings them around the
earth several (many) times a day. There are also several birds
up there. Any single satellite can get "line fix" on a station by
using the signal and the point the dopler shift "transitions".
The station would be on one side or the other of the sat along the
line. A second pass or a different bird would give a different line.
Where the lines cross - "X marks the spot".

But - does the FCC have a hook into such assets in orbit?
Probably not.

Best regards
Gil Jones

Actually, I'm a Libertarian trying to get people to use their thought processes and wake up before it's too late. When you can just shrug off a homicide committed by the police against an absolutely innocent citizen, it may be too late to save the country from becoming a fascist police state. Next time it may be you or me.

Keep in mind that being Christian and claiming to be Christian can be
two different things. A real Christian would never dream of doing some
of the things some people do, like McVeigh, who claims to be Christian.

The fact is, if anything's banned criminals and anyone else desperate enough will still be able to gain access to that particular object. This has been proven many times already.

This law would hurt many people, including sites that provide live streaming of the police bands etc. If passed, this would be one the many steps this country is taking in order to make itself a socialist nation.

Stuff like this makes me recall stories like Animal Farm and Farenheit 451, and I think the future of America is at stake.

Jim,
Not going to be much help mounting the radios, but
may have a few things that can help you. Keep all
leads (power/ant) away from the computer module! No
idea where it is. Bumper mounting a 6M antenna is like
a fresh water fish...crappy. A 'hood' mount/roof mount
would be best.
If you have power windows or mirrors, can you get to
the 'boot' covering the wiring running from the door
to the car body? I found an access point there on my
car (a real pain, but no new holes). Do all the usual
by-passing, grounding, etc. And if you decide to use
the luggage rack for a mointing point, check to see if
it's grounded... some aren't. Thats all the advice I
can think of...that you probably already know anyway.
'Doc

SBCmusic,
I'm aware of two kinds of 'window' antennas. One is
a 'feed-through', a stick on antenna on one side, a 'pad'
on the inside with coax connector. The other is a glass
mounted antenna, conducting tape stuck on the window, a
connection at the feed point.
Bad side:
The feed-through antenna is usually a 1/4 at lower VHF
freqs, and does have some losses. The feed through acts
like a capacitor, doesn't alwasy work well depending on
design/quality.
The 'stick-on' antenna tends to 'un-stick'. Also, you
have to be careful applying the tape, tears easily.
Good side:
No holes. Easily hidden. Keeps wife happy(sort of).

"Ain't no substitute for a big, ugly antenna"
'Doc

: >
: > One of the big questions was why so many Germans supported
: > Hitler.
:
: For many the simple answer was fear. In Nazi Germany a single critical
: remark being over-heard could earn you a one way ticket to Belsen.

And your neighbor would turn you in. Look at the number
of scholars asking why the average German was supportive
of the Nazis? The German public liked Hitler. Hitler even
had a huge support in the intellectual community. For the
most part Hitler, like Clinton, tried to appeal to the establishment
moderates of his society. His propagandists even were
trying to make him out a savior (their were paintings of him
looking like Christ).

: > In truth, Hitler was a step from what they had experienced
: > under the socialists.
:
: Pardon? Could you rephrase that so it makes some sense?
```

The previous administration, before Hitler, was very socialist.
And very restrictive. Hitler was actually considered to be
liberating.

: > Germany, even today, is a society that is very homogenous.
:
: Not really, Germany is changing just like everywhere else. With so many
: "gastarbeiter" it is impossible for Germany to remain homogenous.

Even more so in France and the UK. It is a very big
arguement in Europe.

: > The little old ladies in every neighborhood keep a
: > sharp eye out for anyone who violates the norms. It is one reason
: > that Germany has fewer cops than here. They have a huge force
: > of old ladies.
:
: And you have a huge force of bullshit!

I have lived in Europe, mostly Germany. I have
been there 9 times. I assume that you have lived
there to speak with such authority?

Try washing your car on Sunday. Or not cleaning
your steps on Saturday. You will hear about it. If
you do not comply then they call the cops.

On average, I saw a politezi once a week. I see cops
here daily. When I came back, the US seemed like a
police state compared to Germany.

Hey George,
I seem to remember a certain ham who went unidentified for years. He yelled "Herby baby number 1" and other things. He went by the name "Polly". Should Polly have been banished forever? Don't throw rocks in a glass house you hypocrite.

I have used a glass mount antenna for years on my previous vehicle and for local repeater work on 2 meters and 440 it was just dandy. I put it on a tinted window and was told that that could be a problem because the tinting is some kind of metallic substance and could interfere with the capacitive coupling. As far as I know this was no problem but who knows how much more power could have been put out if the window were non tinted. I should also say that a friend of mine put his antenna to close to the rear window windshield wiper and keying up the transmitter turned on the wiper. This is of course not an issue of the type of mount but still something to consider when figuring antenna location.

: In the case of guns, a good start would be to enforce the
: laws we already have and keep the armed criminals in jail.
```

No disagreement here. In fact if you lose your gun rights (felon, mental illness, misdemeanor domestic battery, what ever else they bring up....) should also result in the lost of voting rights, the right to be a professional (teacher, lawyer, CPA, doctor, etc) or work for the government. In other words if you can not be trusted with gun then you should not be trusted in any other area. That would put a real hurt on the democrats plans (creeping restrictions on gun ownership would then hurt them at the polls).

: > But you use the emotional twisting style. Cops make mistakes,
: > mistakes that are costly. But they are not just running out killing
: > people at will.
:
: Of course they are, just like they did during prohibition. We
: never learn. Adults using drugs in the privacy of their own
: homes have a perfect right to do so and a large percentage of
: the population do just that. Many entertainers and even
: politicians smirk and admit doing such when they were young,
: but not presently (yeah, right). The war on drugs is a
: ploy by the government to take away the individual rights
: of the citizens and it is working.

That is a bit paranoid. At it height, illegal drug usage
only effected 14% of the population and that was in
the late '70s. Now it is only 6% of all Americans.

Why we are seeing a contraction of civil liberties is that
we increased those liberties in the '70s. Now the same
liberals who pushed those rights are rethinking their positions.

Do you remember how much power J Edger Hoover had?
Then those powers were removed by congress when he
died. Our government does not have as much power as
J Edger had.

: I use drugs every day - caffine to wake me up, St. John's Wort
: to stabilize my moods, and scotch to calm me down. Marijuana would
: be a lot better for my health than scotch but it seems the government
: would rather I have liver problems than smoke a God-given weed.

In proper usage, pot might be as useful as St. John's Wort. However
since we are now so urbanized (the rural population is highly urbanized
as well), there isn't a lot of good sense out there. I would not trust a
lot of suburban apartment dwellers with even a kerosene heater!! Let
alone a gun.

We really need to return to the military draft so that we can
teach these idiots what any farm boy grew up knowing.

:
: Hmmmmmm, somebody forgot to tell the German Jewish citizens.

Most of us who are for gun rights seem to forget the intercity
blacks as well.

We focus on German Jews, forgetting that Hitler increased
gun rights for Germans over what the socialist government
before him had given the German people.

Not that I am even saying that Hitler was right, but it is the
wrong example for what you are trying to prove. Hitler was
not oppressive to the average German.

Speaking purely as a historian, BULLSHIT!!!

Hitler's regime was oppressive towards the average German. Anyone who stepped out of line risked a trip to the People's Courts and a one way ticket to the guillotine.

I generally agree with you Doc, but, no this time. What is wrong with
someone going HOME?
If Cuba sends all of the kid's classmates here, are we morally obligated to
keep them here too?
Like him or not, Fidel is a genius at putting the US in situations that
expose our hypocracy
when it is based only upon emotions.
Clinton is right to opt us out of his game. Nothing wrong with letting the
kid go HOME.
A father son-bond takes precedence over political/economic systems.

If it were not for WWCR, how would we find out about magnetic healing and herbology that
cures all diseases including cancer? How would we learn about how not to pay taxes by filing
zero returns? How would we know about the miracle cure-all silver colloid solutions that cure
all ailments? How would we obtain the wisdom of brother stairway-to-heaven and pastor pete
peters who are the only ones who know the real meaning of the bible and hate they find concealed
between the lines? I find WWCR as entertaining as the X-files/. There is excellent fiction content
in its programming that appeals to the animal instinct that dwells deep inside of humanity.

111. Ham radio in new movie

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-02 00:00:00 UTC
From: Curt Phillips W4CP <cphillips@engineer.com>
Message-ID: <8c6iku$5tn$1@nnrp1.deja.com>
Source record: 115333

In case you missed the mention in the ARRL Letter or QST:

Title: Frequency

A young man discovers that his ham radio set can reach 30 years into
the past - to communicate with his father, a firefighter who died in an
accident. The man desperately tries to find a way to change history and
save his father's life.

Stars: Dennis Quaid

Release Date: April 28th, 2000

Sneak Preview: Saturday, April 15th, 2000.

MPAA Rating: PG-13

Premise: When he receives a ham radio message from a fireman during a
freak sunspot, a police officer (Caviezel) soon realizes that he is
talking to his father (Quaid) back in 1969... before he died. The two
strike up a quick friendship, as you might expect, and soon become
partners across time to see if they can change history... but soon find
that as things change, well... things change, including the
endangerment of his [Quaid's] wife (Mitchell)...

Filming Location: Filming began in Toronto on May 3rd, 1999.

Genre: Thriller

FROM THE ARRL LETTER:
Ham moviegoers report seeing previews for the new movie Frequency,
starring Dennis Quaid and directed by Gregory Hoblit, that's set for an
April release. The ARRL was consulted in the interests of accuracy and
came up with an unused W2 call sign for the movie's protagonist to use.
The movie also recently got a plug on Entertainment Tonight.

I have to throw in with you here. The post was far too literate for
Lloyd. First of all it was more than 3 lines... Then, can you imagine
Lloyd using "malcontents?" Or spelling "libeling" with only 2 "l"s? He
hasn't yet.

And, since it wasn't full of RG8 stair nonsense, or "the sky is falling"
nonsense, it wasn't cut-and-pasted from someone else.

Source record: 115338

This %)&*% has got to stop. Below is a a transcript of a short article I read in the American Guardian. It shows the mentality and just how far they'll go to paint Americans as "the problem."

Clinton-Gore Launch Gun Owner profiling?
The never ending stigmatization of gun owners by the Clinton-Gore Administration has now found an outlet in the "FBI Law Enforcement Bulletin." In an article entitled "Vehicle Stops Involving Extremist Group members" in the December issue, law enforcement officers are cautioned when making traffic stops that the display of "pro-gun" bumper stickers is a sign of possible extremist group involvement. Officers are also cautioned about the display of the Bible and the Constitution.
The fact that Bill Clinton and Al Gore could consider citizens to be extremists when they proudly declare their exercise of a constitutional right is -- after the past seven years -- not shocking. But is a powerful message about why millions of "American gun owners" MUST make their voices heard on Election Day 2000.

Sounds great. Did you say the sneak preview's on April 15th? Wonderful. On
the way home, everyone will drop in to their friendly VECs and walk out an
Extra. Then they can drive over to the closest truckstop and pick up a brand
new shiny Kenwood transceiver and start asking for "radio checks." which
will put even more emphasis into what a great movie it was.

:
: Speaking purely as a historian, BULLSHIT!!!
:
: Hitler's regime was oppressive towards the average German. Anyone who
: stepped out of line risked a trip to the People's Courts and a one way
: ticket to the guillotine.

One of the big questions was why so many Germans supported
Hitler. In truth, Hitler was a step from what they had experienced
under the socialists. Germany, even today, is a society that is very
homogenous. The little old ladies in every neighborhood keep a
sharp eye out for anyone who violates the norms. It is one reason
that Germany has fewer cops than here. They have a huge force
of old ladies.

Looks like idiot John is starting to squirm now. This taken from the new
Goodfellow puppet webpage:
Sunday Scandal: I received this email today; Does anybody know what idiot
wrote this letter?????????????????????? It's a
good thing I write this page at a second grade level so the idiot element
of our readership can understand it.....Dimmy O' in
particular.can you imagine this idiot is actually walking the
streets....Check his web page..if I looked this stupid I wouldn't post
it for the world to see!!!! By the way-I've never jammed..only uneducated
nitwits without a life do stuff like that..I don't fall in
that category...my xyl keeps me to busy...

The guillty dog always barks. So there you have it, K1TP, Jon Cunningham,
New Goodfellow lap dog, jammer, and propaganda boy. They always recruit the
idiots!

jonesgil@usa.net writes:
>Then how come ELT signals are located with a mile or
>so usually after two sat passes?

Also, the Transit satellite navigation system gave a position fix
within a few km (I believe) after observing a single pass of a single
satellite.

But then, none of these systems actualy takes "directional fixes" from
the satellite - they observe the change in Doppler shift over time
as the satellite moves along its orbit.

So perhaps Bill is technically correct, in that directional fixes
are not useful for this, but he's commenting on a technique that
simply isn't used.

Cross-posted to: alt.ham-radio.fm,alt.ham-radio.mods,alt.ham-radio.vhf-uhf,rec.radio.amateur.misc,rec.radio.amateur.equipment

I recently obtained a used FT-470 - I am trying to find out how to set the memory scan so that it will stay on an active memory while scanning.

Right now, when memory scanning, if it stops on a memory, it will listen for a few seconds, then resume scanning. I would like it to stay there until the frequency becomes quite again. Then resume. The FT-411E does this. How do I get the 470 to do this?

Also, what is the ALT for?

Thanks,

73 de NW7US

Try to get the Sams Photofacts for this rig and follow the allignment
procedures. This will help you better than anyone can explain.
Try the Local Library for the Photofacts and if they have them, get
them copied. Your library should have a copy machine.

If they dont have it for the Adams, Try the Madison. They use the same
main board and allignment procedures are all the same.

smartass mode *on*

I wish they would just go ahead and legalize drugs for adults. Then the people down the street that run the crack house would not have to fire off guns all night long to ward of the competition, and the savings in ammunition alone would more than allow crack to be sold for 1/10 of the price. The OD's resulting in death would soon bring the situation into a new equilibrium. And since it would be legal and they would not be trying to hide it, it would be alot easier for my neighbor to get a trip to jail for disorderly conduct, DUI, or public intox for smoking weed and crack all damn night with his 'home boys' and raising a rappin' ruckus so people can't sleep. It's all I can do to get him to quiet things down after 10 pm.

140. Ten-Tec Equipment for Sale

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-02 00:00:00 UTC
From: randas@mindspring.com
Message-ID: <8c85iv$hr4$1@slb0.atl.mindspring.net>
Source record: 115362

I have for sale the following equipment. All in fine working order, and can be heard on the air. Would prefer to have local pickup (near Louisville,KY) but will ship in factory boxes if needed.

Omni-VI plus (factory upgraded to option 3)
All filter slots full Standard 2.4kc filter
#288..1.8kc SSB filter 6.3 IF
#285..500hz CW filter 6.3 IF
#282..250hz CW filter 6.3 IF
#218..1.8kc SSB filter 9mhz IF
#217..500hz CW filter 9mhz IF

Radio is in near mint condition..I'd say a 9.85 on the 10 scale. (10 being "perfect")

Included with the radio is a near mint 961 power supply/speaker , all power cables, manuals, and factory boxes.

Price for Omni-VI plus and power supply... $2,150 and some help on shipping if needed.

Have a "mint" 238 tuner..includes the factory supplied 1000pf 500V capacitor for added help on 160m if needed. Have manual and factory boxes.
Price for tuner is ..$300 plus help on shipping. (The buyer of the Omni-VI will have first chance at this tuner)

I will entertain offers...but please make them reasonable.

de Tim K0FL

Make a Package deal offer :-) NO TRADES

Boyd,
That is one of the symptoms of a 'low' battery. It
can also be a sign of other problems. The TS-440 doesn't
use 'paper' capacitors like some of the older radios, so
sitting idle for long periods isn't going to 'hurt' the
radio. It certainly can run the battery down though.
Unless your familiar with solid-state repaires you'll
probably have to take the '440 to a repairman anyway,
have him check it out to be sure the problem isn't from
some other than the battery.
'Doc

For many the simple answer was fear. In Nazi Germany a single critical
remark being over-heard could earn you a one way ticket to Belsen.

> In truth, Hitler was a step from what they had experienced
> under the socialists.

Pardon? Could you rephrase that so it makes some sense?

My first posting didn't seem to make it.

Looking for tips and suggestions from anyone having experience with a late model Ford Explorer..

I recently purchased '98 Ford Explorer with a sunroom and a console that block access under the dash between the front seat.

I want to move my Icom 2710 dual bander and my 6M Azden from my '93 Explorer to my new one.

Problem:

Where/how do I

1. Mount the radios.

2. Route the power leads from the radio to the battery.

3. Mount an antennas.

Re: #1 -- My Icom has a remote head feature, though I don't have a remoting kit (yet).

Re: #2 -- Detroit apparently has ommitted any spare "ports" trhu the firewall. I had to drill at the bend in the floor at the firewall in my older Explorer to create my own access.

Re: #3 -- Looks like the only likely spot is almost all the way aft on the roof if I want to retain any use of my roof rack. I've been using a Larsen 2M/440 for the Icom and a Larsen 1/4-wave for my 6M. Maybe a bumber mount for my 6M?

I will appreciate any help. Thnx & 73 --

Jim Piper / KD6YKL

The only REAL reason why certain so-called Americans on this board demand that Elian be returned to the hell of a communist country is because they are XENOPHOBIC. Either they fear or hate foreigners. They reason..."Aw, just another Spanish onion in our midst. Get rid of the kid." Listen you clowns-that kid is here for a reason. It was predetermined by God himself, herself or itself that the boy would grow up in freedom. It's impossible to believe that this little kid, floating all by himself on a raft in the middle of the 90 miles of ocean separating the U.S. and Cuba got here by luck? No way. It was Divine Providence. Wise up you uncaring dopes and stop thinking about your own carcasses and consider the future of a youngster. If tons of Mexicans can cross over illegally and fall through the cracks while all we do is yawn, then a deserving Elian should remain in the states. And besides his mother divorced poppa for whoremongering. The kid belongs in the care of a guy like that? A commie adulterer? You gotta be kidding!

Hey sport. How much money do you donate to homes for unwed mothers? Would you be willing to adopt? I know a couple who had to go to China to adopt because of the 'UNAVAILABILITY" of Caucasian babies here.Why is that? If your theory is taking hold, then where's all the babies ready to be adopted? Beats me. Sure, of course you're right. Abort nothing. Even when a woman is raped or the victim of incest. Keep loading up society with UNWANTED kids. Think nothing of the loneliness of the unwanted kid but only to the phony moralists who preach the kind of crap you rub in for shampoo. I agree- late trimester abortions MUST be stopped but otherwise the decision must be left up to the parents or the unwed mother. How do you feel about killing abortion doctors, bozo? A good idea, right? They have no right to perform what's lawful just because some off- the- wall phony preacher tells you that Jesus wouldn't approve. Beats me as to the number of lawyers and spokespersons for Jesus we have in this society? Man there's nothing wronger in society than a believer gone bonkers.

On the contrary, this has nothing to do with the fact that Elian is "just another ....". It has to do with considering all sides of the issue: Has Elian been given a unique opportunity- you bet. Would he be better off growing up in Cuba or US- United States by far. But you have to consider my point in my original post- if the situation were reversed we would expect him back. Don't get me wrong here, I'm not supporting Castro or communism, but just because we dislike a form of government doesn't mean that what people living in that country want is deemed irrelevant. Elian's father and family in Cuba want him back, and we have to acknowledge that fact.

Divine Providence, God , and predetermination are irrelevant. It was purely luck.

>Wise up you uncaring dopes and stop
> thinking about your own carcasses and consider the future of a youngster. If

There are more issues at stake here than the future of a youngster.

A way you could mount the radios would be to install one of those overhead racks that mounts above the windshield where the sun-visors attach and mount them on the underside of that- sort of a ceiling mount type thing. and the wires could then be run under the plastic trim that runs from the top to bottom of the windshield. As for the antennas you could mount them in the hood channels with a Larsen TMB-34 mount (in the AES catalog).

Seems like a never ending quest.

I'm looking for the following Drake C-line gear, must be good to
excellent condition, fully operational (if otherwise, please state
what's up).

MS-4 Speaker
T4X-C Transmitter
500 and 250 Hz 2nd IF filters for R4C

I would also be interested in an R4C, as long as it has 5 filter
positions (not 4).

Please call toll free at (800) 962-2949, or email to
NeilR@innermedia.com

Thanks, and best 73's.

Neil, N1DMA

Your memory is playing tricks on you my good man. In reality what you heard was two stations on the air with legal calls, identified, very much within their rights under part 97, attempting to have amateur radio communications under a bombardment from a now defunct amateur and his minions in S. C. and other places maybe even from your QTH.

In the process chafing your feelings no end by being successful. In the meantime your qrming heros are all getting caught and getting the heave ho from our wonderful hobby.

I am happy, if you are not happy. get over it.

163. Re: Wanted: Info on FT-470 - Scan Resume

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC
From: kv7g@mindspring.com
Message-ID: <8cak98$2ei$1@slb2.atl.mindspring.net>
Source record: 115185
Cross-posted to: alt.ham-radio.fm,alt.ham-radio.mods,alt.ham-radio.vhf-uhf,rec.radio.amateur.misc,rec.radio.amateur.equipment

They call that "Pause" mode.
To set the scan resume mode, press F/M and then STEP (7). a small "P" or "5"
in the shaded box at the upper left indicates the current mode.
Press F/M to change it, or just press STEP (7) alone to return to the
frequency display.
5 = 5 second delay then resume scan
P = pause till signal is not present.

>Correct. But I was answering the original question - which WAS about
>using directional fixes.

In Usenet, the articles are arranged in a tree that shows which article
you are following up - i.e. which one you were reading when you wrote your
reply. If you had followed up the *original* article, it would have been
clear that this is the context that you were replying in.

Instead, your comments about directional fixes from satellites were
posted as a followup to and article that was clearly talking about
using Doppler effects for position location, not directional fixes.
That's the context of your article, and that's why it caused so much
puzzlement. You weren't contributing to the discussion in progress
in that thread, but leaping back to the original question.

If you wanted to comment on the original question, it would have been
better to post your article as a followup to *that* article.

Dave

Item one: The guy signing W4FQF IS NOT W4FQF. It is coming from Cary

N.C. FQF is in the Memphis area.

Item two: W4FQF, W4LLI, WA4KBX and others were indeed jamming on 3.901
at the behest of K4OKA. That is the facts...period.

Now since you are NOT W4FQF I'd recommend you keep your mouth shut liar.

Dan:

This is indeed the one, the only, W4FQF, Friend Of Billy Jack W4LLI,. I remember you were in there qrming me at that time. Don't be so quick to come in here and accuse others.
Your past is not a shining example of what a ham radio operator should do. But that is in the past, you have cleaned up your act for the most part, but still under the influence of the evil one.. We need to get the troublesome people out of amateur radio.

Mr Hollingsworth is doing a wonderful job in doing just that. And he has the help of a dedicated group of amateurs working for him.

Why carp and complain when a rulebreaker is brought to justice?
Everyone should forget the past and try to make amateur radio a enjoyable hobby again.

W4FQF, Since 1952 Standing for good amateur practices

170. 14.313 & 3.950 - What Happened?

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC
From: rfcommsys@aol.com
Message-ID: <20000403145108.28474.00000732@ng-fw1.aol.com>
Source record: 115192

What happened to 14.313 and 3.950? These freqs used to be in heavy use almost continuously (14.313 in the day and 3.950 at night), with all sorts of interesting "entertainment". Now both freqs are like a ghost town. All I hear on 313 are a few weak stations from time to time, and 3.950 is completely dead for hours at a time except for WA9KJI and his friendlies who show up in the early evening. What happened to the Liberty Net guys during the week? (Yes, I know that the LIberty Net still meets on Saturday, but I used to enjoy all the political-type discussions that took place on weeknights). Hearing WA9KJI bitch and moan about the Liberty Net folks every time he gets on the air is getting boring fast, especially since they have apparently abandoned 3.950 except for Saturday.

Dammit, I demand my entertainment!!!

you already have the FM->7 answer, but the ALT key, according the my little cheat sheet is

FM -> ALT : Alternating Band Memory Select

So, good luck with that.

This is correct. I personally HEARD these goings on. FQF and LLI
running legal limit to talk across their town, Memphis, and KBX,
the "Yoko Ono" of the Rumphumpers, doing his chanting and caterwauling.

> Now since you are NOT W4FQF I'd recommend you keep your mouth shut

I think I know what you're trying to say without actually coming out and saying it. As we all know, sky wave propogation can be fickle and misleading. The only real proof you're going to get is via groundwave.
Assuming, of course, that you're actually interested in finding the truth and not just engaging in speculation for the fun of it.

Jerry,

Putting the Windoz slams aside, if you want to learn code for anything
more than just passing the test. You need a program that will teach via
the Koch method. The only two programs that I know about that can
do that is supermorse and MorseCat beta version. Supermorse is a DOS
and
MorseCat is Windows.

188. Car Battery Question

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC
From: philz@pobox.com
Message-ID: <38e90bc5.3022388@news.rdu.bellsouth.net>
Source record: 115210

I'm getting ready to hook up my 2M into the van I've recently purchased and had a question about tying it directly to the battery ... which I've done before in my previous car, so I know that it works just fine.

This van has side post battery cables. The battery has both top and side posts, and of course only the side posts are in use. The question is: Is it OK or not to purchase a couple of top post battery terminals to use solely for hooking up the rig? The only thing that would be connected to the top posts would be the + and - for the rig.

Has anyone done this? What were the results?

Thanks ... Phil KF4IUU

Absolutely OK. You can also buy a pair of adaptors for your side-terminal battery cables to replace the existing bolts, that have a stud for mounting accessory cables.

> charges?.. BULL!

I'm not arguing against guidelines in these matters but only how
they're implemented. Your responses do point out one of the
weaknesses of the system, while I suppose all States have passed
laws against practicing medicine without a license, how would a
malpractice suit be filed since technically only practitioners have
licenses? Such a charge for damages would have to be something like
malicious assault or intent to do bodily harm. Then the court
would have to prove intent or fraud or whatever the charge
might be. No, such licenses are there to protect the business side
of medicine. Doctor-caused deaths and hospital-caused illnesses
run around 1.5 million a year.

The driver license senario is easier. Drive without a license and
hit a pedestrian. Assuming that it was your fault then the pedestrian
files the same charge as if you ran him over with a wagon or on
a bicycle. If it wasn't your fault then you get charged with driving
without a license. Remember, all of the traffic laws are municipal
or county regulations from the corporate city or county. If you do
not have a license then you are not charged with those. You will
be charged for any personal or property damages incurred by
your actions.

I could have sworn that the FCC license agreement with amateurs
stipulates that the FCC has a right to examine your station equipment
as it wishes.

> >The public has no
> >agreement with the FCC. You get nothing in return as the airwaves
> >are public anyway and cannot be verboden.

Again, I'll be the last one to argue against the need to manage
airwaves etc.

>legal basis would not be the same as with an amateur.

That's right....instead of a penalty for violating FCC Rules
you would be hit with the same or greater penalty for operating
without a license which is a OS Code violation.

>> Administrstive proceedinhs ARE due process - one is given
>> notice of the offense and the opportunity to respond and
>> present evidence in his/her behalf as to why the proposed
>> penalty should ne mitigated (reduced) oe cancelled. If you
>> mean "court proceedings", the results of administrative
>> proceedings can be appealed in the courts if the accused feels
>> that the Administrative Law Judge did not follow the rules.
>>
>Due process is a component of common or Constitutional law
>and is only concerned with criminal matters.

Give that answer on a law school exam and lose 10 points......

>Administrative law is not law but regulation, and only has
>merit when dealing with a signatory of that regulation. Thus
>the license agreement. Without the license the regulations that
>apply to amateurs may not apply to the general public.

guess from your phrasing but do not consider it a source of
accurate legal information or education).

>> >All good reasons not to get a federal license in the first place. It
>> >is the voluntary license that allows the assault on hearth and
>> >home with the 'forfeiture' of equipment.
>>
>> More Misinformation.
>>
>> Unlicensed operators are subject to sesrch and seizure by court
>> order (warrant) just as licensed operators are. In fact, the

>> prima facie case necessary to secure the warrant(s) is a lot
>> easier to make when the person is unlicensed.
>
>Well Phil, I'm sure you're proud to be a ham and involved in
>such a serious way.

I'm also proud to be an attorney who specializes in US and international communications enforcement and regulatory law and who has spent over 20 years teaching that subject. In fact I was one of the principal writers of the FCC's internal search and seizure and forfeiture guidelines and practice.

How many years have YOU worked in and taught comm law?

>First, an unlicensed airwave transmitter
>is not an operator in the technical sense. It may simply be a
>short causing major interference on a ham or BC band.

In a techical sense the "operator" is the person/agency responsible for putting the transmitter or other radiating device on the air or for keeping it off the air, as required.

>A warrant for what, to do what, to whom? Was someone killed?
>A robbery perhaps? Search and seizure? Sounds pretty drastic.

That's exactly what it is. A warrant from the US District Court directed to the US Marshal or to any authorized Federal law enforcement agent specifying the premises to be entered and searched and the property (if any) to be seized.

The situation does not have to be criminal in nature - for instance a warrant is necessary (and I have had first hand experience with getting same) for the FCC to enter unattended or unoccupied private property in case of accidental or inadvertent transmission causing harmful interference (a legally defined term) to radio communications,

>The only time the (American) public and its airwaves have been
>subject to the type of control you suggest, was during WWI and
>WWII and then under emergency war powers.

Where are you getting this nonsense? (Same place as above, I suspect.)

Go read the following sections of the Communications Act (Title 47, United States Code):

501 (criminal penalties for violation of radio law statutes),
502 (criminal penalties for violation of FCC regulations),
503 and 504 (administrative penalties and procedure for violation of either statutes or regulations)
510 (standards and procedures for seizure and forfeiture of equipment).

These statutes are in effect at all times, At no time is there
any exemption for persons who hold or do not hold licenses.

>Your license however does specify that you, the licenseholder, will
>allow them entry to your station whenever they want and to 'search
>and seize'. That's your agreement with them.

As you have been told by others, there is bo such thing.

There is a whole set of FCC Rules which obligate persons to
make radio equipment available for inspection "at any reasonable
hour", which has been defined to include any time the station
is in operation or shortly thereafter.

>The public has no agreement with the FCC.

FCC Rules apply to all persons, licensed or not, and the
sections of the Act cited above make non-licensed persons just
as liable to penalties as licensed persons.

>You get nothing in return as the airwaves are public anyway and cannot
>be verboden.

"Airwaves are public" ? Urban myth.

>The reason for the license is to allow easy control of those airwaves
>by the government.

"Easy control ... by the government" ? Another urban myth.

You're loaded with 'em.

>Most hams agree that this is a good thing. I agree that control is
>necessary but that the FCC is not the best way to do it.

It sure beats any other alternative.....

>Some of you guys are real hot on 'law and order' but you must realize
>that there is a big difference between a crime against a person (the
>only real crime)

Most qualified legal experts will disagree with THIS urban myth.

>and a regulation that is designed as a management tool for the public
>good.

Smoke and mirrors.....go and learn.....

Dan Dan Dan:

What purpose would it serve to drag up old bones such as you are trying to extract from a long ago scrap heap?

The only thing that matters is this is a new day. There should be no more qrming by anyone. Your penchant for extracting "confessions" from people involved serves no useful purpose.

Forget about what has happened and worry about the condition the amateur bands are in today.

Why don't you forget the past and try to make amateur radio a good clean hobby again. Are perhaps by chance, it would be turning your back on your qrming friends that think differently.

There will be no "confessions" from me Dan . Just the promise that I will do everything in my power to clean up amateur radio back to a delightful hobby. I have been doing this for some time.

Think about it.

W4FQF Since 1952 working for the cleaning up of amateur radio!!

LEGAL CABLE TV DE-SCRAMBLER

Want to watch Sporting Events?--Movies?--Pay-Per-View??

*This is the Famous R-O Shack TV Descrambler
You can assemble it from Radio Shack parts for about $12 to $15.

We Send You:
1, E-Z To follow Assembly Instructions.
2. E-Z To read Original Drawings.
3. Total Parts List.

**** PLUS SOMETHING NEW YOU MUST HAVE! ****
Something you can't do without.

THE UP-TO-DATE 6 PAGE REPORT:
USING A DESCRAMBLER LEGALLY

Warning: You should not build a TV Descrambler without
reading this report first.

Frequently Asked Questions--CABLE TV DESCRAMBLER

Q: Will the descrambler work on Fiber, TCI, Jarrod
and satellite systems?
A: The answer is YES. In respect to satellite,
you just get more stuff! There is one exception:
The descrambler will not work with DSS satellite.

Q: Do I need a converter box?
A: This plan works with or without a converter box.
Specific instructions are included in the plans for each!
Q: Can the cable company detect that I have the descrambler?

A: No, the signal descrambles right at the box and does
not move back through the line!

Q: Do I have to alter my existing cable system,
television or VCR?
A: The answer is no!

Q: Does this work with my remote control?
A: The answer is yes. The descrambler is
manually controlled--but very easy to use!

Q: Can you email me the plans?
A: No the program comes with an easy to follow picture guide.

Q: Does this work everywhere across the country?
A: Yes, everywhere in the USA plus England,
Brazil, Canada and other countries!

Q: Is this deal guaranteed?
A: Yes, if you are unhappy for any reason we will refund your money.

Q: When I order, when will I get my package?
A: We mail out all orders within 24 hours of receiving them.

Q: How much does it cost to get the instruction
plans, the easy to follow diagram, and most
important of all the "Using a Descrambler LEGALLY Report".
A: You get the complete 6 page report and instruction package all for just--$10.00

Q: How do I order?
A: Fill out form below and send it, along
with your $10.00 payment to:

CABLE FREE-TV
12187 S. Orange Blossom Trail #116
Orlando Fl 32837

(Cash, Check or Money Order.)

(Florida residents include 7% Florida State Sales Tax)

(All orders outside the U.S.A. add $5.00)

>
>Because they don't take directional fixes.

Don't you really mean - because they "do" take
a directional fix... After all - without a direction
component - you can not resolve a direction.
Since a direction IS resolved from the satellite
then - ergo - there must be a direction component.
And with two direction components - you have
a fix. Simple idea - Simple math - simple system -

The Amplifier, power supply and transverter are sold..(Thanks)

I still have for sale the following equipment. All in fine working order, and can be heard on the air. Would prefer to have local pickup (near Louisville,KY) but will ship in factory boxes if needed.

Omni-VI plus (factory upgraded to option 3)
All filter slots full Standard 2.4kc filter
#288..1.8kc SSB filter 6.3 IF
#285..500hz CW filter 6.3 IF
#282..250hz CW filter 6.3 IF
#218..1.8kc SSB filter 9mhz IF
#217..500hz CW filter 9mhz IF

Radio is in near mint condition..I'd say a 9.85 on the 10 scale. (10 being "perfect")

Included with the radio is a near mint 961 power supply/speaker , all power cables, manuals, and factory boxes.

Price for Omni-VI plus and power supply... $2,150 "OBO" and some help on shipping if needed.

Have a "mint" 238 tuner..includes the factory supplied 1000pf 500V capacitor for added help on 160m if needed. Have manual and factory boxes.
Price for tuner is ..$300 plus help on shipping. (The buyer of the Omni-VI will have first chance at this tuner)

This is exactly how you should do it. My Yaesu 2500 has been hooked up this way for a year, and works perfectly. I used marine terminals and 10 gage wire. You may need additional filtering to eliminate alternator noise. Also, keep the wires as far away from the spark plug wires as possible.

I have a Yaesu FT-847 that has VERY weak AM modulation (I've had many reports to that effect). Its been that was since purchase, so I suspect poor factory adjustment. Front panel mic gain/power adjustments seem to have no benefitial effect.

Is there a simple pot, trimmer, or other component, that I can adjust to set AM modulation (which one), or should I send it back to Yaesu for repair?

Email replies preferred, but not required.

Dwight Stewart (W5NET)

206. Yaesu FT-847 AM Modulation Adjustment??

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC

Source record: 115228
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I have a Yaesu FT-847 with VERY low AM modulation (I've received many reports to that effect). I think this problem has existed since purchase (the radio is not that old now), so I suspect poor factory adjustment. The panel mic/power settings seem to have no beneficial effect on this problem (neither does switching mics).

Is there a pot, trimmer, or other component, that I can adjust to set the AM modulation (which one), or should I just return the radio to Yaesu for repair?

Any assistance is appreciated. Email reply preferred, but not required.

By the way, the first copy of this message did not seem to go through, so I'm sending it again. I hope I'm not posting a duplicate message. Sorry if I did.

207. Low Battery question.

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC
From: Boyd Durdle <bdurdle@roadrunner.nf.net>
Message-ID: <38E83C71.863E63A7@roadrunner.nf.net>
Source record: 115245

Occasionally my frequency display readout starts blinking.
After a while it stops and remains steady. I have also
noticed that after such a display my stored memory
frequencies are all incorrect but when I return to them
later they are all functioning properly again. All of this
usually occurs just after power up. The radio, a Kenwood
TS-440S, had been used only once or twice in a couple of
years. Could all of this be the result of a low back-up
lithium battery or indications of a more serious problem.

Anything look good to anyone?

This may mean nothing, but one of them is an Abernethy, same unusual spelling, and less than 5 miles (as the crow flies) from the "Hickory" Abernethy. Coincidence? Moreover, the "Hickory" Abernethy's address is much closer to Newton than Hickory. Can't wait to hear how this turns out.

Now before anyone gets their hormones in an uproar, this information is all public domain and was gleaned from an internet database and Street Atlas USA (R). I don't want to hear any crap about contacting your lawyer. Well actually, go ahead; I need a good laugh.

Of course, you state only one side of the story. Whatever the truth
regarding that incident, sadly, a VERY small number of anomalies will
occur.

The vast majority of law-abiding, upstanding citizens will never come in
contact with the authorities in a negative manner. For proof, take the
number of such incidents similar to what you've mentioned above, say,
over the last decade, divide that by 148.7 million, multiply by 100, and
toss a percent sign on the end.

I stand corrected; error in using Street Atlas USA. His address is in
Hickory, but still less than 7 crow flying miles from the Newton
address. And, he was born in '23, she in '46. Still too much coincidence
for me. And I still can't wait to hear how this turns out. This may give
Daddy/Daughter Dance a whole new meaning.

Of course I could be wrong...

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

This week's EMCOMM Bulletin:

EMC230 Amateur Radio Withdrawn!
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC230 Amateur Radio Withdrawn! For release 3/27/2000

FCC Order No. 87

"At a session of the Federal Communications Commission held at its offices in Washington, D.C. on the 8th day of December, l941:
Whereas a state of war exists between the United States and the Imperial Japanese Government, and the withdrawal from private use of all amateur frequencies is required for the purpose of the National Defense;
IT IS ORDERED, that except as may hereafter be specifically authorized by the Commission, no person shall engage in any amateur radio operation in the continental United States, its territories and possessions, and that all frequencies heretofore allocated to amateur radio stations under Part 12 of

the Rules and Regulations BE, AND THEY ARE HEREBY, WITHDRAWN from use by any person except as may hereafter be authorized by the Commission. By order of the Commission:
- T.J. Slowie, Secretary."

A few hours after the first bomb fell on Pearl Harbor, Amateur Radio in normal peacetime ceased to exist. The frequencies we used were deathly silent - an ominous nothingness, not a chirp, nothing.

Transmitters were packed away, receivers turned to some other use. Soon the U.S. Government wanted to buy "commercially made" transmitters and receivers. My Hallicrafters Skybuddy receiver and a Stancor 200 watt AM transmitter went to the war effort.

Today thousands of Amateurs have no knowledge of those events, so this bulletin is a reminder of Amateur Radio privileges.

Prior to WW2 I participated in a forerunner to the ARRL ARES (Amateur Radio Emergency Service.) There was no RACES or other emergency communications (EMCOMM) unit in use by government.

After WW2 ended the right to operate on Amateur frequencies was restored. I was in the U.S.Navy and my parents mailed my CW transmitter (an 807 and a rectifier tube and few other parts.) What a thrill to be on-the-air again. CQ....CQ....CQ de .....! WOW! It was great! Even if it was from outside a navy base, since operation from the base was not permitted.

So, why write about this in the year 2000? As a reminder that the use of FCC assigned Amateur frequencies is a privilege, not a right.

The FCC regulations say that the paramount purpose of the Amateur Service is PUBLIC SERVICE. I understand that to mean to help our communities in time of need with our skills and abilities in communications. In the year 2000 there are many ways to do that. Numerous organizations, methods and means exist so you can help those in your area.

Please find a way to make that part of your future. The rewards that come to you will be those you don't expect, but will find interesting! If my experience is indicative at all, you will find ways to be of help you cannot anticipate. 73's de W6WWW

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- Ideas, suggestions and submissions for these bulletins are actively solicited and welcomed. Please contact

cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a
Landline BBS: 916-262-0856 (graphical & standard interface); and
a FTP Archive: ftp.ucsd.edu/emcomm
.....

Please let others in the emergency services field know of the
newsletter, and encourage them to join... If you have opinions,
suggestions or written material that you'd like to share with
the group, let us know. We're always looking for new ideas and
suggestions that will benefit everyone.

It's actually about the powerful wanting to use the cheap toys w/o having to worry about any of their odd conversations coming back to haunt them.

such things as the use of intercepted communications in political campaigns will do nothing for the monitoring community.

the rule makers are probably in that job because they don't wish to know the laws of physics and don't like their snouts rubbed in them either.

220. Riley Hollingsworth, Esquire: Part 97 and the Constitution

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-03 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <9302-38E81D67-2@storefull-243.iap.bryant.webtv.net>
Source record: 115258

Doc, most hams by now agree with Riley Hollingsworth, Esq. that the service should not become a circus. To circumscribe most non-business conduct further by basis, purpose and scope is Constitutionally infirm, akin to Robert's Rules of Order with Robert ruling.

Conflicts in the law present an ever-present problem, where the Constitution and Part 97 (as interpreted) are incompatible. Let's not fool ourselves into accepting the two as magically exclusive.

In my opinion, Doc raises some excellent points connecting with religion. The most powerful argument against selectivity of enforcement in religious subject-matter is the First Amendment's, Establishment Clause prohibition. Basically this says the U.S. cannot establish or condone one religion over anothel. So quieting a ham of one religious persuasion but permitting another of a different persuasion his right of free speech squarely violates the Establishment Clause.

Doc, your argument resting on type of response is invalid. The moment we have any obligation for what the next guy does and says is the moment we forfeit our Constitutional rights. Of course I'm not contemplating culpability by conspiratorial conduct nor fighting words.

Ordinarily we can look at case law to see what we can and cannot do. Not in this case. When Riley was appointed to rescue ham radio, we had risen to bickering of alarming levels. Just as President Abraham Lincoln threw the Constitution to the wind during the Civil War, shouldn't our regulators do the same if there is no other choice? We know Lincoln had his private confidantes; should we expect different?

As much as Due Process is important, a strong argument can be made for just what Mr Hollingsworth is doing, asserting agency authority to its full breadth. Remember, until a Court of competent jurisdiction supports one of these Constitutional theories, Riley is empowered to act pretty much as he wants.

Lately we have seen a hesitance to officially sanction in favor of setting the ham straight informally, as well as an adequate recitation of the accused's rights. And who could have single-handedly pulled off such relative peace?

Bob Sherin, W4ASX
Miami, Florida

Negative. As I have no license, I could transmit with 10,000 watts on 3.900 causing a stir. When the FCC came to investigate they would treat the matter differently than if I had a license. Now they would be compelled to stop the interference with the amateurs, but the legal basis would not be the same as with an amateur.

And let me be clear. I'm jumping in on this thread just to make a point about licensing, not to comment on its original purpose. Ham licensing has a long history and amateur radio is an honorable pursuit. My concern is for a government that has gone far beyond its original purpose and in many cases has lied and defrauded the public over licensing issues.

> Administrstive proceedinhs ARE due process - one is given

Due process is a component of common or Constitutional law and is only concerned with criminal matters.

Administrative law is not law but regulation, and only has merit when dealing with a signatory of that regulation. Thus the license agreement. Without the license the regulations that apply to amateurs may not apply to the general public.

> 73 de Phil Kane - K2ASP

Well Phil, I'm sure you're proud to be a ham and involved in
such a serious way. First, an unlicensed airwave transmitter
is not an operator in the technical sense. It may simply be a
short causing major interference on a ham or BC band.

A warrant for what, to do what, to whom? Was someone killed?
A robbery perhaps? Search and seizure? Sounds pretty drastic.
The only time the (American) public and its airwaves have been
subject to the type of control you suggest, was during WWI and
WWII and then under emergency war powers. There would be
an action as I describe above but it would fall under interference
with interstate commerce and it is not a criminal act in and of
itself.

Your license however does specify that you, the licenseholder, will
allow them entry to your station whenever they want and to 'search
and seize'. That's your agreement with them. The public has no
agreement with the FCC. You get nothing in return as the airwaves
are public anyway and cannot be verboden. The reason for the license
is to allow easy control of those airwaves by the government. Most
hams agree that this is a good thing. I agree that control is necessary
but that the FCC is not the best way to do it.

Some of you guys are real hot on 'law and order' but you must realize
that there is a big difference between a crime against a person (the
only real crime) and a regulation that is designed as a management
tool for the public good.

: So gps is only accurate to 100 miles +-?

Note I said "directional fixes" - which was in answer to the original question.
GPS tracking has nothing to do with direction. It uses the time difference
of the received signals to calculate the location.

The same could be done by satellite - but that was not the question that was
asked.

Doc, most hams by now agree with Riley Hollingsworth, Esq. that the service should not become a circus. To circumscribe most non-business conduct further by basis, purpose and scope is Constitutionally infirm, akin to Robert's Rules of Order with Robert ruling.

Conflicts in the law present an ever-present problem, where the Constitution and Part 97 (as interpreted) are incompatible. Let's not fool ourselves into accepting the two as magically exclusive.

In my opinion, Doc raises some excellent points connecting with religion. The most powerful argument against selectivity of enforcement in religious subject-matter is the First Amendment's, Establishment Clause prohibition. Basically this says the U.S. cannot establish or condone one religion over anothel. So quieting a ham of one religious persuasion but permitting another of a different persuasion his right of free speech squarely violates the Establishment Clause.

Doc, your argument resting on type of response is invalid. The moment we have any obligation for what the next guy does and says is the moment we forfeit our Constitutional rights. Of course I'm not contemplating culpability by conspiratorial conduct nor fighting words.

Ordinarily we can look at case law to see what we can and cannot do. Not in this case. When Riley was appointed to rescue ham radio, we had risen to bickering of alarming levels. Just as President Abraham Lincoln threw the Constitution to the wind during the Civil War, shouldn't our regulators do the same if there is no other choice? We know Lincoln had his private confidantes; should we expect different?

As much as Due Process is important, a strong argument can be made for just what Mr Hollingsworth is doing, asserting agency authority to its full breadth. Remember, until a Court of competent jurisdiction supports one of these Constitutional theories, Riley is empowered to act pretty much as he wants.

Lately we have seen a hesitance to officially sanction in favor of setting the ham straight informally, as well as an adequate recitation of the accused's rights. And who could have single-handedly pulled off such relative peace?

Bob Sherin, W4ASX

My shtick is this; I'll be hard hitting as it relates to ham radio enforcement. OBJECTIVE NON-PARTISAN conduct on the part of an enforcer is OBLIGATORY if he is to get the support of everyone. As I said, I have nothing whatsoever against KC3AU except for the fact that he uses .313 as a

pulpit which I find offensive in the same way I'd find anyone of any religious persuasion banging away incessantly, monontonously and dogmatically. His predeliction for unnecessarily bombarding us with the New Testament generally and the Born Again movement specifically is as much an irritant to a frequency needing to be relaxed than someone as controversial as I who even innocently might provoke the type of response unwanted by Riley. Yet Riley thinks enough of him to warrant giving out his private phone number and the same might go for a few others as well? What kind of message does this send? KC3AU and other pets can be considered WATCHDOGS whose gripes will be acted upon by enforcement even if UNWARRANTED! It sort of reminds me of reprehensible societies which depended on squealers to keep a dictatorship in power. It's reminiscent of the commie and Nazi hierarchy depending on kids to turn in their own parents and siblings if anything contrary to propaganda was heard. I personally see nothing wrong with Riley getting on the air to work anyone he wishes-that's IMPERSONAL and ACCEPTABLE in our hobby/service, however to provide a home number to anyone shows favoritism which is UNACCEPTABLE and I honestly would harbor the same sentiments if I myself could be considered one of his pets. To prove how this violates my and your rights, read this. In the end of 1999, out of the clear blue sky, I received an e-mail from Riley warning me against intentional jamming. That's odd; in 31 years of hamming never had that subject been broached. The story is that due to phone calls and e-mails by unscrupulous troublemakers on 14.313, Riley was led into believing that the jamming, traced to New Jersey, was coming from MY station. Naturally it was ridiculous and I denied everything because it was a unproven bullbleep, period. BUT just the fact that he believed it very well could have led him into believing that I interfered with Polly and MXL which also was untrue. Did those same squealers having reached him previously influence him in the latest instance? Very possibly but at this stage, I can't prove it but am suspicious. The point is that my "enemies" won-I lost. They could not handle me on .313, wanted me off it and succeeded therefore they have a right to boast however knowing that KC3AU has Riley's private number, and others might too, would YOU be willing to tempt the ire of John and friends? Would you now like to debate his religious theories on .313 even in a most gentlemanly demeanor? What's to stop him from TURNING YOU IN? No, I strongly doubt if John would do it but what about Riley's other pets? Remember, if they were able to get me into deep enough trouble to warrant my departure from .313, YOU'RE NEXT! I have seen enforcement go from punishing the REAL RAGTAG hardnosed unindentified as well as identified foulmouthed jammers to those whose provocativeness can hardly be compared to the aforementioned. Intelligent debating on .313 has been extinguished along with guaranteed rights. It's become the graveyard shift which explains the mass migration to .275 which, as I'm hearing ever increasingly, is supplanting .313 as the HOT SPOT all over again. But then again, when one considers that KT4TR, W4FQF, KB4MXL, WA9KJB,WA2EXQ and K3QAM are PERSONNAE NON GRATA on it, how bad can it be? Pay attention to what I write-if you get on 14.313, you are leaving yourself open to headaches. KEEP OFF THE GRASS!
AF2Y, Doc

Hi all!

I'd like to know how to calculate the relief height correction factor at a point between the transmitter and the receiver of a radio-communication system, due to the 4/3 effective earth radius. Let me clarify my question: how much higher would be a mountain of hight "x" meters at a distance "d1" of the transmitter if I consider the effective earth radius of 4/3 ? The distance between transmitter and receiver is "d".

Thanks in advance,

Fernando Pedreira

Subject: ** FLEA at MIT ** Sunday April 16th Cambridge MA
Summary: Buy Sell SWAP Ham Radio Electronics Computers 9AM - 2PM

Spring Has Sprung and the seasons first MIT Flea is only 2 weeks away...

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday April 16th 2000
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $4 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $10.00-each at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23-W1BOS/R and W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

>treat the matter differently than if I had a license. Now they would be
>compelled to stop the interference with the amateurs, but the
>legal basis would not be the same as with an amateur.

True.... you wouldn't have a license to loose, but the FCC would treat you the same license or no. The fine would be the same... Any legal charges would be the same... the only big difference would be the fact that you'd have no license to be threatened with the revocation of. (..you may even find you qualify for a few extra fines and penalties due to the lack of a license)

You don't have to have a license to drive a car, practice medicine, or pilot a plane, but the penalties for doing so without a license would generally be a bit higher for the unlicensed offender as more charges would be brought.

>Administrative law is not law but regulation, and only has
>merit when dealing with a signatory of that regulation. Thus
>the license agreement. Without the license the regulations that
>apply to amateurs may not apply to the general public.

...So you believe that if you never get a driver's license that you're immune from prosecution for drunk driving or speeding? ...That if you practice medicine without a license that you're safe from any malpractice charges?.. BULL!

>Your license however does specify that you, the licenseholder, will
>allow them entry to your station whenever they want and to 'search
>and seize'. That's your agreement with them.

.... I hold several Commercial licenses as well as a Ham license.. NOWHERE on the license or the application does it state the above....

>The public has no
>agreement with the FCC. You get nothing in return as the airwaves
>are public anyway and cannot be verboden.

...Old argument... if airwaves are 'everyman's right' and 'publicly' held, then what pretense do you base land or water rights/ownership on?

Doc, lots of merit and depth to what you say. Perhaps my view is simplistic.

I know we want neutral regulation. But one person doing his best will need help from the community, which naturally won't encompass all, and has his own personal prejudices and biases. Though we don't want to admit it, we all have biases and prejudices. Into this flawed atmosphere enters one person to regulate, and he does the best he can with virtually no resources.

What a strange thread is going here.It takes "guts" to quit the ARRL and turn in your VE badge? Strange to think it takes courage to quit.

Things change,amateur radio changes,those who don't change are left in the dust.

So

WAHHH WAHHHH BOO HOOO we will miss you.Just go ahead and take your ball home and don't play with the rest of the kids

True and good to see him nailed.But somehow
from my mis guided traveling brother it sounds strange.

I remember hearing for years,two hams from the memphis area a few miles apart
with massive signals acting as if the frequency was not in use and talking
over ongoing qsos

Remember to treat other on the level and be square with them.

What we plant we reap.

....

This newsgroup seems to be populated by two distinct groups - bitter
old men, and snot-nosed teenagers. Where's the middle aged firmly on
middle ground?

I'm 40, and just passed my Extra. I could have passed 4B and waited
til April 15, but I did 1C the old fashioned way because it gave me
satisfaction. It did NOT make me a superior being...

I support the restructuring because it was necessary for the survival
of ham radio at a time when "under-utilized spectrum" is being auctioned
off to the highest bidder. I enjoy operating CW, but as anything other
than a nice, quaint pasttime, it is obsolete (i.e. not used commercially
at all anywhere).

Many of the smartest E.E.s I know are Techs, while some of the biggest
buffoons on the air hold Extra tickets. Obviously, the ability to copy
20wpm Morse code has done nothing to "weed out" morons, and it is
certainly no measure of operator "class"!

Source record: 115089

In article <20000403145108.28474.00000732@ng-fw1.aol.com>, rfcommsys@aol.com (RFCOMMSYS) wrote:

What happened to 14.313 and 3.950?

I can't tell you what happened to 3.950 since for me it holds little or no interest but 14.313 is a different story. I was the one who made it interesting; I was the one who made it funny; I was the one who added spontaneity and several of the Howard Johnson 28 flavors. And I never used foul langauge, never told off color stories, never did NUTHIN' but add interest, spontaneity, fun and several of Howard Johnson's 28 flavors. And it's over for me on that rotten megahertz trap now manned by the most boring finks to ever spray spit into a microphone. When I got a letter from Riley which had the tone of his going after someone who had been cited for intentionally interfering a dozen times, which reflected his condemnation of a real dyed in the wool radio criminal instead of an innocent bigmouth which is what I am, I said, "That's all she wrote." As the great Margaret Mitchell wrote, Gone With the Wind." Anyone with any personality whatsoever,stupid enough to stay on the frequency, is not playing with a full deck. Why in the name of common sense should a good ham put himself at the mercy of a group of power hungry maniacs who feel they have Riley Hollingsworth in their pocket? And I was there to see the WHOLE NINE YARDS my good man and to see those misfits who for years carried on like lunatics now in the a position to influence Riley, that's too much. I and others think this way: we'd rather lose a frequency than out tickets, period. I call the creeps on .313, "Hap Holligans" because their main thrill in life is to read and discuss the enforcement issues presented in the R.A.I.N, reports and to discuss them in such a way so as to cast all inference of dirty dealings away from themselves onto others. These "Holligans" feel they're Riley's boys and I say they just might be, unfortunately. What once was a wonderful frequency, even TONED DOWN, is no longer that. It's boring and lousy with washerwomen like Seymour, WA9KJB and Bob, KB4MXL. Listen if you want to either learn everything about nothing or nothing about everything. P.U.

> equipment or you would be in that report too.

Tolassi, I know you are illiterate, and mentally handicapped, but my FT-
920 is fairly new, bought brand new in December, 1998. So is my Antron
Power supply and I have a new outboard (That's external to the radio,
stupid!) antenna tuner.
Now, it's obvious to this newsgroup that you are a world-class idiot,
and even more obvious to those who would have the displeasure of
hearing your effeminate voice on the air and hearing your uneducated
opinions that you are an idiot. From what I understand, you are running
a used Kenwood from the 1980's. Compare and contrast your backward
technologied rig to one that has DSP, etc, (I know this is asking a
lot out of you, mental midget) and decide. Alternatively, get someone
near you who has some mot of intelligence and have them do it for you,
dumbass.

No, Tolassi, you received at least TWO letters concerning a RETEST. And
I saw several other letters on your harassment of Fred Roll.

Additionally, the letter was sent to the first name on the letter,
N8WGM. It concerned the two of us NOT taking our personal dispute to
the air.
I quote:
"The purpose of this letter is to caution you both to review Section
97.1 of the Amateur Radio Service rules, and to make certain that
whatever disputes that may exist are not carried over to Amateur Radio
Frequencies."
No mention of any Warning as per a normal warning letter is on the
document. Too bad, Dimmy.

If you are looking for equipment, or have something you want to trade or sell, our new message board will email you when you have replies to your ad's. This will keep you informed so that you do not have to keep checking back to see if anyone has replied to your advertisement.

You can scan down and look at topics, create your own topic of discussion without have to read the entire message.

Like I said, if you have something to sell, something you are looking for, or just need help or information, place your add on our new message board, and when you have a reply, you will be emailed and told who replied to it.

Just go to the CB City Website at "cbcity.com" and click on "Msg Board" and it will take you to where you can post or read the Swap-Shop Advertisements.

We have had one of the most visited Swap Shop message boards on the internet, and have seen a lot of sales take place.

Come on by and check it out, you will be glad that you did.

Our URL is in the header of this message, some come on by.

>Forte Agent allows sorting of incoming group by thread, subject,
>author, date or size, and most don't show the tree structure.

Well, my postings, the posting in question, and most other postings
in the newsgroup ARE threaded, which is controlled by the References
header line. Some people may choose news readers that don't understand
the threading, or don't display it - that's their choice. But many
people DO pay attention to the threading, since it helps make sense
of the flow of conversation.

So it would be incorrect to assume that ALL readers see the threading -
but equally bad to assume that NO readers see it. I would suggest that
if you really want to post an article that doesn't fit into the normal
threading tree, either move to the point in the tree where it *does*
fit, or delete the References header line entirely so it doesn't appear
as part of a thread at all. Better to provide no threading information
than to provide incorrect information.

No. At no point in time does the satellite know where the ground
transmitter is with respect to the satellite. That would be a
directional fix.

>I stated a direction IS RESOLVED from the satellite.
>You agree don't you?

A position is resolved, and a direction can be calculated.
This process takes examining the signal over time.
That's different from "taking a directional fix".

Coyotes is right, you can do it and it works well.
Just use a fuse close there to the battery, so if there is a short along the way to the radio, you do not have a GIANT fire.
Also, use 12 or 10 gauge wire. It will have a lower voltage drop over the distance you are carrying the current, and will make things work better.(it's really worth the extra trouble)

They got the Mother*&^ker its about damn time! I winder if they will ever get that slime ball loser that is throwing carriers on 3.901. We all know who that is. Is the FCC that afraid of that peice of crap? I mean that have caught the same trash doing this kind of thing and then going up on 2-meters and orginizing MORE jamming of the 75-meter band. I wonder when this loser will sell his TS-50 and broken dentron MLA 2500 to pay for MORE lawyer fees when the FCC gets him. HO HO HO!

If someone has the background to design and assemble equipment with
the goal of conducting on-air research, then they'll surely have
no trouble gaining the knowledge necessary for applying for such
a license, assuming the FCC feels their project is worthwhile.
Such a license was awarded last year to a group of hams conducting
progation tests on the newly proposed 5 MHz band.

>Ever get an experimental license yourself?

Never needed one. The stuff I build is legal for use on the ham bands.

280. Morse exercises No.17

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-04 00:00:00 UTC
From: DTC <dtc@muenster.de>
Message-ID: <8cbta9eep1@news.citykom.de>
Source record: 115142
Cross-posted to: alabama.birmingham.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr17_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr17_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr17_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

>laws against practicing medicine without a license, how would a
>malpractice suit be filed since technically only practitioners have
>licenses?

Good point... perhaps that was a poor analogy, but the unlicensed
practitioner would still be hauled into court... THAT's the point... and the
lack of a license would make for MORE charges not less.

>No, such licenses are there to protect the business side
>of medicine. Doctor-caused deaths and hospital-caused illnesses
>run around 1.5 million a year.

Medical licenses are no there to protect the BUSINESS.. they are required by
states as a means to protect the PATIENT... you must have the degree and
medical board certification to BE a doctor, the license allows you to WORK
as a doctor.

>The driver license senario is easier. Drive without a license and
>hit a pedestrian. Assuming that it was your fault then the pedestrian
>files the same charge as if you ran him over with a wagon or on
>a bicycle. If it wasn't your fault then you get charged with driving
>without a license.

...you lost me there... faulty logic. License or no the charges will be the
same and probably harsher for the unlicensed driver.

>I could have sworn that the FCC license agreement with amateurs
>stipulates that the FCC has a right to examine your station equipment
>as it wishes.

...Not in so many words.. it says only that "the authority granted (your
license privileges) is subject to the orders, rules, and regulations of the
FCC, the statutes of the US, and the provisions of any treaty to which the
US is a party, which are binding upon radio operators." The rules and regs
of the FCC DO stipulate that inspection is an FCC option, but it is NOT ONLY
for licensees... it is for any STATION licensed or not. Visit the FCC
website and READ this page... the url follows:
http://www.fcc.gov/eb/inspect.html

BE SURE TO READ THE VERY FIRST LINES... the FCC's authority and existence
was granted by and created by Congress.

>> >The public has no
>> >agreement with the FCC.

Oh no?..... go back to the above URL and reread.

I've no doubt of that. Administrative proceedings are the
rules of the agency for which they were written, obstensibly
following congressional desires.

Administrative proceedings use the rules written by the
agency for the agency to enforce the prohibitions and permissions
of the agency. Administrative processes are designed to take the
place of due process. Where is the jury? Where is the court?
It is not Constutional due process.

That is because administrative rules and regulations have nothing
to do with crimes against persons or property. The closest the
FCC comes to its congressional instruction is its original purpose
of regulating the airwaves for Interstate Commerce.

There may be some hams still around from the time when the federal
government decided to kick the operators off their preferred frequencies
and stuck them with higher bands that didn't work well with equipment
of the time. Did the do this to benefit the public? No, it was said
to be for commerce. Because a deal had been cut with RCA and
other lucrative contracts and Tesla was out of the way, the road
was paved for a rosy future. But first it was necessary to pacify
the public and force licensing in order to ensure control.

> legally defined term) to radio communications,

Understood. And is the legal basis of this is the Commerce clause?
That is, the interference with commerce across State lines? Or would
this drastic action be warranted because of security reasons?

Why not wait for the householder's return. Or call them or leave
a note. Sounds like imminent danger.

These were in effect in 1940? Special legislation was put in place
for both wars that dealt with the general public.

I'm not suggesting that there is an 'exemption'. I said, in so many words,
that amateurs are held to a different standard, that they are expected to
know what is permissible as that is in part the purpose of a license.

There is no exemption unless there is a presumption of ownership.
And the presumption on the part of the FCC is that some part of
the federal government owns the electromagnetic radiation spectrum
and then makes 'exemptions' where there is no license.

>Your license however does specify that you, the licenseholder, will

What persons? All persons? Then these are rulings and not law.
This set of FCC rules sounds like the ones I alluded to. Obviously
they cannot apply to those who have no such equipment so they
must apply to those the FCC knows has this equipment, the
license holders.

>
> >The public has no agreement with the FCC.
>

So the FCC can obtain a warrant and enter any persons household
and search and seize and forfeit whenever it thinks it is warranted.

> Most qualified legal experts will disagree with THIS urban myth.
>

Qualified legal experts are precisely why the US is in such a
precarious position. Most citizens by far care little and know less
about interfering with radio waves. Like a busy intersection
without a stoplight, drivers learn to cooperate thus allowing
the traffic to flow. I've seen this many times before stoplights
were put in place, sometimes causing problems. This because
a programmed stoplight cannot adapt to un programmed
conditions. Such is the case with the massive body of law
and regulation. It develops and encourages dependency and
is not capable of adapting to conditions making justice a
theosphical theory and efficiency impossible.

What has happened to CB radio since the first days of licensing?
It got raucous and nasty, quieted down and emerges years later
as a workable system to the point where self-assigned numbers
and names serve as identifiers. A crude example since the frequency
is not very good for distance or local, the general public was never
involved and the only knowledgable people, the hams, never
invested their expertise to educate the CB users. But like the
intersection example, solutions do emerge without the need for
heavy handed law.

Yes, licensing is a piece of cake now (i.e. dumbed down).
Just got the following e-mail from Bart Jahnke at the
ARRL VEC for proof. It appears that a stream of idiots
scrambling for the new "No Brain Required"
licenses have back-logged the ARRL. I thought
restructuring was to move ham radio forward, but it won't
be these hams that do it because they're to lazy to accomplish anything.
Restructuring puts the word 'amateur' back in 'amateur radio'. You can bet
these "Give me something for nothing" hams are gonna move
ham radio forward. Yeah Right!

At 04:28 PM 4/1/00 -0500, Jahnke, Bart, W9JJ <bjahnke@arrl.org> wrote:

284. Anti-CW crowd is full of bullshit. Re: Proposal for "Comunicator" Amateur Class

Newsgroup: rec.radio.amateur.misc

Code haters say that CW is out dated and digital is all that matters in order for ham radio to move forward, but you code haters are a pack of fools and lack the ambition to move ham radio forward and accomplish something. The only people moving amateur radio forward are the satellite operators/builders and AMSAT. Amsat is light years ahead in digital. The ARRL and everyone else have their heads up their ass scheming ways to rake in more money. In 1987 the no-code tech was created for those who wanted to go digital. We were told it would be good for the hobby to have a codeless license. Well if digital is so important then why aren't the no-codes and *everyone* else using it? Fewer hams use digital modes than CW. Hams aren't using digital either because they're too lazy, or too stupid. Laziness and stupidity justify Restructuring. By refusing to learn and use something, you limit yourself. So how can ham radio move forward if we limit our selves? It can't move forward, it can only move backward toward CB. And that's what we're getting after April 15th, more CB! Most of you were talking on channel-19 in 1987 so you don't know how good the operators on the ham bands were back then. The bands got worse in the years after 1987. You'll get alot more enjoyment from ham radio knowing and using CW than you can without it. So don't talk any bullshit about how digital is the savior of ham radio when most of you sorry asses aren't using it and not even planning to. Just go back to rec.radio.cb where you came from and bullshit those people some more.

No no no. As a police officer the laws for traffic are 'state'
laws, not municipal or county. These agencies enforce the traffic
laws that are in the STATE TRAFFIC CODE. Also your license is
property of the state since the state is the one that gives you the
right to drive.

Had Elian's mother survived, she should have been charged
with reckless endangerment of a child. I've seen some full
of shit postings, but yours merits special attention.
Notice too how the fed are tip-toeing around the Cubans.
The Branch Davidian kids might still all be alive today
if the fed had exhibited similar sensitivities.

Simple. Riley ran 'em off the ham bands, so they all got computers and Internet connections. You can find most of the problem operators right here in this newsgroup, continuing their daily libel and defamation campaigns against each other. Same trash, different medium. Instead of a mic, they now use a mouse.

His name is Hollingsworth not Hollungsworth.
He's nothing more than a dictator who sits in his high and mighty orafice
and tells people what they can and cannot say.
We don't need dictators as presidents.
His unwillingness to take final action with the likes of seveal of the most
notorious jammers on 14.313 and 3.950 is proof to me that this guy has a
political agenda. How many warnings is this guy going to give out to 2Y, ART,
KJI and the rest of the nutcases who support the Clintonistas.
I remember his saying..."There is no free speech in amature radio."
Nonsense. In America there is no one who can say there is no free speech. See
the First amendment to the CONSTITUTION.

He is an appointee of and appointee of the Clinton administration. He is
tainted with the scandalls by association.
Remember. The FCC was involved in illegal jamming of a ham radio station
at WACO. The FCC presided over the selling off of some of the ham spectrum.
Hollingworth was reported to be invovled in that scam.
The situation the we now have in ham radio should have never happend. But
it did due to the inaction by the FCC. The FCC is responsible for allowing the
situation to get out of hand.

Hollingsworth as President?
How about NO, never.
We've had enough lawyers in the White house. Screw the lawyers who continually
screw the American people

Source record: 115158

Yeah and there's a new movie out with a guy who goes 30 years into the future with a ham radio. It's called Stabbed in the Back To The Future.
He gets on the air and is hit with a massive fine for transmitting on government owned frequencies 14.313 and 3950. He realizes that the Government is out of control and has taken over the lives of everyone.
He is then attacked by a senile old FCC enforcer named Riley Hollingworth and his new wife Janet Reno..
Jack booted FCC thugs armed with laser weapons attack annd destroy the QTH of this poor guy. All in the name of making the airwaves secure for the owners of the airwaves.
The Movie Stars Mel Gibson as William Wallace, a patriot who sees the danger of government run amuck and Kelsey Grammer as Riley Hollingworth the evil but somewhat comical enforcer who unevenly enforces the dreaded radio laws.
Special guest apperance by Charleston Heston who is trapped in this time warp and says to Janet Reno----"Get you hand off me you damned Dirty Ape!. ".

"Vincent Fiscus, KB7ADL" <vlfiscus@mcn.net> went on a illucid tirade in msg news:sej69tg3eop156@corp.supernews.com...
> Code haters say that CW is out dated and digital is all that matters in order
> for ham radio to move forward, but you code haters are a pack of fools and
> lack the ambition to move ham radio forward and accomplish something. ...

Narrowminded Grandpa Vince (troll) can only react as typically happens in situations like this, he feels threatened, feels that he is losing something, and has to defend since he lacks the intelligence and self-awareness to see alternatives. Human nature is pretty consistent, we hate change and fight anything new or different, from wanting to hang onto the "world is flat" theory, to having organizations like the KKK to "protect" our racial purity from "infiltration". His mindless ramblings are just another form of "there goes the neighborhood, undesirables are moving in", or "the sky is falling". The more we evolve past the blind pre-programmed, inherited behavior of humans as animals, the more we can move forward and see other options.

As an Extra, I would like to have some distinction between an Extra that had to earn his stripes under more stringent requirements and the new Extra "Lite". However, I see the dropping of CW as a positive thing to allow others to use modes that the majority uses anyway and that they are restricted completely from now. I also realize that my wanting to have something like an "Extra Plus" is also purely a human frailty, I want the recognition.

Once again, I offer this for entertainment...

Once again, prevailing thought has called upon the canned HAM to respond. In light of the recent FCC testing requirements changes, those self appointed to protect our rights have used the airwave soapbox to decry the injustice of it all. A recent satirical "test" was passed around, but the CannedHam used his ample snout to root out the "real" test and found this ripe truffle. He presents it here for your pleasure:

Fred
N4IXL

FCC EXTRA CLASS LICENSE EXAM

1. A change long lobbied for is announced by the FCC, do you:

a. complain miserably on every band for which you have access
b. stock supplies in preparation for the obvious end of the world
c. make sure everyone knows how hard things were when you first became a ham
d. all of the above

2. Proper testing procedure should include:

a. the ability to solve a triple integral equations and Fourier transforms
b. the design and construction of an entire HF rig using tubes
c. the ability to send 30wpm cw using a foot paddle while standing on your head
d. all of the above

3. The FCC moves to another letter in sequence denoting new hams, you must:

a. Listen for the new calls and let them know how long you have been a ham and that you are a higher class
b. Coordinate with your buddies to not respond to these "appliance operators"
c. Make sure to "educate" all the new calls as to the proper procedures of being a HAM according to you
d. all of the above

4. When you received your license it also gave you which rights?

a. omnipotence: your opinion is always right and there is no room for other, obviously wrong, views
b. your fringe interest such as QRP, CW, ATV, APRS, etc. must be imposed on others
c. to post and say controversial or extreme views and expect no dissention or debate
d. all of the above

5. HAM radio should always maintain the same set of rules since Marconi because:

a. You had to do it, so should everybody else
b. We wouldn't want to ruin the neighborhood by letting all those lazy CB rejects into the hobby
c. You can't possibly be a good HAM radio operator without an EE degree and 20wpm code skills
d. all of the above

6. A good way to assert you opinion is to:

a. say and write vile right wing diatribes but laugh or put a smiley on it and say is is a "joke"
b. hang out only in groups of people who believe as you do to reinforce your opinions
c. let everyone know that it is not an opinion, but rather a fact and only an idiot couldn't see that
d. all of the above

7. The HAM radio motto is:

a. intolerance, self-righteousness, arrogance
b. exclusion, close-mindedness, bitterness
c. conservatism, the Klan, the NRA
d. Veni, Vidi, Vinci

8. The recent "proposal for change" in rulemaking has asked for the following:

a. reciting 500 memorized stories, chants, and formulas in a dark, candle lit room to 12 hooded elders
b. electric shock therapy for any question missed regarding Q signals or pro-signs
c. skills test showing the ability to solder 50 surface mount components in 5 minutes
d. proficiency in setting up a remote mountain top station using magnet wire, chewing gum and burlap

9. The proper way to maintain your skills as a HAM are:

a. troll newsgroups and nets to learn clever catch phrases like "appliance operator" and "codeless tech"
b. get on 2m repeaters and use Q signals like "QTH" and "QSL", and terms like "ROGER" and "OVER"
c. put down others so that you can appear to be above them without actually having to elevate yourself
d. all of the above

10. When you first became a HAM radio operator

a. You aced all exams without a missed question, could send 30wpm CW, and built all of your own equipment
b. You had to walk 20 miles in a blizzard, at night, with a broken leg to take your tests at the FCC office
c. You didn't have to worry about those damn parasites that didn't have to pass a code test
d. Marconi was still a Novice

The "Canned" HAM

Anyone remember KB6IO, Milton F Brewster III??
His last recorded entry in a callbook was 1993.

He is still on the NGs but is a little extreme, skewed
towards the left-wing.

I am just curious why anyone would drop a license,
especially an Advanced license. There is no record
of him currently being licensed that I can find.

>using CW than you can without it.

A simple solution Vince. Simply use only CW. A number of ops are doing that these days. Those awful new codeless hams won't be able to bother you... (Unless you keep hanging around these newsgroups. But heck, that's what makes the place fun. And that's why you stay here isn't it. Cmon, admit it...)

>And with two direction components - you have
>a fix. Simple idea - Simple math - simple system -

But it's not how the ELT location system works.

Ultimately, you're trying to establish a *position* for the transmitter.

You can do this by taking angular bearings from several locations, and
then see where the bearing lines cross. That's how much land-based
radio direction finding works.

You can find a position by measuring absolute distance from a set of
ground stations using the time it takes radio signals to propagate
from one to the other. Once you know the distance from each ground
station to the target, you can draw a circle of that radius around
the location of each station and see where the circles intersect.
Simple in principle, but requires precise time sync between transmitter
and receiver.

In practice, this is actually done by measuring the *difference* in
time of arrival, not absolute time of arrival, of radio signals.
For any two fixed stations, a third station that sees a given time
offset between signals from those two stations must be somewhere on
a hyperbola of constant time offset. Use 3 or more stations in
pairs, and you get 2 or 3 of these lines, and the intersection tells
you where the unknown station is. This is how LORAN works, and GPS
is very similar.

But the ELT-finding system uses non of these methods. It uses the
moving satellite and a ground receiver to measure Doppler shift of
the ELT transmitter. For a given instant in time, the locations on
the ground that can have a particular Doppler shift as seen by
the satellite forms a particular line along the ground. But as the
satellite moves, the Doppler shift changes, and the shape of the
line on the ground with that particular Doppler shift also moves.
There will be only one point on the ground that gives the *particular*
pattern of change in Doppler shift seen from one or two continuous

satellite passes.

So the system can establish a position on the ground, without ever having the ability to take a directional fix at any instant in time. In fact, the satellite doesn't even have any measuring equipment on it - all it does is receive the signal at one frequency, translate it to another frequency and retransmit it. All the measuring electronics and computation hardware is on the ground.

If he's in a 1993 callbook, but not after, and since his license didn't expire until 1997 (March 31 to be precise), then:

1) He's dead, or
2) He got his license yanked.

Both are good reasons why he disappeared.

Don't waste your time. The 847 is not made with AM in mind. You would
have to do some major surgery to make it sound OK.

> and increasing boradcast band sensitivity.

May be worthwhile for some, but doesn't blow my skirt up.

Two mods that are of interest are 1) adding a solid state output for key an amp, and 2) adding a separate antenna jack.

The first is undocumented as far as I know; I just figured it out from the schematic. I wanted solid state switching for my Alpha 87A, so I just added an NPN transistor to the switching circuit that controls the reed relay (just to invert the switch) and added an RCA jack on the back panel for it.

The second is well documented, and moderately difficult. I haven't done it yet, but intend to.

Here is a website with 850 mod information:

http://www.geocities.com/CapeCanaveral/1138/850mod1.html

>> of the Nazis? The German public liked Hitler. Hitler even
>> had a huge support in the intellectual community.
>
>He also had many opponents, who were to scared to say anything!

1==> What percentage is "many", and how could it be proved? When
things were going well, he certainly had plenty of support. After the
war was lost it would have been hard to find many who would have
admitted being supporters.

>> For the most part Hitler, like Clinton, tried to appeal to the
>> establishment moderates of his society.
>
>No he did not. He tried to appeal to the nationalistic thugs, not the
>moderates!

2==> Sorry, but he seems to have had great support from most of the
population.
>
>> His propagandists even were trying to make him out a savior (their
>> were paintings of him looking like Christ).
>
>Many believed he was at first, however they quickly figured out the
>truth!

3==> Well, as far as anyone can tell, the overwhelming majority of the
German population supported Hitler. We can only judge by what they
said and did. There is, of course, no way to tell what anyone
actually thinks.

During the inquisition, I suppose that the RCC had a lot of support
too. If anyone had any reservations most kept quiet about them.
>>

>> : > In truth, Hitler was a step from what they had experienced
>> : > under the socialists.

>> The previous administration, before Hitler, was very socialist.
>
>The Weimar Republic was not "very socialist". It would be fair to call
>it left wing, but not to the degree you are suggesting. The government
>was hated by the extreme left.

4==> Am pretty doubtful that it could even call it particularly left
wing, but this, of course, can be hard to define. A lot of Americans
thought that President Franklin D. Roosevelt and his "new deal" were
both very "left wing".

Many Americans today think that universal medical care is a "left wing
socialist plot". According to 1999 World Almanac, in 1997 over 43
million Americans are not covered by health insurance.
>
>> And very restrictive.
>
>Nothing compared to the restrictions under Hitler!

5==> Depends on who you were. Certainly there were increasingly
severe restrictions on Jews, but the average German didn't seem to
feel very restricted.
>
>> Hitler was actually considered to be liberating.
>
>For a short time, until people figured out what he was really like!

6==> Um, what percentage of the people and when? ...Again, we cannot
get inside people's head to find out what they really think, but he
certainly seemed to have plenty of support. ...Of course, when ones
children belong to the Hitler Youth and report any deviation to the
Gestapo, one would keep ones opinions to oneself.

>>
>> : > Germany, even today, is a society that is very homogenous.
>> :

7==> Are you two talking about violation of social norms or violation of actual laws? As I understand it, Germans are great ones for rules and insistence that they be followed. For example, it is illegal to litter in Germany, England, America, and Australia. However, have been told the difference is that in Germany the person littering will be challenged or reported, which wouldn't usually be the case in the other countries.

It isn't a perfect world, and no matter what the system there will
always be some mistakes. The only way to eliminate the extremely
small percentage of mistaken raids is to eliminate all raids.

I somehow doubt that American or Australian or British cops go around
kicking in doors on a whim.

>Bill Nelson (billn@peak.org)

Hi Bill -
HOw can you justify that statement
when the equipment being tracked
does not have a means of providing
any feedback?

A time measurement depends upon knowing when
the signal is transmitted.

An ELT (or CB if we are still in that box)
is a transmitter that is not coupled into
the system. Unlike a DME or GPS or radar transponder,
the transmitter is just sending a signal.
Any other station has no clue of the
timing or phase lag or anything
else regarding the signal. If received
from a satellite - the dopler shift of

the satellite's receiver (with respect
to the transmitter on the ground) can
be measured by an analysis of the satellite's
rebroadcast of the signal.

A time delay measurement would require
the analysis of the transponder signal
to have knowledge of the actual time of transmission.
This is information you don't have from an ELT
(or CB, or ...)

Where you getting this data?

Best regards
Gil

330. Give Riley a Break

No question he has made mistakes. No question he sometimes confuses the good guys and bad.

Still, lack of respect for Riley Hollingsworth, Esquire, is folly.

Here's a regulator who cares about the future of ham radio and is making a herculean effort to guide our service/hobby into a peaceful era. Insisting that fighting words be kept out of ham radio, he appears to be moving against anyone who is so prone.

It is my fervent belief that If we respond to Riley compliantly, we need not worry about what frequency we go on. I hear: "Stay off 313 but 275 is OK." With no intention of fighting, why should I give up one frequency for another?

Personally, I have confidence that I'll have no trouble with enforcement. Instead, I believe Riley will act against anyone he senses is intentionally causing trouble, which includes anyone involved in setting up others.

I realise that Yaesu did not put a lot of effort into AM when they designed this radio, but I'm getting what I think is unusually weak AM modulation. Others that I have contacted on the radio are reporting a strong signal, but have to turn up their volume and listen hard to actually hear what I'm saying. That cannot be normal, no matter how bad the AM section was set up.

Actually, I've had the radio for several months, and have never used the AM mode. A friend, an older ham that is addicted to older AM radios, was the first to discover this problem when he wanted to talk to me using one of his older AM rigs. At first, we thought his older radio was the problem. But after a check with a couple of other operators, with newer rigs, we finally figured out that it was my radio with the problem.

At this point, it looks like the radio is headed to Yaesu for repair.

By the way, several people have suggested the mods pages around the internet. None of these, so far, seem to have any info that would help. The hidden allignment menu does not seem to have anything to adjust AM modulation, at least not that I could find. If you know something I don't (not hard), let me know.

rfimitter,

There is a great deal of difference in acting as a regulator and bringing a Court case. The former can be fired off in the form of a letter on mere suspicion while the latter takes legal resources to make and prove a case at law.

Being one person, Riley Hollingworth, Esq. is acting almost wholly by letter, often on flimsy documentation. Even if he is wrong, we need only act in good faith to avoid the complained of behavior.

I believe that cooperation, not counter-productive argument, is key.

KE6NIJ,

Actually, it's improving from the time I came on here a year ago. I am so proud when I read great ham opinions, sufficiently so that I wade through the rest to find them.

After all, this is a free speech forum where every shade of opinion needs representation: e.g. ignorance, hate, prejudice, trolling, flaming, etc.

I am also thrilled at the growth I sometimes see around me, not to speak of my own, ha, ha.

>A position is resolved, and a direction can be calculated.
>This process takes examining the signal over time.
Buzzz - wrong .

Nope - only one point - where the dopler transitions
as the satellite passes from being behind to ahead
of the transmitter.

The only examination "over time" is to listen
to the signal for the instantaneous shift that occurs
at the point the satellite is in line. That point does
form the direction. The transmitter is exactly
below or abeam of the path of the satellite.

>That's different from "taking a directional fix".
That is a direction in its purest form.

> freedom?

Look, neither you or I know why she decided to head for America. It was certainly not because she was poor - she lived a middle-class lifestyle in Cuba. And it was certainly not because of political freedom - her husband was a member of the government (which didn't stop her from marrying him).

I tend to think it was an effort to get at her husband. She wanted to do the one thing that would hurt him the most - take his child and leave the country. But, who knows what the real story is?

> Since when doesn't this country recognize
> the valiant attempt at escaping from oppression?

Man, you're still living in the past. The cold war is over. Some of the worst governments in history are now our close allies and trading partners. It is silly to fuss about oppression in Cuba while we do business with China every day.

> Next, how about the theologic angle? Consider
> this: that little boy can now go to
> church. I assume he's a Roman Catholic
> as are 99.9% of Cubans and now he can
> go to Mass without Fidel's sonofabitch
> red secret police watching who enters
> and leaves churches.

Nonsense. There is not any evidence of any person in Cuba suffering any hardship cause by attending church. Again, more cold war rhetoric.

> Thirdly, since the Mariel boatlift was
> encouraged and since we hardly ever
> send back illegal immigrants from the

> Caribbean and Mexico, why then does
> the State Department have such a "thing"
> for little Elian's return?

Because the boy is six year old child. He is too young to make such choices for himself (he didn't come to America, his mother made him come). The boy was born in Cuba. His friends and classmates are in Cuba. His teachers are in Cuba. His father is in Cuba. Everything, and everyone, he knows is in Cuba.

I think it is an outrage that some people within this country would attempt to keep him away from everything that he knows, and is familar with, all in the name of cold war politics. If you don't like Castro, take your fight to Castro. Leave this little boy out of your petty cold war games.

> <snip> By sending that kid back we play right
> into the hands of the bearded one and we suffer
> a black eye.

By sending the child back, we comply with both US and international law (laws that we worked hard to put into place). We have no legal right to hold this clild. The relatives in Florida have no legal right to hold this child. In fact, were his father to to come to the US, I feel certain that he could press kidnapping charges against those holding Elian. If our government were to agree with those now holding Elian, related charges could be brought in international courts.

And don't give me this liberal versus conservative bullcrap. I'm a dedicated conservative that believes that family is important - even more important than politics. And I don't fight my battles using a young child as a weapon.

No one's shrugging off a sad anomoly such as that. But take
the number of such events, divide by 248 million, multiply
by 100, and toss a percent sign on the end. When such events
become greater than 0.0000001%, then it's time to panic.

> him back, and EXPECT to have him returned? I rest my case.

This is the key to this whole debate. It was exactly because of this that international law (laws we advocated) were established. These laws were designed to protect our children just as much as they protect other children around the world. They were designed to keep countries from using children as political pawns.

These same laws are also supposed to protect Elian from being used as a political pawn by the people holding him in Florida. By returning him to his father in Cuba, we are showing the world that we respect the law. More importantly, we would be showing the world that we are better than someone that would use a child as a weapon in some petty cold war.

And, even more important than that, we would be doing what is right. We would be returning the boy to everything that he knows (the friends, classmates, family, neighbors, teachers, schools, books, television, and everything else that he grew up with). In other words, we are returning him to his home.

>Still, lack of respect for Riley Hollingsworth, Esquire, is folly.

"Lawyers Suck" the life out of every society they prey upon. They entangle themselves in government for the power it gives them and they then pass laws that will benefit their guild brothers and sisters. Esquires are of title and as per the original 13th amendment, should never be allowed in government. Including the FCC. The Founding fathers knew about CONFLICTS OF INTEREST.

Lack of respect---Folly? Respect must be earned.
Not forced upon anyone.

>Here's a regulator who cares about the future of ham radio

Ask Hollingsworth about his involvement with the sell off of some of the ham frequencies a few years back . He seems to care not for ham radio but for the commercialization of the ham frequencies. Especially the VHF and UHF segments. Get those guys off the UHF & VHF segments by dropping CW requirements. .

Hi all.

I'm looking for a Collins 312b-3 speaker, or a 516F-2 cabinet that I
can put a speaker into. Need not be perfect condition, but not dented
please.

Thanks in advance, and any/all leads are gratefully received.

Hmm, I wonder, how tough is the Enigma algorithm by todays
standards? I know, not secure, but just for S&G I wonder if
anyone has implemented it in software, and if some of the
intercepted comuniques are availible in unencrypted form.

If memory serves, wasn't it basically just a substitution algorithm? It was complicated by first 4 then later 5 decades of offset, which, given the computing power of the time (all human), rendered it relatively indecipherable, but if you put a Pentium on it today, it ought to be duck soup to work out all the possibilities.

Here are two Java-based Enigma simulators, with class libraries if you
want to build your own. There is also a pointed to original German
Enigma messages.

That's a bad break. Now the Jerry's will know that we have it and change their code. I thought they only kept them at Blechly Park? Who got one out of there? Churchill is going to be pissed along with Roosevelt. Does that meean D-Day is postponed or are they going ahead before it was scheduled to? You shouldn't have made a posting out here and the press shouldn't have said anything because it may be only held by someone who thinks they only got a typewriter. Now the Jerry's know we have it. I hope they shoot you and the media for TREASON!!!!!!!!!

Yes, there are some simulations of various enigma types (railway, army etc) available from the net. I forget the URLs but try a search. With these you can set the wheel settings and start point and view the plain text, encrypted text as well as the rotor connections moving.

FS quantity 4 Varian vzj2700d4 3kw klystron hpa's. complete and operational with solid state ipa's and 80 dB of gain. wr-137 input and output. 20 dB manual attenuator. 208 volts three phase. Full metering: beam voltage, beam current, body current, reflected power, forward power (4000 watts), drive power, filament volts and current, beam and filament hours. Many spares including klystrons,
filament and beam transformers, 3 phase autotransformers, meters, wiring harnesses, and more.
These amps have either 12 or 24 channel tubes and will make >3kw across any 40 mHz. bandwidth.
Higher power outputs are easily obtainable with reduced bandwidth tuning of the klystron. The tube is a Varian va936 series, 5 cavity. Typical operating parameters are 8kv@1 amp with PO about 3 kw. I
have operated the amps at 8.5kv with output near 4kw. The beam power supply is variable from about 4 kv up to about 10 kv. The amp has arc detection and shutdown, as well as an output isolator.
For more specific information please e-mail or phone. SERIOUS INQUIRES ONLY! THESE ARE NOT TOYS!

Yesterday I made reference to the 14.313 yentas, washerwomen and instigators as "Holligans" based on their predilection for "studying" all those enforcement letters from Riley which are immediately posted by Hap Holly on his www.rainreport.com/ and then getting on that miserably corrupt frequency to sanctimoniously and piously state their cases against anyone so targeted. It's like the National Enquirer of amateur radio. And so here's something to contemplate. Being that the enforcement letters are seen worldwide and neither Hap nor Riley have any reservations about allowing the smearing of anyone who might get in enforcement's way, whether deserved or undeserved, how about Hap offering equal time? Allow me to explain. As far as I can understand it, freedom of speech is theoretically dead on .313; I think it was Riley himself who stated that it doesn't apply to ham radio. It's a bitter pill to swallow but why must it also apply to Hap's website? Our rights are also going by the wayside on the Internet? Is this acceptable to you? It isn't to me. If Hap offered equal time, I estimate the preponderance of hams wouldn't bother replying because the majority have been CAUGHT IN THE ACT and that's that. But how about those poor souls, me included, who are guilty, guilty, guilty without being guilty? Hell, even QST picked up on my case by publishing Riley's remark that I never disputed the charge. What ridiculousness-I was NEVER ASKED TO REPLY BY PHONE OR BY LETTER BECAUSE NO EVIDENCE WAS EVER OFFERED BY TRANSCRIPT OR TAPE OF MY INTERFERING WITH W4FQF and KB3MXL! Of course I replied to Riley-he has the authority and deserved some type of reply-but I didn't stress the charge of jamming because of lack of evidence. To what was I supposed to reply? "The Commission has evidence that.....?"What kind of evidence? E mails from biased "Holligans?' The Herbie crowd? The anti-WB2OTK crowd? Anti-Semites? Oh heck, let's skip it; enough of me- I'm posting this on behalf of others who have been wounded by conspiracy. Take Fred Roll for example-a nicer guy you'd never want to meet on the air or off. The guy gets "whacked" for blowing up at David Tolassi? For God's sake-at Dayton Fred had enough on that Vermont cockroach to put him in the hospital but Fred chose to shake hands. And what does the Green Mountain Greenhorn turn around and do? Mock him some more on .313 and FRED GETS WHACKED? Talk about injustice and rash improper action on the part of enforcement! Had the Commission taken that Green Mountain crazy s.o.b. off the air years ago for jamming, tape playing and annoying Intercon, there never would have been a reason for Fred's anger. I was privy to tons of harassment and slander thrown at Fred by Tolassi for a DECADE, and Fred gets whacked? Damn, it's enough to make one lose faith in the justice system! Had Hap given Fred the chance to explain before a WORLDWIDE audience, I'm sure he would have. And to add insult to injury, who's on the air boasting about the "downfall" of Mr. Roll? You guessed it."David Toiletsi, King Flush." And let's take the situation with Rich,WB2OTK. When Riley's last letter was up on Hap's screen in the blink of an eye, I began getting E mails and phone calls having the same theme, ?"You

got nailed because you support Rich. Are you satisfied?" My answer? I STILL SUPPORT WB2OTK! Riley offered him a break last year but Rich rejected it without really thinking it over. Riley got angry and Rich got frustrated from applied pressure. He typed an E mail to Riley resigning from ham radio. I and others talked him out of sending it. Rich then agreed it would have been wrong, tabled it but didn't DELETE. Uh oh! His wife that night sits down at the computer and by accident launches the missive Riley's way and wham. Riley accepts it although speculation arises on the legitimacy of leaving ham radio by E mail. Mrs. Whiten swears before a judge that it was SHE not her husband who sent it. Riley still accepts it because in my opinion having Rich off the air helped his agenda of putting a cork in 14.313 and 3.901. Rich could get back on by re-testing but he refuses since he tested before the FCC to begin with. The protracted stalemate begins with Riley holding all the cards. I wrote Mr. H. on behalf of Rich and many feel I stepped in it because of doing so. My reply: it's my life; I don't turn my back on friends and if you don't like it, take a hike! Now before you go off half cocked convinced that I'm anti-Riley and anti-Commission, allow me to clarify my position. You are mistaken! Before Riley showed up, things were OUT OF HAND and I myself openly admit that AF2Y most certainly was part of the problem and not the solution. I went overboard making it all too obvious about whom I liked and despised. This was admitted to and apologized for to Mr.H and I haven't had nor will I have an argument on the bands ever again. Riley told me, "Enjoy the hobby" and by God, the man was 100% on target. However I dispute all allegations of interfering with anyone, period! On the plus side, how can anyone fault Mr.H. for nabbing persons having a pocketful of callsigns under false pretenses? How can one fault Mr.H. for nabbing and eliminating persons who got their licenses fraudently? How can anyone fault the man for nabbing jammers in the act and removing them? We're talking about punishing true blue radio criminals and that should be applauded however enforcement can suffer the same stigma as individual hams who are more part of the problem that the solution. It can err; it can be unfairly excessive and those hurt by it should be afforded the same right to put their defense before the scrutiny of hams worldwide as does the Commission its offense. I like Hap Holly, the man. Having had a QSO or two with him, I appreciate his forthrightness and courage proving that even one handicapped can come to the forefront of our great hobby/service. By and large, his website is excellent and interesting. Now all I ask is that it it be FAIR.
73,
Doc,AF2Y

rfemitter,

Notwithstanding the validity of your comments on the legal community, you cannot stereotype everyone under one umbrella. As to spectrum sales, how can you hold that against someone acting in a ministerial position for an agency of the U.S. government which gets its cues from Congress?

What does the RF waveform look like on an oscilloscope?

Using AM with no modulation, you should see a carrier of constant amplitude. Modulation causes the amplitude of the RF waveform to increase in some places and decrease in others - the "envelope" of the waveform is actually the audio signal. 100% modulation is defined as the point at which the minimum amplitude of the RF waveform reaches zero. You want to avoid 100% modulation, but you should be able to come somewhere near it.

If the modulated waveform shows only small amplitude changes, the modulation level is way below what it should be.

Oh by the way in case you're interested in WB2OTK....no one knew about it except Riley, me and a few of Rich's closest on -the- air buddies. When the conflict arose between Riley and him and in disgust, aggravation and frustration Rich composed that "goodbye to ham radio instead of arguing letter," there was something FAR more important on Rich's mind than ham radio. It was called BREAST CANCER. It's frightening to hear those words, isn't it folks? Mrs. Whiten was diagnosed with a suspicious lump in that area and being that cancer has been in her family.....well you put yourself in WB2OTK's place. I'd say he was very very upset, distraught, anxious and preoccupied and YOU'D BE TOO! I think it's proper to lay off someone who'd tend more to cry than to yak on a mic, don't you? Remember when I was at odds with Tom, KE9RY and mad enough to post some pretty facetious and mean things about him on this board because I felt I was wronged? I did and Tom called and admitted that he was being hurt emotionally by them and I STOPPED. I still felt used and wronged and insulted but I STOPPED because I felt for the guy and still respecting his feelings and I stopped for good. I'm not about to exacerbate his problems because I'm not like that and hopefully KE9RY knows it. I wasn't sure if Rich wanted me to post this info but I felt obliged to. By the same token we all realize Hap Holly is blind and I wanted no one to think that my posting regarding his website reflected anything but honest criticism rather than an attempt at picking on a handicapped person. Folks, in life sometimes you have to retreat in favor of someone's emotional and/or physical welfare but that didn't happen in the case of Richard Whiten versus Riley Hollingsworth. I honestly feel badly for Rich because a proposed thirty day suspension turned into a sixty day suspension which turned into a 120 day suspension and all the while he was precoccupied with his wife's health condition. Would that biopsy send a life or death message? Now you know why he penned that "enough is enough" letter which was sent by ACCIDENT. He wasn't trying to show up authority but rather reacting to stress compounded on more stress. Isn't a man in this position entitled to a mistake and be forgiven? How many times did he have to apologize to authority? Wasn't a sworn affidavit enough to convince Riley of his wife's accidental folly? A man who took his test before an FCC official is now made to re-test as if he didn't get his ticket legitimately in the first place?
How about it Hap? How about putting this letter on your website? I'm better with words than is Rich and that's why I wrote it but HE FEELS IT and has suppressed it while too many loose cannons on 20 and 75 who fancy themselves as having Mr. H. in their hip pockets gloat like all hell over his prolonged absence from the ham bands.
AF2Y, Doc

>Congress?
>
>Bob Sherin, W4ASX
>Miami, Florida

MY point is that all of Washington is beyond redemption. It's systematic.

Too much power concentrated in one area.

Too much of our money spent by career politicians who think they can tell the US citizens what to do.

Spectrum sales to benefit who?
Lots of money means lots of payoffs.

I wish I had the answer as to handle the use of valuable spectrum space.

I think that using that space for the best purpose is by far the way to go. If ham radio looses out, so be it.
But who decides what is the best purpose?
A buerocrat in Washington?
These guys couldn't even predict how many cell phones would be in use in 5 years. They were off by about 10 million.

Congress has not the intelligence or the wisdom to define who gets to use what.

They all have their hands out waiting for the payola from special interests who have their own ideas.

I'm just complaining about the way it's being done.

They have the ear of the FCC. These are hams not content with cleaning up the bands nor letting the past fade. Rather these comprise the status quo on 14313, a group out to destroy hams they dislike.

Now ruled by mob mentality, 313 is a frequency where individual opinion is not tolerated and to be accepted means caving in to the will of the group. Even hams known for their decency will throw in a barb during your transmissions to impress the group.

This morning I tried to break in to 313. Retorted a ham, "You're not welcome here." Then another weighed in: "He's a trouble maker." Before I knew it, a conversation was underway about how bad I was. (Mind you, I've been off the air for 5 years and have no intention of arguing on the air.)

The repartee went like this: "He sounds like Raincoat Charlie." "We have a qrmer on the frequency." "He's a fag." It didn't stay like that, because these hams signed out and I was picked up by KB4MXL and W2EXQ, who were very much gentlemen.

Of all the alleged trouble on ham radio, such behavior is unacceptably worse than much of what has been sanctioned thus far.

First, arrogating power over a frequency squarely violates Part 97, a transgression that is readily provable on its face. Secondly, you have a group of guys weighing in based upon no more than the lead guy's prejudice. And third, you have an ongoing train of talk among this group portraying the breaker, who did nothing more than say "break" and "W4ASX", as someone ripe for FCC sanction.

Having done investigative reports on ham radio's deepening difficulty for over a decade, I know that some who have gotten letters from Riley deserve them far less than some who are confidantes and otherwise esteemed. Moreover, more hams have been intentionally run off of 313 than remain there. I, for one, have no intention of abandoning a frequecy to which I'm entitled.

To the FCC: Can we even the playing field, so everyone who acts contrary to Part 97 is called to task, not just a few on one side of the body politic?

Well just a thought Doc? You sure get long winded.You got your fingers burned by Riley and you deserved it. Playing Hitler speeches on top of Bob and George got you popped buddy. Not once but TWICE, and now the bitter tears. Those of us who know and detest you realize you would normally have DEMANDED the tapes and what ever that the FCC had on you,instead you knew they could put you away and shutup. Good idea.
As for Fred Roll I had no idea his wife Rosey was in the truck when I asked him the queston, and I apologized and meant it. It's not my fault the bozo blamed me for his actions instead of standing up like a man and saying he lost his cool and would never do it again. Something you guys do alot.
Next: What about the things you have done the last decade? Driving WB4GDP nuts with you Holocaust rhetoric. Your comments that "may your holy water turn to hydrocloric acid" and your EVIL prayers broadcast on the ham bands. The way your buddies drove KA4MUJ to the brink of ham insanity. Condoning Pig Pen Pete and Roll's visit (packing weapons) to Mikes' QTH.
Not nice Doc. You got caught just like your friend in Easly. The B.A.R.F. won the war.
Also if 'OTK thinks he is going to come back and be the obnoxiuos bully he was, he is SORLEY mistake. You and your cronies are on the ropes and I for one are happy for it. Sign off Doc--Get another hobby

dtollasi,

Yes, I hear what you are saying, but I think Doc's role is epitimized in his own writing. Is it possible that your bias is so deep that you are unable to understand him?

Mind you, I am not trying to be disrespectful to you. Yet I see all too often how biases color reason.

For example, I knew the late Mike Gallego, KA4MUJ. His tirades were, in my view, the result of severe mental disorder. So sick did he sound that I was ready to take the car up to Fort Lauderdale to calm him down. I never got the chance. In retrospect, his mental state could very well have been connected with his death.

Let's not lay guilt trips on our fellow hams.

My wife had one of those enema machines too, but it couldnt translate
nuthin!!! I did have some fun with the machine and her poodle tho',
til is
busted!!! (the poodle)....now I use it for drilling holes in the back
yard
to put ground rods in!! M

Yeah, she wondered how you could be considered a man with the 10^-18
sized tool (YOUR atto-sex-organ, in other words). She said she made you
turn beet red when you couldn't get it up after 5 hours of trying. She
said at least she wanted something she could see without the aid of an
electron microscope.

Of course, we know this couldn't really happen, because you lack the
courage to even come by my house, don't you?

> Change Mommy's
> Pampers, they smell like they are full!

Oh, so YOU ADMIT having your nose in other peoples' rectums then?

BTW..I turned your e-mails in to the police today! Hohohohohohohoho
And I gave them a list of names, addresses, and phone numbers of who it

might be. Like (320) 283-5176. Wait..worry that it might be you that gets the knock on the door. Watch over your hunchbacked shoulders.. LOL!!!!!!

Now that was mean!

You just turned on all the cw-fanatics and gave meaning to
their lives!

Wait until they realize the _date_ it was posted! :-)

413. AF2Y: a Miami explosion?

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-05 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8cgmek$2n7$1@slb2.atl.mindspring.net>
Source record: 115070

How 'bout this one? All of you, hammer007 and other knuckleheads, stop to consider this. The Cubans especially in Miami are getting hot as hell over the Elian matter. There are lots of them too. Now suppose we begin to see a vision of let's say Watts or Detroit or Newark back in the '60s. Remember those garden parties folks? Burn baby burn and all that stuff amounting to many millions upon millions of dollars repairing the damage? No one wants to see anyone or any group break the law especially in riotous rancor but IT HAPPENS and it's going to happen again. Absolutely illegal and unjustified and in defiance of American law but it's going to happen not only down there but up here in Union City, New Jersey.
What then are we supposed to do about angry people going beserk? Did we gun down angry Blacks in the '60s? Didn't they riot, burn and loot but what was our response? Rat a tat tat with machine guns? You bet not. Do we shoot Mexicans coming across our borders illegally? No. And are we going to shoot rioting Cubans if indeed someone does set off the fuse? You bet not and a great city like Miami will sustain an unbelievable amount of damage. All who say that Casto has us where he wants us would be right if Elian is ordered home with poppa because we not would not only look bad in the eyes of a world which looks to America for hope but Fidel will get one hell of a laugh as cities go up in flames. Those who say that Miami Cubans are blackmailing the government by threatening riots are RIGHT but what's better-to see the bigwigs from INS stand up and beat their chests like King Kong proclaiming that NOBODY DICTATES TO US or seeing mass rioting especially when we will not use force of arms to stop it? Yes, if the Cubans knew that insurrection would be met with gunfire, none would be stupid enough to go off the deep end but that ain't the case hams and hamlets. Carter, Reagan, Bush and Clinton welcomed them in most cordially and now there's trouble in River City and a stupid, uncaring act by our government will make all of them rue the day when they beckoned, "Come on over." For those of you who've never seen beautiful "palmtreed" Miami, you're missing something. It's a magnificent place which I personally have delighted in visiting in addition to Miami Beach. You can get a great corned beef sandwich on rye along Collins Avenue. I'd hate like hell to see everything go up in flames and it just might happen. Miss Reno, the fire at Waco has been haunting you for years. Do you really need the additional flames of Miami?
AF2Y

be careful how you talk about Heir Hollingshimmler and his henchmen.
you will be hunted down by his OO-Gestopo lackys.
They will stalk you at your house and follow you in your mobile
waiting for you to make a mistake so Heir Hollingshimmler
can write you the dreaded letter which makes you guilty no matter what.
you must must must must not talk about anything that upsets
Heir Hollingshimmler or anything not approved by him
or the central committee. if you do they will "start a file"
on you and then your goose is cooked sooner or later.
the OO-snitches will see to it.

and never never offend an OO or he will report you and
you will see your callsign on the rain report.
be a good little stooge or they will sudden find out
you are a "jammer."

and all the arrl toadies shouted

"heil Hollingshimler!"
"seig Hiram! seig Hiram! seig Hiram!"

I'm 47, have BA, BS, M.Ed., Ph.D, extra call for many many years, lived and traveled around the world, speak two languages (curse in neither), and I'm not an ounce better than anyone else in any way. I have been able to take advantage of opportunities that others have provided. The restructuring will provide opportunities for many. I just hope that most get beyond the "hardening of the categories" and encourage the hobby to grow.

Strabo <strabo@flashmail.com> wrote:
>There may be some hams still around from the time when the federal
>government decided to kick the operators off their preferred frequencies
>and stuck them with higher bands that didn't work well with equipment
>of the time.

That was 1912; amateurs were restricted to the frequencies 1.5 MHz and higher ("200 meters and down"). Hams redesigned their equipment and discovered that the government had given them a gold mine -- they discovered that worldwide communication was possible on those bands that we now call the MF and HF frequencies.

>Did they do this to benefit the public?

Certainly. For example, it made transiting the high seas much safer.

>No, it was said to be for commerce.

And it *was* for commerce. Amateurs had to be segregated from the maritime and naval radio traffic, for, prior to 1912, it was a free-for-all -- amateurs intentionally interfered with ship-to-shore radio communications endangering the lives of all those on the high seas. Hams hindering the passing of Titanic-related traffic finally was the last straw. Radio law came into being. There are dozens of radio history books available which will document the total mess which existed prior to licensing; separation of the radio services *had* to take place.

>Because a deal had been cut with RCA
>and other lucrative contracts and Tesla was out of the way, the road
>was paved for a rosy future.

Whatever credibility you *might* have had just went out the Windows. RCA was created on October 17th, 1919, fully five years after amateurs were relocated up to 1.5 MHz and above. Prior to WWI, the only "broadcasters" were amateurs themselves; equipment was still very crude, most of it home-built. Only because of the World War did radio and electronics rapidly advance, permitting the concept of "broadcasting" to come into being. See "History of Radio to 1926," by Archer.

> But first it was necessary to pacify
>the public and force licensing in order to ensure control.

Nonsense. There was no concept of "broadcasting" which existed when radio law came into force in 1912; when radio was shut down in

1917 due to WWI, there was still no concept of commercial broadcasting.
None whatsoever.

>I have the advantage of not being a lawyer.

That's no excuse for not studying radio history.

>So a peculiar short in a powerline that causes interference
>an operator?

The responsible "operator" is the owner of that power line.

>Qualified legal experts are precisely why the US is in such a
>precarious position. Most citizens by far care little and know less
>about interfering with radio waves. Like a busy intersection
>without a stoplight, drivers learn to cooperate thus allowing
>the traffic to flow.

Poor analogy. In your intersection, drivers can see other drivers
and avoid interfering with each other. But as you pointed out above,
"most citizens by far care little and know less about interfering
with radio waves." Also, radio waves, unlike cars, are not visible;
an unknowing operator manning a transmitter can create a huge
swath of interference affecting aviation, maritime, broadcast, public
safety, etc. communications. Thus, a need does exist for government
control of the RF spectrum.

Your uncontrolled intersection with all drivers cooperating is a
fantasy; there will always be selfish drivers who will not cooperate,
leaving behind mayhem.

>conditions. Such is the case with the massive body of law
>and regulation. It develops and encourages dependency and
>is not capable of adapting to conditions making justice a
>theosphical theory and efficiency impossible.

Nice dream. It reminds me of the school of thought which says that
students have the ability to create their own mathematics necessary
to solve a given problem. That's like asking someone to build a
building without providing him the tools to do so. Give him the
tools, then he can build. Provide those students with the needed
techniques, then they can solve.

>What has happened to CB radio since the first days of licensing?
>It got raucous and nasty, quieted down and emerges years later
>as a workable system to the point where self-assigned numbers
>and names serve as identifiers.

Workable system? There goes your credibility again!

>A crude example since the frequency is not very good for distance or
>local,

A frequency is either useful for local or for distance communications
(and, at different times, both).

>the general public was never involved

Part 95 communications was/is open to the public.

>and the only knowledgable people, the hams, never
>invested their expertise to educate the CB users.

The FCC's Part 95 regulations were/are all that's needed to educate
those users: Power output limited to 4 watts, no external power
amplifiers, antenna must be no more than 20 feet above its supporting
structure and no more than 60 feet above ground, only FCC type accepted
equipment, no internal modifications permitted, no obscene language,
no interfering with others, no one-way transmissions, no music, whistling,
or other sound effects, no communications greater than 155 miles, no
communications with foreign users, et cetera. Many of the users have
ignored the regulations causing the channels to become utterly useless.
It's just like your make-believe uncontrolled intersection -- selfish
drivers, ignoring protocol, causing traffic-jamming accidents.

>But like the intersection example, solutions do emerge without the need
>for heavy handed law.

Your uncontrolled intersection has already had a dozen accidents today,
two of which were fatal, yet it's only 4pm. What until the drunks come out
after midnight.

Nope. Hundreds of thousands of refugees (Cuban, Haitian, Vietnamese)
are in the US, having risked life and limb in unseaworthy craft
in order to escape from their homelands. They've all been welcomed.

Listened to the CB and "freeband" to see just how bad things are. Here in Silicon Valley there's a fair amount of illegal freebanding heard.

Why do these freebanders use gimmicks like echo and beeps on their signals? Echo tends to ruin intelligability. At least on my reciever.

No, I meant exactly what I said.

The only method that is precise enough is to use time delays.

Each measurement provides a radius on which the object can be located.
But two measurements are not enough - as two intersecting circles will
have two points where they cross. Three measurements are required to
provide a direction. Four measurements will provide an altitude (if
such is desired) as well.

436. Windows HAM radio software at http://www.dxsoft.com

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-05 00:00:00 UTC
From: amx@i.am
Message-ID: <8cee6u$ll3$1@nnrp1.deja.com>
Source record: 115128

Hello, All!

I want attend your attention to our WWW-site -
"Windows HAM Radio software by the DxSoft grop"

URL is http://www.dxsoft.com

There are next software:

RZ4AG AALog HAM logger
Platform: Windows 3.1x/9x/NT
AALog is a comprehensive logger program designed for
amateur radio station operators. It has convenient
interface, good set of tools, fast and very easy in use. It
look like your paper log an use all power of your
computer. It is able to be integrated with the CW terminal
program CwType, morse decoder CwGet and
RTTY/PSK31 software TrueTTY

UA9OSV TrueTTY - RTTY and PSK31 software
Platform: Windows 9x/NT
Program to receive and transmit RTTY (radioteletype)
and PSK31 (BPSK mode) via sound card. No additional
hardware required - your need only transceiver and
computer with sound card.
Optionally you can use simple circuit for PTT-control.

UA9OSV CwGet morse decoder
Platform: Windows 9x/NT
Program to decode morse code (CW) via sound card. No
additional hardware required - your need only receiver
and computer with sound card.
It is software morse decoder that REALLY work!

UA9OSV CwType morse terminal
Platform: Windows 9x
The terminal program for CW-operators. You can
transmit both from the keyboard and from the paddle
connected to a joystick- or LPT-connector.

Best regards,
Sergei,
UA9OSV

There was a guy in suburban St Louis, St Charles, actually, in the
late 60s, early 70s who not only used an Echoplex on his
transmitter, but all manner of music sources, sound effects and
multiple voices. The quality of the sound was wonderful...We found
that was because he was using a heavily modified Collins transmitter
and about near a Kilowatt. Nightly he would put on his show. I still
have tapes of the night that Uncle Charlie came calling on old Echo.
The show was good, but came to an abrupt screeching halt.
To answer your question? Because they can. And for many of the
same reasons they adjust SWR by trimming the coax.

An ELT just transmits an AM signal on 121.5MHz or 243MHz

I have apent too many hours in Cessnas and Pipers
at tree tops in the mountains for C.A.P. not to know
how the system works.

>Ultimately, you're trying to establish a *position* for the transmitter.
Yes -

>You can do this by taking angular bearings from several locations, and
>then see where the bearing lines cross. That's how much land-based
>radio direction finding works.
So -

>You can find a position by measuring absolute distance from a set of
>ground stations using the time it takes radio signals to propagate
>from one to the other. Once you know the distance from each ground
>station to the target, you can draw a circle of that radius around
>the location of each station and see where the circles intersect.
>Simple in principle, but requires precise time sync between transmitter
>and receiver.
Not for ELTs
Not satellites
Not CBs

>In practice, this is actually done by measuring the *difference* in
>time of arrival, not absolute time of arrival, of radio signals.
>For any two fixed stations, a third station that sees a given time
>offset between signals from those two stations must be somewhere on
>a hyperbola of constant time offset. Use 3 or more stations in

>pairs, and you get 2 or 3 of these lines, and the intersection tells
>you where the unknown station is. This is how LORAN works, and GPS
>is very similar.
Not ELTs
Not CBs
Not satellites

>But the ELT-finding system uses non of these methods. It uses the
>moving satellite and a ground receiver to measure Doppler shift of
>the ELT transmitter.
Yes

>For a given instant in time, the locations on
>the ground that can have a particular Doppler shift as seen by
>the satellite forms a particular line along the ground. But as the
>satellite moves, the Doppler shift changes, and the shape of the
>line on the ground with that particular Doppler shift also moves.
>There will be only one point on the ground that gives the *particular*
>pattern of change in Doppler shift seen from one or two continuous
>satellite passes.
Even more important - that absolute delta in signal
when the satellite changes position from the transmitter
being "header of" to being "behind" the satellite.
At that instant - the transmitter on the ground is
"in line" with the satellite. Since the position of the
satellite is known - the DIRECTION is known.

>
>So the system can establish a position on the ground, without ever
>having the ability to take a directional fix at any instant in time.
The satellite just has a transponder on board -
rebroadcasting the ELT (or whatever) signal.

>In fact, the satellite doesn't even have any measuring equipment
>on it - all it does is receive the signal at one frequency,
>translate it to another frequency and retransmit it. All the measuring
>electronics and computation hardware is on the ground.
So what?

I said
"Don't you really mean - because they "do" take
a directional fix... After all - without a direction
component - you can not resolve a direction.
Since a direction IS resolved from the satellite
then - ergo - there must be a direction component.
And with two direction components - you have
a fix. Simple idea - Simple math - simple system - "

I said they take a directional fix -
You agree don't you?

I stated a direction IS RESOLVED from the satellite.
You agree don't you?

Why are you arguing with me?
In order to get a directional fix - your
measurement must have a direction component.

> Dave

Dave - I believe we are in violent agreement.
I naver said that the satellite had a 1940s
vintage loop antenna and some servo
wildly turned the loop to get a direction
did I?

Gil

Um, not always true, Dave, depends on what news reader one is using
and what options one is using. Went through this a few weeks ago with
Velek over a "NT" [no text] post that didn't tie to anything.

Forte Agent allows sorting of incoming group by thread, subject,
author, date or size, and most don't show the tree structure.

A curious point Bob, and one I generally agree with.

I do have one question however, that I think you may be
in a knowlegable position to answer.

I understand that when an Attorney is granted
a licence to practice Law in a particular State or
Political Jurisdiction, he is then granted membership in a
fraternal organization commonly refered to as the "BAR".

The "BAR", I have heard, allegedly stands for "British
Admiralty Reagent", members of the same then
granted the authority to use the suffix
"Esquire" or "Esq" after their legal last name.

Do you have any information on just what the terms
"BAR" and "Esquire / Esq" legally confer to the
individuals to whom the same is conferred?

You've made your agenda perfectly clear. Thanks for your input.

Now please direct it to the ARRL.

446. AstroAlert: Potential Major Auroral/Geomagnetic Storm Warning - 06-07Apr

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-06 00:00:00 UTC
From: Solar Terrestrial Dispatch <STD@Solar.Spacew.Com>
Message-ID: <38ECF116.2B8CF71B@Solar.Spacew.Com>
Source record: 114888
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc,sci.astro.,sci.astro.amateur

A s t r o A l e r t

06 and 07 April

** Potential category G3 Geomagnetic Storm **

One of the most vigorous interplanetary disturbances to impact the Earth
so far this solar cycle collided with the Earth's magnetosphere near 16:40
UTC on 06 April. The disturbance was preceded by one of the strongest shock
fronts yet observed this solar cycle. Solar wind velocities almost
instantaneously increased by almost 200 kilometers per second within a minute
or two from a background quiet-time value of 380 km/sec to a value exceeding
570 km/sec. The strength of the magnetic fields in space (which originate
from the Sun and are dragged outward by the solar wind) also increased
dramatically in magnitude by a factor of almost 4 times the normal quiet-time
background value.

The sudden increase in solar wind pressure against the Earth's
magnetosphere, combined with the favorable southward orientation of the solar
wind magnetic fields resulted in increased erosion and compression of the
sunward side of the Earth's magnetic field. This has caused the GOES-8 and
GOES-10 geosynchronously orbiting spacecraft (and all other geosynchronously
orbiting spacecraft near the "noon sector" of the Earth) to pass through the
protective barrier that separates the quiet and stable magnetic field of the
Earth from the more turbulent and hazardous environment inside what is known
as the magnetosheath which is the transition region between the solar wind
and the Earth's magnetic field. Passage of spacecraft through these regions
can affect satellite health and can make it difficult for satellite

operators
to maintain spacecraft pointing stability.

The effects of this disturbance are also being strongly felt in the

Earth's ionosphere. This is producing heavy degradation in the quality
of
radio signals that rely on the ionosphere to propagate to distant
locations
around the world. Communications with spacecraft may also be affected.
The
disturbed ionosphere can cause spacecraft signals to begin to
scintillate,
which can affect communications with spacecraft.

Another adverse effect of this storm will be to increase the
atmospheric
drag on satellites. This effect is expected to begin within the next 3
hours
(anytime after about 23:00 UTC on 06 April) and is caused in-part by the

heating and expansion of the Earth's upper atmospheric envelope. This
increased drag can change the orbital elements of lower orbiting
spacecraft,
particularly those spacecraft with perigees below about 500 kilometers.

Intensely varying magnetic fields can also cause problems for
electrical
power generating companies, particularly those whose power-generating
grids
are located in the upper-middle and high latitude regions. The problems
manifest themselves as induced electrical currents that are superimposed
upon
the existing electrically generated power flowing through power lines.
These
induced currents can damage (and in rare cases even destroy) expensive
equipment such as electrical power transformers. In most cases, the
general
public will not notice the effects of these induced currents. The
equipment
that brings power to your house are well regulated against such events.
The
worst that can happen is the complete loss of electrical power if damage

should occur to the large transformers and other susceptible equipment
maintained by the power companies. An extreme example of such an event
occurred in Quebec in March 1989, where power was lost to more than 6
million people. Since then, power companies such as Hydro Quebec have
expended considerable sums of money to help protect against recurrences
of
geomagnetically induced power outages.

A strong geomagnetic and auroral storm is currently brewing over
the
northern Russian and European regions, based on the latest spacecraft
imagery. There is uncertainty whether this storm will persist into the
night
hours for North American observers. If the disturbed conditions persist,

observations well into the central U.S. states should be possible under
dark
skies. If the disturbance decays before then, activity may be limited to
the
southern Canadian provinces and/or the northern tier of the U.S. states.
In
either case, observers over North America may wish to take special note
of
this disturbance, which is occurring during the near-new phase of the
moon.
Thus, optimal observing conditions and dark skies should provide a
maximal
unimpeded view of possible auroral activity.

Observers who successfully spot auroral activity are asked to
report
their findings to: http://www.spacew.com/www/auroras.html so others may
see
the observations. All reports are permanently archived for potential
future
scientific use. Space weather forecasters at the Space Environment
Center and
elsewhere also make use of the reports submitted by amateurs to this
site.

We are also interested in receiving digitized (scanned) photographs
of
auroral activity that amateurs make during this storm. Later, we will
release
a compiled list of the images we receive on a web page with appropriate
credits to those who provided them to us. We will also provide any links
to
the images that are included with the images. Imagery can be e-mailed
to:
STD@Solar.Spacew.Com. Please include appropriate wording for credits and

links to any of your web pages for further information.

The current estimated visible limits of auroral activity may be
seen
from the map provided at: http://www.spacew.com/www/aurora.html.
Spacecraft
derived imagery and products are also available within that page.

The duration of this disturbance will probably continue through the
mid

UTC hours of 07 April. The intensity of the storm could change rapidly if the
magnetic fields within the solar wind do not maintain their current southward
orientation. Such shifts in the orientation of the solar wind magnetic fields
can occur very rapidly. Within as little as 2 hours, a very strong auroral
storm can diminish to insignificant levels during such rapid swings in solar
wind magnetic field direction. As a result, for near-realtime information
concerning the state of auroral activity, rely on the sites above. Serious
users, media, and other organizations requiring immediate notification of the
arrival and current status of disturbances such as this one should consider
purchasing software such as SWARM (http://www.spacew.com/swarm) for staying
on top of these (and future) conditions.

This storm has the potential of being one of the largest events observed
so far this solar cycle.

This is getting confusing. Someone by the name of Gerd Henjes is posting here and I was just told that Henjes is the maiden name of KT4TR's wife. The question then arises whether Gerd Henjes IS actually TR's wife and if not, who might have known about the maiden name and what then is the significance of the posts? Does anyone have a clue to this bizarre turn of events which alter and illuminate our time and you are there?

Guys,

Can we take previous enforcement action from here? Naturally, everyone expects equal treatment under the law. If we find that it is anything less, we'd have cause to complain.

But why wrestle over old stuff? Doc, you've still got your license, FQF has his, and I have mine. Let's continue with the big picture in mind: ham radio and its salvation. And we can thank God someone is minding the ship.

>(as far as I could tell, there where trees in that direction).

I read the alert about 8:45 EDT, and checked the charts at www.spacew.com. They showed that it might be visible from Pennsylvania, so I went out. We had high clouds, and at first I didn't see anything. But as I became dark adapted, I became aware of a deep red band passing through the sky. It was motionless and it took me a while to convince myself it wasn't light pollution. I wish I could've seen it without the clouds.

No, I did not say anything of the sort. If your read back over my last few messages, you'll find that I said in one of those messages that the problem was discovered by a friend, an older ham that is an AM aficionado.

To elaborate, while he was over at my house one afternoon, he attempted to contact his wife at home (an excuse to have her talk on an old AM radio he had left hooked up before he left the house - he wanted to see how it sounded). By the way, if I remember correctly, he was on 20 meters.

When she could not hear him very well, all of us assumed it was his old radio at fault. However, we took my radio over to his house to try a few more tests, just in case. Later that night, he attempted to contact another friend who also had an AM radio and the friend also reported very weak audio coming from my radio.

In an effort to better understand how the radio sounded, he went down the street to listen in his car while I continued to talk to him on the radio (his wife was present as control operator).

The radio has been operated on AM on only two other occasions, to attempt contact with several people at another ham's house (under his license) and at a local repair shop.

By the way, Crunch, if you had read that earlier message, you would have also saw that I said that "I've had the radio for several months and have never used the AM mode." I use an old, unmodified, Cobra 1000, that I purchased many years ago, to occasionally talk to friends (CB'ers) that do not have a ham radio license.

guest@host.com,
The power 'drop from your power company brings 208
to 240 volts A/C to your breaker-box. This '220v' is
then 'split' using one side of this '220v' line and the
'third' wire(ground/neutral) to get '110v'. To obtain
220 volts, simply run a 3-conductor cable from the two
'hots' comming to your breaker-box AND the ground/neutral
to an appropriate type receptical. Just like 'they' do
for any 220 volt outlet. It goes without saying that
you should always observe safety precautions!!
'Doc

460. Combining two 120v leads two make 220?

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-06 00:00:00 UTC
From: guest@host.com
Message-ID: <38ec2eb4.248948158@news.direct.ca>
Source record: 114936

I combined two 118volt leads on differnt breakers to form what I thought would be 220. When I turned my amplifier on the plate voltage was way down. I measured the voltage at the 220 repecticle that I had hombrewed and found it to be around 210VAC-no load? When you combine 118 and 118 why don't you get 236 or so. I got a feeling it's do with phaseing or somthing. Can some please explain this in detail.

jprocyk@direct.ca is my reply address.

461. QST--FRACTAL ANTENNA CHALLENGE--QST

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-06 00:00:00 UTC
From: fractenna@aol.com
Message-ID: <20000406023848.01080.00000133@ng-cr1.aol.com>
Source record: 114937

QST--

Chuck O'Neal, K1KW, has issued a challenge to compare his 10M linear loaded antenna with the 10M fractal quad Yagi (FQY) seen on the ham page of:

http://www.fractenna.com.

The specs on the FQY indicate at least 3 dB gain compared to a dipole (in the same environment) and better than 20dB F/B. Impedance is close to 50 ohms, with no matching whatsoever.

Chuck's linear loaded antenna will have the same turning radius. Specs are not known, but Chuck contends that 'fractals are linear loading' so this should be interesting. [BTW, fractal antennas are certainly not linear loads any more than a nonlinear circuit is linear.]

On the air comparisons with DX are not scientific. That's what the specs are for. But it should be fun to see how these two antennas 'play' at the same heights, with very similar types of locations (separation about 20-25 miles LOS) and get comparison signal reports.

You are invited to hear this challenge on the air.

Plans are for Chuck and I to operate N1IR and two other local ops to operate from K1KW.

Tentative date is May 13, 2000 on about 28500 KHz. Time TBA but probably about 14 or 1500Z. Propagation to Europe is a requirement; a 'raindate' will also be posted.

Please pass this along to any list, buddy, or NG you feel may enjoy knowing about this.

73,
Chip N1IR

>
> What does the RF waveform look like on an oscilloscope?

Don't really need an oscilloscope to know things are not working correctly here. When a friend just down the street has to turn up the volume to hear me (even with a very strong carrier present), there has to be something wrong. Since discovering this, and trying this mode with several other people, all have reported seeing a strong carrier, but can barely hear me when I talk.

Either the radio was poorly adjusted at the factory, or the radio has developed a problem since then. Whatever the case, I need to get this fixed before the warranty runs out. So, it appears that the radio is heading for the shop soon.

Success in breaking the German codes was an essential element in the victory over Nazi Germany. Absent the codebreaking, it's likely that England would have fallen and Europe would have been dominated by the Nazis for a very long time, possibly until the present day. Ancient, yes; crap, no. Millions died to defeat Hitler so that you could sit in safety and plenty, making snide comments about things you obviously know nothing about. He who does not know history is destined to repeat it.

Ignoring for a moment that "barf communications" is an oxymoron, I note
that you apparently can't read. I specifically mentioned the ONV of the
early 90s; "one ONV in the early 90s." According to the only known
record of it extant, interference was not mentioned.

If you have further, credible, verifiable knowledge to the contrary,
please furnish it. Hearsay or wishful thinking isn't sufficient.

LRod

I have for sale the following equipment. All in fine working order, and can be heard on the air. Would prefer to have local pickup (near Louisville,KY) but will ship in factory boxes if needed.

Omni-VI plus (factory upgraded to option 3)
All filter slots full Standard 2.4kc filter
#288..1.8kc SSB filter 6.3 IF
#285..500hz CW filter 6.3 IF
#282..250hz CW filter 6.3 IF
#218..1.8kc SSB filter 9mhz IF
#217..500hz CW filter 9mhz IF

Radio is in near mint condition..I'd say a 9.85 on the 10 scale. (10 being "perfect")

Included with the radio is a near mint 961 power supply/speaker , all power cables, manuals, and factory boxes.

Price for Omni-VI plus and power supply... $2,100 "OBO" and some help on shipping if needed.

Have a "mint" 238 tuner..includes the factory supplied 1000pf 500V capacitor for added help on 160m if needed. Have manual and factory boxes.
Price for tuner is ..$300 plus help on shipping. (The buyer of the Omni-VI will have first chance at this tuner)

Buy both and I'll ship insured 48

Thanks LRod for your most valuable support. "Toiletsi's" in another world-he simply can't get over the fact that KA4MUJ is dead in hell; Billy Gasell, WB4GDP, allegedly got the hell beaten out of him because of having interfered with emergency medical traffic and hasn't shown up on ham radio in five years and his favorite all time hero, the Saint Croix felon, lost his last appeal. He must have an escape from such misery and Riley's letters provide it.

Gee that's strange, David. Riley's letter never mentioned what type of intentional interference I created to warrant enforcement action. No tapes were sent. No transcripts given, yet you know it was Hitler speeches atop FQF and MXL? Since I vehemently deny doing it and never heard about it until now, I wonder if I wasn't set up by the one really playing it-YOU? I'll have to ask Riley for proof and send along a printout of your posting.

Why do you want to expand the TX? Is it so you can use it on your PSU radio system. May I ask a question? Well going to anyway. Is the radio FCC type accepted to operate out of the ham bands on commercial/public safety frequencies?

Would a letter to the school stating that you are using a non FCC certified radio on their system cause any problem?

.....Hmmmm... you say you tested your 847 on Ten Meters to check the AM capabilities of your rig? That's interesting, seeing as your Technician class license does not allow you to utilize the AM mode on any band except 11 meters, where, of course, your 847 is a 'non-type accepted' rig. (..and I'd guess from your posts in the CB news group that's where you're were planning on using it) FOR SHAME!!

subject.

by Gordon Sinclair

"This Canadian thinks it is time to speak up for the Americans as the
most
generous and possibly the least appreciated people on all the earth.
Germany, Japan and, to a lesser extent, Britain and Italy were lifted
out of the
debris of war by the Americans who poured in billions of dollars and
forgave
other billions in debts. None of these countries is today paying even
the
interest on its remaining debts to the United States. When France was in
danger of
collapsing in 1956, it was the Americans who propped it up, and their
reward was
to be insulted and swindled on the streets of Paris. I was there. I
saw
it.

When earthquakes hit distant cities, it is the United States that
hurries
in to help. This spring, 59 American communities were flattened by
tornadoes.
Nobody helped. The Marshall Plan and the Truman Policy pumped billions
of dollars
into discouraged countries. Now newspapers in those countries are
writing
about the decadent, warmongering Americans. I'd like to see just one of
those

countries that is gloating over the erosion of the United States dollar build its
own airplane. Does any other country in the world have a plane to equal the
Boeing Jumbo Jet, the Lockheed Tri-Star, or the Douglas DC10? If so, why don't
they fly them? Why do all the International lines except Russia fly American
Planes? Why does no other land on earth even consider putting a man or woman on the
moon?

You talk about Japanese technocracy, and you get radios. You talk about
German technocracy, and you get automobiles. You talk about American technocracy,
and you find men on the moon - not once, but several times - and safely home
again.

You talk about scandals, and the Americans put theirs right in the store
window for everybody to look at . Even their draft-dodgers are not pursued and
hounded. They are here on our streets, and most of them, unless they are breaking
Canadian laws, are getting American dollars from ma and pa at home to
spend here. When the railways of France, Germany and India were breaking down
through age, it was the Americans who rebuilt them. When the Pennsylvania
Railroad and the New York Central went broke, nobody loaned them an old caboose.
Both are still broke. I can name you 5000 times when the Americans raced to the
help of other people in trouble. Can you name me even one time when someone else
raced to the Americans in trouble? I don't think there was outside help even
during the San Francisco earthquake. Our neighbors have faced it alone, and I'm
one Canadian who is damned tired of hearing them get kicked around. They will
come out of this thing with their flag high. And when they do, they are
entitled to thumb their nose at the lands that are gloating over their present
troubles. I hope Canada is not one of those." Stand proud, America!
Wear it proudly!!"

488. AF2Y: the privileged few

Allow me to pose some questions about enforcement and its advertising on the RAIN report and Web Extra.
Have you noticed the changes in the on-the-air demeanor of KT4TR and W4FQF? Heavens to betsy, they're absolute angels or so it seems. I don't hear any police reports read on the air. No more credit reports given out. No more private investigatory reports on education, income, families etc. Why Mr. Youngblood has become a figurative saint. And how about George who used to be Polly but garbage by any other name smells as bad. Today I heard him say that WB8FIH was jamming him on 14.275 and he's going to report this to Riley. Paul jams no one-he's a great guy and a fine ham and how odd it is that Polly should be so obsessed by interference in light of his outright obnoxious behavior for a decade.
Now I ask-what do you think brought about such magnificent changes in their attitudes? Voluntary achievement? Hardly! Let's see now; I'll make a guess-ah ha--LETTERS! From whom? From Riley Hollingsworth. How many did TR get do you suppose? One, two, three or more? Bill, K3CQR, told me he had seen in QST a blurb about a Florida ham being tagged with a 2.5 K for reading confidential reports etc. I can't prove it was TR because Bill said his name wasn't mentioned. Can you make an educated guess? And although I have not seen their publication, no one can make me believe that Polly suddenly, while in church one Sunday in the role of an elder sporting his vestments, heard God tell him to reform for the betterment of all mankind. I say one or more letters from Riley did the trick. In my opinion, W4FQF has been one if not the worst troublemaker to ever key a mic on 14.313, yet somehow he's a privileged unpublished individual presenting the allusion of changing for the better miraculously. WHAT THE HELL IS GOING ON HERE? Why are certain enforcement letters published while others are suppressed? Everyone knows that TR got them-why wasn't I able to read them on RAIN or the Web Extra while those to me are published? And the same goes for that "thing" from Tennessee. Do you suppose that Youngblood wasn't published because of the sensitivity of his employment? It must be cloak and dagger work and a scandal reported on RAIN and elsewhere just might have impacted it. For that man to escape public scrutiny is an abominable disgrace to the entire concept of fairness in enforcement and think about this: Polly's an elder in his church and probabaly looked up to and with those dumbo ears, who can miss that puss? Do you suppose he pleaded with Riley, Hap and the ARRL to omit publishing his letters and got away with it since his "image of purity" before the congregation might be ruined? God I hope I'm wrong in my assessment of the situation and if so, will someone with a semblance of intelligence(David Tolassi need not apply) explain my error in judgement?
AF2Y, Doc

Source record: 114965

I wrote this to doc first and he asked me to
send it here so you could all see it.
I sent it through a remailer because I dont
need any more crap for telling the truth.

Doc I don't agree with most of your attitudes
but I think the latest hits on you
are unjustified and so were the on Rich
and Fred Roll.
Someone posted a long time ago that Hollingsworth
was getting out of line in some cases demanding
people not talk about this or that and that
his getting a bunch of old OO hams as
an FCC Secret Police-posse-lynch party
was going to lead to abuses.
Looks like he was right.
You've been charged convicted and
threatened with execution without them giving you
the right to look your accusers in the eye
or see the evidence.
Are the guys who reported you cowards?
The lynch mob has you tied to the stake
and is ready to set the kindling burning.
One mistake and theyll light it.
All the 'me too' sheep will come
and watch and bleat approval.
They wont even give you the common
decency of allowing you to defend yourself.
You are accused so you are guilty case closed.
I've been an opponent of some of the
political actions that have been done under
the cloak of 'enforcement'. mostly in private mail
but a lot of times publicly. I stopped writing
about it publicly because these old women kept
giving me hell about it.
Well, I got a letter a couple of months ago from a friend
who is an employee of the ARRL.
He said that I should "watch my rhetoric" because certain
people were being "looked into" by Hollingsworth and
his Secret Police (OOs).
I think it will probably prove to be nothing.
Just my friend looking out for me and being a little
paranoid. But if it isn't, you can bet I'll be
on every news group telling the world about it.

Did you see that post someone wrote about "heir Hollingshimmler?"
I'm sure it was a joke but when you see
stuff like this it doesn't seem so funny.

With the exception of sullying Riley Hollingsworth, Esqire, I agree with you.

Let us not forget that what is being attempted here is more than any one person can reasonably handle. Like any movement, it will have its excesses and miscues.

We need only speak out, as we are here, so the powers that be have exposure to a side with which they may be unfamiliar. Further I urge my fellow hams to cooperate with Riley. Don't fight nor characterize unnecessarily. If you think he's made a miscue, ask for the evidence and communicate in good faith.

If we get with the program, we'll come out with our licenses in tact and ham radio will be improved.

Hi all.

Looking to find (buy) the following:

1. Drake FF-1 Crystal unit for TR4cw transceivers.
2. External crystal cover (sheet metal) for Drake R4C. It's the one
for the band crystals, not the crystal filters.
3. Drake R4C NB Brackets
4. Drake R4C sheet metal cover that goes over the filter switch.

Any all help/leads is appreciated.

Please read my challenge. No "terms" were stated or agreed.
This response is therefore useless and this "plan" is a joke.

THE conditions are simply the same as you employ
during your 10M runs: You run your stuff and get reports from some
DX station. I run my stuff and get reports from the same DX station,
either right before you or after you. We compare reports and therefore
determing whose system is working better. Just like in the real
world during a contest. None of this attempting to equalize things....
too communistic for me. You can make any assumptions concerning
the comparative reports you feel necessary to account for power,
antenna gain, phase of the moon....ect. in the determination of how
your antenna works.

This is just as "scientific" as your run postings in determining antenna
performance....probably more so since there will now be a reference, me,
and any others that wish to join in. There are a few locals that will
probably join us as well..

I will be running my normal station. 1 KW and my homebrew log antennas.
I suggest you run your amp if you have one so the difference won't be
too great....as long as your antenna can take it.

Anyone else is free to join in on the fun. I will be on this weekend,
Saturday morning, 28.450 - 28.460 starting at aprox. 9 AM EDT.
Maybe Sunday morning as well.

73,
Chuck...K1KW

Yeah the www.mods.dk/index.htm site has it!! I would be interested to know how Alinco feels about this, seeing as how they advertise on their website that it will receive these freqs. I wonder if they would still honor the warranty if you had it done at the dealer who you bought it from, and if they would do it for free.

dtollasi,

We've never met nor do I have any preconceived notions. If you feel the emotion of hate, as you report, why not turn it around? Escalating hate merely stirs your own cauldron of rage. It surely doesn't do a thing to the other guy.

Here's a suggestion: Behave in a way that makes you very proud of yourself. Then, paying no attention to the excesses of others, live your life in the most spiritual way possible.

497. ARRL values lazy hams more than Extras

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-06 00:00:00 UTC
From: hermit_thrush@my-deja.com
Message-ID: <8cirej$ip8$1@nnrp1.deja.com>
Source record: 114973
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.dx

ARRL, who brought you the incentive licensing debacle, has once again decided to cash in; now on the reduced license requirements by offering a discount to only those hams who are upgrading.

Recall the defenses of some on here that the ARRL restructuring was needed to save ham radio and not to increase the membershp ? No, they'll do that by piggybacking a discount for the lazy bastards who are upgrading on April 15.

The ARRL Membership Discount Coupon will offer
examination and upgrade applicants a chance to recoup the usual $6.65 processing fee in the form of an equal discount from the cost of a new or renewed ARRL membership.

Well, screw the rest of us is the easiest way to phrase what they think of current members, who wasted their time on 20 wpm code tests and diagrams of tubes.

Why would WB2OTK WANT to get back on the air ? Why would any of us with a brain want to ?

What would we expect from an organization that thinks it's fine to discount the memberships of old farts who receive social security check handouts every month in addition to their fat pensions, but thinks the disabled can go fend for themselves, by denying a rate reduction at every board meeting. That's right, discount it for the most frequent service users, leave it at $34 for the poor folks who are disabled.

Discount it for kids who have no other expenses in life, screw the guy on oxygen or the guy with no legs. Let him shell out the 6 bucks to keep K1ZZ, et al., comfy in northeast Connecticut.

ARRL-VEC Manager Bart Jahnke, W9JJ, says the League is offering the discount coupon as a way to "soften the blow" by giving applicants a one-time $6.65 discount from the cost of an ARRL full or associate membership.

Got that right. One time is all you'll see these newly enhanced novices as ARRL members. And the last time is how you'll see many more.

Dayton Hamvention® has announced that the Smothers Brothers comedy team will headline the post-banquet entertainment this year. This year's Hamvention also will host the ARRL National Convention.

Why don't they just have some new Extras get up and explain the workings of F layer propagation or the difference between IF and AF DSP ?

More recently, Dick Smothers has gained a reputation as a vintner in California.

Excellent. He can bring some with him and hand it out to the new Extras since they'll all be longing to hold an Eyeball Belch Contest with Riley as judge and jury (a roll he relishes) a la 75 meters after dinner.

>
It looks like your power company is feeding you two phases of 118VAC
seperated by 120 degrees, not 180 degrees. What you could do is
boost one of the 118VAC lines up about another 30V to give a total
of 230V. It doesn't add directly, you got trig going on here.

To boost the 118V up 30V you need a transformer that outputs 30VAC
at whatever amperage the load will draw. Connect the secondary
to the hot wire of the primary so the secondary voltage will add
to the 118V. Then take the other end of the secondary and use that
with the other 118V and you should see voltage around 230VAC.

What you really should do is run a new 208V power circuit from
its own dedicated double circuit breaker in the breaker box. Using
two 118V circuits is mildly dangerous. If one and only one of the
118V breakers opens, you'll have 118V leaking from the
circuit that is still on across the 230V load
and underpowering the circuit with the open breaker.
Also if you unplug one of the 118V plugs you have driving the 230V
load the male prongs of the unplugged plug will be hot with 118V
from the other circuit and zap you. The fire marshall wont like it
either.

>Most homes are wired for 110 each side of center or ground. There are 3 lines that come into your house:A ground and 2 110 lines. Measure from ground to each hot and you will read 110 or so, Go across each hot and you get 220, Your dryer or stove is wired for 220. Each line (hot to center) would be added together. My quess is that you didnt have 118. Your line is low. If you measure across lets say you dryer or stove you would read around 220 vac or so. Your 110 vac comes from a ground or center to the line.
The only thig I can say is that you didnt go to the fuse box and go across you street input--be careful!! this is not static electricity. You touch both sides of line, you do a Ted Bundy!!

To be such a self proclaimed "Brain". You sure have a hard time getting the message from the FCC to knock off the qrm. You have been warned not once not twice but three times to knock off your interference on ham radio. Now, you whining is loud and long. You were let off easy by Mr Hollingsworth in my opinion. In fact I was one of the stations you interfered with!!

Why is it so hard for you to clean up your act, quit supporting qrmers like WB8FIH who was in fact qrming me on 14275 this very morning. (letter to Mr Hollingsworth has been send this morning).

The thing for you to do is get right with the rules, obey part 97. And please pay close attention to Mr Hollingsworth when he says "OBEY THE RULES"

W4FQF since 1952

So tell me "w4fqf"....why did you chose 14.275? With all the open frequencies available, why do you continue to operate on 275? Its really quite simple, isnt it? You go there in the hopes of starting some crap. You and your "hollier than thou" attitude has apparantly gone to your head. We ALL KNOW the only reason you go there is to stir up the pot. You are a world class hypocrite and a liar to boot.

As for Paul, WB8FIH....I hope you do make it to the 80s and 90s. I want to see you when you are harassed and attacked by a bunch of malcontent fools. Then your time will come.

You are supposed to be a "elder of your church"...well I'll tell you this jerk....what you do now will be read in the book of life. And God help you.....and we know he wont....right?

There is no need to attack Riley. I believe he is honestly trying to
do his volunteered job. Unfortunatly he did nor, and still does not,
have a handle on the true situation. I believe he will figure it out
one day. When he does the worm will turn.

People keep saying "twice" or "three times." Check the record; one ONV in the early 90s, no mention of interference; one letter in Nov, 99, no mention of interference; one letter in Mar, 00, the ONLY one that mentions interference.

You got your fingers
burned by Riley and you deserved it. My playing Hitler speeches on top
of
Bob and George got you popped buddy. Not once but TWICE, and now the
bitter tears. Those of us who know and detest you realize you would
normally have DEMANDED the tapes and what ever that the FCC had on
you,instead you knew you didnt do it and had no idea who did, well now
you do, so shutup.

As for Fred Roll I told him I had no idea his wife Rosey was in the
truck when I asked him the queston, and I apologized and meant it. The
reason I did that was because he scared the hell out of me. He
could have kicked my fag ass from Ohio to VT with one hit. It's not my
fault the bozo blamed me for his actions. I don't think I did anything
wrong. After all its just radio fun, right?

Next: What about the things I have done the last decade? Driving
you nuts with Holocaust rhetoric. The way your buddies drove KA4MUJ to
the brink of ham insanity, and rightly so. Because all he did was cus
and scream for hours upon hours on end. Like Douglas Gerry said, he
was just a mullet headed sailor.
That was nice Doc. He got just what he deserved.
Also if 'OTK thinks he is going to come back and be the obnoxiuos bully
he was, he is SORLEY mistake. Because I will jam him again just like I
and the BARF used to do. You and your cronies are on the ropes and
I for one know it wont last long. Damn I wish I could have gone to
Vietnam like my buddy Aldo Ryder did. Sign off Doc--Get another hobby

To agrivate listeners, primarily truckers, but other CB'ers that are part of an opposing group are also fair game. It could even be polite conversation using echo and sound effects. They think that they sound cool and powerful. Kinda like that punk with the BOOM-BOOM stereo in his car that rides through at 3am when you are trying to sleep. That knuckle head thinks that he sounds cool also.

I have a couple of boxes like that around here somewhere. One is called a VC-100. It is a neet little device with long clear echo, ding dong courtesy tone, and one other slick little device. It has a voice inversion scrambler/descrambler built in. I use it to decode police scramblers on the scanner.

I used to play those games with the big linears and the electronic toys and trickery, but those days are long gone. All those jerks think that they are hot shit on a silver platter, when it's very plain that they are cold turds on a paper plate. It's a vanity thing. Kinda like your lawn freak neighbor.

I still have my 500 watt solid state amp. It kicks ass on 10 meters with the 2510 hitched to it. It's great for field day on a quarter wave ground-plane I have. (a more noble use on ham radio, and I don't need a CB'er getting it and wiping out the neighborhood cable system.)

the sell off of frequencies was guided by a nice conservative congress
who believes govt functions best when sold to the highest bidder.

hollingsworth is doing an admirable job for ham radio. he's kicked off
freq a bunch of nut cases and cleaned up the bands.

If the ends be just, then any means must be all right too. This appears to be a guiding principle of journalist Hap Holly. But knowing the golden Hap, I don't think he's aware of it.

To Hap, the scoops from the FCC are enticing material. Running them without question, he doesn't see the reason to dig further, I'm sure. Who's going to question Motherhood, apple pie and the American flag?

Notwithstanding, I believe Doc's posts on this subject are meritorious and worthy of note by the amateur community, media and the FCC. I have experienced the lopsided behavior firsthand, not from the FCC but from hams bent on putting me under too.

Hap's email makes clear, the FCC is indeed selective in releasing Mr. Hollingsworth's letters to the press. Letters are published on some hams but not on others. If Hap isn't doing so, it must be the government. This course should not be trivialized, because we need not throw out some of "the babies with the bath water" if we are to have equal treatment under the law.

Perhaps with this enlightenment, Hap will dig further. I, for one, have been posting, hopefully, unbiased reporting on this issue and am ready to be interviewed about every point. Enforcement, yes; selective enforcement, no!

First of all, if I were to apply your logic to radio in general, I wouldn't have a ham radio either (it's possible to call anyone in the world using the telephone). I talk with my friends on the CB radio for the very same reasons I talk to other friends with the ham radio - its fun. I tend to enjoy our weekly roundtable discussions (its not easy to talk to eight or nine people at the same time on the telephone).

Gee, you would think a person posting to a radio newsgroup would understand the appeal of radio (any radio).

Damn, you're weird. I don't have time for these petty little games.
What does it matter what band he was on? That has nothing to do with
the point. To be honest, I didn't really pay attention to what band he
was actually using. He could have been on any band. I only mentioned a
band because you mentioned the 10 meter band, which I know he was not
using - his radio won't do it.

For that matter, what business is it of yours? You're hinting that
I've used my radio illegally in the CB band, which I have clearly
denied. However, if you still think I've done that, or anything else
against the rules, report me to the FCC.

Until then, stop with the innuendo, and go away.

Sorry, Dan. I have to agree with FQF on this particular issue. He is on 275 for the same reason I'm on 313. For you, it may be stirring the pot; for me, it is a "sit-in" to properly make every frequency available to every licensed amateur.

Let's assume regularity until we see irregularity. Then, we can post benignly with specifics that everyone can follow and which are subjected to scrutiny. Justice and fair play aren't something that can be rammed through by one guy bypassing the customary safeguards of free speech..

> equal treatment under the law....

Bob,
You might as well get ready. A lot of people will want to
throw stones at you because you won't join the lynch mobs
and yell "me too!."
I posted some time ago that we were going
to see this sort of thing, and I got lots of hell for it.

I'm not here to slam Mr. Hollingsworth. He has his orders
and must carry them out as best he can. And I believe he's
doing his best. But some things are falling through
the cracks and it has me worried. Mr. Hollingsworth
isn't the only person in this enforcement effort-
there are a lot more involved.
While most have the very highest motives,
things can still go wrong.

Like our anonymous friend yesterday- I, too am worried
about these anomalies. I'm worried about some "auxiliaries"
injecting personal biases and grudges into the enforcement process,
especially when Big Brother has said he'll unquestioningly back them
with the muscle. No one has told us how these guys are supposed
to operate, or what qualifies them to say one guy is "jamming"
and one isn't. They've met and decided all this pretty much
in secret; At least, I've never seen an article on it.
It only takes a few rotten apples to do some serious injustice.
Where are the checks and balances to prevent this?
Who watches the watchers? Or are we really, truly
going to have an unquestionable secret police in ham radio
and networks of spies, stalking and informing on their neighbors?
No one in authority has addressed these fair questions.

I worry about the posting of enforcement letters publicly on some people
and not others, about those letters being spread as gospel when
the charges have not been proven. Most of the accused are not presented

with the specific evidence against them nor the names of their accusers.
Even a petty shoplifter gets to see the video tape that nailed him
and face the officer that accused him.

I worry about a select ham being given Mr. Hollingsworth's
home phone number, and that ham's word- with all his personal
biases- being given some special status. I dare say that
if I were to hold forth on 14.313 espousing the wonderful
world of Hari Krishna, I wouldn't receive such special treatment
(I don't own a 20 meter antenna, so no danger of that ;-).

And why does everyone just assume that these guys are guilty?
Maybe this guy in Newton is guilty as sin, but I want to see
some evidence other then "Jim drove by in his mobile and
his S-meter pinned." Are they doing more than this?
I don't know... they haven't told us what they're doing,
other then "direction finding," which can be in error,
so I can't know if it's a valid catch or
just somebody's "best guess."
What if it were *you* they were accusing?
I can't speak for the lynch mob,
but before I condemn someone I want to be reasonably sure
he's guilty. Since they don't say exactly what they do,
I don't know what to think.

This and other things worry me about the latest enforcement
efforts. I hope my worries turn out to be groundless.
The bands are unquestionably cleaner these days,
but if it's done by simply lopping off the heads of the
unpopular guys without observing the rights of the accused,
or by bullying a net out of existance because some don't like
its politics, then it's too high a price to pay.

Kind Regards,
Dave S.

> Yes certainly Millions died, but it was not thanks to the infamous Enigma machine. That's my only point!

What in the world are you talking about? The greatest achievement of the Enigma code-breakers was intercepting the communications between German submarines in the Atlantic and their commanders in Europe. That knowledge made it possible to keep the sea lanes open, arm and supply England, and later stage the D-Day invasion. Without Ultra (the Enigma intercepts), those sea lanes would have failed, and England would have likely fallen, or at least could not have been used as a staging base for the invasion. There would have been no second front, the entire German army would have been available to counter the Russian advance in the East, and Europe would have been in Nazi hands indefinitely. Ultra made it just possible for England to hang on long enough for America to enter the war and turn the tide. Ultra was a cornerstone of the Allied victory; there were many other essential elements as well, but without Ultra the Allies would have failed.

Ever since I saw my first Heil demonstration at W9DXCC in 1982(?) I have been convinced. I bought an HC-4 (mike element) on the spot and had it installed in my D-104 that night. What a difference!

When he came out with the ProSet in the late 80s(?), I bought one right away. He had had the lightweight headset out for some time, but I never cared for it; I preferred a full ear muff.

If you want the best sounding and best performing audio, the Heil mike, whether in the ProSet or as a replacement element in your D-104, 444, etc., is the only way to go. The earphone part of the ProSet is great, too, and the mike boom tips up out of the way when all you want to do is work CW or listen.

I also got very good service from the company. I broke a piece on one of the ProSet ear pieces, and when I called to order a replacement, the lady told me that the part had a manufacturing defect and she shipped replacement parts to me at no charge.

Bob Heil is sometimes hard to like, but he knows his audio stuff. If you go to Dayton, stop by his booth and listen to his demonstration (then go to the next booth and get QSL cards from W4MPY, a super nice guy). It is quite effective. Some will say the ProSet is overpriced, but it depends on what you want to do with your operating. For my kind of operating, it was money extremely well spent, and I would spend it again.

I don't recommend anything else.

That's exactly my point. If he had to pay a cent, why wasn't it publicized? Why wasn't any letter publicized? Apparently in the cases of Polly and BobbyBadBlood, one has to be an egregious amateur radio nuisance to remain anonymous and privileged.

Here's a message I got this morning referencing Gerd Henjes:

Hi doc Gerd is W2ISB an is the president of the LARC amateur repeater club,
inc of Liverpool New York. an he is a major JERK he's the hole in
ass.....73
----- Original Message -----
The name's been omitted to protect confidentiality since I have many many
agents doing fine cloak and dagger work. Apparently the person who said that
Henjes is TR's wife's maiden name was pulling my leg or nose since both are
long and I extend my apologies to Mrs. Youngblood for any inconvenience or
embarrassment I caused although being married to TR causes more.

Very small piece of intelligence? The gaining of that intelligence had a
significant effect on every aspect of the European and African theaters.

> The germans did it less than 10 days after the Enigma machine was
> compromised!

Did what? They never knew until well after the war that it had been
compromised.

> Yep I am grateful for the agents that gave there [sic] lives and
> first hand intel through espionage not exploited Enigma machine.

So, your point is what? That capturing the Enigma was nothing and that
only ground based, in country intel contributed anything?

> Come on people wake up! Just another analogy of the truth. No
> not ungrateful just realistic!

What conspiracy are you working on here?

> No short memories here.

Yeah, all the way back to, what, about 1960?

> Read the files,they are available, if you don't know how than its best
> to remain silent ya think?

This is excellent advice. I suggest you take it. You are clearly
uninformed on this subject.

> Yes certainly Millions died, but it was not thanks to the infamous
> Enigma machine. That's my only point!

Please clarify it then. And cite empirical evidence to support your
assertion. Perhaps personal experience...

> Who knows? maybe one would certainly pull a stunt like this for the
> publicity of a movie???????

Ahh, yes. That whole WWII thing was just to get some good story lines so Hollywood could make money. I heard that Pearl Harbor was done on a sound stage; whadda ya think? I bet we didn't really go to the moon either, huh?

> Yes propaganda still works.

Or some OLD Extras, for that matter?

Even more amusing would be a 20 WPM challenge, where whining Extras can prove (or not) their competence at their license CW speed.

Then we could have a contest: Hand a bunch of whining Extras a microphone, tools and the approriate parts, then have them wire up a cable for a TAPR-2 TNC. (Hi, Alan!)

Or maybe we can have a bunch of whining Extras try to pick a photo of the inside of their rig out of three possible choices?

The REAL amusement will be NEXT year! We can have a challenge, grab a random group of new Extras and a random group of whining Extras and see who is faster and more accurate in the tuning of tube-driven HF rigs. I would have suggested a race to REPAIR them, but it would be hard to find three whining Extras who would take the challenge.

REAL 20WPM Extras don't feel threatened by 5WPM Extras, because their sense of manhood isn't related to their CW speed.

Keith, my son, you are missing the whole point. Nothing, nothing in this world will clear a room faster than introducing an ARRL official at a hamfest, let alone Dayton. I have literally seen bodies jumping out of windows when a Section Rep was introduced. A skunk could not achieve the same result.

Personally I suspect a conspiracy to empty the crowd into Dayton hotspots and keep the crowd at the vendors (shopping in the dark beats hell of an ARRL official). The real question is why the League showed up. Theories range from a feeble attempt to regain relevance to needing enough bystanders to prevent a lynch mob from forming. Pick yours.

BTW while not denying there may be some, the 'bitter old Extras' are largely imaginary.

Dick McCollum N0BK

549. AF2Y: a reply from Hap

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-07 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8cl071hcu1@slb2.atl.mindspring.net>
Source record: 114853

Oh by the way I did send an inquiry or two to Hap Holly concerning "equal time" on his website which notwithstanding an otherwise very fine piece of work still comes across as the National Enquirer of ham doings on the web. I broached the issue of equal time to Hap because if one sends an e-mail in defense to Mr. H., it's not seen by those same hams who see just the other side of the picture. And if one sends a certified letter to Mr. H., it's not passed on to Hap for publication. Perhaps I'm wrong but shouldn't democratic principles apply to ham radio since they apply to every other phase of American life? Do not misconstrue my remarks as blaspheming Riley Hollingsworth specifically or the Commission generally. Enforcement was LONG OVERDUE and thank heavens we have it. I am making a case for those who never were caught in the act of doing anything but jumped upon by Riley by virtue of clever perfidiousness emanating from a collaboration of misfits who convinced him of their sainthoods and righteousness, like from someone who might be an elder and wears vestments in a Southern Baptist church who for years pretended to be a talking squawking bird whose talents included blowing into harmonicas before a microphone and playing rock and roll records and jamming QSOs with "Herbie baby's number one" and other assorted infractions tantamount to exhibiting the worst conceivable demeanor ever heard on amateur radio. Just a thought-no names or calls mentioned. Here is Hap's second reply and if course being that he sees no need for equal time, rehashing it with him is moot. If he's satisfied showing hamdom just one side of a story, then so be it and we'll all have to learn to live with it. I really wish I were computer literate enough to create a website on which I could convince Mr. H. to let me publish his outgoing letters as well as replies. Wouldn't equal time (DEMOCRACY) be a wonderful thing to have in ham radio?

Equal time does not apply to Amateur Radio. Furthermore, M. Bohnhoff Inc. posts ALL letters sent by Hollingsworth. We do not ask for them. Hollingsworth forwards these enforcement letters as public documents to be posted on www.rainreport.com <http://www.rainreport.com> . We are one of a handful of media outlets that are recipients of ethers letters.

I trust we can now put this matter to rest.
Hap Holly, KC9RP

> It reduces air pollution.

But Burt, this is not the problem! The problem is
going to hamfests and seeing all the beer-bellied
slobs wearing cloths that were last washed in 1984
who insist on dicking you down to 25 cents on a
50-Cent item. It's a visual pollution problem.
Someone once told me that if you want to take a
census of all the unwashed and overweight radio
nuts living in a 100-square mile area, all you have
to do is announce and hold a hamfest. Is this an
accurate statement?

> Welcome to ham radio-set your watch back 40 years

No, more like 80 Years. Traffic and message nets have
been around since 1920 and have not changed one iota
since their inception. Sh-T, I've even heard some of
the missing-links at hamfests arguing how they can't
go out and *buy* a *tube type* radio anymore! They said
that "those transistor rigs go bad if you run your feet
across a carpet and touch-em". (a DIRECT quote from a
guy with a W2 call who looked like he last bathed in
1990 and saw a dentist in 1980) Guess he has not heard
about Integrated Circuits yet eh? Ham Radio - the
participants and colorfull (meaning cheap WASPs) therin
never cease to amaze and amuse. Be sure to check out ham
radio's greatest circus freak sideshow, comming soon to
a hamfest NEAR YOU!

(...and don't forget Dayton 2000! This Year's stellar lineup
includes the Smothers Brothers and toothless dancing girls OOOFA!)

First of all, PSU operates on an 800MhZ system. we trashed our 160 mhz system years ago. As I understand it, this radio is a dual-band 2 meter/ 70 centimeter radio, therefore uncapable of operating on 800 mhz.
Second of all, I don't even own the radio. This post was for a friend who was looking to buy the radio, and asked me if this type of modification IS POSSIBLE. I didn't know, so I asked the forum.....

Thanks for the quick judgement, Liberty.

I hate to say it Doc,but you are right. I think you have a legit beef with Mr Hollingsworth. You NEVER recieved a tape of you jamming. They (he) should reveal the just what you did (said).
Doc, you are in a fine club of individuals meligned by Riley.
Only you can take this to the limit.
Only You have the vast intellect and command of the English to fight the dragon.
You have done so many things.
Identifing Neo-Nazis when the rest of use werent able to reconize they were Nazis.
Making the last few months of life of a ham a preperation for the hell he would ultimatley endouer.
Change the chemical compostion of holy water for the enjoyment of Christians.
Write letters to stop a ham from recieving a pension because of his affiliation to a radical club
Dedicating yourself mind,body,and soul to the destruction of a single ham.
Use psychological techniques to cause a ham to "go nuts" and get beat up
Mastermind aplot to expose the persons sending letters degraging hams by wire tapping a phone call and have someone else to do it and get all the pleasure.
This is your greatest challenge Doc.
Alot of us are depending on you to go the distance with the FCC. Other guys have done alot worse, but the FCC has targeted YOU.
Are they yet other examples of hatred towards people of you tribe?
Keep up the good work

Wow. Big deal. The fact remains, as I've always said, the people upgrading under the handout system are not committed to the hobby. If they were, they would have upgraded a long time ago. These are comers and goers, people out to maximize their access but not their use.

Flash in the pans burn out quickly.

And before a select group responds by saying "sour grapes", note that the hams upgrading in many cases are those already in the Advanced and Extra portions. I already talk to them, but still have a right to my opinion of their waiting game, without being subjected to your hackneyed cliches that are indicative of your mentality.

My concern is that this sort of ambivalence is going to run this country down the "terlet" faster than it already is going. Ham radio laziness is just symptomatic of it.

And my concerns are not so much for the antique 20 wpm CW test, but for the "increased difficulty" of the new question pools, the only increase in difficulty of is to confuse people with exisiting CSCEs.

To those "many qualified applicant" codeless techs who "desired to be amateurs" and were "prevented from contributing to advancing the state of the art", and who upgraded and built their own microwave spread spectrum DSP rigs, as the FCC has said there are so many of, you have my apologies if I have offended you.

"There is only one quality worse than hardness of heart, and that is softness of head."- TR
"There is only one quality that hams have around beautiful women, and that is the urge to flee"- MFL

Now some juvenile will respond with:

1. duh, you would know
2. takes one to know one
3. my personal favorite "na na na na na" : "no, that's the urge they have around you"

or some other creative ham newsgroup hackney that completely avoids the issue since they don't have a leg to stand on, or a brain to sit on

(Now some juvenile will repind with "you must be sitting on yours, Old Man" or better yet, "yeah, number 3 must be true, that's why it's your favorite")

Hermit, I'm a REAL 20 wpm extra who most certainly WOULD feel threatened by the packS of UHF and VHF jackals who will now INVADE HF if I were very active on all the bands. Here's a for instance. Have you ever tried to hold a regular ragchew on a contest weekend? It's impossible due to the EXISTING nuts and bolts selling their mothers for a point. What's going to happen beginning Apr.15th when insult is added to injury? Not only will the influx screw up even more the chances of having a QSO but will create chaos among contesters themselves. I suggest you stop being so cavalier about things to come and so facetious about us who earned our Extras the old way- through SWEAT and STUDY. How do you feel about seeing our flag burned? Any decent American would tend to go after the ignitors and beat hell out of them. How then do you feel about ham radio being burned because that's exactly what restructuring will do? And about Extras whose technical skills are lousy? I

ask, SO WHAT? Are kits being sold like in the old days whereby a ham can study a schematic or solder or hold resistors, capacitors and what not? Haven't the Japanese made all that passe? Would you be willing to go diddle inside a $2-5 grand rig? And so in light of the unnecessariness of being technically proficient nowadays, what has separated the men from the boys? CW! I took and passed the Extra in April of '78 and reflect upon it this way. What was so tough about the written even before the Bash books? I didn't have to write an essay to explain things-it was all memorization more or less. BUT the code test was something else because we were all herded into a room with a proctor present. The headphones were put on and brother...in came hell and there was no faking nada, fellow. It was either copy and understand or goodbye. Now you see how important was CW? And even today, with code much less emphasized than in years past, it should remain at 20 wpm for someone to call himself an Extra. Who get's more credit, who deserves to be called a hero at the top of Mount Everest- a guy who got there by helicopter or one who clawed and sweated his way up?

Dang Doc....I feel cheated...I never had earphones with my General test, at age 14 in Pittsburgh PA. Nor for my Extra test in Wiesbadden Germany in 1976. I feel abused.

Look, there is no sense in bitching and moaning about the new guys and if they are "real" hams or not. The bottom line is that they are (or will soon be) here.

What we ALL MUST DO is treat them as a human being should be treated. If they make a error, then politly correct them. In otherwords welcome them into this elite fraternity of amateur radio. Because if we dont welcome them then you will see all hell break out. And that is what the FCC wants. They want us to act stupid and start radio wars. That will give them a excuse to END HAM RADIO.

Why do you think they are making it so easy to go on HF? TO GET THE VHF/UHF bands and SELL THEM OFF.

Watch and see if that don't happen.

A good point. The interesting fact is that with all the screaming
about standards, no one offers any set of standards on any
specific basis. Just the same bull about "dumbing down", less
effort, relaxing the rules, lowering requiremnts,
yada, yada, yada. If someone could spell out an
objective of what they wanted and how to measure it in
a reasonable means, perhaps others would listen.

Cheers,
Bill K2UNK

I have the following Ham Radio equipment for sale.

1: FT-847 All Mode Transceiver HF & SATELLITE
$1250.00

2: ATAS-100 YAESU MOBILE ANTENNA and ground plane kit.
$225.00

3: FC-20 ANTENNA TUNER AUTO
$175.00

4: CfX-514 tri-plexer for radio
$50.00

5: Ameritron AL-811 160 thru 15 meter HF amp.
$400.00

6: Radioshack watt meter 1500 watts.
$30.00

All equipment less that 6 month old, I live in a apartment
and decided not to move. Buyer pays shipping, will make package
deal.

Mr. Bowers, I'm offended by your harsh statements. Wimps use CW? Are you nuts. Was Guglielmo Marconi a wimp? This whole thing we know as ham radio began with a spark and you dare to insult code? Bowers you're an insult to every ham who was ham enough to struggle as I did to pass that 20 wpm test and just because you can't...just because you're a flaming hotshot idiot who finds it easier to knock and mock guys like I than to ever try and upgrade your own standing, makes you ham lowlife of the year.

I have also used Heil mics/cartridges on a couple different Yaesu rigs. I've changed the element in an MD-1 to HC-4 and what difference. Nice punch, good clear audio. The only thing I have found that is better is a 'broadcast/recording" mic (Equitek E-100) that is pricey, and flat as a pancake from from 10Hz to 10,000Hz with gain from hell-o. Other than that I've not seen too many "radio" mics that beat the Heil. You'll like it.

You people keep repeating this nonsense, apparently in the hope someone
will believe it.

Please cite verifiable proof of warnings of interference in any other
communication from the FCC to AF2Y than the one issued in March, 2000.
The words "interfere" or "interference" must appear in your citations.

Provide proof, not wishful thinking (if you can).

I just observed the most intense auroral display I've seen.

It was observed from about 8:30 to 9:00 PM (EDT, 0:30 - 1:00 UCT) from Shepherdstown, WV (approximate latitude 38 53' N). It was a bright red, and extended from about 10 degrees above the western horizon, passed pretty much though the zenith, and went to the eastern horizon (as far as I could tell, there where trees in that direction).

The stars of Ursa Major were noticeably dimmed by it, and I could easily see it with non-dark adapted eyes.

I've seen a few other posts about auroras tonight from other places. I'd suggest everyone with clear skys take a look. I've seen green shimmery things at star parties before -- in the wee hours of the morning with dark-adapted eyes -- but nothing like this.

That is sonsistent with the "fixes" that are generated with the
satellite reports and given to C.A.P.

I have flow missions looking for these crashes.

>>>But you just made a *direct* response to one of my posts last week.

>Uh, no. No more than this is a *direct* response.

Think back to a couple weeks ago -- your comment that no one on
the Maritime Net was able to copy CW, and the incident on the boat
was a good reason why everyone should carry a gun -- recall the
response I made to those two statements, and your *direct* response
back to me.

>But Jeff has always had a problem dealing with the truth, which is why I
>filtered him in the first place.

Let's examine the truth: You claimed that the government didn't
acknowledge the existence of "amateur radio" until sometime in the
late 20s or or early 30s, instead, calling hams "experimenters." I
refuted that by providing historical evidence that the government did
indeed use the term "amateur radio" as early as 1912.

You claimed that there was no Extra Class amateur radio license prior
to what, the 30s? I refuted that by showing that the government had
indeed created the Amateur Extra First Class License in 1923; to be
awarded the ticket one had to be licensed for at least two years, take
a test similar to the First Class exam of that period, copy 20 wpm,
and have a clean record. Extras were then permitted to operate on a band
that those with lessor grade licenses were forbidden to use. That band
(200-220 meters) had originally been open to all hams.

Confronted with having been proved wrong on these two counts, you
claimed that you would add me to your "filter" (which seems to have
some leaks).

And no, you won't find any out-of-band mods in the Handbook, but if
you read it thoroughly enough, you'll learn enough about electronics
so that you can perform modifications on your own without having to

resort to "1. Cut Diode D12, 2. Cut red wire between R23 and C37."

The CBer hermit_thrush@my-deja.com, wrote:
>ARRL, who brought you the incentive licensing debacle,

Incentive licensing has been around almost as long as ham radio itself. The idea of an IL structure was created in 1923. Back then the government developed the Extra First Class amateur license; to be awarded the ticket one had to be licensed for at least two years, take a test similar to the First Class exam of that period, copy 20 wpm, and have a clean record. Extras were then permitted to operate on a band that those with lessor grade licenses were forbidden to use. That band (200-220 meters) had originally been open to all hams.

Moreover, in 1959, the FCC asked hams, via a Notice of Inquiry, what incentives could be tacked on to the Extra Class license.

It was the government which first suggested incentive licensing, not the ARRL.

etagg,

Let's not impugn the integrity of Happ Holly, who is an unblemished servant of ham radio. And let's not suggest that Riley Hollingsworth, Esq. is doing anything but his best to clean things up. Nothing suggests otherwise.

Save for those caveats, I know for certain, there are some hams acting to put others in the frying pan, regardless of merits.

Source record: 114918

It's called 3 phase.
Looks to me like you are being given 2 phases of a 3 phase system.
You have to make sure that the 2 phases you are using are different, put a meter across them, if they read 208 your ok, if they read 0 or close to it you have the same phase. And make sure to run a 2 pole breaker, NOT 2 single pole, so you don't zap yourself or someone else if you turn only one breaker off as said from you previous poster.

LINES A B C N
A, B, C are line
N being neutral
A - N = 120V
B - N = 120V
C - N = 120V
A - B = 208V
B - C = 208V
C - A = 208V
From phase to phase in a 3 phase system, multiply line by 1.73 not by 2.

There are transformers that will transform from 208 to 240V, but I would call your power company and request something be done about it.

599. ****Worth Sharing...."America, the Good neighbor !"

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-07 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <20000407010450.19063.00000182@ng-fw1.aol.com>
Source record: 114919

With all the bad publicity of the U.S., here's the good side of it.

TRIBUTE TO THE UNITED STATES
This, from a Canadian newspaper, is worth sharing.
America: The Good Neighbor.

Widespread but only partial news coverage was given recently to a
remarkable editorial broadcast from
Toronto by Gordon Sinclair, a Canadian television commentator. What
follows is the full text of his trenchant remarks as printed in the
Congressional Record:

"This Canadian thinks it is time to speak up for the Americans as the most
generous and possibly the least appreciated people on all the earth."

Germany, Japan and, to a lesser extent, Britain and
Italy were lifted out of the debris of war by the
Americans who poured in billions of dollars and
forgave other billions in debts. None of these
countries is today paying even the interest on its
remaining debts to the United States.

When France was in danger of collapsing in 1956,
it was the Americans who propped it up, and their
reward was to be insulted and swindled on the streets
of Paris. I was there. I saw it.
When earthquakes hit distant cities, it is the
United States that hurries in to help. This spring, 59
American communities were flattened by tornadoes.
Nobody helped.

The Marshall Plan and the Truman Policy pumped
billions of dollars into discouraged countries. Now
newspapers in those countries are writing about the
decadent, warmongering Americans.

I'd like to see just one of those countries that
is gloating over the erosion of the United States
dollar build its own airplane. Does any other country
in the world have a plane to equal the Boeing Jumbo
Jet, the Lockheed Tri-Star, or the Douglas DC10?
If so, why don't they fly them? Why do all the
International lines except Russia fly American Planes?

Why does no other land on earth even consider putting
a man or woman on the moon? You talk about Japanese
talk about German

technocracy, and you get automobiles.

You talk about American technocracy, and you find
men on the moon - not once, but several times -
and safely home again.

You talk about scandals, and the Americans put theirs
right in the store window for everybody to look at .
Even their draft-dodgers are not pursued and hounded.
They are here on our streets, and most of them, unless
they are breaking Canadian laws, are getting American
dollars from ma and pa at home to spend here.
When the railways of France, Germany and India
were breaking down through age, it was the Americans
who rebuilt them. When the Pennsylvania Railroad and
the New York Central went broke, nobody loaned them an
old caboose. Both are still broke.

I can name you 5000 times when the Americans raced
to the help of other people in trouble. Can you name
me even one time when someone else raced to the
Americans in trouble? I don't think there was outside
help even during the San Francisco earthquake.
Our neighbors have faced it alone, and I'm one
Canadian who is damned tired of hearing them get
kicked around. They will come out of this thing with
their flag high. And when they do, they are entitled
to thumb their nose at the lands that are gloating
over their present troubles. I hope Canada is not one of those."

Stand proud, America!

Wear it proudly!!

++
This is one of the best editorials that I have ever
read regarding the United States. It is nice that
one man realizes it. I only wish that the rest of the
world would realize it. We are always blamed for
everything, and never even get a thank you for the
things we do.

I would hope that each of you would send this to
as many people as you can and emphasize that they
should send it to as many of their friends until this
letter is sent to every person on the web. I am just a
single American that has read this, I SURE HOPE THAT A
LOT MORE READ IT SOON.

Source record: 114921

"To boost the 118V up 30V you need a transformer that outputs 30VAC"
I'm not sure where you got this info, but this isn't right.
You are telling him "outputs 30VAC" that will give you 30V AC out.

To do this properly you must transform both lines.

Find out how much current you need.
P=EI same as I=P/E
(P)Power in Watts = (E)Voltage x (I)Current in amps

So what you need is a single phase 208V to 240v transformer.
Now you need to know how much current you need...

E.G..
Lets say you need 10 amps on your LOAD side (radio, light or what ever devise)...
Multiply the load side voltage of your transformer(which will be 240V) by LOAD side current(example 10A) to equal your transformer VA.
240V x 10A =2400VA or 2.4KVA
(VA) volt-amps and (W)watts are pretty much the same except for inductance on your load, but it would be safe to say they would be pretty close unless your running motors or powering big coils.

So ask for a 208 to 240V, 2.4KVA transformer.

Now on your line side or breaker feed...
2.4KVA/208V(line side voltage) = 11.5A draw at your breaker.
15A 2 pole breaker and #14gauge wire will do fine for a radio.
Also use a plug desinged for 240V, I have seen people put 240V on a 120V plug and forgot about it, or there kids or wife go plug something in and.....BOOM!

Sorry about getting so detailed.

Hehe, nope, just a different class that would be there when you look it up in a database or when someone asks. Just like my call doesn't immediately tell you I am an extra, there is no need until you are asked. The point is, that Extra's should be "Extra Plus's". I am not sure what to do after the 15th, because that is going to be yet another class, one that has to pass a harder written exam.

> then 'split' using one side of this '220v' line

To be accurate, the "split" is done at the pole by taking 1 phase of 3 phase service and using a center tapped transformer to get 2 110V legs that are of opposite phase. This is single phase service.

> and the 'third' wire(ground/neutral) to get '110v'.

Please do not think of ground and neutral as equivalent. Although they may have a common connection at the service panel, they serve entirely different functions in the system and may not be substituted for one another.

> To obtain 220 volts, simply run a 3-conductor cable from the two
> 'hots' comming to your breaker-box

The 2 hots are all that are needed for 220V. But if (as below) a neutral is needed, then 4 wires should be run to include a ground.

> AND the ground/neutral to an appropriate type receptical.

The ground should be run for safety reasons. The neutral is necessary only if 110V is needed in the load.

> Just like 'they' do for any 220 volt outlet.

Not exactly. "They" do it as I described.

For the original poster:

Do not use single 110V breakers; use a dual 220V breaker. Besides the safety issue mentioned elsewhere, this ensures you are getting both legs from opposite "phases" of the service.
Do not "homebrew" a receptacle.
3 phase is quite rare in residential settings; it is unlikely that's what you have.

From: bm8311@my-deja.com
Message-ID: <8cl3tsjm1@nnrp1.deja.com>
Source record: 114930

1. Disconnect the power cord and antenna coax from the transceiver. OK

2. Remove the top and bottom covers. OK

3. Remove the top screw from each side of the front panel assembly. OK

4. Loosen the bottom screw from each side of the front panel assembly. OK

5. Carefully rotate the front panel forward to gain access to the Control board (X53-3690-10). OK This board is mounted vertically against the body of the transceiver. It is not the board that is mounted in the front panel assembly. OK 6. Locate and remove the chip resistor R41 from the Control board. Problem Cannot find R41 on (X53-3690-10). But it is on the board that is mounted in the front panel assembly. Anyone any thoughts on this matter?

7. Assemble the transceiver then perform the CPU reset procedure by holding the A=B button depressed as power is turned on.

This is for the DG model only!

1.Disconnect the power cord and antenna coax from the transceiver.

2.Remove the top and bottom covers.

3.Remove the top screw from each side of the front panel assembly.

4.Loosen the bottom screw from each side of the front panel assembly.

5.Carefully rotate the front panel forward to gain access to the
Control board (X53-3690-10). This
board is mounted vertically against the body of the transceiver. It
is not the board that is mounted
in the front panel assembly.

6.Remove the square cover with 4 screws on it? I DO NOT NEED TO DO
THIS TO GET AT THE IC5? LOCATE IC 5 go to the lowest point by ic 5 there
are 2 resistors(I SEEM TO HAVE FOUR?) between the is 5 chip and the
screw hole REMOVE the HORIZONTAL ONE (THREE HORIZONTAL AND ONE VERTICAL
IN MINE?)
HAS ANYONE OUT THERE ACTUALLY DONE THIS MODE? IF NOT CAN ANYONE CLEAR UP
THE ABOVE CONFLICTS?

7.Assemble the transceiver then perform the CPU reset procedure by
holding the A=B button
depressed as power is turned on.

Source record: 114933

I have a TS-850 which someone modified for transmitting in the CB band. In doing so, they did something which blocks activation of the WARC bands. I'd like to undo this mod, but I have never found a description of how it was accomplished. There is a toggle switch on the rear apron that switches this mod in and out.

I've opened the rig to look for the changes. But the person did the modifications so skillfully that I can't tell what's "factory" wiring and what's not.

Any suggestons will be welcome.

> also have a 847 and was wondering what you did to fix it?

Well, Martin. I received a message from Yaesu that recommended that I turn the AM carrier level down to about 20-25 watts by adjusting VR1020 (located next to the crystal filter on the main board). This is below specs, but Yaesu insists that it will help the situation.

However, Yaesu also admitted that the AM mode will never sound as strong as that on a dedicated AM radio (often high-level plate modulation units), but Yaesu insisted that adjusting the carrier down will "make it sound quite reasonable."

As a volunteer examiner who has seen increases (our session, normally with 30 candidates has has 90, 80, and 80 in the past 3 months - a 177% increase), I must concur that is is mainly people seeking upgrades. Out of those 250, 200 (or 80%) will be returning to cash in their upgrades come April 15th. However, out of the other 50, about half were candidates who failed, and half (10% of the total) actually submitted a form 605 for a new or upgraded license. Therefore, I agree with the factual statements made here (except the SAT score reference in the title), but I make no opinion on the conclusions drawn.

631. RITTY problems

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-08 00:00:00 UTC
From: cdc <cdc@fast.net.au>
Message-ID: <38EEEE4A.94A06767@fast.net.au>
Source record: 114764

Hi
I am currently trying to evaluate ritty (still searching for the best RTTY
program to use). I must say trying because I can not start the unregistered version of RITTY. My operating system is Windows 98 and I had no problems evaluating other soundblaster based software like MixW Demo.
When I start RITTY the Windows screen switches and the RITTY welcome screen comes on. That is how far I get.....
This is very disappointing as I am very curious about RITTY, I have read

many encouraging articles about the software. So if anybody has an idea what could be the reason for my problem please let me know.
Thanks for your help

If you're one of Riley's pets, you can get away with anything in Amateur Radio, with full impunity. Take for example, when I was on the internet telephone with VA3GJB 2 weeks ago on 3901, W2KP, Ed Clarke made unidentified transmissions, and caused malicious interference. I guess that's okay, if your one of Riley Hollingsworth's snitches! I wonder why he doesn't do the work himself, I guess it's easier to collect a government paycheck, and accept bogus information from Amateurs with a hate agenda.

Howdy, Bob.
I don't think you should encourage this type of segregation.
There's already going to be an initial "adjustment" period,
and setting a specific frequency will aggravate those feelings.
Most of us "learned by doing." We just jumped in and listened
to what the old hands did. That will work for the new guys.

Personally, I think you'll have to deal with a few (very few)
hotheads, but the vast majority of HF hams are going to
welcome the company. The guys who come on yelling "skip land"
and "10-4 good buddy" will either learn and adapt or be
swept aside by ostracism. The guys giving them a hard time
will face the same problem ;-).

Good luck, OM
73 Dave S.

The REAL fun is when the incompetent ARE the irrelevant, whining about
the loss of 20 WPM (as if they will never be able to do it again --
which, for some, might be true).

BadBlood. I care nothing about the guy because the only time I ever heard
him was saying "Amen" on 20 meters which is as flagrant as Squeaky's "Uh oh"
which has always seemed to go unnoticed by you and your crude crew. The
truth is that anything said unidentified is in violation of Part 97 but your
crew is so damn stupid you don't know the difference between it and a part
in your hair. If his capture elates you, so be it. With your alleged
matrimonial disharmony with a divorce either in the wings or already under
way, you could stand cheering up. I briefly checked the Webfoot extra or
perhaps it was another ham radio National Enquirer and thought I saw mention
of the fact that the guy called himself Captian Sod or Captain Sodomy.
That's as warped as the mention of my mobile operations in a letter sent by
Riley in December. One of these days the powers that be will get info
straight. I haven't used ham radio mobile in 20 years and the offensive
names applied to whomever were labeled by the most offensive K4OKA and his
sheep, one of which is a professor named Bill Simpleton and the other whose
wife allegedly ran away with a 17 year old. The latter loser is also a
professor or is it brot fresser at Virginia Polytech or is it "Pollytech"
and is often inebriated from what I've been told. "Hic." In the meantime
Badblood would you like to tell us why letters of condemnation from Riley
sent to you were never published? I mean for a guy who relishes the "skinny"
and demands truth, we do too. And might you comment on the allegation of
your having been hit with a $2,500 fine for being so obnoxious on the air?
We'd like the truth, please. Finally a last word about this guy Truth who
has you and your flock in an uproar. You say he's been bankrupt? You're the
wrong one to talk about it. Do you mean financially because your sincerity,
genuineness and on-the-air demeanor have been bankrupt ever since I heard
you open your fat trap.

I have had it for over a year now. A real solid radio from a construction standpoint. Terrible on CW unless you like listening to the clack clack clack of the relay with every dit and dah. Too noisy for me to use on CW, but since I'm not a big CW fan, it's not a big problem for me either.

SSB transmit and receive audio quality is good. SCAF filters work well. My biggest complaints are that the sensitivity of the receiver on 15, 12, & 10 meters is poor. The frequency display is off for every band. You can align the display on one band, but then it is off even more on the other bands. Sent it back to SGC have it fixed, and it came back with the same problem. I wish SGC would fix the problems through upgrades to future production models. I keep going to the web page and see nothing that indicates they are trying to make future production units better.

Regards,

Duffy

Doc, by now you know that I don't enter NGs with intended prejudice. You may know something I don't but, for my part, is a simple matter of frequencies for everyone until I see something different.

I don't buy into mob psychology, jumping on any band wagons. Though we all are admittedly biased, I try my best to see everything through clear glasses.

Dave Stinson, your words in "Re:What Hap is Failing to Cover" are GOLDEN. You have you head on VERY straight, Sir! I hear about banking on OO reports as being the Gospel all over again. What? Let me tell you about an idiot OO from Spartansburg, SC named R.L.Nitch, W4NTO who's one of these demented Jesus freaking fundamentalists to whom the ARRL delegated authority. I got card from Nitch in March of '99 which castigated me for using the term "God damn" on the air because according to him, I invoked the wrath of the deity with the repeated use of that term," Can you beat that? An OO card sent in GOOD FAITH, sent without bias, sent without a preference for one side of an argument or the other, SHOULD BE APPRECIATED AND ACTED UPON, but something like I got was outrageous and I let the FCC and ARRL know about it. I decided to answer it because I have no use for these very dangerous fundamentalist slobs who preach more evil than what they scream against. I wrote the following dated 3/5/99.

"Dear Mr.Nitch,

Although I'm not required to reply I chose to as well as to inform the ARRL how poorly their OO cards are being used.

You are bent out of shape because I blurted out in anger, "God damn?" That's strange because I've heard that same expression used in sermons by phony televangelists who rob the gullible, even from South Carolina, out of cash to guarantee their afterlives in heaven instead of hell. Quite honestly I don't rate that expression as one of cursing but rather as a forceful expression of a wish unfulfilled.

Now don't misread me. I like the ARRL and even though some whackos have been given OO credentials, I feel the OO program is useful. My reaction to your card is not predicated on the customary "who me?" syndrome but rather on the banality of it all. I wonder how many cards you've issued to the obnoxious pig mouths and white supremacist idiots on 75 meters, the ones who are fond of a four letter word starting with "F" and the ones who graphically expound upon sexual intimacy and the ones who denegrate non-Caucasians and Jews? Do you act so decisively with them as with me or perhaps white supremacy cloaked in Christian garb fits your personal agenda? When I read, "invoking the wrath of a diety with the repeated use of the term, 'God damn,' I think of that nut Brother Stair from Walterboro South Carolina, the shortwave evangelist who is, according to himself "the last day prohpet of God" amidst horns blaring and daggers thrown at the Pope. Sorry but I get the distinct impression that you are one of these "end times, 666 screwballs" whose emphasis is misplaced in amateur radio. Call it "God crazy or a Jesus freak," you are deity- driven in the name of amateur radio or vice versa.

Sending such a card assumes that the recipient is neither an agonostic nor atheist and that, Mr.Fitch, is UN-AMERICAN. Although I myself do believe in God, if I were an OO, NEVER would I ever dare to send anyone a card with a religious inference and that's because I respect freedom of speech and the

fact that we have no national or state religion in this nation.
Your problem Mr.Fitch is that I feel you don't like the idea of separation of church and state. By that I think you will react much more quickly to anything on ham radio relating to God than to the reality encompassing the lewd and bigoted which we hear so often nowadays therefore I suggest your religiosity be not a prerequisite for issuing an OO notice and the ARRL must be made aware of your misuse of their valuable program.
And may I close by saying God damn all those who, in one way or the other, are hell bent on destroying this hobby/service as well as our basic freedoms, YOU INCLUDED.
Yours truly,"

Based on the above, if the OO program is to be given the highest priority, let the ARRL CLEAN HOUSE. By that I mean SCRUTINIZE the situation instead of being cavalier and then throw out everyone like Fitch who has a religious agenda and everyone who is known to be an FZ lover, a WB2OTK hater and vice versa. But then again how can we hams expect an OO cleanup in light of ARRL and FCC relaxation of rules and regs which separate ham the hams versus hams the shams?
AF2Y, Doc

(anti-extra-lite rant snipped)

Oh please..
This new "extra-lite" to be is maintianing three repeaters. I rebuilt
one from scratch, after a lightning hit reduced it to parts rattling
around in a nice box. This was more fun because our previous "all
extra" tech committee had lost the docs, so I had no schematic to
work from, and most of the damaged parts were unidentifiable. I'm
also president of the local ham club, and I design various electronic
gizmos for the point of sale on the side. (The last big one sold over
5M units) I passed the gen, advanced, and extra tests last weekend
with no studying, and I used a calculator once on the advanced exam.

Maybe some day I'll see the attraction of CW, but I rather doubt it.
I'm getting old fast enough, without waiting around for the beeps to
happen.

How about we fix the technical requirements of ham radio to match the
majority of the "old extras" that I know :

All rig control microprocessors must be banned. There's nothing that
you can't do with the right crystals anyway.
No privileges at all unless you are over 50 yrs old, with at least
three major ailments to gripe about on the repeater.

Seven days to extra :)

NCI Board of Directors Election - News Update

As posted on the NCI website over the past month, according
to the Bylaws, it was prescribed to hold an election for
NCI's Board of Directors no later than April 15, 2000 for
a two (2)year term commencing May 1, 2000.

Accordingly, the Board of Directors set about making plans
for an election and a number of new pages were posted on the
NCI website relating to the election process, including an
Election Announcement, with links to a Call for Nominations;
a page of instructions on "How to Nominate a Candidate"; a
"Nomination Form" to be printed, filled out, and submitted in
order to nominate a candidate; and a page of links to
"Candidate Statements".

All of the incumbent members of the original Board of
Directors sought election for another two year term and were
duly nominated, but nominations were also open to the general
membership, as provided in the Bylaws, should other candidates
wish to "toss their hats into the ring" and become involved in
the administration of the organization.

As specified in the "How to Nominate a Candidate" page, cutoff
dates of April 1, 2000 (for postmarking of nomination forms) and
April 7, 2000 (for receipt of nominations in order for a candidate
to be placed on the ballot) were established, in order to allow
adequate time for any additional nominees' Candidate Statements
to be posted to the website for member review, as well as for the
preparation of a web-based ballot form and an e-mailing of secure,
individual "validation passwords" to all members eligible to vote
in the election to protect the integrity of a web-based voting process.

As of the April 7, 2000 cutoff date for receipt of nominations, no
additional nominations beyond those of the incumbent Directors were
received.

Thus, according to Article V, Section A, Par. 2 of the Bylaws,
balloting is rendered unnecessary and the incumbent members of the
Board of Directors, being the only nominees, are duly declared to be
elected to another two (2) year term of office, commencing on
May 1, 2000.
```

(Article V, Section A., Paragraph 2 of the Bylaws specifies:
"In the event there are not more nominations than the maximum number of Board of Directors members who served, at any one time, since the previous election, all nominees will automatically become members of the Board of Directors on the first day of the subsequent term.")

This Notice published April 8, 2000.

Bob,

Let me give you a little advice. Stay out of things you know nothing about. This discussion does not concern a hams "right" to utilize a frequency. It concerns a malcontent that thrives on strife. And Doc is right, you were not there and simply don't know how it was.

I removed myself from 14.313, as did MOST of the people I talk to. Why did we do that? To stay the hell away from the troublemakers. And now they follow us down. What does that say Bob?

I have not been on that frequency for at least 3 months. And I will not return to it as long as it is occupied by people I have no desire to talk with. I also have the "right" to operate in peace. I ask nothing from them, other than to leave me the hell alone. Is that asking too much?

Dave,

Here is a horror story for you; A individual was identified of being a
well know qrm'er on both 20 and 75 meters. He was tracked and verified

and then reported to Riley. Unfortunatly it was the WRONG MAN.

A letter was issued for re-test, for whatever reason he didn't show up. Another letter was issued, this time cancelling his license. Drop ex-N9LAT a letter and see how he feels about it.

Dan:

I don't think you are rock bound to 14275 in this day and time. My suggestion to you is , if someone is on this frequency you want to operate. Example number 1 wait til they get through and call your station. Example Number 2 , If you are in a hurry , break in and ask to make a call. If successful, move your party to another frequency. That way you are in accordance with part 97. If you don't won't to do this , set in your chair and stew and brood til they get through and vacate the frequency.

This is the only advice I can give you Dan. Cheer up it could be worse.

For you CW purists, I propose the following 'new' test in case you ever
decide to use any other mode of transmission:

1. You must type 40 wpm to use packet.
2. You must 'master' an 1880's crank-style telephone
before you can use a common cellular phone.
3. You must monitor the 500KHz maritime CW distress
frequency for one week, since even the GOVERNMENT
no longer monitors it! (They went satellite/digital)
4. You MUST NEVER deviate from the 30 meter band!

THERE...now everyone's happy!!!

I have no intention of arguing with anyone on the air; Riley warned me about it. My posting was in defense of a grading system that should have been left alone since it's worked very well for decades. However are you serious when writing that the FCC HOPES deregulation starts a war whereby they can end ham radio? I disagree. Why would there by a concerted effort to destroy the money making capabilities of electronics manufacturers and retailers? No, restructuring has other motives which are deep, dark and secret but obviously helpful to the League and the Commission. Who knows, maybe it will work out okay however I'm skeptical. Spectrum allotment is like an elevator. Ever on a crowded one? A bit uncomfortable but what happens when it stops and another ten get on and then another ten etc? Irritation, shoving, bumping and short fuses. Oh boy, we're in for some ride beginning next week.

Dwight, the decision was squarely up to Clinton and he let me and you down. At times STRICT international law must be ignored especially in the case of COMPASSION. The father was rehearsed by Castro. The father is a pawn of Castro's. If anyone is using the kid politcally it's Castro. If he goes back just wait and see the staged Red rallies in Havana celebrating how the bearded bastard outfoxed "Imperialismo Yanqui." THAT CHILD IS HAPPY AND CONTENTED HERE in FREEDOM and we have been and will always be a haven. Has anyone thought of the following. Suppose Mrs. Gonzalez hadn't died at sea? Do you think both she and Elian would have been shipped back? BOTH were refugees fleeing oppression. One didn't make it-one did. therefore the survivor deserves to grow up in freedom. Period.

Once a federal law-breaker, always a federal law-breaker:

Title 47 - Telecommunication Chapter I - Federal Communications Commission
Part 95 - Personal Radio Services Subpart D - Rules for CB Service
Revised as of October 1, 1996 *Citizens Band (CB) Radio Service*

Rule 13 - Illegal Communications

{A} You must NOT use a CB station-
[9] to communicate with, or ATTEMPT to communicate with, any CB
station more than 155.3 miles (250 kilometers) away.
[11] to communicate with stations in other countries, except stations
in Canada (on General Radio Service).

Have you noticed the amateurs receiving letters are
exclusively "Goodfellows" , Must be a reason, I know, they are qrmers
and deserve the letters.

W4FQF since 1952

What about the letters KT4TR received for broadcasting credit and
police reports and YOU received some most likely, Polly.
And we KNOW you whined not to put your name out.

> Interesting that the notice was published *after* the two cutoff dates.
>
> Jeff KH6O

Jeff ... think clearly FOR A CHANGE ... the impending election was
posted to the website and an e-mail bulleting mailed to the membership
in early March.

There were CLEAR and UNAMBIGUOUS instructions, along with a
nomination form posted on the web site.

There were NO nominations other than those of the incumbents.

As far as the Notice mailed today, it CLEARLY could NOT have
been posted *prior* to the cutoff date for receipt of nominations,
because, UNTIL the cutoff date, there was the possibility that one
or more additional nominations could be received, which would have
necessitated an election. (Thus, the outcome could not have been
announced ... do you "get it" now???)

Since no additional candiates were nominated, as today's Notice
indicates the incumbent members of the Board are, according to the
Bylaws (which have been published on the website for quite some
```

time), automatically elected to another two (2) year term of office.

Now, PLEASE explain to me why you find it interesting that the
Notice of the OUTCOME was posted "*after*" the cutoff dates
for nominations? Surely you'd have raised holly hell if an outcome
had been posted BEFORE the deadline for additional nominations ...

Everything was "in the open" and "by the Bylaws."

no 73 for flamers like you,

To clarify Brian's comment above ... members received notices OF THE
IMPENDING ELECTION and HOW TO NOMINATE A CANDIATE,
well in advance ot the two cutoff dates [for nominations to be 1) postmarked
and 2) received.]

Today's announcement was simply a notice OF THE OUTCOME, which
was that no nominations other than those of the incument Directors were
made,
and thus, according to the Bylaws (also posted on the NCI website), the
unpposed incumbents are elected to another two (2) year term of office.

Although that may be a nice idea, there was no mandate of such in the R&O. I'm keeping my box's ID at 20wpm so as to minimize the time it may QRM the voice signal (even though the ID's audio level is less than the voice's audio level, some feel it's a sufficient distraction...).

Hey Doc,
Don't know about KT4TR (and don't care), but I think
ol'Walt had a heart-to-heart with 'RH'.
As for 'poor' Elian, he's with his surviving parent.
Whats so wrong with that? In the same situation, you
wouldn't want your son?? (Check custody of a minor under
common-law.) While your in the law library, also look
up 'kidnapping', might even take a look at international
law/treaties/conventions while your at it. I really hate
to say anything good about ol'Slick, but even he can't
be wrong all the time.
Had a 'Moon-Pie' and an 'RC' lately??

Interesting that the "close of nominations" notice was
posted to the NGs, but nothing prior to that.

>the impending election was
>posted to the website and an e-mail bulleting mailed to the membership
>in early March.

Nothing previously posted in the newsgroups about an upcoming election.
Yet the "close of nominations" notice was posted. I find that a bit
suspicious.

>Now, PLEASE explain to me why you find it interesting that the
>Notice of the OUTCOME was posted "*after*" the cutoff dates
>for nominations? Surely you'd have raised holly hell if an outcome
>had been posted BEFORE the deadline for additional nominations ...

A newsgroup announcement of the close of nominations is posted, yet
no earlier newsgroup announcement of an upcoming election. Why post
one without the (more important) other?

>Everything was "in the open" and "by the Bylaws."

Jeff ...

For the last time ... what was posted was a notice of the OUTCOME.
It simply included some of the details of the process for the information
of non-members like you who were bound to bitch about something
about it no matter what, despite the fact that, as a non-member, it's really
none of your business.

Gee, Dave ... I hate to be the one to tell you this, but the
member bulletin announcement brought MANY "Keep up
the good work!" and "Thanks for all of your work on our
behalf ... you're doing a great job." sort of messages from
the members who received the bulletin.

But you couldn't conceive of conceeding that perhaps the
reason there were no other nominations was based on the
fact that the membership is very satisfied with the performance
of the Board of Directors team that's been in place for the
past couple of years.

I can live with that ... I don't need YOUR approval. The
approval of the membership I represent is all I need.

Naw ... Dave doesn't meet the requirements for membership ... he believes
in Morse testing as a requirement to get a ham license.

[snip]

> Most of the work of NCI is complete.

Not really ... we're just getting warmed up ... 5 wpm is a step
in the right direction ... as evidenced by the HUGE increase in
people taking tests to get licenses (as reported in The ARRL
Letter of April 7 and other places). That probably really frosts
Dave ... he'll actually have to share "his" HF bands with new
folks.

> The remainder of the work must await the elimination of the ITU
> code requirement, and most of the rest of the nations will fall in step
with
> the US.

There's a lot of work to go to get to that stage ... we're on it.

> Given the good successes of the present crew, why would we want a
> change?

Thanks, Brian ...

NCI Board Ratifies Bylaws Amendments

On April 8, 2000, NCI's Board of Directors ratified several
amendments to the Bylaws designed to improve the efficiency
and effectiveness of the organization.

To summarize, the changes are:

1) Added sections C, D, and E to Article V, stipulating that
Directors serve on a purely volunteer basis, authorizing
reimbursement of reasonable out-of-pocket expenses to
Directors, and authorizing the Executive Director to make
normal, routine expenditures from the NCI treasury account.

2) Added new Article IX providing for the formation of, structure
of, and rules for National Chapters.

3) Renumbered former Article IX (Amendments to Bylaws) to Article X.

The full text of the Bylaws, as amended may be viewed in either HTML
or Adobe .pdf format on the NCI website at http://www.nocode.org.

NCI Announces Move to Form National Chapters
- - The Netherlands Leads the Way

In a move to enhance the organization's effectiveness in
lobbying radio regulatory agencies around the world, NCI's
Board of Directors plans to establish "National Chapters"
of NCI in all of the countries where we have members,
according to the provisions of the Bylaws as amended
April 8, 2000.

Peter Halpin, PE1MHO, has been appointed by the Board of
Directors as "National Chairman" for The Netherlands.
Peter was the first member to join NCI from The Netherlands
and has been quite active in corresponding with the Board
in recent times.

The Board of Directors is actively seeking suitable volunteers
from every country where NCI has members. Interested candidates
should contact NCI's Executive Director Carl R. Stevenson, WA6VSE
at wa6vse@fast.net.

Well Gertie Hinges it's like this. I went into private practice on May 29,1967 and in that same location for 22 years, I was successful enough to finally sell my practice, my building and everything associated on 5/13/89 to two enterprising young dentists from NYC who had just passed the NJ Exams. I was 50 years old when I decided to take an offer I couldn't refuse. Now you tell me what you did for a living providing of course you haven't subsisted on welfare.

Still twisting the truth. In Cuba, he would have a "clean home,
wholesome food, a car instead of a horse drawn cart, and good medical
and dental care." He could also have a dog, pizza, and toys.

Every child, even in America, receives some "home indoctrination" from
the parents to install their values and beliefs (obviously you were
indoctrinated by your parents to hate castro).

And I have no idea where you got the Leninist stuff from (as far as I
know, Castro is no Leninist).

In other words, you want to ignore international law whenever you feel like it. The international laws were created to protect the world from hate-filled fanatics, and I, for one, am very glad they are there.

As for his father, show me some evidence of his being "rehearsed by Castro." It is easy to make accusations - I want to see proof.

And, as for the child being happy and contented here, you don't know that. You don't know anything more about that child than I do.

Look, all this is nonsense. You are obviously not about to change your mind in this matter (your hate won't let you). And this has absolutely nothing to do with Amateur radio. So, I'll leave you to your misery. Take care.

Tim, considering that I have already mentioned, in this very thread, that I routinely talk to friends using a CB radio, I doubt it would really surprise anyone reading this thread to learn that I have an antenna to use with that radio.

And, as for my license class, I'm sure everyone in this newsgroup, who wants to know, already knows that. You seem to think being a technician class ham radio operator is something to be ashamed of. Let me tell you a little secret - its not.

Take care, Tim.

now being a "non member", not that there seems to be any membership other
the board..let me be the first to state

I TOLD YOU ALL SO.

The board of directors has just voted itself a free hand into the pockets
of all so called No COde members. The board can submit expenses and them
the board decides that the expenses be paid..as long as it's proper.
What a potential scam ;-)

Hmmm seems to me the 3 BoD members staying at the Crown Plaza during
Dayton @ $130 per night..well, I guess this goes without saying this is
probably a proper expense..at the sheeps, err members expense

Less see 3 members time 3 days times $130 that's $1170, plus travel plus food and entertainment...pretty cushy and the membership has absolutely no say. I TOLD YOU ALL SO..

I truly have seen it all when a so called national or international organization allows itself and not the membership at large complete and total entree into a bank account.

Looks like the No Code sheep are now truly gonna be fleeced.

Just remember absolute power corrupts absolutely

LET THE SPINNING BEGIN

BTW, are these expenses tax deductible??

In the subject post, I wrote: "If the ends be just, then any means must be all right too." I went on to attribute this guiding principle to Hap Holly.

I retract that attribution and apologize to Hap. While I've watched Hap's rise as a ham radio journalist with admiration, I have never understood precisely how Hap sees himself.

Tonight I heard from Hap and know the answer. He is dealing in soft features. Unlike me, Hap does not want to be caught up in the controversy I find intrinsic in issues.

Read Hap with pride, as he puts everything into his work. I am genuinely sorry, Hap, for having sullied your work.

Bob,
Beats me! The AL-600 is a very nice little amplifier,
after you move the power supply once or twice, it's not
so little. It's rated at 600 watts, but a solid 500 watts
is more honest. Fairly 'picky' about SWR, but a 'no muss
no fuss' amplifier.
'Doc

What an absurd insinuation.

Anyone, even non-members are free to read the damed Bylaws ...
any expense in excess of $50.00 must be pre-approved. All
expense reimbursements must be accompanied by receipts and
any other appropriate documentation, and must be for a legitimate
purpose in the conduct of the Director's duties.

ARRL Directors are likewise reimbursed for expenses. I've never
seen you bitch about that and you're an ARRL member. Do they
ask you if it's OK??? I didn't think so.

NO organization could operate efficiently if the Board had to poll
the membership for things like "Can we spend $85.00 to do a mailing
to <fill in some folks to mail to>? "

As a non-member you have NO business even commenting on this.
If you want to bitch about some Directors getting reimbursed for
legitimate out-of-pocket expenses (say gas money to attend a meeting),
bitch about your ARRL Directors ...

> Hmmm seems to me the 3 BoD members staying at the Crown Plaza during
> Dayton @ $130 per night..well, I guess this goes without saying this is
> probably a proper expense..at the sheeps, err members expense

I'm not going to Dayton ... Fred is the only Director I know of who's
probably going to Dayton ... and he'll be footing his own bill on the
tab of his business ... a legitimate business expense, I'm sure.

> Less see 3 members time 3 days times $130 that's $1170, plus travel plus
> food and entertainment...pretty cushy and the membership has absolutely
> no say. I TOLD YOU ALL SO..

Your imagination never ceased to amaze me Steve ... you really should
write fiction. Oh, I forgot, you do ... here on r.r.a.*

> I truly have seen it all when a so called national or international
> organization allows itself and not the membership at large complete and
> total entree into a bank account.

Why don't you bitch to the ARRL? At least in the case of the ARRL,
it's (partly) your money they're spending. (I really don't expect you to,
nor do I really think you should. I'm an ARRL member, too, and I
don't have a problem with the Directors being reimbursed for expenses
incurred in the perfomance of their duties ... after all, they're unpaid
volunteers, just like the NCI Directors.)

> Looks like the No Code sheep are now truly gonna be fleeced.

Only in your overly-active imagination.

> Just remember absolute power corrupts absolutely

Just remember that when you sit down in front of a keyboard your
personality disorder comes to the surface. Actually, I hear that
in person you're not nearly so irrational.

********************
NCI Announces Move to Form National Chapters
- The Netherlands Leads the Way

In a move to enhance the organization's effectiveness in
lobbying radio regulatory agencies around the world, NCI's
Board of Directors plans to establish "National Chapters"
of NCI in all of the countries where we have members,
according to the provisions of the Bylaws as amended
April 8, 2000.

Peter Halpin, PE1MHO, has been appointed by the Board of
Directors as "National Chairman" for The Netherlands.
Peter was the first member to join NCI from The Netherlands
and has been quite active in corresponding with the Board
in recent times.

The Board of Directors is actively seeking suitable volunteers
from every country where NCI has members. Interested candidates
should contact NCI's Executive Director Carl R. Stevenson, WA6VSE
at wa6vse@fast.net.

Auction is going well the reserve i have set has been met -

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=301822093

I am also gonna serve notice on you people who are messing with my auction. I have already took off bids from one person. You think i'm gonna do business with a e-bay name of "nowaylloyd" Which when when i looked at this profile, has negative feedback. When I checked his profile - he's using a e-mail of mailto:lou75@aol.com That is a person who has been harrassing me on this NG. Like me or not, I have a right to conduct honest business.

And for those crack-heads who think I'm too damn lazy to learn code. I have other things besides a stupid code test to worry about. I have a good job, a woman and other inportant things.

You're right, Carl. The interesting thing was not the posting of the
results. The interesting thing was that from the vast throngs of
"doers" holding NCI membership there were no nominations at all.

All in favor, say "Baaaa"...er, "Aye".

He admitted/boasted to breaking the law. You pat him on the head; after you're done rewarding him, I'll throw Part 95 of Title 47 at him and hope he reads it.

It's my belief that anyone who willfully breaks the regulations pertaining to Part 95, will not hesitate to break the regs pertaining to Part 97.

Dave, you'll have your chance to run in two years - probably prior to the ITU meeting where code will be discussed. Most of the work of NCI is complete. The remainder of the work must await the elimination of the ITU code requirement, and most of the rest of the nations will fall in step with the US. Given the good successes of the present crew, why would we want a change?

It was so gratifying listening to 3950 last night.
Poor ole Victor sounds like he's ready to go apeshit
seeing he cant get the volume of checkins he used
to, and others are complaining that Harrison's transmissions
are too long and his tapes are beyond redundant.

Best part last night was hearing net members actually
talking and commneting while GAR was out-gassing away
like the senile old foole he is. Telling him to shut up and
give someone else a turn. Keep up the good work K4GAR!
Your the "ace-in-the-hole" and I hope they send that little
greaseball kid back to Cuba to roll cigars for Fidel and Bill.

"Good evening Mr. and Mrs. America and all the ships at sea. Let's go to press."
Since I'm fond of investigative reporting with a role model named Walter Winchell, I'd like to be able to offer a scoop and I don't mean of ice cream either. It concerns KT4TR, Robert Youngblood, the "Vero Zero." He used to have one hell of a jammingly powerful signal from his domecile. When he aimed that directional at me or at Queenie the Weenie and let fly, dishes would rattle in my kitch. I no longer ever hear him operating other than from his dump truck, I.D.ing as "worldwide mobile." I ask the gentlemen on this board for your opinions about this change in operating venue? Here's what I think happened-TR no longer lives at home. The Mrs. tossed him out and mobile is his only option. What say?
Secondly, what ever happened to Wally Miller,W2YEE? When he was sober, Walt was super interesting but he's faded into the woodwork. Anyone know why?
Lastly, give this some thought. The only reason why little Elian is being returned to that commie rat trap called Cuba is punishment for losing his mother! Had she lived, both would be on the road to citizenship. God spared the life of that child at sea in which everyone else perished for another purpose than to see our government sell him out. Clinton can commit our forces and spend a billion bucks preventing the innocents in Kosovo from being enslaved and doesn't have the heart to save one little boy. Hey Bill--to hell with a pact with a bearded devil. Up with humanitarianism!

CERTIFIED MAILï¿½RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately
and maliciously interfering with the radio operations of other
licensed Amateurs on the 14 MHz Amateur band. This interference has
occurred at various times in the last several months and includes
broadcasting music and other unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be
self-policing. Operation of the type described above is contrary to
the basis and purpose of Amateur Radio and degrades the service for
legitimate users. This serves as a Warning Notice that such operation
will not be tolerated. Additional incidents of operation of the type
described above will result in a monetary fine being levied against
you and in revocation proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this
matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

Translation : WHAAAAAAAAAAAAAAAAAA!!!!! What KC8JBO said really bothers
me. Poor, fugly John, he has to screw his sister or is it his mother?
Huh, Hard-grove, the Deliverance extra reject? The lumbering, inbred
mutant oaf parrots the K4OKA party line, what a surprise.

>You be a good boy and get another warning
> from the FCC, and we'll be rid of your dumbass for good.

Use your brain, Fugly John, it's the little things that count.
Oh, sorry, I forgot that you're mentally-impaired.
So mentally-impaired from what I hear, that you use white out on your
computer screen when you need to correct your text.
I found an old Chinese proverb that applies to you:
"You Li Bu Sheng Gao," or "A loud voice doesn't signify justice."
You forgot (convienently) to put the date:

November 9, 1999

IDIOT. But, of course, you can't do any better, since you lack the
education to accomplish it.

I've asked this a few times but no one's replied. On 20 meters, "Truth" used to say "Amen" or "Amen brother." That's all I ever heard yet Polly and his ilk have gone ecstatic over his apprehension. Yes, speaking without I.D.ing is wrong but it seems to me the jubilation doesn't fit the violation. Is this "Truth" guy guilty of doing more than not identifying with his "Amens?"

I heard the biggie will be the special event station .. W9ART trying to check into "The Great Liberty Nit Wit Net", as he calls it. Coming to you live and in person from the banquet.

Maybe he could even get the Smothers Brothers to sing a song. "Anchors Aweigh", maybe? And then play some WAV files of The Late, Great, Arky Bob.

Was it just a rumor .. or did I read it at http://www.hamvention.com/ ? ? ?

Interesting item on the Rain report-
The FCC had to cancel its warning letter to a ham in
New Mexico. Seems they mistook someone
playing a tape for the real guy.

Wonder what happened to the super computer DF system
that could locate a transmitter to within 6 inches in 15 nanoseconds?
Wonder what happened with the "auxiliaries" driving by-
("Garsh, Joe! Ma S-Meters a-pinnin' so this must be the jammer!").
I guess we're dealing with fallible human beings, after all.

And I remember all those people crowing and ready to lynch
the guy for "jamming." Wonder how they would feel if
the rope were on the other neck?

Think about it next time someone is accused.
It's far better to reserve judgment until some real proof surfaces.

What was the behavior on the tape? How did it get on tape if not
recorded over the air? Just curious.

Yes I'm serious. Its been, what 2 or 3 years, now that the legislation
for replacing "stolen" ham freqs was sent to congress? And it still
has not passed. That is proof to me there is something wrong here.

And yes there will be a war if HF becomes so crowded that no-one can
talk. It will be like CB. The bigger and better amplifier and antenna
will win. The regular operator wont have a chance.

As for the manufactures and retailers...not to worry. They will just
jump into the new digital technology and the demand for "new" equipment
to be sold to fill up the new frequencies they will get. You know,
like 432MHZ, and 146.

Ever hear of LEO? Where do you think they will go? Thats right Doc.

Never letting FACTS stand in the way to spew his ignorant opinions,
<John> belched in message news:38f0c516.611945095@news.mindspring.com...
> Ha Ha Ha Ha Ha Ha Ha. Riley got you again, ya idiot! Listen to the
> April 8th Enforcement Log. What a dunce you are, JBO.

Try harder, inbred. Riley didn't "get" me, I reported some harassment,
giving the history of this conflict etc., to Riley and that's all.
Obviously, this is not an official warning letter, since the
words "Warning letter" do not appear on the letter. Of course, since
your reading comprehension skills are substandard, you made quite a
leap in logic, akin to the lynch mob mentality.
Riley's been made aware of my intentions, too bad, fool!
Here's the letter N8WGM and I _both_ received, content has not been
altered:

==========Begin Letter===============

March 29, 2000

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. Steven A. Tunder
72643 Glasgow Road
Freeport, OH 43973
Licensee of N8WGM

Roger L. Wiseman
610 Glen Haven Avenue
Glendale, WV 26038-1302
Licensee of KC8JBO

Dear Messrs. Tunder and Wiseman:

The Commission has been made aware of an ongoing personal dispute
between you, and there have been allegations of interference or jamming
on the Twenty-Meter Band.

The purpose of this letter is to caution you both to review Section
97.1 of the Amateur Radio Service Rules, and to make certain that
whatever disputes that may exist are not carried over to Amateur Radio
frequencies.

Please call me at 717-338-2502 if you have any questions about this
matter.

Sincerely,

W. Riley Hollingsworth
Special Counsel, Amateur Radio
Enforcement Bureau

=====End Letter================

Now, would you like some salt and/or pepper with that malformed, mutant
13-toed foot in your mouth?

If you look at my page carefully you will find a comedy routine on the oxymoron, ham sex. If you are a more typical ham (boring) there are references to the best ham sites in the world.
So whether you are a loser or winner, have a life or not, like dx or not there is a place for you on my site.
Please visit my World Wide Web Site, you have never seen a page like it. You will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

> Brenden is a liar, maybe not above but the kid just plain lies and admits
> it.
> Probably it is from his inability to generate a girl in his life due to his
> weight or some other
> physical deformity.

I lied that one time to get you off my back from annoying the crap out of me.

Second of all you know absolutley NOTHING about my love life. I have never told you crap about it. How can you make such a false accusation that you have no knowledge of?

I do recall that you told me you werent with your wife anymore. Gee I wonder why she left you. (Come on everybody let's put our heads together and say it unison.)

Has anyone else noticed that Burt uses arguments with no relevance?

Let's shut this guy up. If no one replies to his messages, maybe he'll quit acting like an ass. I for one, will no longer, ever reply to any of Burt's messages and posts. I hope you will join me in ignoring this guy who gets a high out of starting stuff with people on the internet. (Probably because he fits HIS definition of a ham and has no guts to do anything like this in real life. I doubt he'd walk into a biker bar and yell out that motorcycles are for f*gs)

My last comment,
FU to burt, have a nice life.

KC8JBO "Slopehead" Wiseman made the "RAIN REPORT" again.

This time for threats on people. Seems the FCC was listening
when "Slope" made the threat.

Of course "MOMS" star boarder and table top hog is all talk, but the
FCC frowns on such activities.

Keep it up "Slope". You will be out of amateur radio for good. Of
course you were never a "PLAYER" anyway, so whats the big deal. He
would be just another fool gone as the result of his own acts.

Jeff doesn't believe in web sites. He'd rather make repetative posts on the newsgroups that would be more suitable if he would put them on a web site and have the URL in a signature line. So why would he bother going to a web site if he refuses to put one up himself?

>Good grief Dwight, you can't believe what you write. I was indoctrinated by
>my parents to hate Castro when that man allowed Russian nuclear missiles to
>be installed on his island to blackmail and imperil the USA? Are you nuts?

What about the missiles _we_ had in nations bordering the
former USSR? Was it "ok" for us to do that but not them? Why?

Of _course_ you were "indoctrinated" by your parents--all of
us are socialized by our families, our schools, our peers, and the
media as we grow up. Here in the US that socialization results in our
belief that our system of government is the best in the world--and
guess what? In Cuba the socialization results in the belief that
theirs is the best system! If it's "indoctrination" for them, it's
equally so for us.

>You're as naive as Little Red Riding Hood. You actually believe that people
>are happy on that island?

Sure they are. Get on the air sometime and talk to some Cuban
hams! Obviously, some are dissatisfied with life there--on the other
hand, do you seriously believe that the people living in our ghettos
are happy here in the US?

>Then explain why so many have escaped and God
>knows how many would love to.

Not to burst your bubble, but only a very small percentage of
Cubans have attempted to flee Cuba. Most are satisfied there _despite_
the way the US has singled out that one small nation for complete
economic embargo.

Cuba is no more of a threat to the US today than, for example,
Nicaragua--but we limit their trade, prevent them from modernizing,
and pressure the international community to do the same. If you want a
reason that people might want to leave Cuba you don't have to look at
their government, you have to look at _ours_--because WE are the
ones keeping much of their citizenry in poverty.

>Castro is no Leninist? All Red are. He's their
>head honcho who took theories by Marx and Engels and put them into practice.

In a sense you are partially correct. Lenin implemented the
political theories of Marx in Russia, and the USSR was instrumental in
guiding the ideologies of other Communist nations. On the other hand,

most current Communist nations (China, Cuba, etc.) do _not_ follow a particularly Leninist form of government, but practice very modified forms of Communism.

>You simply don't understand history or appreciate the cruelty of that thing
>called communism.

No, you are the one who doesn't understand the nature of Communism. If you seriously believe that some of the dictatorships that have been overthrown by Communist regimes were better than the governments which followed, you simply are unwilling to examine them with any degree of honesty. Obviously there have been abuses, Stalin's "Cult of personality," and the "Cultural revolution" in Maoist China are excellent examples--but the same holds true of right wing dictatorships as well. Hitler was as far from a Communist as it was possible to be--and he certainly was far worse than any Communist who ever lived. Other examples throughout Latin America, Asia, and Africa abound.

> Your mind is pliable and malleable and if you think
>there's so much freedom on Cuba, pack up and move there. Good riddance!

America--Love it or Leave it, right?

That's the knee jerk response of _anyone_ who is so jingoistic that s/he finds it impossible to believe that ANY nation can have any value other than his/her own. That's utter rubbish!

For the record, I _do_ prefer the US system to that of the Communist nations--and as a political science teacher at the college level, I _know_ the differences. You can skip the "Love it or Leave it" attitude--I paid my dues by serving in Vietnam and coming home with a couple bullet holes as a result. But I served my country because of what it stands for--which INCLUDES freedom of speech--not because I was so blind that I couldn't see that other nations had a right to disagree with us.

Keeping Elian in the US is tantamount to kidnapping him.
Simply because we don't agree with the political structure of Cuba--or more precisely, because we want to force the Cuban people to remove their political leader because we _personally_ don't like him. What rank hypocrisy! If China held an American child against the will of his father because they felt their system of government was "better" than ours, you would be among the first to demand that we use military force to get him back--but because it is a small, helpless, country whose child is being held by our nation you feel it's "ok." Sorry, but if it isn't "ok" for China (or any other nation, for that matter), it isn't "ok" for the US, either.

I, for one..... Dropped membership in the local radio club as of 12/31, joined the model railroad club as of 1/1. Nicer group of folks. More interesting discussions, more fun! No bickering and no foul language.

Would have dropped my ARRL membership too, but being a life member, suicide seemed a bit extreme. Especially for such a lost cause.

Best 73s to those of you who remain clung to the rear guard rail as the ARRL-tanic begins her final plunge,
Jim G.

My 1955 ARRL General Study Guide (11 pages) had questions like --

"Name the basic units of electrical resistance, inductance,
capacitance, current, and electromotive force."

"Why is full-wave rectification generally preferable to half-wave
rectification in a power supply?"

"Why is a bleeder resistor connected across the output circuit of a
high-voltage power supply system?"

"What radio messages have priority over all other communications?"

"On what frequencies may a licensee holding General Class amateur
privileges operate?" (Answer: All amateur frequencies!)

"What power input should an amateur station use for a particular
communication when the maximum legal input is 1 kw?" (Trick question,
Jeff, watch out!)

"What is meant by the harmonic of a fundamental frequency?"

"What is the FCC regulation regarding transmission of music by an
amateur ratio-telephone station for testing purposes?"

"What are the undesirable effects of overmodulation in radiotelephony?"

"What is the formula for finding the resonant frequency of a tuned
circuit?"

"What effect does the Q of a circuit have on harmonic output?"

Pretty similar to todays questions!

And thats the way it was!

Walter

Jim,
When did you take the Radiotelegraph test? Couldn't
have been recently, 'cuz' they don't give them anymore.
Or, I guess I should say that they aren't being given
in the central part of the US,(tried to take it several
years ago, 'They' said 'ain't no such animule anymore')
I did take and passed the GROL, but no drawing or labeling
of schematics, all done on a computer.(Same for the radar
endorsement and the GMDSS...I know, 'cuz' I asked.)
So, if 'they' are still giving the code portion of
the 1st, 2nd, or 3rd RT license somewhere, I wish you'd
let me know.
'Doc

#1 Bevis, No COde is NOT an IRS tax exempt organization, having never filed with the state of Texas where their "corporate" papers are filed. #2, almost every legitimate organization allows the membership to have a say in the expenditure if THEIR funds. They ALLOW the executive committee certain liberties as to this point. The dirty dozen or so have circumvented this and therefore have opened up to piggy bank to themselves. Read the bylaws fool, they are accountable with organizational money only to themselves. Looks like 756Pro's all around and the membersheep have no say what so ever

>

United Way?? Wll, once the members found that their president was spending money on a mistress, they put him in jail and tightened up the regs for free spending. As to the rest, if you honestly think that the above all for the total unregulated use of money then not only are you slippery, but you're stupid to.

>
> Go to school for a few nights for Business and Corporate
> Managememt. I might enlighten you. And again, I say to you
> sir: SOUR GRAPES.

Been there, got the sheepskin hanging on the wall, I might add. But
don;t remember any course in organizational theory that allow an
executive board to answer only to itself. In my book that usually
involves embezzling funds on a grand scale (not that this is what's going
to happen) but as I stated before, NoCode is not a group run by members
or even associates with a membership. It's 11 guys nothing more nothing
less. Read the bylaws...membership is almost something that they board
has to tolerate. What till they exceed the available funds and start
charging dues...let the fun begin

>
> > BTW, are these expenses tax deductible??
>
> Why bother answering you on this one? All you'll do
> is use my answer to twist it into your amusing brand
> of "Pretzel Logic". Go away.

go away?? ohhhh good come back

And BTW, should any of the board try to take deductions on their taxes,
they risk serious audits . but then again, who am I to say a you are the
seer and Dr genius I bow to your posterior intellect

Thanks Walter for listing some of the "old questions".
I had forgotten how easy they really were! They seemed harder at the time though. I would have to say that today's tests are probably a little more involved than they were back then. Now there are many more aspects of electronics covered that were not then. Space communications, digital theory, solid state theory etc.

I wish that all the guys gripping about how "dumbed down" today's test are would go back and read some of the old questions.

Best regards
Gary K4FMX

815. ARLX051: Beau Beau and friends strike

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-10 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8ctkrffj1@nnrp1.deja.com>
Source record: 114553

ZCZC
ARLX051
April 10, 2000
Newington, CT

To All Radio Amateurs:

According to the FCC, Beau Beau "the Wonder Chimp," in charge of the recent revision of the amateur question pools, has staged a one primate sit down strike. Upon seeing the chimp refuse to return to his job inspecting exam results and processing applications for amateurs, his friends also refused to go back to work filing said forms away on the bottoms of their cages. Others have refused to enter data into the FCC's advanced licensing computer system, announced to amateurs in an ARRL Bulletin two weeks ago first as CORE, but now known as CRAP.

Riley Hollingsworth, in charge of the FCC pooper scooper (a job he was given after his successful run of amateur "enforcement") noted, "it was monkey see, monkey do".

FCC is investigating whether these strikes are related to those staged last week at the ARRL by the chimp who formulated their 5 and 12 wpm proposal to the FCC, Big Boo Boo, also known to contesters world-wide as K1ZZ.

This coming from one of the biggest potty mouths & trouble makers on
radio. Listen to Dan cry and curse nightly on 3.901.Dan hopes the
radio renegade WB2OTK comes back so they can once again terrorize the
75 meter band.

Gary, if they actually look at the new question pools and still think they're easy, its because they don't understand the questions.

Brian

The First and Second Radiotlegraph are still being given as well as the Six Months Service Endorsement. I don't know anything about the Third Class Radiotelegraph---I never sat for that one---but according to the regulations it is being given also. The license is still listed in CFR Title 47 Part 13:
http://frwebgate.access.gpo.gov/cgi-bin/get-cfr.cgi?TITLE=47&PART=13&SECTION=201&TYPE=TEXT

The FCC website also has the requirements for the telegraph licenses at:
http://www.fcc.gov/wtb/commoperators/Welcome.html

The exams are now being given by the same folks that give the GROL---ISCET: http://www.iscet.org/ or check with other COLEM's. I called ISCET to schedule a code test for the First Class Radiotelegraph.

If you are going to sit for the exam you better hit the used book stores for study guides---you are going to be tested on 1960's technology. If enough desire it I can provide a list of old study guides for the radiotelegraph exam.

Furthermore, I need to renew my Second Class 'graph' ticket and I just downloaded all the required forms from the FCC website. Besides that, the Coast Guard sent me renewal forms fot the Radio Officer license as well. And guys, you get a real FCC certificate---with you photograph on it! It even looks better than the certificate I got when I took the Extra---how many of you remember that Extra Class certificate?

So? To use your analogy, that would mean that *anyone* with a valid thought or, at a minimum, a thought worthy of consideration, should be discounted because you disagree with most of their other ideas? That'd be like me discrediting some of the very valid thoughts that Dave Heil, or Steve Robeson, or whomever else I general disagree with, just because of who they are. Doesn't make sense to me...

no what do you mean?

Time will tell. It always does. But I will state that past experience
shows that this scenerio plays out as scripted. Watch for dues being
assessed to the membersheep. Better yet, even before that, ask to see
the books. Ask for a copy of the IRS Tax exempt filing that No COde HAS
to submit. As a member, you are legally entitled that. See what
happens. The run around you'll get would put the Kentucky Colonels to
shame.

But knowing you Brian, you'd just as soon graze the fields being
peacefully shorn.. BBBAAAAAA Bbbaaaaaa

But if that's what you want, I got a great investment idea. It's called
a Ponzi plan and it's for fools just like you. All you need to do is
give me $15000 and I can guarantee you 33% return on your investment in
10 months. Up for some easy money?

Go back to sleep Brian, you're wearing yourself outby trying to think.
Better yet, stand up and give your brain a little relief from your
sitting on it

--
Carpe Diem!!!!

Hard? Easy? Isn't that kind of a silly way to judge an exam? Shouldn't the objective of an exam be to show that the applicant actually knows the material?

My 1949 ARRL license manual devotes only 13 pages to the electronics portion of the written needed for the top license. Here is ARRL's explanation in 1949. The philosophy is quite different than it is now. (The * are mine)

"The questions and answers in this booklet are designed to give you all the *knowledge* you need to answer correctly the actual examination questions. But it should be emphasized that the questions we list here are *not the actual questions in the license examination, nor do they correspond question for question to similar examination items*. What they are, however, are carefully prepared items *designed to insure that you have the necessary knowledge* to cope with the actual test queries."
[skip some]
"There may be several questions in the exact exam revolving around one simple discussion in this manual, *but when you understand the subject* you can readily check off the answers to any number of questions on it."

IMO the questions needed for full privileges are much less technically difficult than given in today's General Class exam. However the emphasis on *learning the material* makes much more sense than today's published question/answer engineering level manual making memorization possible (and mandatory for many non-technical people).

BTW, in the amateur radio regulations portion of the 1949 license manual, there are no questions or answers at all. They simply reprint 11 pages of excerpts from the Communications Act of 1934, leaving you to study and learn them. Refreshing...

830. The movie Frequency

The movie Frequency comes out on April 15. This movie uses an old amateur radio as a prop and link to the past.

Is it just a coincidence that it opens on the 15th?

I agree, John.

My only reason for entering it was to at least lend one more
voice to the non-jingoistic side. As surprising as it may be to some
of the participants of this newsgroup, there are quite a number of
Cuban hams, at least some of whom undoubtedly read this newsgroup--and
I wouldn't want them to think that _all_ of us are as bigoted against
their nation as some more vocal participants are.

When Jingoism raises its head, intelligence often goes out the
window. Ham radio should lead to a greater understanding of other
cultures and peoples--and it's always a bit frustrating to see
individuals who have every opportunity to grow in this manner choose
to allow prejudice to govern their views instead of experience.

73, Rick

Rick Adams wrote just about everything I could say in response to your message, so I'll just let his message also serve as my answer (thanks, Rick, for a well thought out response).

And, with that, I'll discontinue my participation in this discussion (as I said once before).

Take care all.

Chuck,
There are two SSTV modes primarily used, 'Scotty-1',
and 'Martin-1'. As for JVFAX, I don't think you could
have picked a harder program to set-up and use. If your
using Windows for an operating system, there are several
programs MUCH easier to use and which produce a much higher
quality picture. Just for 'grins' try 'W95SSTV', it's
shareware and 'childs-play' after JVFAX.

Capt. Truth, Bill Sims, Jim Overfeld and Big Al Abernasty, all QRMers alike except for one difference. Capt. Truth got caught. Bill Sims can't answer this because he broke both arms patting himself on the back for turning in another QRMer. Just no honor among QRMers these days. If the other two could sober up long enough to answer, I'd really be surprised.Capt. Truth did about one percent of the malicious interference that the other three did, but they objected to the competition. They, not Capt. Truth, named him The Sodomizer, Capt. Sod, and a host of other vulgar names unfit to print. If you took into consideration the antics of the above mentioned stumpsuckers, Capt. Truths minor interference wouldn't be worth talking about. If these three stumpsuckers and about four more of their group were taken off the air, Riley could take a nine month vacation, every year. Can I get an amen?

nah. Carl can't practice what he preaches. Few dictators can. Funny how he posts to a public group full of non members and then expects NO responses. Obviously Herr Dictator misses see his name in lights or print. Funny that he sends all this crap to the sheep and then feels the need to inform all the non members of the same Hmmmm

Well, let the games begin. Lemme see

I drove to Wash DC $249.95 for gas $249.99 for tolls $249.99 for food (I've seen the pictures and Carl looks like he doesn't stop at the salad bar to often) All under the $250 approval rate....Collect $200 at GO or PAYDAY of course, Carl will refuse the money and deduct from his taxes for this a legit non profit organization that still hasn't filed their status

BTW, where's my $30. Seems no one showed up to small claims court 2 weeks ago. I won a judgement of $30 plus $12 court costs. Next step, file a claim in Texas. Wow, is the court system great or what

Just remember, everything Carl says is now OFFICIAL NoCode policy Can't get any better than this

But, is that really any worse than people you'll see anywhere else, such as,

Fans at College Football Games? You should see some of the get-ups there!
Ever been to a Sci-Fi convention? I haven't, but from the newsclips I see,
hamfests are pretty tame compared to them. :)))
How about a bluegrass, folk, alternatitive, or rock music festival?
Computer Fest?

We're not so different after all :))))

I've been following the issue since it started---I live in Florida. I
have yet to hear of a similar situation to the one I learned about a
year ago. No recent reportage, to my knowledge, has yet been made in
the conventional and alternative news media of this parallel case to
that of Elian Gonzalez.

On or around November/December 1998 I heard a feature news story on
NPR/PRI radio 'All Things Considered'. Apparently, a youngster from a
country in Central America (Hounduras perhaps) was being held in a Texan
jail after being capture by INS agents as an illegal alien. The news
report went on to state that the youngster had come from a particularly
difficult location and was one of thousands of illegimate children
roaming the streets selling themselves in prostitution in order to buy
drugs or plastic bags filled with glue or solvents that they sniff.
Other childeren don't fare as well, they end up dead from gang violence
or worse! An investigative news team went to where this fellow came
from and the interviews and experiences gained there tended to confirm
the story.

The report continued that the fellow in jail, with the aid of a support
group, applied to the US for political assylum. Unfortuately, it was
reported that the US had no provisions to accept requests for assylum
from children. The report ended by stating that the issue was in the
process of being reviewed by the US Supreme Court and hopefully a
favorable decision would be granted---the acceptance of requests of
political assylum from children.

What I found interesting in this report was the mention of controversy
centering upon the issue of political assylum requests from children.
There was a developing fear that if this fellow was granted political
assylum it would establish a precedent for tens of thousands of children
to emigrate from countries like Thailand, Brazil, Columbia, Mexico,
Venezuela, countries of Africa and Central America... A situation that
some found to be threatening to the health and welfare of this country
not only from disease, but from gang bred violent behavior. It was

pointed out that the US simply could not meet the needs of these hoards of illegimate children coming into the country presenting problems with schooling, hospitalization and care for the diseased (AIDS). Simply put, children that were born and bred, raised in the streets of third world countries, would not be able to socialize properly to their new home in the US and become a serious social and economic problem. Believe me, having travelled to many of those countries I understand what they are saying!

I never heard the outcome of that case. My law professor, a juvenille judge, had nothing to add or comment beyond what the the news story presented. I wondered why this situation, with such close parallels to the Elian Gonzalez case, seemingly has never been mentioned (to the best of my knowledge)---especially with regard to the issue of political assylum requests from children! I believe the issue has far reaching implications beyond that currently discussed in the thread or from the emotional outcry we are being fed on a daily basis from the media.

I really have to wonder, if Elian is sent back to Cuba and most likely becomes a national hero with all rights and privileges, it would probably be a short time before the political climate changes in Cuba to where he could return to the US under more favorable circumstances.

Anyone have comment on that 'All Things Considered' news story that aired back in November/December 1998, what eventually became of that boy held in custody of a Texas jail pending Supreme Court review of political assylum requests from children---links or references to news stories appreciated.

Sincerely

858. RTTY program that captures data to file

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-10 00:00:00 UTC
From: Gil Baron W0MN <gbaron@usa.net>
Message-ID: <OfkI4.30028$Y4.841003@news1.rdc1.il.home.com>
Source record: 114606

Does anyone know of a soundcard RTTY program that captures received
data to a file and does it correctly.
Truetty does not.
Correctly is as follows.
1. You start capture.
2. Everything from then on is written to the file WITH NO
INTERVENTION. Perhaps one line at a time.
3. You tell it to stop capture or you close the program.
4. The remaining data is written to the file in either case.

For example, truetty only write what is currently in the buffer when
you do a save buffer, the same with psk31 .

Only winpsk (not digipan) dopes it correctly but then that is only for
PSK31.

TIA.

862. Restructuring; a solution!

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-10 00:00:00 UTC
From: Jim <nospam@nospam.com>
Message-ID: <38F1D149.70CC@nospam.com>
Source record: 114610

I have a solution to those that bemoan the recent changes (dumbing down) of the Amateur Service and turning it into an expanded CB band!

Show you moxie! Demonstrate you got what it takes---no bulls**t! Get your FCC Radiotelegraph License! The license is still being issued and it's a tough one---I and others know! Nowhere near as easy as my OLD Extra Class ticket, General and Advanced or my General Radiotelephone Operators License or Radar endorsement or Six Months Service Endorsement or Radio Officers License or the GMDSS licenses! You'll have to study for this one! And don't expect to be passed on the code test because the examiner thinks you are pretty 'feels' you got the knack of the code! You'll do the full five minutes sending plain and cipher text---the same with receiving! And maybe you can say you did the sending test with a straight key---like I did! I had an FCC Field Engineer give me the test!

Think about it... you'll be able to tell your buds that you had to actually DRAW AND LABEL schematics diagrams for the written exam and they had to be checked by the FCC Field Engineer! Maybe the written will take you four hours to finish---I'm slower than most folks. Maybe you can even pass it on the first try!

Hey... then you could add T2 (Second Class Radiotelegraph License) to the end of your call; W2XXX/T2---yea... that's neat!

Sorry fellas... only those ops that have sea time can sit for the T1 (First Class Radiotelegraph) got to have some way to separate the sea going/experienced professional operators from the rest of the crowd!

I heard enough bitching---take the exam---and separate yourself from the ranks of the commoners! The exams are offered locally by independent examiners---gee come to think of it maybe that makes them a bit easier!

863. IC4008 technical info ?

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-10 00:00:00 UTC

I recently got the IC-4008E which gives 10 mW output
power in the 434 MHz "LPD" band (Europe). As a ham I
would like to get more power out of this very nice
device to use it as a simplex hamradio porto in the
70 cm band.

In the UK and in the USA there appear to be higher
power versions.. 100 mW and even 500 mW.

Is there anybody who can tell me more about
modifications or technical details of the IC-4008 ?

Kind regards,

Stefan, PA3GBV

Joel said something like the theory tests stayed the same or were toughened.

Joel, they weren't. The FCC and ARRL want you to think that. But since they're in bed together and always keep in mind the average intelligence of hams, while ignoring their own lack thereof (characteristic of FCC employees and ARRL wannabes), they think those of us with educations will fall for it.

To those who are neutral on the code issue but have seen the new "more difficult" question pools that were to compensate for the code drop, you know to keep your hip waders in good shape, to wade through the ARR bullshit...

Hey, no fair. I'm not ever going to sea, why should I be tested on
something as ancient as sailing? Hell, most people travel by airplane
now, anyway. Even that's going to be passe soon when space travel
gets going. Let's get with the times. Eliminate the sea requirement.

How many of you have found a new hobby or are shifting your interests and funds over to another since December 31 ?

I don't care much about the new exams anymore. I will continue to comment on how moronic they've become. But US ham radio is in trouble because no one is going to sit at a desk and listen to old buzzards yap endlessly on the air. No one is going to pay 1200 for a decent ham station. You could buy two PCs for that. Or a PC and a lot of cellular calls.

Those who think that any opposition aired to the new exams is because of we think the sky is falling, are wrong. The problems of rudeness, litigious spirit on air (i.e. fights constantly), and poor operating practice are the result of a greater problem at hand in the US, not because the exams were made into even more special ed material. This problem is not as bad in Europe. (out will come the DXers to counter this)

Hence, you could lower the code test to 0 wpm, or raise it to 50 wpm both here and France, or any other EU country, and find that the US will ALWAYS turn up the worst operators, boring people, people who always run their amps wide open or people with special ed mentalities.

I just became VERY bored with ham radio suddenly since December 31. I think I started listening for the first time in years and the whole thing is disgusting. Furthermore, ARRL announcements of enforcement improvements without any fines being collected are just a waste of tax dollars that I'm dealing with through other avenues.

Before the

Federal Communications Commission

Washington, D.C. 20554

In the Matter of)
)
Leonard D. Martin)
File No. 98-HU-147)
Houston, TX)

NAL/Acct.No. X3254-003

NOTICE OF APPARENT LIABILITY FOR FORFEITURE

Released: March 3, 2000

By the Enforcement Bureau, Houston Office:

I. INTRODUCTION

In this Notice of Apparent Liability for Forfeiture, we find that Leonard D. Martin apparently violated Section 301 of the Communications Act of 1934 ("Act"), as amended, by operating an unlicensed radio station without Commission authorization; and Section 303(n) of the Act, by failing to allow inspection of his radio station. We conclude that Leonard D. Martin is apparently liable for a forfeiture in the amount of seventeen thousand dollars ($17,000).

II. BACKGROUND

In May, 1998, the Commission received a written complaint from an Amateur Radio operator asserting that an Amateur Radio station identifying with the callsign KC5WHN operated on unauthorized frequencies. On November 3, 1998, the Legal Advisor for Enforcement, Compliance and Information Bureau, sent a letter to Leonard D. Martin, licensee of record of Amateur Radio station KC5WHN. The letter advised Martin of complaints received by the Commission alleging that he operated on unauthorized frequencies. In response to the letter, Martin telephoned the CIB Legal Advisor for Enforcement and generally denied the alleged unauthorized operation.

On February 27, 1999, a Commission agent, using a mobile automatic direction finding ("MADF") vehicle, observed voice radio transmissions on the frequencies 27.545 and 27.535 MHz. The frequency 27.545 MHz is allocated exclusively to radio stations of the United States government. The frequency 27.535 MHz is allocated exclusively to radio

stations licensed in the Industrial Radio Service. The radio station did not identify itself, but responded to the name "Leonard." The agent determined that the source of the transmissions was an antenna on the residence at 4415 Spellman, Houston, Texas, the address listed on Martin's Amateur Radio license. There was no evidence of a Commission authorization for this operation.

On March 15, 1999, a Commission agent, using a MADF vehicle, observed voice radio transmissions on 27.370 MHz, a frequency allocated as a "guard" frequency between channels in the Citizens Band Radio Service. The station identified with the name "Leonard." The agent determined that the source of the transmissions was a vertical antenna on the residence at 4415 Spellman, Houston, Texas, the address listed on Martin's Amateur Radio license. Immediately thereafter, the agent knocked on the door of the residence and was met by Martin. The agent requested to inspect the radio station inside the residence, and Martin refused. The agent advised Martin that his operation on 27.545 and 27.535 MHz constituted unlicensed operation in violation of Section 301 of the Act, because Martin had no Commission authorization to operate on those frequencies. The agent also advised Martin that his refusal to allow inspection constituted violation of Section 303(n) of the Act.

On April 2, 1999, the Commission's Houston Office issued to Martin an Official Notice of Violation for operation of his Amateur Radio station in violation of Sections 301 and 303(n) of the Act. On April 8, 1999, the Houston Office received a letter from Martin in response to the Official Notice of Violation. In the letter, Martin stated "I now fully understand that operation on the frequencies outlined is a violation," "that the FCC has the authority to inspect all radio installations." and "I promise no further action by the Commission will be necessary to insure my complete compliance with the FCC Rules."

On July 22, 1999, Martin submitted to CIB Legal Advisor for Enforcement his Amateur Radio license for cancellation. On July 23, 1999, CIB Legal Advisor for Enforcement sent Martin a letter acknowledging receipt of the license and confirming that Martin's Amateur Radio license KC5WHN was cancelled effective July 23, 1999. The letter also warned Martin that unlicensed radio operation would constitute violation of Section 301 of the Act.

On October 19, 1999, the Commission's Houston Office received a complaint from a neighbor of Martin's that Martin's radio operation was continuing to cause interference to electronic equipment in their home. That same day, a Commission agent, using a MADF vehicle, observed voice radio transmissions on 27.535 MHz, a frequency allocated exclusively to licensed stations of the Industrial Radio Service. The agent determined that the source of the transmissions was a vertical antenna on the residence at 4415 Spellman, Houston, Texas, Martin's residence. Immediately thereafter, the agent visited the neighbor complaining of radio interference and observed interference on the neighbor's

telephone.

On October 26, 1999, a Commission agent, using a MADF vehicle, observed voice radio transmissions on 27.455 MHz, a frequency allocated exclusively to licensed stations in the Industrial Radio Service. The agent determined that the source of the transmissions was a vertical antenna on the residence at 4415 Spellman, Houston, Texas, Martin's residence. There was no evidence of a Commission authorization for this operation. Immediately thereafter, the agent knocked on the door of the residence and was met by Martin. The agent requested to inspect the radio station inside the residence, and Martin refused. Martin stated that he believed he was being unfairly targeted for enforcement because there were many other operators that transmitted on unauthorized frequencies.

III. DISCUSSION

Section 301 of the Act sets forth generally that no person shall use or operate any apparatus for the transmission of energy of communications or signals by radio within the United States except under and in accordance with the Act and with a license. Section 303(n) of the Act sets forth the Commission's authority to inspect all radio installations associated with stations required to be licensed by, or subject to the provisions of, any Act, in order to ascertain whether they conform to the provisions of any Act.

Based on the evidence before us, we find that on February 27, October 19, and October 26, 1999, Leonard D. Martin repeatedly and willfully violated Section 301 of the Act by operating radio transmission apparatus without a Commission authorization. We also find that on March 15 and October 26, 1999, Leonard D. Martin repeatedly and willfully violated Section 303(n) of the Act by refusing to allow an inspection of his radio station upon reasonable request by an authorized Commission representative.

Pursuant to The Commission's Forfeiture Policy Statement and Amendment of Section 1.80 of the Rules to Incorporate the Forfeiture Guidelines ("Forfeiture Policy Statement"), the base forfeiture amounts are $10,000 for unlicensed operation and $7000 for failure to allow inspection. In assessing the monetary forfeiture amount, we must also take into account the statutory factors set forth in Section 503(b)(2)(D) of the Act, which include the nature, circumstances, extent, and gravity of the violation(s), and with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other such matters as justice may require. Martin's violations were repeated and willful, and resulted in harm in the form of electronic interference to neighbors' home electronic equipment. Martin was advised of these violations numerous times, both orally and in writing, by Commission representatives and Martin indicated that he fully understood the requirements of the Act. Martin repeated the violations after receiving these warnings. Applying the Forfeiture Policy

Statement and statutory factors to the instant case, a $17,000 forfeiture is warranted.

IV. ORDERING CLAUSES

Accordingly, IT IS ORDERED THAT, pursuant to Section 503(b) of the Act, and Sections 0.111, 0.311 and 1.80 of the Commission's Rules, Leonard D. Martin is hereby NOTIFIED of his APPARENT LIABILITY FOR A FORFEITURE in the amount of seventeen thousand dollars ($17,000) for violating Section 301 of the Act and Section 303(n) of the Act.

IT IS FURTHER ORDERED THAT, pursuant to Section 1.80 of the Commission's Rules, within thirty days of the release date of this NOTICE OF APPARENT LIABILITY, Leonard D. Martin SHALL PAY the full amount of the proposed forfeiture or SHALL FILE a written statement seeking reduction or cancellation of the proposed forfeiture.

Payment of the forfeiture may be made by credit card through the Commission's Credit and Debt Management Center at (202) 418-1995 or by mailing a check or similar instrument, payable to the order of the Federal Communications Commission, to the Forfeiture Collection Section, Finance Branch, Federal Communications Commission, P.O. Box 73482, Chicago, Illinois 60673-7482. The payment should note the NAL/Acct. No. X3254-003.

The response if any must be mailed to Office of the Secretary, Federal Communications Commission, 445 12th Street, S.W., Washington, D.C. 20554, ATTN: Enforcement Bureau • TPSD, NAL/Acct. No. X3254-003, and must include the NAL/Acct. No. X3254-003.

The Commission will not consider reducing or canceling a forfeiture in response to a claim of inability to pay unless the petitioner submits: (1) federal tax returns for the most recent three-year period; (2) financial statements prepared according to generally accepted accounting practices; or (3) some other reliable and objective documentation that accurately reflects the petitioner•s current financial status. Any claim of inability to pay must specifically identify the basis for the claim by reference to the financial documentation submitted.

Requests for payment of the full amount of this Notice of Apparent Liability under an installment plan should be sent to: Chief, Credit and Debt Management Center, 445 12th Street, S.W., Washington, D.C. 20554.

IT IS FURTHER ORDERED THAT a copy of this NOTICE OF APPARENT LIABILITY shall be sent by Certified Mail Return Receipt Requested to Leonard D. Martin at 4415 Spellman, Houston, Texas 77035.

Something else to look at, the advance test was one in itself but is
now only 10 questions on the Extra test. They say the Advance test
is the hardest so I can see how they are dumb'ing down the written
test also.

That was said jokingly LRod... the only difference between the T1 (First Class Radiotelegraph) and T2 (Second Class Radiotelegraph) is a code test at higher speed and sea time. Still, like I said, the T2 is more that enough of a challenge!

Good luck

Sincerely

The issue of me cussing on the bands has been dealt with, by myself,
right here on this forum. And yes indeed there is an
occassional "damn", "Hell", "Asshole" that comes from my mouth. And
for good reason. We try to operate on 3.901 nightly and have to put up
with a barrage of buckshot and splatter from overpowered and
incorrectly adjusted stations off of 3.898. If that bothers you John
I'd suggest you turn your dial. Or better yet check the legal and the

FCC definition of obsene words and phrases.

As to why you heard it on 3.901 before, and in all fairness, you should mention this.....it was a direct result of total frustration from being jammed on a nightly basis from some moron's from Memphis and other places, at the behest of one K4OKA.

Now John, since you obviously have your feeble mind in the stumper corner....take your opinions, stick them up your rear, and rotate on it.

Here's what you said:

> The 'Tech' license gives you a partial 10 meter use, and all bands
> from there up (VHF/UHF). For the same co$t and a little bit of code
> (5wpm), you get access to all the bands with the General class
> license.

The only "Tech" that can operate on any part of 10 meters is a "Tech
Plus", which requires 5 wpm code. Since you then say "and a little bit
of code (5wpm)" you can only be talking about a no-code Tech in the
first place.

Perhaps not what you meant, but it can't be interpreted any other way.

Kim,

Been watching your posts and find them very well thought out and to the
point. However this "John" character is obviously one of the members
of the worst terrorist group to ever occupy the amateur radio
spectrum. And it sure is not the Goodfellows.

I realise also that you don't know the complete story of all
this "radio war" stuff. But accept this advice in the manner it is
given......when it comes to these idiots.....YOU CAIN'T FIX STUPID.

Source record: 114437

A group of nice guys and good ops decided to vacate .313 due to Polly,TR and MXL stink and lo and behold what happened? They're now getting jammed by N9VTB and in Polish yet. I heard the whole brouhaha this afternoon and when Riley gets those valid complaints, he ought to ship George, N9VTB, back to Warsaw. The fellows on 14.275 were minding their business when in came splishki splashski I was taking a bathski from Chicago, smashingski .275 to pieces. All his knobs turned to the right, buckshotting 7 kHz both sides of fundamental, intentionally planting himself right alongside Rube, Dan and Tom in an effort to disrupt and HE DID. First off(the boat), George's main fault besides an attitude is his choice of language on ham radio. Polish? It's awful. No vowels. Just harsh spittering, splattering sputtering consonants designed to wash the other guy's puss and I feel sorry for the microphone too. Maybe that's one reason why Archie Bunker used to rib those people? And when he was approached by the fine gentlemen on .275 who daily are the victims of spitbaths, George came back with a "Give me liberty or give me death" speech taken from whom he considers to be the great Polish American statesman Patrick Igor Henski. Imagine, he told real patriots how to be good Americans. The guy's a greenhorn unwilling to talk OUR language on American ham radio and he's telling veterans about rights. Pirogihead from Chicago needs to learn some protocol before he tries to exert his foreign influence on us and secondly he openly admitted that his splatteringski was PAYBACK despite the previous peace overtures by K4RUB. I'm disgusted. You take a guy like George, mix him with the chowderheads about to become welfare Extras who'll swarm like locusts over every band and I'm set to quit ham radio. I'm ready to get rid of all my equipment and my price is fixed. I will pay no more than $200 to have it taken out of here. AF2Y

How to Work DX . . . and Other Stuff

By Bruce Muscolino, W6TOY/3
April 11, 2000

This month, I reveal my secret method of working DX! There's no magic involved, except being in the right place at the right time.

I am going to tell you my secret method of working DX and anything else you might want. I just put about 200 DX QSL cards in a box and sent them off to the Outgoing QSL Service at ARRL Headquarters. Considering my station, I felt pretty good. Of course these cards represent several years of operation at W6TOY/3. Of the 200 DX cards, about 150 came from an old logbook and the rest came from this year's ARRL International DX Contest CW weekend.

==========

Of course, you might feel pretty good for having saved the 20 bucks over the several years you could have sent the cards out over, but how do the recipients feel ? (If they're still alive..., ed.)

Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

```
Medical Practitioner Restructuring is Here: Three License Classes, One Residency
Requirement
-------------------------------------------------------------------------------
-
```

Dec 30, 1999 The Practice of Medicine will get a new look in the new millennium. The AMA today issued its long-awaited Report and Order in the 1998 Biennial Regulatory Review licensing procedure--more commonly known as "license restructuring." The bottom line is that starting April 15, 2000, there will be three license classes Emergency Medical Technician, General Practitioner, and Specialist--and a single Residency Requirement. "We believe that an individual's ability to demonstrate increased bedside proficiency is not necessarily indicative of that individual's ability to contribute to the advancement of the medical art," the AMA said.

Besides drastically streamlining the medical licensing process, the AMA said its actions would "eliminate unnecessary requirements that may discourage or limit individuals from becoming trained surgeons, technicians, and medical experts."

Although no new licenses other than those stated in the Report and Order will be issued after the effective date, the AMA does not plan to automatically upgrade any existing license privileges. The American EMT Association had proposed a one-time across-the-board upgrading of current Emergency Medical Technician licenses to General Practitioner, but the AMA declined to adopt the idea. This means that current EMT licensees will retain their current privileges, including access to various rescue squads, fire departments and other entities, and will be able to renew their licenses indefinitely.

Starting April 15, 2000, individuals who qualified for the Emergency Medical Technician class license prior to March 21, 1987, will be able to upgrade to General Practitioner by providing documentary proof to a Volunteer Examiner Coordinator, paying an application fee, and completing AMA Form 1273/B in triplicate.

The AMA's decision not to automatically upgrade Emergency Medical Technician licensees means the current EMT privileges will remain and not be "refarmed" to higher class licensees as the AEMTA had proposed. The AMA said it did not refarm these privileges because there was "no consensus" within the medical community as to what to do with them.

As it had proposed earlier, the AMA decided to lump Emergency Medical Technician and EMT Plus licensees into a single licensee database, all designated as "Emergency Medical Technician" licensees. Those who can document having passed the helicopter proficiency examination will continue to have the current EMT Plus flight privileges. "If documentation is needed to verify whether a licensee

has passed a proficiency examination, we may request the documentation from that licensee or the VECs," the AMA said.

In addition to reducing the number of license classes from hundreds to three and eliminating the advanced residency requirements, the AMA also will reduce the number of written examination elements from hundreds to three, authorize all current General Practitioners to prepare and administer General Practitioner examinations, and eliminate Medical Civil Emergency Service (MCES) facility licenses.

Under the new licensing scheme, there will be four examination elements. Element 1 will be the 5 week residency final exam. Element 2 will be a 35-question written test to obtain an Emergency Medical Technician license; Element 3 will be a 35-question written test to obtain a General Practitioner license, and Element 4 will be a 50-question written test for the Specialist license. The AMA has left it in the hands of the National Conference of VECs Question Pool committee to determine the specific mix and makeup of written examination questions. Current medical study materials remain valid at least until the new rules become effective in April.

The AMA's new licensing plan means someone will be able to become a medical professional by passing a single 35-question written examination. The plan also simplifies and shortens the upgrade path from the ground floor through Specialist--especially since doctors will only have to pass one residency test.

Elimination of the myriad of residency requirements also means an end to physician certification waivers for applicants claiming an inability to undertake residency due to physical handicap.

The AMA disagreed with the AEMTA's suggestion that it undertake a restructuring of operating privileges along with licensing restructuring. "We believe that in light of ongoing discussions concerning implementation of new and more modern medical technologies within the medical community, we should accord the medical service community an opportunity to complete such discussions and possibly reach a consensus regarding implementation of new technologies before we undertake a comprehensive restructuring of the medical operating privileges" the AMA said in its Report and Order.

In its amendments, the AMA's Report and Order refers to a "Hospital Name Administrator," something that does not exist under the current rules and which was not explained in the R&O itself. An AMA spokesperson said the Association plans to issue a Public Notice soon to explain the program and to solicit qualified entities to serve as name administrators for hospital applications.

In its comments, the AMA noted that by simplifying the entrance requirements for medical professionals, the public stands to gain by having greater access to the medical profession and drastically reduced medical care costs. No comment was made regarding increased litigation costs in medical malpractice suits, however. "We believe this is an issue best left to public policy and the American Bar Association", noted an AMA source who wished to remain anonymous.

When asked whether the change in licensing would affect the status of AMA rules enforcement, AMA Enforcement Bureau Chief, Rollie Hoisington said, "Given that

the AMA has made no effort over the past ten years to enforce its rules, we see restructuring as a positive move." When asked to elaborate, Hoisington declined further comment.

It will never cease to amaze me that ham radio, the hobby, is compared to things such as this, the profession. The hobby holds a lot less incentive than the profession to be serious.

You don't say why you need it. If all you want to do is
prove that you
did have a call then, the older versions of QRZ on CD showed
the previous
call and the date you upgraded. This might still be
available at the FCC
site, but I've noticed recently that historical and personal
information
has been disappearing from (publicly available) databases.

Profanity is permissible to use in public also, and usually won't get you arrested. But would you use it in a family setting? It doesn't add anything to the conversation, and often offends those you're talking to. Since ham radio is supposed to be a family rated hobby, profanity really has no place on the bands...

Old buddy "Fred"'s account of what went down in the restructuring action doesn't give much credit to NCI. In his column in CQ he says the NCVEC (under his leadership of course) swayed the FCC away from going with the ARRL proposal at the last minute.

By the way where is Fred staying at Dayton? I'm sure there are those who want to pay homage to the man who made it all happen. ;-)

911. FS TWO DRAKE 2B's w/2BQ's

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: W2NZ
Message-ID: <38f2b0ca.4090137@news.ifreedom.com>
Source record: 114485

The 2B/2BQ combination was the hottest CW rx of its day and still holds its own. A skilled user can get 100-150 cps selectivity from this rig. Bought one new around 1959-60 and the other a year or two later.

The first one works on 40 meter band, but dirty band switches and noisy controls need cleaning badly and would no doubt result in other bands working as well. Comes with 2BQ q-multiplier/speaker; ORIGINAL TECH MANUAl; very rare plug-in 160 meter converter; 100 kc xtal caibrator;

Second unit doesn't work. Lights when switched on but just lies there. Good chance it's a tube or two. Also comes with 2BQ q-multiplier/ speaker; 100 kb xtal calibrator.

Physically both in similar condition: some few scratches, and chassis show corrosion. I rate them about 7 on a scale of 10.

Sell all as is for $350 plus shipping from 11758.

Hi, sorry I forgot to post it. On the other hand, as you'll see in the description, the "serial number" is kinda meaningless, since this radio's been heavily modified by the Drake staff.

The actual number on the back is 16466, but as you can see from the photos, it has the 5-position mode switch, and as a result of their work, EF184 (6EJ7) tubes.

Thanks for asking.

Neil

Hi,

I bought a Tentec 1208 Transverter from a tailgate hamfest the past weekend. It is a basket cast at this point, and the seller did not have the manual or assembly info. I need to strip it down and deflux it then rebuild it to trouble shoot it, and am looking for a kind soul to copy a manual. TenTech wants $10.00 for it, and that is certainly their right. At this point, I hate to put that into it additional to what I paid for it, as the chances of getting it cleaned up and in shape to check out are looking bad.....

Email replies please to dalite01@sprynet.com

Thanks,

David

924. Morse exercises No.18

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: DTC <dtc@muenster.de>
Message-ID: <8cv4vgmqp1@news.citykom.de>

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr18_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr18_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr18_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

Did you know that the ICOM 706 also operates on 6 and 2 meters? And as you know techs can operate on those bands. Also Lloyd can listed to his great BARFIES on 14.313.....

No Ed, I think we should allow applicants to keep taking exams at a test session even if they continue to fail the exam each time. Simply charge them another $6.65 and keep handing them tests until the VE's supply is exhausted. That would be a good measure of knowledge.

Hey, wait a minute, you can already do that now. Cool man! Will I get an ARRL coupon for each failed exam?

It should be an interesting movie, however. I think the premise has
been done before in science-fiction, i.e. the original tv
series "Twilight Zone."

933. A ONCE ONLY CROSS-BAND EVENT

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: Robert Dixon <robert.dixon@zetnet.co.uk>
Message-ID: <20000411145344697742@zetnet.co.uk>
Source record: 114507

BT Radio Services have announced the closure dates for the United Kingdom's Coast Radio station Service.

Portishead Radio/GKA and all remaining VHF stations will close at 1200z on Sunday 30 April. Portishead Radio first came on air 80 years ago in 1920 and was to become the largest communications centre in the world. It employed over 340 people and was the CW and RT centre for the British Commonwealth.

Stonehaven Radio control centre and all remaining MF stations will close at 1200z on Friday 30 June. The history of the MF service traces right back to Marconi himself.

BT Maritime Services have agreed to run a special cross band maritime/amateur event on Saturday 29th April 2000. The details are as follows: -

Date: 29th April 2000. Time 0700 - 1900 UTC

Call sign Frequency Amateur
Frequency + or -

5 kHz
GKB2 4274 3525
GKB4 8559.5 7025
GKB5 12835.4 14050
GKB6 17113 18075
GKB7 22448.7 21050

There will be three stations operating at any one time - subject to the commercial requirements of the station.

COMMONWEALTH COUNTRIES
Special efforts will be made to beam towards Commonwealth countries at appropriate times. Please e-mail details of which frequency band and time suits your part of the world (e-mail address below)

BT has appointed the Radio Officers Association to handle the amateur side of this operation and the liaison officer is David Barlow/G3PLE.

ALL QSOs WILL RECEIVE A QSL VIA THE RSGB BUREAU.

Contact details: -
David Barlow G3PLE PO Box 50, Helston, TR12 7YQ
e-mail (for this event) dbarlow@u.genie.co.uk
Event Website: http://you.genie.co.uk/dbarlow

Amateurs are asked to note that there will be NO access to BT sites
and following closure and there will be no surplus equipment for
sale. Any enquiries from radio amateurs should be routed through G3PLE.

PLEASE CIRCULATE THIS AS WIDELY AS POSSIBLE INSIDE THE AMATEUR RADIO WORLD.

http://welcome.to/amateur.radio

You don't have to understand the question when the answer is given to
you. All test applicants have to do now is just memorize which answer
goes with the question.

If I understand correctly (which rarely happens) you have problems with
antennas in your "neck of the woods" others do like them?
IF (being the largest word in the english vocabulary) that is the case

MOVE!!!!!!!

if not.....disregard my last.

943. ARRL Executive VP an "A-1" Op ? I think not.

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8cvl7haf1@nnrp1.deja.com>
Source record: 114517

How can ARRL "staffers" steer the future of ham radio in a competent manner if they go around making statements like this ?

May 2000 QST:

regarding operating:

(and especially if it's intermittent and you have to remind your-self
how things work every time you sit down to operate)

What does this tell us ?

1. Quantity is better than quality. Contesters are on 10 weekends a year, disappear from the air for months on end, and as such want a body count to run up their QSO totals (at least they think all those guys will call CQ contest on April 15). Thus, they never really learn to operate their gear. But because they can sit in a chair for 48 hours and make 2500 QSO's, they're better than the rest.

If they think that is professional or A-1... they're wrong. Professional was some sloppy fisted guy on a tanker in the Persian Gulf sending SOS, not "UR 599 TU" from a computer program, 2568 times on a Saturday in January.

2. Well now, if the ARRL VP can't remember how to tune his AL-1500 after using it for several years, for thousands of QSO's, should he be pontificating to others about "good amateur practice" or proposing to institute "ARRL certification" programs to make up for written exam shortfalls they failed to stave off ?

3. I guess the people who say the buzzards are in control are right. By inference, this guy can't figure out how to run what he buys. Or else he doesn't care enough about ham radio to commit it to memory. Or else, he doesn't have a memory at his age and should retire before ham radio gets driven into the soil because of their misguided interpretations of what's going on.

But the fact that he doesn't care about ham radio doesn't surprise us, does it ?

Sent via Deja.com http://www.deja.com/
Before you buy.

>
> /JBL KD1ON (ex-KN7YEG)

Yes, my 61 study guide was also about the same as the 1955. As for
current tests being "dumbed down" because of learning to memorize the
right answer out of four given, the only difference then was that the
three incorrect answers were not provided with the question, only the
single correct answer. Thus the "hard" part, memorizing the right
answer out of the manual, and being able to detect it in a stealth field
of previously undefined incorrect answers. It was really rough then :)

Chuck,
My earlier reply didn't help you much with JVFAX,
sorry 'bout that.
The settings deal with 'timing'. These settings
depend on the speed of your computer. Even computers
with the same CPU, etc, can/will have different settings.
Theres no practical way to tell you what yours are
going to be. It's sort of a "try it and see" thing, and
can really be a 'pain'.
Still haven't helped you much, but really, theres
not a lot any one can do. Hope you get things running,
SSTV is a lot of fun.
'Doc

You bet. Because of the ease of influx of VH and UHFers into HF coupled to lack of bandspace expansion, we will see mayhem and talk about INTERFERENCE complaints? Riley will need a battalion of secretaries. I say it's going to be impossible to conduct a regular QSO without being wiped out by adjacent signals and splatter that will be unbelievable. The fun will begin in four days and by the Fall of this year, MAYHEM IN FULL SWING.

951. Drake HF Station For Sale

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: Carver Washburn <clwashburn@worldnet.att.net>
Message-ID: <38F384E4.76284E02@worldnet.att.net>
Source record: 114525

Full HF station complement of operating Drake equipment for sale: T4X transmitter with two extra 500 KHz bands for MARS frequencies, AC4 power supply for T4X, R4A receiver (built in power supply) and MS-4 speaker & equipment manuals. I'll throw in extra pair of T4X final tubes and a new Heil dynamic microphone. $400. takes all plus shipping.
Name: Carver Washburn
Callsign: W2TFM

952. Help Wanted - Standard 5900DA

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-11 00:00:00 UTC
From: Jeff Willis <jwillis@nc-cap.org>
Message-ID: <SDLI4.8228$x62.40110@typhoon.southeast.rr.com>
Source record: 114526

I have recently purchased a Standard 5900DA. Fine Rig (I think) I got it at a hamfest for a real good deal. But (there is always a but) I don't have the manual. have most of it figured out, but I need to know how to program a subtone into a memory channel as and how to do a non standard offset. If anyone has the manual and can help I would be most appreciative.

Thanks folks,

Jeff Willis
Senior Systems Engineer

>>done away with.
>
>Working DX is not one of the purposes of the CBRS. That one is heard by
>a DX station is not breaking the law; only when two-way contact is
>established has one broken federal law.
>

The purpose is irrelevant. The government has mandated who you may and may not talk to via a specific radio frequency or frequencies.

The FCC, since its inception, has dictated what speech is allowed over the airwaves. They have bamboozled federal judges into believing that the airwaves should not have the *full* protection of the First Amendment. How the American people have been led to believe and accept this con is an even bigger travesty.

The purpose of the FCC should be to regulate and assign frequency allocations for different services, and prevent such from interfering with each other for the protection of life and property. Content of transmissions should not even be an issue.

>>...and I see you've conveniently deleted my quote from Marcus Cicero.
>
>It's unknown to me what you're talking about. There was no "Marcus"

>Jeff KH6O <--- feel free to delete this line in your fol-up

FYI, it was *not* a signature line. The only signature line I have in the radio newsgroups is my name and callsign. You can find it if you go back through the thread. I assure you that it's there.

We just put together our new web site.
MAG Electronics: We sell radio communication
products + Computer Parts & Systems for LESS!

Check us out:

http://magelectronics.8m.com
Backup: http://magelectronics.hypermart.net

We are currently expanding our on-line catalog.
So, some products may not show up yet. If you do
not see a product listed, drop us a line or e-mail us with
you inquiry!

YES! We accept VISA-MASTERCARD-AMERICAN EXPRESS-DISCOVER
credit cards!!!

Your click is worth it!

Thank You,

Mike Green KQ6MU

Of course you are right Rick. I just finished a 3 year assignment in Vietnam..Hanoi no less. People there live under what we consider a repressive government. Most people in VN howwever are not communists..they're as apathetic about politcs as Americans. What matters most there, as I suspect from my travels in Latin America goes for Cuba, is FAMILY. The VN wouldn't and don't understand the way some Amercians parade politics all over the world as "we know what's best for you folks". And they certainly don't understand how we could hold on to a child when his father is willing and able to care for him. Neither do I.
I wonder if this his Doc fellow has ever been anywhere? No matter, as an American he can talk talk talk----no experience necessary.

In any case, this discussion continues all over the internet and convention/etiquette dictate that it shouldn't take place in here.

Those are interesting, but Ed et al keep making reference to the 16
pages of their'63 study guide; I'd like to view all the questions
contained in that guide rather than just know the number of pages.
Maybe someone could place the '63 guide on a web page.

I'm sure he'll think as much of it as the guests on the Jerry Springer show think of the "final thoughts".

With a band that is so highly affected by atmospheric conditions, the distance restriction on CB communications serves no purpose. The regulation should be done away with.

...and I see you've conveniently deleted my quote from Marcus Cicero. Yet, chastise others when they do the same to you. Bad boy, Jeffy

Thee ARRL wanted, the FCC left the matter the QPC which choose to
canabalize the old pools (a logical step whitoit regard to any other
merits/demerits it has)

>they're in bed together and always keep in mind the average intelligence

The FCC and the ARRL in bed together. What are you smoking?
and how much did you inhale. The ARRL finds itself all but ignored byt
the FCC in the matter of license structure, rightly or wrongly the FCC
did what it thout best and rejected all the ARLL's coments/proposals.
Indeed I suspect it reject the petion to reconsider consoldating the
Tech and tech Plus license groups. I believe (without real evedieence)
that this is because the FCC expects and has more or less decided that
when S25.2 is droped that they will drop all code testing and so the
seperation will become moot.

>of hams, while ignoring their own lack thereof (characteristic of FCC

}Maybe someone could place the '63 guide on a web page.

I don't remember which study guide(s) I had when I got my novice in '62, but I seem to recall that the questions for the technician or general were not all that different in nature. It was still the same sort of thing -- 'learn the material covered here and you will know enough to be able to answer the actual questions of the test'. For various reasons I did not go on to get the general (well, then it would have been a conditional) till nearly 30 years later. The CW was still the hard part anyhow.

The BC780XLT is not a handheld unit. It is designed as a mobile unit. Will it take a battery pack? Still, it will do more that the BC245 and has some aphanumerics.

The VX-5R is a pretty poor HT. The old FT50RD is a better choice, though not much cheaper. The VX-5R CTCSS is unusable. The metal case makes the unit too hot to handle. It has other problems as well.

The reason for dumbing down ham radio was to CLEAR THE VHF AND UHF
BANDS so that the FCC could sell off that spectrum. You guys just
don't get it. With all the hams getting on HF and leaving the bands
above 50mhz they will be ripe for a takeover.

There is no correlation between the destitute waifs roaming the streets of poverty striken countries and Elian Gonzalez. Had his mother lived, the INS and State Department NEVER would have made an isssue over it but instead lauded the bravery of the two who held tight to anything that took them across the strait between Florida and Cuba. Sending Elian back will have nothing to do with anything but pure politics based on an agreement we made with a lousy commie s.o.b who's held Cuba in subjugation for 41 years and was treacherous enough to allow the Russians to point nuclear warheads at us. Do you really believe the kid wants to go back to rotten Cuba with daddy? Every shot of him I've seen shows a happy content little boy surrounded by loving relatives instead of a tearful kid caling for poppy. And here's something that suprises me. How come we don't hear the religious right in this country demanding he stay? They try to come off as being the only ones who'll ever get into heaven-they talk about family values and all that stuff so why are they silent about the value of Elian's family in Miami who love and comfort the kid? Everyone died at sea except Elian and probabaly by the grace of God himself, herself or itself. Doesn't God's desires mean anything to us? Who knows-by allowing him to stay we might be fulfilling God's plan? Yoo hoo, Jerry Falwell, where are you? Where are you Pat Robertson? Why don't we hear anything from prominent Catholic and Jewish leaders. I can't stand hypocrisy and this whole Gonzalez affair reeks from it.

Neat idea, arrest the person that was offended :-)

The reality is somewhere in between as the issue then comes
down to what is pofanity in any given instance. That's not
an easy line to draw.

The rafting episode I believe was not in CO, but
either Michigan or Minnesota I think.

Cheers,
Bill K2UNK

All kinds of crap that makes your computer choke and crash. Either
Burp, or whoever writes his Java code, is a screw-up on writing web page
stuff. And this happens no matter whether it's a PC or a Mac, dial-up or
T1/T3 line. Go to something like look at Burp's family, and the page
starts to load, calls up some applet, and proceeds to hang,
necessitating a hard reboot. Of course, just the thought of looking at
his family is enough to make anyone (or anything) choke.

This just shows everyone how juvenile you really are Llllloyd. You
come on this board a few years ago and jump on the anti-semite, racist
bandwagon. You make thousands of off subject posts. You bitch and
moan about hams that actually give a damn, and work to upgrade. You
badmouth anything and everything good and decent. Now you expect me,
or anyone else to take you serious? What a flippin fool you are
Llllloyd.

If you have that much of a problem with me....call ur BARF buddies and
see if any of them are interested in doing your foot work. I'll bet
you wont find anyone. And why is that Llllloyd? Because we have a

truce worked out. A handshake sealed it all. Now Llllloyd in order for such a thing to work....both parties must have some crediability. This immediatly elliminates you.

And you better damn well believe that I got just as many tapes of your "hero's" in action. Will I use them? NO. Why not? BECAUSE ITS OVER STUPID. In otherwords wanabee newguy, you ain't worth my time or effort or sweat off my you know what. Get a life.

985. Let's adopt "Extra Plus"!

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-12 00:00:00 UTC
From: Fred <fdecker@compuserve.com>
Message-ID: <8d24cd$d7a$1@ssauraac-i-1.production.compuserve.com>
Source record: 114394

Look, even if the FCC and ARRL won't grant a concession to people who passed the harder Extra Exam, we can do it ourselves. Once something gets into the common lexicon, it doesn't matter if it is official or not, we make is so. For example, UNC officials have done everything possible to try and have people call their arena by it's official name, "The Smith Center", but everyone calls it the "Dean Dome".

Rather than slight new Extras who still have passed a written test and 5wpm and deserve some credit by calling them Extra Lites or worse, let's use the positive and call old Extras, "Extra Plus's". What do you think? We had Tech Pluses, so why not? Let's all just standardize it, talk it up everywhere.

Texas Penal Code

TITLE 9. OFFENSES AGAINST PUBLIC
ORDER AND DECENCY
CHAPTER 42. DISORDERLY CONDUCT AND
RELATED OFFENSES

Sec. 42.01. Disorderly Conduct.

(a) A person commits an offense if he intentionally or knowingly:

(1) uses abusive, indecent, profane, or vulgar language in a
public place, and the language by its very utterance tends to
incite an immediate breach of the peace;

(2) makes an offensive gesture or display in a public place, and
the gesture or display tends to incite an immediate breach of
the
peace;

(3) creates, by chemical means, a noxious and unreasonable odor
in a public place;

(4) abuses or threatens a person in a public place in an
obviously offensive manner;

(5) makes unreasonable noise in a public place other than a sport
shooting range, as defined by Section 250.001, Local
Government
Code, or in or near a private residence that he has no right
to
occupy;

The cited law below does not prohibit using foul
or profane language in public...EXCEPT when
the second condition is met...that the "language
by its very utterance tends to incite an immediate
breach of the peace;" Several possibile allowed
situations come to mind:

If John Doe is standing next to his car cursing
up a storm at the flat tire he has, that probably
wouldn't by its very utterance tend to incite any
immediate breach of the peace. Someone might
not like hearing it, but it wouldn't fit the law as
being so inciteful.

Just my lay personal opinion. Your mileage
may vary.

Cheers,
Bill K2UNK

That defines ham radio

Please visit my World Wide Web Site, you have never seen a page
like it.
You will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham
contact.
8. The warm side of K1OIK, hear me speak, see me with famous
people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics

Better yet, let's break it down further:

New Extra:

From VE Novice/Tech upgrade: Extra Quickie-Minus
From VE General upgrade: Extra Easy-Minus
From VE Advanced upgrade: Extra -CW-Minus

From FCC Tech upgrade: Extra Quickie-Plus
From FCC General upgrade: Extra Easy-Plus
From FCC Advanced upgrade Extra -CW-Plus

Old Extras:
Pre-April 15/Post-VE program: Extra +CW-Minus
VE upgrade-from Pre-VE program: Extra +CW-Plus
Pre-VE program Extra: Extra Old

After all, if we're going to _brag_ about how macho our cw
is--let's brag about how hard the test was, too!

Sheesh!

GOOD! Ham radio is nothing more than a cheap-ass old white
males hobby anyway in the USA. I just freakin love it when
I see full-page AD's dissappear from ham mags. Let all the
dealers go freakin out of business. Ham radios are built no
different from cheapo VCR's anyway. Anyone who would pay
more than $300 for ANY new piece of ham gear should have his
head examined. So keep droppin like flies you old tightwad
farts. I wanna see page-and-a-half long Obit's in QST.

That sounds like taking money out of your left pocket and putting it into your right pocket Fred. Let's refer to "Lite" Extras as blue-collar hams, and "plus" Extras as white-collar hams. (..we just cannot have those "blue collar hams" on OUR frequencies you know! Next they'll want to become members of the Country Club and want a slip for their Glassmaster right alongside my 52' crusing ship, or a reserved parking spot. No No No this is totally unacceptable.)

I just LOVE IT how ham radio continues to fracture, fragment and self-destruct from within! These folks actually still want the old "incentive licensing" scam that sealed this hobby's fate 33 years ago, and continues to drag it to the grave along with their obsolete and overpriced radio gear. I guess next they'll say that ham radio is more desirable to the average 15-22 year old than the Internet. What a pack of seff-blindsided old FOOLS.

That's nuts. V/UHF will still be used by *everyone* for short-range
comms, just as that region has been used for that purpose for the
past 40+ years. I can't envision a 160m HT. (Besides, anyone with
the login name you've chosen has no credibility at all.)

Sounds good to me! Let's set up 20 WPM code exams at all the hamfests,
and let people prove their competence at 20 every year. We can award a
little annual badge or patch or sticker or something like that just for
taking the exam (this proves something right there, after all!), and
publish their callsigns and pass / no pass ratings.

We can charge, say, $6 for the test, and give the money to public-school
ham radio clubs in the way of equipment.

The exams should include not only DEcoding CW, but also SENDING (bring
your own key / keyer or use ours), and different levels of accuracy will
be rated -- "Extra A+" would be 95% on both elements, for instance, B+
would be 95% on one element, below that but passing the other, and C+
would be passing but below 95%.

How many Extras do you think would challenge a test like this to prove
their skill?

FCC Warns Ham Against "Indecent" Language on the Air

W8MMQ - The FCC has sent a warning notice to Thousand Oaks, California ham Donald Rainwater, KY6W. The letter charges Rainwater with using indecent or obscene language on the 40-meter band.

In the letter, the FCC tells Rainwater that he is misinformed about the basis and purpose of amateur radio, and that he is misguided about the Commission's enforcement of indecent or obscene language on amateur radio frequencies.

The letter goes on to say that the Commission treats amateur radio transmissions the same as commercial broadcasts, on what can and cannot be said on the air. The Commission says that obscene speech is not protected by the First Amendment, and will not be tolerated.

Hang Gliders, Get a License

Amateur Radio Newsline - If you fly a hang glider and use ham radio to communicate, you had better have a ham radio license. If you don't you risk a heavy fine or other sanctions. So says the FCC's chief rules enforcer Riley Hollingsworth K4ZDH in a letter to a California glider port:

"We requested the Torey Pines Glider Port out in California, to warn its patrons that use of Amateur Radio equipment without a license could lead to a monetary penalty.

We had gotten information that numerous pilots out there of the hang gliders, were using Amateur Radio without licenses to communicate." Riley Hollingsworth, K4ZDH

And Torey Pines might not be the only glider port to get such a letter. You may remember a few years ago Newsline reported that a similar activity was taking place with hang glider enthusiasts in New Mexico. According to sources in Albuquerque, the problem has not yet gone away and hams there continue to monitor the gliders and record the illegal glider pilot communications.

From Amateur Radio Newsline, April 7, 2000

The FCC Prepares for Restructuring Phase-In; Expects Many Upgrades

ARRL - The FCC has indicated that it will continue to accept electronic filings from VECs for Technician Plus license applicants until May 4, 2000 -- 20 days after restructuring becomes effective. But ARRL-VEC Manager Bart Jahnke, W9JJ, says that date is under scrutiny at the FCC and could change. April 14, 2000, is the last day that an applicant may take the Tech Plus examination, however.

According to information from the FCC as of this week, Tech Plus applications reaching the FCC by May 4 will be granted a license stamped "Technician Plus," and this license class will be posted to the FCC database. After May 4, the FCC no longer will grant new Novice, Tech Plus, or Advanced licenses. Licensees of any class may modify and renew their licenses indefinitely after restructuring becomes effective. At renewal time FCC will change a license class of "Technician Plus" to "Technician," but no privileges will be lost. The "codeless" Technician license will continue to be available under the revamped licensing system.

Restructuring also will mean changes to the forms required to apply for an Amateur Radio license. "What's changing is every written test, answer sheet, roster, test report and most importantly the Certificate of Successful Completion of Exam, or CSCE -- all to reflect the new exam element categories," Jahnke said. Prior to April 15, Volunteer Examiners also will be supplied with copies of a revised NCVEC Form 605 that reflects the new four-element examination system of three license classes and one Morse code speed. The new form no longer will include the Novice, Tech Plus or Advanced license nor will it include the physician's certification section for applicants seeking a waiver on the Morse code examination.

If ARRL-VEC statistics are any indication, the HF bands will be hopping with newly minted licensees starting April 15. Jahnke says interest in obtaining element credit prior to the big day has been nothing short of intense. ARRL-VEC statistics show that the number of individuals served has risen by more than 135% in the three months since the FCC announced restructuring December 30, 1999. The number of applicants -- many Tech Plus ticket holders -- attempting to pass Element 3B to upgrade to General rose by several hundred percentage points over last year's numbers. Interest skyrocketed among applicants -- many Advanced licensees -- trying to get credit for Element 4B, the Amateur Extra written examination. The number attempting that element rose on the order of 1500%. Demand for General and Extra license study materials also has been unprecedented.

Jahnke said that while a typical ARRL-VEC examination session last year served maybe a dozen or so examinees, sessions the first quarter of this year have seen five or six times that number -- and more. VE teams across the US have scheduled so-called "paperwork processing" and examination sessions on April 15, some of them starting at the stroke of midnight so licensees can get an early start on using their new privileges. The upswing in the number of applications has slowed the normally swift flow of paperwork through ARRL-VEC. As a result, it now can take up to 10 days or more for a new license to show up in the mail.

From the ARRL Letter, April 7, 2000

New Movie Features Ham Radio; in Sneak Previews through April 15

W8MMQ - A new movie, called "Frequency" and scheduled to be released in April, features amateur radio.

According to those who have seen the trailers for the movie, Dennis Quaid stars as a son who meets up with his dead father on the airwaves. He then tries to alter the past to prevent his father's death.

"Frequency" is currently playing in selected cities. It is a science fiction thriller, and rated PG-13 for intense violence and disturbing images.

"Frequency" web site: http://www.frequencymovie.com/

W8MMQ Web Site Back Online

W8MMQ - The W8MMQ web site was offline for a couple of days. It was undergoing maintenance, and the radio mod archive was being updated. The web site is now back online, and the radio mod archive has been updated.

Also, please note, the w8mmq.com address will soon be phased out. If you are currently using it, please start using w8mmq.net. Thank you.

The Weekly DX Report

The Kingdom of Bhutan has completed the long-awaited Telecommunications Act of 2000, which authorises amateur radio. An international team has been invited by their Ministry of Communications for the initial introduction of amateur radio to Bhutan from the 1st until the 12th of May 2000. The goal will be to give as many DXers as possible the opportunity to work this second-most-wanted country, and initial emphasis will be on the major bands, including the WARC bands. The team will be operating from two hotels with stable power lines. After the first demands of the DX bands have been met, more emphasis will be placed on the lower bands. Three CW, three SSB and one RTTY station will be active around the clock. Six of the operators are veterans of the Heard Island operation, three have just returned from Clipperton Island and all have extensive DXpedition and contest experience.

Andre, GM3VLB, plans to be on the Scottish islands of Grimsay (OH27) and Baleshare (OH26) this evening, Sunday the 9th of April.

From RSGB News and 425 DX News

Upcoming Contests and Events

Visit the ARRL Contest Calendar at http://www.arrl.org/contests/ for more contest information.

The Michigan QSO Party, sponsored by the Mad River Radio Club, will run from 1600-Z April 15 until 0400-Z April 16. Stations may operate the full 12 hours. Operate phone and CW, on 80, 40, 20, 15, and 10 meters.

The DXYL-NAYL Contest, CW portion, sponsored by the YLRL, will run from 1400-Z April 15 until 0200-Z April 17 (phone contest is April 22-24). YLs only. Send RS(T), QSO number and section/province/DXCC entity. W/VE YLs work DX YLs, and vice versa. KL7 and KH6 count as DX. Work stations once per

band.

And ... In Closing

> signals? Echo tends to ruin intelligability. At least on my reciever.

If you have a problem listening to, or understanding them, while on 11
meter or "freebanding" why do you listen? have you not got a tuner dial
on your radio?
Possibly an on/off switch?
Seems to me that many on the NG complain about CB'ers and freebanders.
How would any of you "ticket holders" know they exist unless you are
there listening? Guaranteed you'll hear little from CB'ers on 40 mtrs.

Your question was: Why CBers and freebanders use echo and such on their
signals?
My question to you is WHY do you care?

1013. Yaseu FT-102 For Sale

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-12 00:00:00 UTC
From: elinger@sherwoodinv.com
Message-ID: <38f4f854.423154463@news.quickconnection.net>
Source record: 114422

Yaseu FT-102 For Sale. Excellent Condition -- Like New. I still have the original box.

SSB filters and two extra narrow-band CW filters installed.

Includes matching Yaseu speaker and manuals (not in original box any more). Original MH-1 microphone in box.

Works like new.

Delivers 180 watts with 3-6146s in final, but usually run at 100 to 125 watts.

Best offer accepted.

The FT-102 HF transceiver was top of the line for Yaesu in the mid-eighties and has a reputation of being a solid performer. It is a hybrid transceiver, all solid state circuitry except the final power amplifier (3 x 6146B) and driver (12BY7A) . It's better then average frequency response of both transmit and receive make it an excellent sounding rig. Also, it is one of the best receivers made in terms of dynamic range. It has plenty of controls, digital frequency display, two panel meters. It has almost everything you could ask for a rig except for computer control, memories and digital-age advantages. The rig is in excellent operating condition and does not have any relay problems that are common with these radios. Cosmetically it is also in excellent condition.

I'm located in New Jersey.

Is a catillion a party for felines? I never heard of it before your posting.
I think you mean cotillion or in plain words, a fancy dance party and how
that relates to a hamfest is beyond me unless that city is known for it's
swanky swingers and humdingers.

1018. A Disturbing e mail

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-12 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8d30pu$e0j$2@slb2.atl.mindspring.net>
Source record: 114427

Before I discuss the disturbing e-mail, I want to thank the many who contacted me about Youngblood issuing some type of threat against my wife. It appears that he's coming into my area on business, probabaly monkey, and today made some type of harsh statement against her. This is to inform all that if this slob calls me, I'll have him arrested because one of the stipulations two years ago when I had his A in court and dropped the case after he issued a letter of apology was that he was never to call me. I have already apprised the Clifton Police Department of the threat he made on the air against Iris so if he doesn't show up on the air for weeks, someone come up here and make bail for the bum because I have a feeling his own wife wouldn't want to. Now for the other item. The other day I got an E mail from KC3AU of bible thumping fame on .313 in which he promised not to turn me in to Riley because of some postings I had made here. You're reading me right, folks and I'd post the actual message but John asked me not to and I shall abide by his wishes. He did say it was okay to paraphrase which I'm doing and I'll add that he said he helps the FCC catch only the unlicensed. And so quite logically I wrote back to ask if he were so inclined, what posting of mine would cause him to turn me in to Riley? I never got a reply. Does anyone know why he mentioned "turning in" hams? Because he has Riley's private number and I'd like to know why someone in enforcement has the gall to give any ham his private number? Since Riley's the type of guy who likes to get in with the boys right on the air an being that he's down-to-earth, perhaps he might like to come on this board to write about the situation? And I know he reads this r.r.a.m because he told me so. Does anyone see the danger in John's statement? I have a good relationship with the man except for the fact that I object to his agenda; I don't particularly like fundamentalists and especially those who make ham radio their private pulpits. But let me clarify something. I have absolutely nothing against Christianity-nothing. I see it as just one more religion, no more or less important than any else. I definitely do not see it as the ONLY way as fundamentalists brashly proclaim on bumper stickers and other venues. However when KC3AU comes on strong like garlic, he is not BROADCASTING in the illegal sense of the word. Some of you who dislike him claim he is but I've not heard him make one way broadcasts therefore he's perfectly entitled to preach and sermonize and lecture all he wants. Most times I just listen and wonder how any adult could take such little responsibility for his own life by assigning everything possible to Jesus? At any rate I wonder if John came out with that hint because of a posting like this? If so, it doesn't scare me in the least and I shall continue to speak out against those who'd turn this wonderful democracy into a theocracy because such an idea is as dangerous to the internal security of the United States as any threat ever issued by a Red, Nazi or anarchist. I see KC3AU as an honest decent man but should never be in a position to tell anyone that he will not turn them in to Riley because by such intimation he's saying he has leverage over his

fellow hobbyist. And for an enforcer to pass out his private number to those in the service he scrutinizes is a breach of faith and protocol. We need enforcement and after April 15th, we're going to need a lot more, but completely IMPARTIAL. Fellow hams-stop to think if there are others who have private access to Mr. Hollingsworth-hams we know to be ex-jammers, bigots, instigators and the like who have now put on the garb of sainthood which he believes to be legitimate? I mean can you imagine him having confidence in Queenie or Polly or MXL? Or even in KT4TR, God forbid? What's the answer? Let Mr.H. give the same private access as John has to everyone. No favorites allowed, period. Or let him give private access to no one and public access to everyone. I had every reason this morning to send him a tape and register a complaint against N4TLU, Dan or Bjorn on 14.308. I decided not to. I listened for one minute before calling CQ and heard nothing. After doing so I was attacked by this mad Dane who said that I was another Herbie Schoenbohm. That I should get off the frequency since I knew it belonged to the Danes who WOULD BE having a net in operation which I interpreted to mean did not at the time of the incident. In other words, the frequency was reserved, or so it seemed, which is VERBOTEN by Riley. Now suppose I had Riley's private number which meant that I was special. That tape I could have sent in would have had more impact than otherwise and that's not right. Who knows but just perhaps the Danes were in there so weakly I couldn't hear them but Dan could? My tape would have gotten the man unfairly in trouble had I been as special as KC3AU and I wouldn't want it on my conscience. Now you can understand why I dropped the thing and QSYed. Let Riley and the monitoring stations continue their fine work because with the mayhem that's coming, it's just the beginning but any sign of favoritism, even miniscule, must go.

You have the right attitude.
We need alot more hams to take a good look at how they operate.
The crap I hear is just as bad if not worse than CB. The CB'ers that I used to fight with, when I see them in Wal-Mart, I shake thier hand and wish them well and they also in kind. Why do hams have such a hard time burrying the hatchet??

73's to all
Radio Oger

In article ,
nw7us@hfradio.removethispart.org (Tomas - NW7US) wrote:
> Amateur Radio is not "cb" -- not just buying a factory-made, plug-and-play station and pushing the mic key, shouting, "CQ CQ!" While currently in the United States there exists a trend to make entry and upgrade to Amateur Radio privileges easier, there is something this hobby represents that is true for any amateur radio operator, in whatever country s/he resides. We represent our respective countries. We are ambassadors. When I talk with a Ukrainian Amateur, I actually come away thinking, "So that is how they act over there. That's what that country is like."
>
> Amateur Radio to me is an art. The art of communication, the art of language, the art of electronics, propagation, etc. Perhaps that is why CW is so attractive to some people, RTTY to others, and why DXing is so hot to many others. It is more than just making quick contacts and feeling like you did something grand because your 1500 watts made it 3000 miles.
>
> We Amateur Radio Operators are making connections. The human touch. Perhaps making peace and improving the human condition. Could it really be possible?
>
> All of us are part of a large family. This hobby allows us to use technology in a pleasurable way to "reach out and touch someone" (remember that advert?) and make connection. CW is a mode, one of many. I take great pleasure in it. It inhances the experience of communicating. Sexy, some might think of it.
>
> If we wish to encourage the long life and health of cw, or of any mode, perhaps we should nurture the sizzle. This has been said, and said again. We lead by example and through embracing those who choose this form of communication. The result is that more of us humans are

connecting, forming a closer family around the world. No skin color. No accent. No gender. Pure exchange of thoughts and the sharing of common experiences.
>
> I am a single dad, with two sons (11.5 and 13) -- and my life's work is to nurture them into leaders -- men who know the "real deal" and lead by example. Ham Radio is just a channel that allows society to communicate. What we communicate and how is an extension of who we are and what we believe. So my hope is that my boys, and I, exemplify a high standard that impacts the world of humankind with something of value.
>
> Life is simple. Really, it is. And Amateur Radio is not God's gift to the world. But it is a very valuable pursuit. The foundation of this hobby is made in part of the value of life and the respect of each other. Modes of operation in Ham Radio is really insignificant. What we do through these modes is more at issue. CB became the mess it is because those with virtue left it to the lowest common denominator.
>
> I hope to spark the kindling in other's minds. To tempt the non-amateur with the magic and sizzle of crossing boundries and issues, and connect. Be it with dit-dahs or with long-winded chatter.

I think that Geofrey protests just a little too much.
I'd be willing to bet that he was the biggest CB'er in his neighborhood
or engaged in some form of BS or bootlegging along the way to becoming
the self-righteous ham he is today. He is looking to punish us all and
bring us to the level of perfection that he cannot attain.

Besides, that gentleman did not say he did anything wrong. He mentioned
the frequencies above and including 27.385MHz. Last time I checked,
those were legal channels 38, 39, and 40. I see no law breaking there.

I think that he needs to get his medication adjusted.

Anyone who thinks ARRL checks all those contest logs for
accuracy should have his head soaked in sparkling muscatel.
Just like DX logs. In 1997 I added 10,000 points to my November
SS score by adding a couple of dozen contacts from calls
that I had "lifted" from listening. Sure enough, my "hamburger helper'
score was there on the pages of QST in their cheap ink that smudges
when you rub it. What a JOKE.

If you need it for proof of passing the code element, you can send a letter to the FCC records clerk with the details of your call, year of issue, address at the time, etc. It takes a little time, (for me it took about 3 weeks for them to respond) but they will respond with a confirmation letter of your license class held at that time.

That defines ham radio

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

All,
He grabbing his marbles and going home as he does not like the rules. He can't be serious about he hobby or he would stay and help foster new hams into it. Hell he could even focus all that negative energy into going after the 35-55 crowd that have the money and leisure time to get into ham radio. So Vince are you going to do more public service to give back to the hobby or are you going to "sell out" and move over so us radio do goobers can't get more band space? I don't think you would be happy in any hobby as you are an old curmudgeon.

Mark, your statement is incorrect that profanity is permissible to use in public. There is a law that was enforced in Colorado when a family was out rafting and a drunk no good bum lost his raft and started cussing. He was arrested and found guilty. Also in Texas there is a law that if a person is offended with your profanity in public that person can be arrested.

Since we're sharing :), I think the simple truth is that those who equate their thoughts about CB to that of some kind of lower form of life have truly not listened to CB in quite some time, and have certainly never listened to SSB. I began listening to CB as a youngster and began talking on a CB in my teen years. That was my very first exposure to radio as a hobby.

I then bought my first CB several years ago, began using CB on a regular basis, learned about ham radio via CB, took ham classes taught by two CB/Hams and one non-CB Ham. Were it not for CB, I would not be in the hobby of ham radio.

The "AM" part of CB radio is pretty trashy; with either a flood of signals or topics and language that no self-respecting person would involve themselves with. I didn't know a darn thing about SSB until one night when a really thoughtful person (who was using SSB on the same channel where my AM rig was at) was nice enough to switch modes and explain that the "buzzing" noise I was hearing was a whole bunch of people talking on SSB. It was 2 days later when I bought my first AM/SSB CB.

I have only a Tech+ license. I have only operated on 10M phone. But, my experience in listening on all the other HF bands, and talking on the Tech+ portion of 10M, is that there is little difference between the two. Before the critics keel over with heart attacks over that, consider that CB is the one place where some of our most credible work for ham radio can be conducted. It is on CB that DFing conversations often take place; it is on CB where we can do things that are not allowed on the ham bands, due to the "pecuniary interest" restriction in the ham portion of the bands. Maybe you don't consider that valuable, but I do.

I think the unfavorable attitude towards CB radio and those who enjoy it is more against the perception of a lower class of person in general--it is generally thought that "anyone" on CB must be "one of those knuckle dragging, beer swilling" whatever you call 'ems. I'm here to tell you I've heard those same kind of people on ham radio and they are just as disgusting on ham radio as they are on CB.

Mark Morgan wrote
> 2) where was it written that this was a family oriented hobby?

It's just common sense to most decent people that when you are in the company of strangers of all ages profanity and decency should prevail. You should act as if you were in the presence of a family when on the air, because you might be. Do you remember the old Heathkit catalogs with the cover showing a family operating the station?

But of course it's probably not written anywhere. Do we have to codify decency? Here is a better question: where is it written that hams should be cordial to each other when on the air? Yet most hams are, no written regulations required...

The ham bands are the only things that will be eat'en up, by CBer's,
pirates, Bootleggers, welfare recipients, and other low-life.

CAN YOU RECCOMEND A GREAT/BETTER TUNER?

I AM CURRENTLY USING A MFJ-949E TUNER FOR HF AND HAVE GREAT DIFFICULTY
IN CONSISTANTLY GETTING MY MUTIBAND(40-10 METER) DIPOLE TUNED.
IT TUNES WELL ON ALL BANDS AT TIMES AND AT TIMES I CAN NOT GET IT TO
TUNE AT ALL.

I CHECKED ALL OTHER CONNECTIONS AND AREAS AND THEY ARE IN CORRECT ORDER.
EVEN MFJ THINKS THEIR MAY BE A PROBLEM WITH THE TUNER. (ONLY 3 MONTHS
OLD).
IS THERE A BETTER TUNER THAT I CAN DEPEND ON TO BE CONSISTANT IN USE???

KC8LVJ,
Check that there are no changes in the antenna, the
feed line, or grounding(if any). If your sure there
are no differences in those things between when the
tuner doe and does not work, then I'd agree with MFJ,
maybe something wrong with the tuner.
When selecting any MFJ tuner, always pick one that
has apower rating twice what your normal output is.
MFJ's tuner ratings are in 'PEP', NOT in average power.
If your normal power level is 100 watts, you need at
least a 200 watt tuner. If 1500 watts, then at least
a 3000 watt tuner (or more).
MFJ does have good tuner designs, the quality
control isn't always the best though, but their warranty
makes up for it. Just to be safe, always shake a MFJ
tuner, if it rattles, open it up and tighten all the
nuts/bolts.
'Doc

I REALLY wish the Bitter Bastards Brigade would keep this OFF the
antennas NG.

Face it- things change- I'm 73 and an Advanced Ham, but I dont see
anything to gain by increasing the Irritation factor by this type of
Bitching.

I guess you're responding to me here. Sorry but, again, this is what you said:

> The 'Tech' license gives you a partial 10 meter use, and all bands
> from there up (VHF/UHF).

This part is in response to a non-licensed person, but it refers to the Tech license. At this point it *could* be a Tech or a Tech Plus; it's ambiguous, but wrong for a non-Tech Plus.

> For the same co$t and a little bit of code (5wpm),

Here you are tell the non-licensed person that in addition to the "Tech" license, code will get you more. That resolves the ambiguity in the first part to a non-Tech Plus.

So, no matter what the license stature of the original questioner, you HAD to be talking about a no-code Tech that gets partial 10 meter use, and that is clearly incorrect. You have acknowledged the "incorrect" part. Good start, but poor finish.

> How many Extras do you think would challenge a test like this to prove
> their skill?

Actually, I think quite a few. I am not an elitist, I want the restructuring, I just also want their to be more challenges and areas where HAM's can excel. It just "stops" at extra. You can try other modes, work for DXCC, but there are no other "endorsements" you can have. I think it would be a good thing. A lot of people I have talked to are buzzing about it and looking into the certificate you can get from the ARRL.

To Eddie and anyone with at least a sane response. I ignore those who use obscenity or who are just basically clinically insane, but somehow manage to function enough to keep themselves out of an institution (ie: most of the old hams on this list).

I am not an old timer, I just turned 40. I am also FOR restructuring and think code is a silly test of ham skills. OTOH, it is a weeding out of people who don't want to make a comittment. I wasn't going to be a chemist either, but they made me take it in College to be a EE. Frankly, a lot of us don't make our own rigs anymore either and there are no "user serviceable parts" inside, yet there is a lot of electronics on the test. The bottom line is that we have to test SOMETHING, and this is the best we have come up with.

I accept and welcome all hams, new and old, except for the ignorant rednecks that seem to dominate 14.313 and parts of 80 meters and this list. However, I don't think it is fair to people who worked very hard to get what will always be the hardest qualifier, the one you couldn't cheat on, the CW test. You can argue that this is ego or bragging rights, but why do you think all the Advanced licensees scrambled to get in their tests before the 15th? Same thing, they want bragging rights. I am certain they don't want the tiny little extra band privildeges, most are only using VHF anyway and hardly any can take advantage of CW only high speed bands. What they want is to say they are extras and know that no one will no whether they got it the hard way or the easy way. I know several right in my circle who have been Tech Pluses and Advanced for over 25 years, and are now becomming Extras because it is "free".

I think bringing more people into HF is great, especially if they crowd out the rejects who shouldn't even have a license. I also think that there should be a class called Extra Plus for the same reason there were Tech Pluses. I think it is a very fair compromise.

Those of you on the cloister this afternoon were "treated" to this garbage. I wonder why hams are so obssesed with something most of them will never do (not counting the guys in Dayton who pay people) ?

Why did it take 30 minutes for the garbage to be taken out ? Was the operator of the node too busy on a DX NET ?

STAND BY PWEEZE STAND BY PWEEZE. PWEEZE DONT CALL THE DX STATIWON UNLESS I CORONATE YOU PWEEZE....

If the guy was in JA (not), it's an amazing use of an education in English; but didn't we all learn the bad words first when studying a broad (get it) ?

Doc is right.

At least I didn't type it out as Castillian, as some on here with
advanced degrees in ham radio (now possible under the ARRL CEU program)
would have.

I don't think I've heard "welfare recipients" and Ham radio mentioned in the same breath before. Do you include medicare and social security recipients in that pool of low lifes as well? Seein that they are all government handouts that are being supported by the working middle class.

Hi! I'd like to purchase one each of the following Azden radios:

PCS-7800 or PCS-7800H 10M Xcvr
PCS-7000 or PCS-7000H 2M Xcvr
PCS-7200 or PCS-7200H 220 MHz Xcvr
PCS-7300 or PCS-7300H 440 MHz Xcvr

The radios must be a cosmetic 8 or better, and 100% functional. They must be complete with manual, power cord, mic, and mounting bracket.

Please drop me a note with your offers.

Thanks,

Paul WD8DKY

Not so, John! Our national parks and forests and other public lands are
over-run by campers and hikers who couldn't start a fire with flint and steel
if their lives depended on it. What has this to do with ham bands and low
life? Well the ham bands are public property allocated to recreational (vs
commercial) use just like national parks and forests and code is much like
flint and steel: both are antiquated, both can be fun, both could save your
life under the right circumstances and both could be used to minimize the
number of Americans allowed to use their own recreational property - right?
Think how many people we could exclude from our parks by making them prove an
ability to start a fire in 30 seconds with flint/steel, and how much room
that'd leave for the few "serious campers" who can. After all, it worked for
amature radio for half a century ... ;o(

>If you have a problem listening to, or understanding them, while on 11
>meter or "freebanding" why do you listen? have you not got a tuner dial
>on your radio?

Most amateurs abide by the regulations set forth by the Commission. It
can be a bit irritating to be mindful of the regs yet hear law-breakers
using our public resource RF spectrum in such an awful manner -- similar
to witnessing people littering a public park. Maybe folks like yourself
can turn your back and pretend it's none of your business, but others
are more community-minded and do care (and wonder why it's occurring).
Ignoring federal communication laws is a good indicator that one would
ignore other federal (and state and local) laws, too. Such folks are
a burden to society and are looked down upon by the more law-abiding
citizens. You'll have to just accept that rather than questioning why
(just like you chastising Robert for asking why).

>Seems to me that many on the NG complain about CB'ers and freebanders.
>How would any of you "ticket holders" know they exist unless you are
>there listening?

Those free-banders have found their way up to the 10m band and down to
12m; that's how we know they exist. Some are so bold as to even use
the HF air-to-ground frequencies, endangering aircraft. That becomes
everyone's business (even yours).

>Guaranteed you'll hear little from CB'ers on 40 mtrs.

Guaranteed you'll hear many of them as low as 12m and has high as 10m.
It really has become our problem. And note the region between 11m and
10m are government frequencies; the latest recipient of a $17,000 fine
was caught operating on those government frequencies.

Jeff

[posted and mailed]

Ed,
There is a difference. Hams in 1963 probably cared more and they certainly had more intiative. After they got their licenses alot of them had to build their own equipment. If they couldn't build, they'd get surplus military gear and modify it, often making it work better than it had to start with. Hams with money could buy off the shelf. When you have to work harder to be a part of something you care for it alot more. In my opinion, the hams of the 1940's, 50's, and 60's with their innovation and experimentation advanced ham radio more than any of these modern day Techie-talking code haters will ever do. Amsat is the only group moving amateur radio forward with new emission types and the utilization of microwave frequencies. Using these new modes and frequencies might require a little effort on ones part, such as modifying or homebrewing equipment, but thats not anything different then what the early hams had to do to use HF in the early days. Where am I going with this?
The ARRL has been talking bull out of both sides of its mouth and the whole thing has been a smoke screen money-grab, and it has suckered in alot of hams over the last year. The League says it's moving ham radio forward, but I haven't seen any proposals. The League says gaining more hams by removing some exam elements will advance ham radio, they said the same thing about the no-code tech which didn't advance a thing. I could go on and on but who'd read it. I'm not requesting electronic experts, I'm reguesting hams have good operating practices and procedure, and it's gotten to sound a whole lot like CB over the last 10 years.

Make it harder to be a ham and those that make it will certainly have the initative to move the service forward and protect it. Ed, I don't know how much time you spend listening to your HF rig, but you more than anyone else should be a creditable witness on how operating practices have gone into the sewer. And don't cut yourself short Ed, what you had to do as a ham in the early days was tough.

Remember....whenever standards are lowered, quality suffers. ALWAYS. Years ago when someone was interested in knowing the difference between CB and amateur radio, a ham could say, "WE EARN LICENSES, CBers don't" and it was the truth. What will a "welfare Extra" now say,"I earned my higher grade ticket?" Like hell he did. It certainly was a GIFT. From time to time I heard fellows saying, "I'm going to try to get my Extra BEFORE April 15th." That's admirable and anyone who stepped on it and pushed and studied to do it and has succeeded should be commended. In two days the entire composition will change. perhaps irrevocably and if anyone thinks that amateur radio will become better for it is just plain nuts. Several years ago WB2OTK called a watch officer at an FCC monitoring station who told him that for all he cared, ham radio could become CB. It's going to happen in 2 days. What puzzles me is why will the Commission bother with enforcement when the Commission itself, along with the ARRL, will be responsible for such chaos that enforcement will not be practical? Riley has stated that he wants no conflicts, no arguing on the bands since they are detrimental to the very esssence of the hobby/service. Yet, the Commission with restructuring is contributing to exactly what the man opposes. How many arguments will now pop up between hams who earned their tickets versus the electronic carpetbaggers who'll try to run things? The excess baggage that'll flood into HF will turn the entire thing upside down with such ferocity that enforcement will become useless and the amateur PHONE portions will be nothing more than "10-4 Good Buddy." What then will be the saving grace for the old timers? " Charlie Whiskey." CW will gain more status than ever. The Phoenix will rise from the ashes and the lost art which wasn't important enough to warrant the retaining of the status quo will become a badge of honor and achievment for REAL HAMS. Dust off your Vibroplexes, keyers and straight jobbies-the great days will return. Hallelujah.
AF2Y

NEGATIVE. John didn't threaten me; he ENLIGHTENED me to the fact that he has the power to adversely affect the destiny of a fellow ham through a privileged connection to enforcement. He therefore has the ability to suppress free expression on the Internet which I find extremely dangerous and hopefully erroneous. I still don't know to which of my postings he alluded because he never answered the question. His quasi arrogance would be equivalent to someone pointing an empty pistol at your head and saying, "I can put bullets in the chamber."

After watching the piece on amateur radio on the abc news
last night I wonder how many of you actually care what
happens. All I ever see is code no code slams one way or the
other instead of congrats on giving someone a helping hand.
After the pirate attack on that boat that kid could have
died, it did not matter if the guy's who helped on the
maritime mobile net knew cw or not. Also, 2 years ago when
southern Minnesota was torn up but tornados in early March
many tech class hams helped (taking time off work without
pay) to support communications out of the spots that needed
it. Why don't you guy's get a clue, it isn't the fact that
someone took this or that test, it's the reason for the
amateur service, to help in emergencies, the hobby part is
just the added fun.
Mark (tech + and don't know if I want to bother with hf,
to busy working eme)

I don't think Brother John would qualify as a fundamentalist. He'd have to condemn Southern Baptists and Catholics to qualify for that one.

And ham radio is not a private pulpit. The only pulpit more public is wherever "Prophet" Stair is broadcasting at a given moment.

And a word of thanks to Radiosigs for his compassionate tone towards Brother John. I think Radiosigs understands that Brother John's message keeps the "nasties" squirming. So even if one does not agree with Brother John, we still have to love him for the enemies he makes.

Keep up the good work, Brother John. Light in the darkness. Just what we need.

Flame-throwers?

It don't do bad on sideband with a horizontal beam even without band
openings. It's easy to get 100 to 300 miles out of it.

Have you ever used one of those Create Design log beams. My asshole
yuppie neighbors think that it is a TV antenna, although they cannot
figure out why there is a second rotor on it to turn it vertical.
I do use it as a TV antenna, when I'm not operating. It's the easiest to
hide in a well regulated neighborhood. Right out in the open!
Not to mention the inverted V from the chimney to the two light posts in
opposite corners of the property.

I had an idea of putting up a vertical that I can raise and lower
through a plastic vent in the roof. Up at night or when operating, and
down, just like a power car antenna at the carwash. Something like that
would make the Zoning guy crazy with false reports and fruitless drive
by inspections.

I heard N8WGM mention that situation in his comments to The Great Liberty Net this past week.

I don't know the background, but Steve used some admirable discretion in describing the situation to his friends on the net. He never once mentioned any names or call-signs. Steve gets an A+ for his use of diplomacy in a difficult situation.

I don't know JBO, but I can tell that he and Tim and I have a common enemy. Nope, it's not Steve Tunder, either. Tim knows to whom I refer. :-)

Source record: 114355

So let me understand...
New Ham's will never be accepted?
Is there some place I can go to test 20wpm and a harder test?
If I could do 50 wpm and be able to pass any exam ever given in the last 50 years, would I be accepted by you all?
Will you be able to tell me apart from any one that takes the easy one? (still just a newbie in your eyes)

This change was not made by a new operator, but it seems that we will take all the flak.
I would think that this would be the time to take us in, under your wing, and teach us.
But instead it seems like an elementary class here, WE HAD THINGS HARDER SO WE DESERVE MORE!

So to me it looks like you all are going to take it out on all the new operators because they didn't walk 20 miles uphill to and from school at -40 with bare feet!

I wonder if the exams had got harder what most of you would be saying... Would you be able to pass the harder exams, heck can you pass them now?

Just My Opinion

Fred <fdecker@compuserve.com> wrote in message news:8d24cd$d7a$1@ssauraac-i-1.production.compuserve.com...
| Look, even if the FCC and ARRL won't grant a concession to people who passed
| the harder Extra Exam, we can do it ourselves. Once something gets into the
| common lexicon, it doesn't matter if it is official or not, we make is so.
| For example, UNC officials have done everything possible to try and have
| people call their arena by it's official name, "The Smith Center", but
| everyone calls it the "Dean Dome".
|
| Rather than slight new Extras who still have passed a written test and 5wpm
| and deserve some credit by calling them Extra Lites or worse, let's

use the
| positive and call old Extras, "Extra Plus's". What do you think?
We had
| Tech Pluses, so why not? Let's all just standardize it, talk it up
| everywhere.

Adapt or die to change. Time has largely passed the code by,
except in specialty areas like QRP, EME, and weak-signal DX.
Vince would rather pass blame and have his hobby "die"
than adapt and continue. So be it; it's his choice.

1128. AF2Y: Vocal Polish Bigot?

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-13 00:00:00 UTC
From: Anon <anonymous@cotse.com>
Message-ID: <200004130605.CAA16461@cotse.com>
Source record: 114358

Now wait One moment stop the presses let me get this right Doc AF2Y the one and only Official (as per FCC) Jammer and Noted "Wide" Splash Master of 14.313 is actually pointing fingers and producing his gibberish against others

```
This has to be the best comedy output from that Clifton
Idiot for at least a week.
```

Imagine (And yes gang this only can happen in America) the Clifton Putz AKA Doc the Pot is Calling the George the Kettle BLACK....

```
ROTFL so hard that it is starting to hurt.
I guess it must burn him that he is not abel to speak
Polish,, and his French is no better
```

(PS. Doc was arrested in Paris for asking a women standing on the corner for the Time)

```
I wonder if George paid Doc the $200 for that crummy amp,
I sure hope that it was a check.
```

I guess the Clifton IDIOT has finally come out of the Closet and now it is clear for all to see that he actually is a true Putz and a most of all a BIGOT.

```
Thank God that we do live in a democracy, like the USA, can
you imagine living in a country that is run by the likes of
the Clifton Idiot AF2Y and his brethren.
```

Charlie you are a true example of a individual who suffers from Hoof and Mouth Syndrome, it is NO wonder why you alone have become the poster boy for the Idiocy Telethon.

```
>A group of nice guys and good ops decided to vacate .313
due to Polly,TR and MXL stink and lo and behold what
happened?
They're now getting jammed by N9VTB and in Polish yet.
I heard the whole brouhaha this afternoon and when Riley
gets those valid complaints, he ought to ship George,
N9VTB, back to Warsaw.
The fellows on 14.275 were minding their business when in
came splishki splashski
I was taking a bathski from Chicago, smashingski .275 to
pieces. All his knobs turned to the right, buckshotting 7
kHz both sides of fundamental, intentionally planting
```

himself right alongside Rube, Dan and Tom in an effort to disrupt and HE DID. First off(the boat), George's main fault besides an attitude is his choice of language on ham radio. Polish? It's awful. No vowels. Just harsh spittering, splattering sputtering consonants designed to wash the other guy's puss and I feel sorry for the microphone too. Maybe that's one reason why Archie Bunker used to rib those people? And when he was approached by the fine gentlemen on .275 who daily are the victims of spitbaths, George came back with a "Give me liberty or give me death" speech taken from whom he considers to be the great Polish American statesman Patrick Igor Henski. Imagine, he told real patriots how to be good Americans. The guy's a greenhorn unwilling to talk OUR language on American ham radio and he's telling veterans about rights. Pirogihead from Chicago needs to learn some protocol before he tries to exert his foreign influence on us and secondly he openly admitted that his splatteringski was PAYBACK despite the previous peace overtures by K4RUB. I'm disgusted. You take a guy like George, mix him with the chowderheads about to become welfare Extras who'll swarm like locusts over every band and I'm set to quit ham radio. I'm ready to get rid of all my equipment and my price is fixed. I will pay no more than $200 to have it taken out of here. AF2Y>

Oh, that's it. Now you've done it. Prepare to be disgraced, flogged,
and shot, at dawn. We can't have any of that radical nonsense in this
newsgroup. This newsgroup is for intellegent, rightious, people to
discuss the seriously important issues facing the ham radio community.

No, honestly people, I don't use my radio in the CB band. As I have
already said, I have an old cobra radio for that. My ham radio has the
MARS/CAP modification to allow it to be used on the VHF marine band in
connection with my activities with the USCGA, but that is as far as it
goes when it comes to out-of-bands activity.

Dwight Stewart (W5NET)

1132. FT90R ..extended TX? how to? programming software?

Newsgroup: rec.radio.amateur.misc

My rig is supposed to be enabled for extended RX + TX on the marine band. (purchased in Singapore) I cannot figure it out how to tune it outside 2m/70cm.

Is there any memory programming software available for FT90R? Do I need any special interface?

I think so too, if what you said is true. I didn't hear him, so I'll take your word for it. The only reason I mentioned him on here is because a few idiots posted that I was the only one to get a letter. I wouldn't mind making peace with Tunder, but I am uncertain about his thoughts on the matter. I refer you back to his September of 1999 posts, and you'll get some history.

Interesting note:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules.

So Barflies/rumphumpres put that in your pipe.

You are all absolutely correct, I should have said the
'Tech Plus' would give you limited privileges on 10 meters.
Now, for a few replies to the comments.
Yes, I am sure I am an 'Extra'. Passed the test, and
bought the callsign. If your not happy with that, I suggest
you 'handle it'.
No, I did not 'have' to be referring to a 'no code Tech.',
I was referring to a non licensed person who was asking about
the 'tech' license class. Good answer, but wrong premise.

Here are our updated circuits for building a tuner simulator to gain control of the tune function on the Icom 706. Sure comes in handy for use on a manual tuner or other non-Icom tuners. Enjoy all!

The point is, is that we are not hearing about ANY new
equipment. The market is dead!!

Is there anything, handheld, that will replace these
two units? Anything at all in the pipeline??

: I am about ready to buy a trunking scanner, such as the BC-245,
: and a new handheld radio, such as the Yaesu VX-5R. What is
: holding me back is that the new equipment is usually announced
: at Dayton. But this year there has been little talk of any new equipment.
:
: Am I safe to go ahead and buy these two radios??

> upgrading hams? It is this attitude that has probably driven away more new
> or possible hams than any cw test ever did.

Attitude means nothing in the real world. If you wanted to step inside ham world, you'd do it anyway. Nothing is wrong with rewarding someone who "WORKS" for it (not that a published Q and A constitutes work- you'll have to trust I didn't memorize 5 elements like a loser does). [insert sour grapes/ why do we have to because you did crybaby CRAP here]

In order to avoid having people be screwed without knowledge of what they're getting into, I took the opportunity more than once to pull out the ham catalog and let the visitor laugh their formerly interested ass off at the pricetag on anything other than a 2 meter CB.

Then, to solve that problem, I put on the 2 meter CB (or packet when I had it), and let them listen to the buzzards spin around and around, chasing their beaks in an infinite spiral that makes the Greeks' Oros look comprehensible.

So you see, the problem with ham radio is the "Three P's"

1. The Prices
2. The People on air
3. The People who then point out the above (otherwise known as telling the truth, as others did toward me, when I was first licensed)

Oh yeah ?

Try to get some buzzard on 75 to remove the bolt through his tuning knob
by taking the frequency he's been on since Hirohito was welcomed aboard
the Missouri and see how cordial he is.

F.C.C. to Promote a Trading System to Sell Airwaves

By STEPHEN LABATON

WASHINGTON -- As the airwaves grow ever more congested with modern wireless communications, the federal government is developing plans to open up the spectrum by, in effect, treating its frequencies as commodities to be bought and sold as routinely as pork bellies or soybeans in the open market.

Officials at the Federal Communications Commission say they are preparing rules that would create a trading system in which telecommunications companies of all kinds, from old-fashioned radio stations and telephone companies to purveyors of wireless Internet services, could bid for underused slivers of the spectrum that are already under the control of other companies.

It would be a radical overhaul of the rules governing one of the most valuable, if intangible, forms of property in the new economy: the rights to transmit electronic signals at specific radio frequencies that constitute the spectrum. It would also have profound implications, not only for the telecommunications industries, but for consumers as well.

Under the current system, the federal government licenses each user and regulates what frequencies and signal power can be used. Most times these rights have been sold to the industry, although the oldest license holders got them for free. But they have never been bought and sold in a secondary market like so many bushels of grain.

With the proliferation of cell phones, pagers, satellite services and other wireless devices, the communications agency's top officials have warned that demand is so outstripping supply that it may lead to what they call a spectrum drought, making the scarce spectrum even more valuable to haves and have-nots alike.

Right now, for instance, the agency reports that the volume of traffic on the Internet is doubling every 100 days, a stunning increase considering that telephone traffic has traditionally risen about 5 percent a year. As consumers increasingly reach the Internet through wireless connections, like cell phones and handheld computers, experts fear the heavy use of the airwaves will begin to create bottlenecks and interference that could greatly frustrate the further development of the technology.

"What a tragedy it would be if, right as we're on the verge of the Internet migrating to inexpensive handheld devices and offering real hopes of truly democratizing the technology, the movement would be stymied by overloading the spectrum," William E. Kennard, the chairman of the Federal Communications Commission, said in an interview on Friday.

Kennard, who has been pushing the agency to consider what rules need to be changed to help deregulate the spectrum to foster a new market, said the FCC was just beginning to enable the licensees who own the rights to a given slice of the spectrum to make money from any surplus they have, like parts of the airwaves they may not be using 24 hours each day.

The plan began to take effect last week and will take many months to complete. In a little noticed announcement last Thursday, the FCC released rules for an auction this spring of a slice of the spectrum used by public safety organizations, including police departments and hospitals, as well as railroads.

Described by Kennard as "putting our toe in the water," the rules will reserve some of the frequencies to be auctioned to "guard band managers." They would be able to lease and trade the frequencies they win at the auction to commercial companies or private wireless users, setting up a system that opens the door to brokers who could help match buyers with sellers.

Another auction this year for even more valuable frequencies, those being vacated by broadcasters as they convert to digital television, is also being prepared in a way intended to encourage new spot markets. These frequencies, considered beachfront property by the industry, can be used for a wide variety of technologies beyond television, including cell phone

and Internet communications.

If the idea works, the trading of spectrum futures could benefit the telecommunications companies
that own licenses and other companies that cannot function without obtaining access to the
airwaves. And consumers, in theory, would benefit from more capable communications devices and
cheaper bills.

Just as the trade in physical commodities allows farmers to hedge against abrupt swings in price
and enables consumers to count on steady supplies, economists and communications experts say a new
approach that treated scarce frequencies as a commodity would allow new and older technologies to
continue to flourish.

In theory, officials and economists say, the secondary market would be beneficial to consumers in
several ways. Economically, it would create a more efficient and predictable way of matching supply
and demand, and therefore would result in lower costs for using any equipment that makes use of the
spectrum, like cell phones and pagers.

Technologically, it offers the hope of better reception for consumers who have begun to encounter
greater interference as the spectrum has become overloaded.

"There is a severe spectrum shortage," said Peter Cramton, an economics professor at the University
of Maryland who as chairman of the Spectrum Exchange Group, a Washington company, is involved in a
private effort to auction parts of the UHF television spectrum in conjunction with the broadcast
auction.

"Consumers want better services," Cramton said. "They want high-speed data. They want a connection
every time they place a call on their cell phones, not three-quarters of the time. The needs for
users right now are great."

Officials at the Federal Communications Commission described a variety of ways a commodity market
in the spectrum would work.

-- News organizations covering political conventions or the Olympics would be able to buy contracts
to use a piece of the spectrum during the event to give them extra capacity to beam pictures, sound
and data back to their headquarters.

-- A large metropolitan airport congesting the local airwaves around it with everything from air
traffic transmissions to car rentals and cell phone users would be able to reserve space from other
spectrum users who are not fully using their space during peak hours.

-- Nationwide cell telephone companies would be able to buy and sell pieces of the spectrum in
different regions of the country depending on the available supply and the demands of their
customers.

Kennard and executives of some companies that are involved in creating markets for fiber-optic
cable use said they envisioned a secondary market that could be set up by brokers on the Internet,
much the way a secondary market exists for reserving the excess capacity of fiber-optic cable. They
said the market would exist on a Web site listing what is available from licensees to trade to
other companies who would want to buy or lease space, an eBay for telecommunications companies.

Companies like Arbinet Communications, Enron and The Williams Cos. now act as brokers to
essentially buy and then sell unused telephone time on fiber-optic cables.

At a telecommunications conference sponsored by Credit Suisse First Boston in New York last week,
executives from some of the companies now involved in trading unused telephone time said that the
FCC's proposal held great promise, but that it would take time to develop.

"The beauty of wireless is that the current system for trading it is so inefficient," said Eric L.
Rabb, managing director of AIG Telecom, a unit of the American International Group that acts as a
broker for access to time on fiber-optic cable. "What we apply now to the wired world we can apply
to the wireless."

Officials at the FCC say they are planning a forum this spring on ideas and rules changes for
encouraging spot markets for the spectrum.

"Just through our licensing records we already have the most comprehensive list of potential
sellers," Kennard said. But even as it seeks comment on changing the rules, he said, the agency is
beginning to take steps beyond just the way it structures spectrum auctions to encourage the new

marketplace.

This week, for instance, the agency plans to begin writing rules for a new technology that could
have a profound effect on a secondary market. The technology is known as digitally defined radio,
and it would allow new kinds of radios and cell phones with special software to seek out different
and broader frequencies than current radios and phones.

The military has expressed interest in digitally defined radio because it would enable radios to
avoid being jammed by an enemy by searching for a clean signal. But other companies are also
developing products that rely on the technology.

By making broader use of the spectrum, digitally defined radio would also encourage
telecommunications companies who are not using all of their licensed frequencies to their full
capacity to lease their underused portions in a secondary market.

You are right, that is exactly the point. Being a ham myself for 30 years, that is my feelings. Why fight something I wish they had done 30 years ago. The good ole boys at the frat house(ARRL) did a fine job of keeping out many by using the code to weed out the underlings. Some of us think ham radio ranks right up there with world hunger or a cure for cancer. The better informed of us do know this is not true. I will continue to enjoy my hobby of radio and use morse code and phone and it will be better than before.

If you will read my post again you will see that I said that *most* hams are
cordial to each other in their everyday QSOs. I would even give the opinion
that 99% of regular ham contacts are cordial. That's certainly better than
the general public, and vastly superior to rrap...

I think the test was probably *easier* in 1963, because the material was much easier. Today's memorization of a large amount of very technical questions is definitely not easy. But what does easy or hard have to do with the *quality* of a test? If the purpose of a test is to examine the applicant to see if he knows the test material, then today's tests do not do that. If the purpose of the test is just to be *hard* and require a lot of *effort* at memorization to pass, then it is no better than the Morse test...

CTCSS works fine on the VX-5R. The repeater I use has CTCSS access,
and I have no trouble accessing it with the VX-5R. The metal case is the
heatsink for the radio. If it gets too hot to handle, it is telling you to shut your
yap and let the other fellow talk for a while. You probably timed out the repeater
several minutes ago anyway.

Not necessarily. It may just mean that current models
are adequately addressing market demand. In other
words, there's no reason to bring out a new model if
the old model is still selling well.

>Is there anything, handheld, that will replace these
>two units? Anything at all in the pipeline??

Rumor has it that Motorola is returning to the ham
market. If so, we can expect a bulletproof radio which
doesn't try to be a DC to daylight noise box. I'd be
delighted with a new radio that had stout helical
filtering in the front end which would stop cold any
signal from outside the ham bands getting into the
radio.

Well, it's an interesting anthropological question! I think that this
is a reflection of a separate culture that's developed on (and near!)
the 11m band, and it's interesting to probe its origins. I suspect that
heavy voice processing is part of a generally rebellious posture taken
by the people who use it, and it also harks back to the use of
overdriven amplified Shure mics in the 70's. I think that this is
indicative of the existance of a distinct set of styles within each of
the hobby radio services when it comes to abiding by the letter of the
law. It seems to me that "Pirate Radio" is at one end of this
"legalistic" spectrum, and amateur radio is at the other end, with
"Freebanders" being closer to the "Pirate" end, and a majority of CBer's
being somewhere in the middle. This is not to say that hams are all
squeaky clean when it comes to sticking to the rules - it just means
that many of them are more defensive about making sure that people abide
by the laws of the land, particularly when it comes to spectral
incursion and operating procedure. It's difficult to place FRS on this
"legalism" scale, since it's usually used for a different mode of local

communication.

Any thoughts about this?

As I understand it the discount is equal to the amount paid for a VE session. This is most likely because of the fact that most upgrading hams paid that fee once in the past couple of months and will paying it again for paperwork submission only after April 15th. Thus it is really a rebate from the ARRL. Besides, what is so wrong with welcoming in and rewarding new or upgrading hams? It is this attitude that has probably driven away more new or possible hams than any cw test ever did. Think about it!

All I had to do in 1963 was pass a simple test I took after reading 16 pages
of study guide.

When I was in high school, I would not have considered a test that was drawn
from over 1000 questions to be "simple."

> Hey, while on this topic, will the ARRL please
> now admit that they put the pressure on at the FCC to publish

I was not active in ham radio, much less the ARRL, at the time.

Can you share with us the way you have determined what actions the ARRL took
at the time? Or is it a case of "it coulda' been that way, so it musta'
been?"

The exams of today certainly cover a LOT more scope, starting with the Novice exam (we don't even want to talk about the 4-page Novice study guide, do we?). The exams of today are certainly a lot more work, as evidenced by the sheer volume of the questions in the pool and the 1200 pages of study guide it takes to describe them, as compared to the 16 pages it took to describe the study guides in 1963.

But some people can look at the stack of 16 pages of old study guide on one hand and look at the 1200 pages of new study guide on the other hand and say with a straight face that the "new" exams are too easy.

1204. HAM BANDS PRAISE THE LORD!

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-14 00:00:00 UTC
From: Anon <anonymous@cotse.com>
Message-ID: <200004141959.PAA10880@cotse.com>
Source record: 114206

Ham Radio Brothers and Sisters in Christ:

1) Let us give thanks unto God for the Salvation he has sent
to Ham Radio! Soon the bands will ring with holiness
and every frequency shall proclaim Jeeesus as Lord!

2) For I have had a VISION while on the road to Dayton!
Yea, verily, brothers and sisters, I was traveling on the
Road to Dayton when suddenly, there was a great corona
glow from my 20 meter mobile whip, and it did nearly
blind me, and I did pull over and get out of the mobile,
and I did look upon the corona, and The Son of God
did shine from within it!

3) On his right stood Saint Hiram, holding the Holy Handbook,
and on his left stood Marconi and Morse,
Protectors of the Faith of old.

4) And the Lord spake unto me, saying:
"John, my good and faithful servant, know ye my
servant Riley? He is a powerful warrior in the faith.
Seek ye him. Then go forth unto all the bands,
preaching in my name.

5) And where thou dost encounter the heathen, rise ye up,
and call upon my servant Riley, and he shall call down
the holy Fire from Heaven, and they shall be consumed."

6) So Almighty GOD has called me to my duty, and
I come to you brothers and sister, to join my,
I mean our holy army, and go forth with our
OO brethren and slay the unbelievers, and smite
them from our holy bands, that you may be
seen as holy in my, I mean His eyes.

In the name of The Father, and Riley, and Me,

Amen and Amen.

Brother John KC3AU

(This ministry can only continue with your kind support.
Give as the spirit leads. Good in the callbook, Amen)

Agreed! That is the FCC's position, and responsibilty. Not yours or mine. All I was getting at is people spend their time compaining about what other people are doing, 'rather than enjoying themselves doing their hobby. Let's assume I (or you) have a license and the equipment to legally operate on HF. Can I (or you) operate on 27.650 etc. ? No. So why are we there? Not to talk, but to listen, get griped, and then to finish with bitching. To what end? Have you appointed yourself commisioner? cop? what can YOU do? little. send in a complaint? that's it.
I dislike hwy. litter, i do not think however that I will park on the interstate to see if people do it. Hell, I know they do it. Shall I chase them down? then what? get shot? or be arrested for harrasment? The police will tell me "mind your own, this is OUR business"

Just seems to me that too much time is spent bickering, chastising, and lowering others or ourselves, 'rather than promoting, enjoying, furthering our hobby. Why ask why? Why care? Do you think there is actually an answer to all questions? Why do CB'ers this? or that? Why do kids feel compelled to push pencils through speakers?

"Maybe folks like yourself
can turn your back and pretend it's none of your business,"
Not at all. Somethings are and should be out of my realm to handle, or to want to handle.

I think simply that you should do one or the other, enjoy, or police. Not both.
Bitch about taxes... Bitch about your pres. Bitch about the country going down the tubes. Bitch about alot of things that "SHOULD" concern you more than some CB'er freebanding.

Do you hunt down illegal aliens? (Border Patrol INS)
Chase theives? (Police, FBI etc)
Catch drug runners? (DEA)
Protect your Pres? (Secret Service)
Confiscate Guns? (BATF)
Check out commercial Trucks? (FHWA)
Airplanes? (FAA)
Dogs? (SPCA, Animal Control)
Flies? (Vector Control)
Beef? (USDA)

Radio (FCC)

See my point? probably not. You probably want to play cop, or bitch, or just make everyone else aware that you are aware that everyone else is worse than you. Better you than me.

This is what happens when hillbillies are allowed to dabble in French.
It's n'est ce pas.

But it is pronounced "nes pa". See the French put lots of letters in
that they don't need ("t" "ce" "s"). Take a look at what we would spell
as "or derv." In French it's hors d'oeuvres. A complication factor of 2.
Go figure.

But, they do know their comic geniuses...

A warning to whomever spun this irreverent but brilliantly satirical commentary. You've got talent but unfortunately after KC3AU reports you, there'll be no more ham radio for you but then again if you go CB there'll be hardly any perceivable difference. Amen.

1227. ARRL Hires Another Cronie (I'm loving this...)

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-14 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8d86i7efo1@nnrp1.deja.com>
Source record: 114229

Where to begin, where to begin.

Contester cronie. They already have him lined up to join YCCC I'm told.

Retiree who doesn't know when to quit. Sold a radio business ? Think of the connections there, friends. Must be a few units short of a picnic at SSA.

By the way, when ARRL uses phrases like "history making DXpedition" or "noted DXer" as they do here, I derive such joy. It just proves the fact that they're so out of touch with the real world, they need to note each other and write their own history. Kind of like feminists and homosexuals...

DXer. Yowser. Isn't this the organization that still worships Don Miller, convicted attempted murderer, while telling the FCC on hams who use BAD OR CONTROVERSIAL WORDS on 20 meters ? Why yes it is. A book by K1 Zootsuited Moron said what a great guy he is and it had a forward by K1 Zooming Zero (not the Toyota made one). Guess it's official, then. Of course, our friend N7NG isn't in jail, but there's hope for a Don if the parole board gives the nod.

++++++++++++++
Wayne Mills, N7NG, to Join ARRL HQ Staff

NEWINGTON, CT, Apr 14, 2000--ARRL Executive Vice President David Sumner, K1ZZ, has announced that noted DXer Wayne Mills, N7NG, will join the Headquarters staff as Membership Services Manager, effective May 2. He succeeds Bill Kennamer, K5NX, who retired from the League last month.

First licensed in 1953 at age 10, Mills has served as the Rocky Mountain Division DX Advisory Committee representative since 1996 and as chairman of the ARRL DXAC since March 1997. He also served on the DXCC 2000 Committee. He is best known for his operating on DXpeditions over the past 15 years, most recently from the Chesterfield Islands TX0DX DXpedition.

Mills holds BSEE and MSEE degrees from the University of California-Davis and just sold his two-way radio communication sales and service business in Jackson, Wyoming.

Now, Doc, those 5 dollar black and white books with the two tone covers
they offer all of us free on the 15th renewal notice and that
personalized Xerox from K1ZZ is enough to get any of us back.

I know I'm getting ready to torture myself this fall waiting for all the
notices to pile up, until one cool day, as the leaves gently fall to the
amber ground... they all go into the pail at once. I want to see if with
the increased numbers of "no thank you's" I'm hearing about, they panic
and begin offering books sooner.

But then again, the Board will have to vote on any changes in July over
roast beef...

You sir, are too kind.

But alas, I'm allergic to the virus that causes hepatitis, commonly
found in Dayton (per the ARRL M.O. web last year soon after the guts
were full and the tables folded up).

Good point .. VERY good point. Dave is not as frequent on "the most exciting frequency in amateur radio" as he once was, however.

What else would be interesting? Well Dave's complaint is that Vic won't let him check into The Great Liberty Net. This I'd like to see. Maybe let him check in one time. Just to see what he wants to say on the net.

"Friendlies" will be interested to know that Sid should be back on in a few weeks. "Netters" might not find the news all that interesting.

SEEMS like most keep overlooking the FACT that passage of the new
license gives user rights to operate the CW mode AND band spectrum -
THUS an excellent reason to PROVE ability somewhere above the Novice
minimum! For those so rabid and opposed AGAINST CW, either as a point in
testing OR operation, why not merely BAR them from operating CW in other
than current Novice-assigned CW bands/frequencies? Wouldn't be any skin
off their noses, since they hate CW anyhow, and gives all the "plus"
license holders that additional sense of pride and achievement THEIR
extra work/ability has accomplished...

I'm disappointed in you. After all the years' experience you have listening to one blowhard after another saying they can do this and they have that, when it turns out they couldn't blow their nose if their brains were dynamite.

This guy is just one more blowhard saying he has something or can do something that not only is suspect on its face but fits that same blueprint of blowhardism that you've heard or read for years.

Challenge him. Tell him to try and get over on me. I offer myself up as a test case. Have him make his calls. See where it gets him.

Here's your problem: you were *denied* a General class ticket because
you FAILED to meet the requirements. Failing to meet the requirements
was a choice YOU made. No one did anything to you. YOU elected to not do
the work need to meet the requirements.

> I look forward to April 15th when I can fill out a form,

Guys guys guys ... this is Brother John we are talking about here. Brother John, like Radiosigs, is a good spirited individual. Brother John brings good insights to the ham bands just like Radiosigs brings good insights to this n/g.

Now let's lay this aside before it gets outa hand. Don't want either of these fine individuals to be offended in any way.

I don't get on 313, but I listen there a lot. I sure miss the religious repartee' between Brother John and KC1ZQ. Radiosigs, see if you can get these 2 talking some more. It would be nice to hear them "go at it" in their gentlemanly demeanor again.

So who says anyone who holds a valid ticket cannot listen to the
so-called "freeband" (and I hate to break your bubble but there is no
freeband, all those frequencies are allocated to licensed services).
However I don't have to listen there to know they are there, I hear
their splatter boxes with the gain on everything they can find cranked
to the max, splattering all the way up into the 10 meter band. It seems
that CBers have this stupid notion that if they cannot hear someone
using a frequency it is "free" for their taking.

My story totally!
We used to have a large group that got together on weekends for beers(ok, maybe a lot of beer) and also one night during the week for the usual bunny hunt. For those that don't know what that is... It's when someone out our group(maybe 20 - 30 vehicles) would go hide anywhere with in the city limits and they would key up for 30 seconds and un-key for 2 minutes, while all of us would start spinning circles to find the signal. The winner usually got a case of beer...hmmm the good old days!
Now granted there were some... ok a few low life operators on there, but all in all it was good and fun.
Upper 37 was the place to be where there seemed to be an unwritten code of conduct, where there was the Tuesday night swap meet at 7pm and somebody always there to help when needed. What I found strange was the amount of HAM operators on Upper 37... although it was good for all the info, they helped me build my first antenna not to mention mic repairs and tower erecting.

I just had my CB in the pick-up from a 10 leave of it, but took it out as before because of all the skip bending my needle from the US.

CB for me was my learning zone, it taught me all the basics such as...
SWR, Antennas, Radio Conduct, Signal searching, Radio trouble shooting, grounding and drinking coffee(or beer) with a group that had the same interests.

Without CB I don't think I would have ever been interested in AR.

And yes, I had a license... and that didn't seem to make me better then the people who didn't after it was abolished.

Kim W5TIT <kw5tit@hotmail.com> wrote in message news:0B1015E24EB912CD.5F2950B892D249D1.131F7BFA42B9F6DE@lp.airnews.net...
| Since we're sharing :), I think the simple truth is that those who equate
| their thoughts about CB to that of some kind of lower form of life have
| truly not listened to CB in quite some time, and have certainly never
| listened to SSB. I began listening to CB as a youngster and began

talking
| on a CB in my teen years. That was my very first exposure to radio
as a
| hobby.
|
| I then bought my first CB several years ago, began using CB on a
regular
| basis, learned about ham radio via CB, took ham classes taught by
two
| CB/Hams and one non-CB Ham. Were it not for CB, I would not be in
the hobby
| of ham radio.
|
| The "AM" part of CB radio is pretty trashy; with either a flood of
signals
| or topics and language that no self-respecting person would involve
| themselves with. I didn't know a darn thing about SSB until one
night when
| a really thoughtful person (who was using SSB on the same channel
where my
| AM rig was at) was nice enough to switch modes and explain that the
| "buzzing" noise I was hearing was a whole bunch of people talking
on SSB.
| It was 2 days later when I bought my first AM/SSB CB.
|
| I have only a Tech+ license. I have only operated on 10M phone.
But, my
| experience in listening on all the other HF bands, and talking on
the Tech+
| portion of 10M, is that there is little difference between the two.
Before
| the critics keel over with heart attacks over that, consider that
CB is the
| one place where some of our most credible work for ham radio can be
| conducted. It is on CB that DFing conversations often take place;
it is on
| CB where we can do things that are not allowed on the ham bands,
due to the
| "pecuniary interest" restriction in the ham portion of the bands.
Maybe you
| don't consider that valuable, but I do.
|
| I think the unfavorable attitude towards CB radio and those who
enjoy it is
| more against the perception of a lower class of person in
general--it is
| generally thought that "anyone" on CB must be "one of those knuckle
| dragging, beer swilling" whatever you call 'ems. I'm here to tell
you I've
| heard those same kind of people on ham radio and they are just as

disgusting
| on ham radio as they are on CB.

1249. God and Riley Save Ham Radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-14 00:00:00 UTC
From: AllAmericn@webtv.net

What a tempest in a teapot. Riley Hollingsworth is providing his good offices, together with telephone number, to quell and mediate disputes. So why is it necessary for any of us to exacerbate trouble with inflammatory posts?

No one should want harm done another. Isn't solving our problems better than making the alleged bad in people worse? After all, most of us are at least over 13 (the age at which I got my license) and have some measure of maturity. Let's use it!

Bob Sherin, W4ASX

He's also using his post to stifle free speech.
Somehow, the FCC seems to think that when I signed the back
of my licence that I somehow waived my rights to discuss
ANY topic whatsoever over the ham radio airwaves.
Takling on topics NOT CONFINED to technical discussions
ARE NOT verbotin on ham radio. (ONLY exception being
the famous "seven dirty words") If I want to discuss
politics on ham radio that's MY business, NOT the FCC's.
Since when did THEY become the arbitators of the content of speech?

> pass has been ruled out as unjustifiable anymore by the FCC.

Whatever the reason, his claim that he was done some wrong lo these many years is baloney. The responsibility is his, no one elses. It's sour grapes, nothing more.

> Guess what, they don't teach sliderules anymore in tech
> schools and college. Guess those people are just dumbed
> down techs and engineers now.

Specious argument.

> >> I have a vanity call, it was my father's and he was a top notch cw

> >
> >That's not all he failed to teach you.
>
> Yes, just 24 hours until you can really piss and moan.

This isn't about me. It's about someone whining that he's OWED something because he ELECTED to not do the work for it.

> >> He would be delighted to see me get my new privileges!
> >
> >If you were my child, I'd be turning over in my grave, because you
> >would have been taught that something you get for nothing is no
> >privilege.
>
> Pure sour grapes.

Pure baloney. If you were my child I'd slap you up side the head for missing the entire point.

> If he were my child I'd say he recognized that progress
> leads to changes. YOU may not like those changes,
> but that's just the way it goes.

Yep, another point entirely missed. Whether I like them or not is irrelevant. His whining "poor me, I was denied" when it was HIS choice is the subject. Get back to me when you have something substantive to say on THAT subject.

I think you all need a life. Ham Radio is not the ends of the earth. Use what privileges you have and enjoy. Does it matter to you if you have a qso with a person that has a general, advance or extra? Does it make that much difference? It does not to me and when I talk to anyone on ham radio, be it on 440 mhz, 144 mhz, 50 mhz or HF I don't ask what class license you have. I really don't care. Just enjoying Ham Radio.

Hey butthead, you weren't denied anything! You just didn't qualify
by not passing the requirements. If you failed in school, which you
probably did, did you go to the school board and request a diploma
because you were denied one by not passing the requirements. Get a
life and hope you do enjoy your dumb down ham radio. Welcome to the
NEXT generation... What a bunch of looooooosers.

Vince Fiscus, KB7ADL wrote:

>There is a difference. Hams in 1963 probably cared more and they certainly
>had more intiative.

I see no evidence at all that the hams of today care any differently about ham radio than the hams of 1963. I see no evidence that they have less intiative -- to the contrary; they may have more. I studied those 16 pages to get all amateur privleges; hams today have to study over 1200 pages of study guide to get the same thing.

> After they got their licenses alot of them had to build their own equipment. If they couldn't
> build, they'd get surplus military gear and modify it, often making it work better than it had to
> start with. Hams with money could buy off the shelf.

I was 13 years old when I was licensed. I didn't build a darn thing to get on the air; I borrowed a transmitter from W1BNB, my Elmer. A few months later, I bought an old National HRO-5 receiver off the shelf for $50 from Hatry Electronics in Hartford. A few months later, I bought a used DX-20, then a used DX-100 for my General operation. The only building I did was at some point, I took apart the DX-100 and rebuilt it all on a wooden chassis; it did NOT work better as a result.

Sure, there were homebrew rigs about, but the majority of the stations I worked were using commerical gear. My other Novice friends, equally young and equally poor, had commercial gear, too.

What you describe may have been true in 1933, but not in 1963,

> When you have to work harder to be a part of something you care for it alot more.

Under that premise, the new hams care more about ham radio than those who only had to study 16 pages of study guide.

> In my opinion, the hams of the 1940's, 50's, and 60's with their innovation and
>experimentation advanced ham radio more than any of these modern day
>Techie-talking code haters will ever do.

The percentage of hams, even in the 40s and 50s, that were active experimenters who advanced the state of the art, has always been small. Most hams then did what hams do today; buy commerical equipment that builds

on experimental work done only by a few. For a recent example, what is the ratio of the number of hams who developed PSK-31 to the number that use it?

> Amsat is the only group moving amateur radio forward with new emission types and the utilization of
> microwave frequencies.

I don't know that AMSAT has developed any new emissions types. Phase IIId will indeed use microwave frequencies, a good thing. Perhaps you are talking about TAPR? Even in that case, the work they are doing on spread spectrum is based mainly on technologies that were first implemented seriously outside the Amateur Radio Service.

> The League says gaining more hams by removing some exam elements will advance ham radio,
> they said the same thing about the no-code tech which didn't advance a thing.

The only exam element that the League's proposal asked to remove was the 20 wpm code test.

As to the NCT, let's see, it only added a few hundred thousand hams to the ranks, many of whom chose to upgrade. It only increased VHF activity several fold. The advancements brought forth by the NCT are, on the whole, not much different than the advancements brought forth by the other classes of license.

> I'm not requesting electronic experts, I'm reguesting hams have good operating practices and procedure,
> and it's gotten to sound a whole lot like CB over the last 10 years.

Not in the parts of the bands I have listened to. There are a few "trouble" areas, and, although there were a few trouble areas in 1963, the conduct of <0.1% of those licensed does seem to be a bit worse than it was in 1963. Now, you seem to imply that this is because the testing process is not rigourous enough to have prevented these people from getting licenses. I offer that the slight worsening of the degree (not the amout) of misconduct on the ham bands is a result of decades of the lack of FCC enforcement.

> And don't cut yourself short Ed, what you had to do as a ham in the early days was tough.

It sure seemed so at the time, but when I look at that study guide with today's eyes, I see how easy that exam really was. When I look, with today's eyes, at that study guide and the scope and amount that new hams have to study to get the same priveleges I was given so easily, I begin to understand how dumfounded some of these folks must be when one of the old timers starts saying that all that work is "dumbed down" from the "really hard" work he had to do to study those 16 pages and get his General and all amateur priveleges.

Are we sure it isn't a case of having to walk 10 miles to school uphill both ways in our bare feet on ice with barbed wire on our feet for traction?

Hi all.

Just a reminder, there's just one day left on the ebay auction for a very special Drake R4-C. This unit is an interesting collectors item, having been an in-house engineering prototype at Drake.

Check it out at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=305449161

Thank you, and happy bidding.

Neil

True, but also remember that when ARRL proposed and later
got it's "Incentive Licencing" from the FCC, nearly 75%
of the USA based ham manufacturer's went out of business
in the following 2-Year period, and lost a full 40% of
their paying membership in the organization.

I know. I was *there* when it happened, and it does not
suprise me that the guy (callsign?) who was ARRL Pres.
at the time came up with this disaster from which the
hobby has >NEVER< recovered. (The ARRL President
at the time was also known as a red-nosed drunk,
along with some of the Board members. They nearly had
to CARRY him out of the 1966 or 67 Dayton hospitality
room... He was so LOADED with Seagrams and Old #7
that he couldn't walk more than 3 steps at a time
without falling on his face. All hail our fearless
leader! All hail Incentive Licencing! Pass me
another drink boy! -hic-hic-hic)

> Amsat is the only group moving

> HF in the early days.

Again true. But remember that AMSAT accounts for
0.8 percent of ham radio enthusiasts also. A drop
in the pond. This is a gem in the rough. If the AMSAT
boys could come up with a way to couple *wireless*
internet access with HamSats, THEN you would see some

interest in young people in ham radio.

Nahhh, it will not happen, too many folks want
stupid mores code and are bitchin and moaning
about April the 15th of 2000 or something.
Status-Quo, Same ole s--- different day.

> The ARRL has been talking bull out of both
> sides of its mouth and the whole thing has
> been a smoke screen money-grab, and it has
> suckered in alot of hams over the last year.

Not really, their membership stats are dropping
about 5% (or more) per year. The old standby
crowd is dying off. 15 per month to 1 new member
joining. This is what's called a revenue disaster.

All they're interested in is keeping their
ivory building well-covered in English Ivy
and those nice advertising revenue checks
rolling in the mail from the "Big-3"
Jap radio builders, and QST subscriptions.
Hope they have a big marble stone to plant
on Main Street in Newington in a Year or two...

> The League says it's moving ham radio
> forward, but I haven't seen any proposals. The League says
> gaining more hams by removing some exam elements will
> advance ham radio, they said the
> same thing about the no-code tech which didn't
> advance a thing.

Correct! And add to that as long as code is required for ANY
class of radio licence, you will never attract new
people. Code is about as relavant today
as buggy whips, horseshoes and dial-type telephones.
Come to think of it, much of ham radio is just as outmoded
too.

> Make it harder to be a ham and those that
> make it will certainly have the initative to
> move the service forward and protect it.

Yes, I am sure all EIGHT of the new hams will!

Guess what, you just >re-instituted< Incentive Licencing!

HOW the phuck does this keep re-appearing? It boggles my
mind why Hams are so addamant to think that making something
harder will somehow *increase* both quality and quantity. I don't
know about you, but between work, kids in college, time wasted
in commuting, weekend chores, soccer games for the
youngest etc etc I am lucky if I talk an hour-a-day on 2M

and this mostly while waiting in traffic on the Interstate.

Tell me, HOW is someone going to make time for code and
other arcane stuff to get an ham licence, when for FAR
LESS MONEY, they can pick up a Pentium-III computer
and be "Plug-and-Play" on the Internet with RealAudio
and a gazillion webpages and chatrooms to select from?

Finally, about 2 Meters.. HA HA HA!!

You can get a *pair* of Family Radio Service
UHF walkie-talkies from Motorola for about $120.00
No Licence. No learning code. No test. No problem.
Put 3 "AA" batteries in, and your on the air with 13 channels
and 32 PL tones to choose from. (MUCH cheaper than 2 Meter
rigs)

FACE IT GUYS HAM RADIO IS IN IT'S DEATH THROES. THE ARRL
KNOWS IT, AND SO DOES EVERYBODY ELSE. Hamfests are being
canceled all over, people AIN'T comming anymore. Dealers
AIN'T comming out anymore. It a non-stop ride down the
technological whirlpool of history. Used to be that
ham radio was UNIQUE. To talk to someone in Europe or
make a phone call from your car used to be something
new and interesting. Today, you can do all this on the
Internet and via cell phones and FRS radios.

FACE IT boys, ham radio IS as OBSOLETE as a vaccum tube
television set is in the Year 2000. Enjoy it for the
next 10 years at the most, before it's relagated to the
antique shelf display in a dusty corner at the Smithsonian.

And that, my friends, IS the real TRUTH.

> study guide to get the same thing.

HORSE-APPLES! All they need to do 2-day is pass a simple
test in which the question pool has already been printed.
If that ain't tossing softballs, then I don't know
what is. They don't even need Dick Bash's old study guides
anymore either. Hey, while on this topic, will the ARRL please
now admit that they put the pressure on at the FCC to publish
the question pools, just so that they could put Dick Bash
out of business and retain the market for study guides?

The ARRL is at it's root, a publishing company, and as such those
who are in the publishing industry tend to get a little "testy"
when someone (Dick Bash in this case..) takes away their
(ARRL's) market.

Heck, I can remember when the Bash Study Guides were the hottest commodity
at any hamfest from Coast to Coast. People were
having them Fed-Ex'd the minute they rolled off the press! They were hotter
and in more demand than "nose candy" would be
at any Hollywood Movie celebrity party, while ARRL study guides
collected dust on the shelf....

What is the REAL STORY concerning the "Bash Study
Guides vs ARRL" battle Ed? I am sure some of us would
like to read this juicy tidbit of ham radio history
just as much as we would the un-redacted Warren
Commission report.

:) :) :)

Yes I to had a CB once and a CB license to go with it.
Those who look down on CB are just the type of people
who want to revise history and clean up (in their opinion)
the dirty parts. Seems I remember reading something
like that in the book 1984 "Hey Winston we don't like
CB's anymore rewrite history and make them the bad guys
this time" :0

BTW most of you must live in a bad part of the country
the CB'ers in this area are a pretty good bunch of people,
of course there are a couple of bad apples but the county
jail has a few bad apples housed in it, and some of them
have "NEVER TALKED ON A CB IN THERE LIFE!"

Go figure?

Hello!

I want to present new software from DxSoft group
AAVoice - digital voice processor
http://www.dxsoft.com/miaavoice.htm

Digital voice processor for amateur radio operators. It use prepared
"wav"-files for transmition. Optionally you can use simple circuit for
PTT-control. It has a lot macros for tramsmitting. Can cooperate with
RZ4AG AALog logger.

Negativo. Bob Sherin was talking about my postings in which I wrote that I was offended by Brother" John's implied threat of turning me into Riley because of my postings which he skillfully turned into the negative to prevent me from posting that he would turn me in to Riley because of my postings.Regarding free speech,the 1934 Communications Act specifically states that the FCC will not suppress it but nowadays you can take that promise and line the bottom of your birdcage with it.It works this way:if a stink is to be made against someone for ulterior motives, the Commission can take anything said by that person, protected speech, and state that, although protected, it was against the best interests of the hobby/service thereby eliminating said individual. This is known as arbitrary justice based on capricious, contemptible, nonsensical evidence.My recommendation for ham radio in light of current events to prevent forfeiture of one's ticket is the same course any man can take to prevent AIDS.Sit on your butt and keep your mouth shut.

1274. ARRL attempts to keep public away from movie

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-14 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8d7k88$p7e$1@nnrp1.deja.com>
Source record: 114279

ARRL, in yet another attempt to be sure no one except relatives of current hams and friends of contesters become hams, is pushing for clubs

"to get free passes to a sneak preview of the film. A field publicity representative for the film's distributor, New Line Cinema, said that select clubs in the top 50 markets where early screenings are being held will be offered the opportunity to get passes to sneak preview during the week of April 24. Clubs contacted may also be asked about their promotional activities for the weekend of the movie's release. "

Instead of pushing for hams, terminally cheap as it is, to get in free, why is the ARRL once again rushing forward to cater to existing hams ? I thought the whole thing of this restructuring that they fought so hard to guide (sheah) was to get new hams ?

(of course, at this point, some ARRL know it all will say "oh no, the studio is pushing, not us", because they don't have a leg to stand on)

Then why aren't half the tickets or more going to schools, colleges, or technical schools ? Why, especially, aren't those people in the cities (black and hispanic) being approached to increase the numbers of these groups in ham radio ?

Wait. We all know. It's because if you're not a relative of a current ham or a friend of a contester or a relative, you're not REALLY wanted. Except as another slash mark in the total hams column at the FCC.

"Clubs are being urged to contact
their local theaters to inquire
when Frequency will show in
their area and about the
possibility of on-site promotion
on behalf of Amateur Radio. "

This ought to be fun as many hams can't keep their spurious signals out of a TV 2 blocks away, since most are running antiquated tube type CRAP.

1275. ICOM to give away ONE (count 'em) IC-746

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-14 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8d7l32$q72$1@nnrp1.deja.com>
Source record: 114280
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

Well, not only is ARRL guaranteeing free passes for clubs (screw the individual ham, and screw the schools and colleges where the new hams they want so badly [not] are found), but Icom is giving away ONE IC-746 to the club that does the best job of promoting ham radio.

What is it with the ARRL, that anything they stick their filthy hands in ends up being done through a club ? Any one want to wager on whether ARRL has aranged it so that rig will go to an ARRL affiliated club ? After all, if a club doesn't pay homage to ARRL, it's no good, is it ?

Have you ever been to a ham club meeting ? I know MANY of you have made comments to me over the years about what a nice CLEAN, NEAT group of men and WOMEN attend these meetings. There is never the faintest aroma of CIGARETTE SMOKE on any of their business suits. Which is amazing since so many arrive from their jobs as teachers, lawyers, doctors, and other office professionals. Of course, seating has never been an issue as these persons are never obese SLOBS, with their legs outstretched. I also know that many of you have remarked that you've never been in a room with so many POLITE, well-spoken, educated people in your entire lives.

People who would never waste their time bickering endlessly over whether to use voice or CW ID's or the code speed of the CW ID.

You figure out the title. We all said it. And the idiots still keep sending their 34 dollars in like addicts in a crack house. But now ARRL is bold enough to admit it publicly, since most hams are too stupid to not renew their subscription... er, "membership":

NEWINGTON, CT, Apr 12, 2000--Representatives
of the ARRL recently joined Amateur Radio
equipment manufacturers and publishers for the
second year in a row to share ideas and discuss
issues facing the ham radio industry. The session last
weekend, was organized by Amateur Electronic
Supply Manager Ray Grenier, K9KHW, and held at
the Wisconsin hunting lodge of AES owner Phil
Majerus.

Attending on behalf of the ARRL were ARRL
Executive Vice President Dave Sumner, K1ZZ;
ARRL Advertising Manager John Bee, N1GNV, and
ARRL Marketing Coordinator Bob Inderbitzen,
NQ1R.

Leading the discussions were Gordon West,
WB6NOA, of the Gordon West Radio School, and
Bob Heil, K9EID, of Heil Sound Limited.

Sumner said much of the talk centered on ways to
better support local efforts to attract new amateurs.
"As all politics is local, so is the case here," Sumner
said.

Politics ? You couldn't exist in the real world if you were on life support.

The high prices of ham radios are the result of this sort of collusion, not the result of high costs of design and production, as ARRL tries to sell us. Collusion between manufacturers, ARRL as the keeper of the advertising journal and vendors. Collusion which is the real, albeit indirect, reason the hobby will die from a lack of new hams.

Lower the IQ bar not the cost. If you were to lower the cost, you >>would<< end up with more hams (maybe)...

Just wondering where are all the apolgies due Dean Brown, AC5IU?
Remember, this is the guy that was "supposidly" nailed by the FCC for
jamming, and not using his call. And all you two bit hypocrits on here
that were jumping for joy. Show you are a man. You remember how dont
you?

FCC Amateur Radio Enforcement Log
Apr 10, 2000

ALBUQUERQUE, NM [UPDATE]: The FCC wrote Amateur Extra licensee Dean M.
Brown,
AC5IU, on April 4, 2000, advising him that it was rescinding a Warning
Notice
sent March 14 concerning operation on the 20-meter band. The FCC told
the ARRL
that additional evidence indicates that the licensee was not at fault
for the
alleged interference. The licensee was advised to disregard the Notice.

Does the FCC want hams to go to DeVry for two years?

I was trained as a meteorologist, and educated as a geographer and cartographer. I'm installing and programming automated hydro-meteorological sensors and data collection platforms, and programming the systems and sensors. They are powered with solar and lead acid batteries. They transmit to the GOES satellite at around 400 MHz. Kind of technical but not rocket science.

A few days ago I was a know-nothing Tech, according to my detractors. Soon I'll be the Extra you spoke of above.

Doubt it, Jeff. Here's what the ARRL said: "If our answers
sometimes seem to the initiated to be naive or incomplete,
rest assured that they are sufficient for the purpose."
That meaning seems pretty clear to me. No other material
required. Memorize the LM Q&A and you will pass the exam.
It worked exactly that way for me in 1951/1952 when you
were how old?

I would bet that all the people who are complaining about license restructuring are the same people who thought that the 3point shot in basketball would ruin the game, that installing running water and electricity into homes was luxury we didnt need, that color TV was a bad thing, that installing lights at Wrigley field would destroy baseball in Chicago, etc. Change is inevitable. Why cant the oldtime HAMS welcome the new HAMS and be glad for us?? When I was trying to decide if this was something I would really be intersted in, I posted questions on the newsgroups and i received many reponses such as....Get your ticket then come back and talk to us..... Buy the NOW YOU ARE TALKING book followed by,...(you probably wont be able to understand it), HAM radio requires a license and until you get one dont waste our time. Finally one HAM, not an oldtimer, offered some help and I was on my way. Now that I have my ticket, I am embarassed by the way the new HAMS are treated by some on the list. Anyway, Congratulations to all who upgraded and to all who are new to the hobby.

In my 1949 license manual ARRL said:
"The questions and answers in this booklet are designed to give you all the knowledge you need to answer correctly the actual examination questions. But it should be emphasized that the questions we list here are not the actual questions in the license examination, nor do they correspond question for question to similar examination items. What they are, however, are carefully prepared items designed to insure that you have the necessary knowledge to cope with the actual test queries."
[skip some]
"There may be several questions in the exact exam revolving around one simple discussion in this manual, but when you understand the subject you can readily check off the answers to any number of questions on it."

ARRL seems to encourage getting "knowledge" from the manual. It specifically says that the sample questions don't match the test, in fact one sample question may cover several test questions. How can that tacitly encourage no knowledge memorization...

Why is it when someone gets on their soap box, people call him a supremacist, nut case, babbling idiot, etc.

I think "Brother Lloyd" posted some good points.... I don't think this was the forum for them... but, none the less, provoking thoughts.

Well, first of all you have to differentiate among whom you are talking about. In the case of the author of the piece, David J. Smith, he is a supremacist, nut case, babbling idiot, etc. It has been well documented. He has been publishing this nonsense for years.

In the case of the poster, lloyd davies, he is a supremacist, nut case, babbling idiot, etc. That has also been well documented. He has been spamming the newsgroups with this nonsense for some time.

Come to think of it, as regards these two, you don't have to differentiate much at all, except one of them does have writing skills.

> I think "Brother Lloyd" posted some good points.... I don't think this
> was the forum for them... but, none the less, provoking thoughts.

Plain old spam. He hasn't posted anything with a positive contribution since he's been here. Check in some other of today's posts about how he claims to be a "fallen angel" while at the same time posting this rubbish.

Just a troll, nothing more. And not a very good one, either.

Hello everyone. I own a Kenwood TS-520 HF transceiver, and it has a tube-type final for it's transmitter. It's receive is solid state. My question is if I change bands (say from 10 meters to 15, 20, 40, etc.) do I have to re-tune the transmitter? I recently upgraded from Tech Plus to General, and want this info before I start transmitting with my new privileges. Also, do I need an antenna tuner if I use a G5RV Dipole antenna?
Thanks
Adam Lind, KB9JKE/AG

I certainly have nothing against John trying to put David on the right road to Damascus. In fact I applaud anyone who can distance David from his preoccupation with homosexuality and lesbianism and truly hope neither is a predilection or an occupation although to David they are obsessions. In person I found John to be a gentleman, his wife a lady and if they'd stop back again, both would be welcome. John has never insulted me or demeaned me in any way and when I was odds with him a few years ago it was because he had lost sight of whom was sincere and whom was rotten on .313 and went overboard trying to appease the rotten. I mean like that song, "Oh Herbie" wasn't exactly telling the truth about the lousy felon who was directly responsible for getting the whole mess started. But getting back to John vis a vis David, I don't believe anything can help the latter. Of course Fred Roll had the chance having met him in person however Fred took the high road whatever the hell that means. It must mean something to John who gave a three day sermon on that great adage which came from the mouth of Jan Harding in a sober moment. Oops, I mean a sombering moment.My apologies. The only real hope we hams have concerning David is to hope he restests twice more. The first one will downgrade him to Novice and the second to Vanished.

In any organization, Dan, responsibility for what happens within
that organization rests with the top man. An innocent person
was publicly branded a "jammer" before the whole world.
Mr. Hollingsworth is responsible for that error.

I don't say Mr. Hollingsworth should "lose his job" because
he failed to check a report from his subordinates.
Tossing a good man who's correct 99.9% of the time
because he's human and fallible is foolish.
If he and the many others who rushed to judgment in this matter
learn some extra patience and discretion, that's good enough---
except for this:

Tell me- Where does AC5IU go to get his good name back?

Think about it- Next time, it could be any one of us.

Thanx for the notice that others have reached out to him . He claims nobody ever tried to help him and I hold him in disdain. Convenient memory kicking in.
This much I know of personally:
One guy sent him a set of code practice tapes.
2 guys invited him to hang out at a hamfest.
1 guy invited him home after the hamfest.
1 guy lent him an antenna analyzer to adjust his ham-sticks.
5 guys invited him to hang out at a hamfest, then join them for supper that evening.

The thanks shown to this group? Things said in confidence were noised abroad in minute detail. Later comments were made regarding "those nasty Jews", when a member of the group who befriended him happens to be Jewish.

And now I get preached at about forgiveness, and my church is no good. Maybe so. Maybe I should find a church that promotes double standards and hypocrisy and back stabbing people who try to be your friends.

He's forgiven, no problem. But he shouldn't be sad that there is no more trust. He worked hard and deliberately to destroy that trust. We extended a red carpet. He tracked mud on it. So if there is no trust now, I wonder who is to blame.

We trusted him before. Now he's mad that we don't trust him. Sorry. Maybe this will teach him a valuable lesson. When someone is nice to you .. be nice to them. Or else risk losing a friendship you might want later. Is it rocket science?

Thanks again, Dan. Radiosigs .. what do you think?

Well, Folks, I have had to suffer through two REAL funerals in the last 12 months...this "phantom" one I will pass attending.

No, I didn't want to the the Code test changed as drastically as it was, but the biggest change was in the written nad the number of test questions in total. THERE is where Amateur Radio will suffer...in the lack of technical infrastructure.

Until the tests are reinforced and we restore some credibility to what was once a respected and even revered program, THERE will be the weak link of Amateur Radio. I don't care if there's only ONE class of license, if it has no credibility as a true determination of technical knowledge or skill, it's a paper tiger.

Yes you will need to retune it.

If the G5RV is actually working properly the SWR should be reasonable
on all the bands, with the exception of the WARC ones(which your rig
wont work anyway).

If you don't know, or are not sure, how to tune it up I'll be glad to
help. I have had one of those rigs before and still have a 530.

Congrats on ur upgrade and have fun!

About the only person who would be dissatisfied with this rig on HF is the dedicated HF contester, and that person would probably be buying a much more expensive unit. The radio performs just fine on HF.

> The 847 has no SWR meter, a cheesier tuning knob, not as good dsp, needs
> IF filters to do any better, has no tuner, and the two worst parts:
>
> Poorer receiver performance as per ARRL and also a noisy T/R relay.

I would prefer a separate VSWR meter. The tuning knob feels just fine to me (a matter of personal preference). No complaints about the DSP. Yes, IF filters can improve performance, but the radio does just fine without them. Nothing wrong with a separate tuner if you need one (many radios come like that).

And finally, I was not aware of poor receiver performance or a noisy T/R relay. Both seem just fine on my radio.

Poor John.

His elitist world just collapsed around him and he can't deal
with the loss.

Funny how some of us with pre-restructuring Extras feel
threatened by the presence of other hams who didn't have to go through
the same hazing ritual (20WPM cw) that we had to undergo, while others
of us (hopefully, the majority) welcome the new additions to our
numbers, isn't it?

From the perspective of a pre-restructuring Extra who _agrees_
with the changes that took place today--welcome to the Extra class (or
General class, of course)! I, for one, look forward to meeting you on
the air in the future!

Read between the lines, Jeff. The LMs said, "If our answers sometimes seem to the initiated to be naive or incomplete, rest assured that they are sufficient for the purpose." Translation: Rote-memorize everything in the license manual and you will pass the exam. Because of the existing political climate at the time, the ARRL couldn't afford such an utterance but their meaning was crystal clear to anyone with an IQ higher than his/her age. How old are you, Jeff?

Source record: 114081

Yes you will have to re-tune not just with band changes but also when you move up or down about 15 kc's or so, just a tweak. That G5RV is not a true multiband antenna most people think it is. You should look into using a multi-band homebrew. One coax feeds all 5 bands. The formula is pretty straight foreward it's in the antenna book.
As to your second post about "Nets". There are many, it depends on what you want to do. There are traffic nets that cover all of the US and some 3rd party countries. They can always use new people especially around the holidays.
Listen around and see what your interests are. There is a lot to be had in the Amateur Radio Service. You will meet people from all walks of life from all over the world. There are contest run from all over the world, they help with your operational skills plus they can be a good time. I run qrp when I contest, 3 1/2 watts output. The best contact I ever made qrp was running 750mw with an HW-7 to a ZL for 20 minutes. You know how hard that can be. I own an "amp" but never needed it. Good wire as high as you can get it is all you really need.
The 520 you have is a good radio. It will serve you well for years, I don't much care for the CW filter however. It should have been designed so it could "in or "out" not in all the time. It makes it hard to hear the weak ones.
Got to go. Have a "Dixie-Sixty" that needs to be worked on. Want to alter the audio a bit. Hey for the age of the set it is still in good shape, just don't care for that damned clamp tube.

If a person really knew the material on the Extra test, he should be able to find employment as (at least) and electronics technician. In most trade schools like DeVry, it takes from 1 to 2 years to bring a layman up to that level.

I'm saying that the average guy, who just want's to be a ham, would rather spend the week memorizing the test, than 2 years at DeVry...

Did you simply mail the credential back to the VEC or did you
include a letter specifically requesting that you be disaccredited?
Simply returning the credential may not do that. If you really want
to make sure you are disaccredited, mail your license back to
Gettysburg with a letter requesting that your amateur license be
cancelled. Once you can confirm that your amateur license has been
cancelled, you can relax because you are no longer qualified to serve
as VE and the VEC's accreditation will be moot.

Poor Doc. Ya gotta laugh up your sleeve at him....
Doc tried to foist himself as a cross between Groucho Marx and Walter Winchell...comedy and parody at its poorest.
Unfortunately, the only Marx brother that Doc seemed to best emulate was Carl Marx.
Doc, in all respect please stop deluding yourself that you were the main calling card on .313. Your calling card was pulled when Riley sent you his greetings. You were not "popular", Doc. You were more like "caustic".....

There is an old saying an old pastor friend told me, "What ever dog you feed the most, that's the one who will be the strongest"

meaning, that if you and LW would learn to forgive some of my mistakes and put them behind and quit being so damn hateful to me, maybe i would be a more reserved on here. You are to blame as well as me in this situation. maybe if you were more encouraging and instead of critical, maybe i would not have so hateful. Understand that, I , take repsonsibilty for my posts, your's and LW's disdain for me is the very opposite of what you 2 try to uphold. I have tried to be cival w/ you 2. Is there a probelm w/ having certain beliefs? I dont go around and make people think the way i do.

This is too bad for both of us. I on the first, have made a complete fool on here, but then people like you have done nothing to help me. Noone has ever wanted to try to help me, and none has offered ammends if i would try to "see the light" but then there are some folks, who operate the opposite of Christ, when he spoke about grudges and helping his neighbor when he is down. I admit to my mistakes and take repondsibity for them.

Greg,
Don't know anything about the MFJ power supplies, and
wouldn't bother with the Kenwood PS either (over priced).
CAll W5YUO and ask about his power supplies, probably the
best PS and deal around.
'Doc

Your welcome to your opinion. I for one would rather listen
to the wit-a-cisims and "woids" of AF2Y for a month of Sunday's
over hearing just another 5 Minutes of that anti-Semite asshole
and Ernst Zundel loving, Holocaust Revisionist espousing slimeball
felon - down in the U.S.V.I. comming thru the radio speaker...

There are still people who go to the trouble to learn the material. There are still people who try to memorize it all. The material is far more complex than any exam you ever took in amateur radio.

Sorry you took it that way. It was written to be funny. It had all the elements of humor: irony, pun, play on words, metaphor... I laughed my butt off every time I reread it. Didn't you even like the part about French comic geniuses?

> Up yours.

Sorry, I don't go that way.

Without the ARRL there would be no amateur radio and the informed know that it's more than a magazine. With the buying and selling of spectrum, without the ARRL who would defend the amateur bands. I'll answer - no one. If you don't want to join fine, the rest of the ARRL members will keep supporting you and your hobby.

You need to follow you OWN advice, stupid, like the other day you
erroneously
told W4FQF I received a "warning letter" on the air, making sure you
left out the fact that another ham received one also.
There is no mention of "warning notice" on the letter, so stick to car
mechanics, at least it's something you know about, you dumbass.

==========Begin Letter===============

March 29, 2000

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. Steven A. Tunder
72643 Glasgow Road
Freeport, OH 43973
Licensee of N8WGM

Roger L. Wiseman
610 Glen Haven Avenue
Glendale, WV 26038-1302
Licensee of KC8JBO

Dear Messrs. Tunder and Wiseman:

The Commission has been made aware of an ongoing personal dispute
between you, and there have been allegations of interference or jamming
on the Twenty-Meter Band.

The purpose of this letter is to caution you both to review Section
97.1 of the Amateur Radio Service Rules, and to make certain that
whatever disputes that may exist are not carried over to Amateur Radio
frequencies.

Please call me at 717-338-2502 if you have any questions about this
matter.

Sincerely,

W. Riley Hollingsworth
Special Counsel, Amateur Radio
Enforcement Bureau
==========End Letter==========

Go back to pretending that you were dead, meat-head.

Dear Newswatch Magazine Listeners/Readers:

There has been a dramatic rise among the general population concerning the abuse of presidential and congressional power to deliver America into an all-powerful world government under the United Nations.

Many citizens are now becoming aware that a Marxist organization founded in 1919 and incorporated in 1921 have now taken over ALL key positions of power in the United States Federal Government. That organization is called the Council on Foreign Relations. Former President George Bush belonged to it and was on its Board of Directors in 1978-79. He resigned to run for Vice-President. He was also a member of Globalist David Rockefeller's Trilateral Commission. He also resigned from its Board of Directors to run for Vice-President. George Bush also was a member of Yale Universities Skull and Bones, which is also working through infiltration into corridors of power for world government. His son, Governor George W. Bush, is also a Bonesman.

Current President Bill Clinton is still a member of BOTH the Council on Foreign Relations and the Trilateral Commission. Most Cabinet members of any significance for the last 50 years have been members of the Council on Foreign Relations. This is WHY our government - on the federal level - continues its downward spiral toward Socialism/Communism and Corporate Globalism WITHOUT WE, THE PEOPLE'S CONSENT.

The Constitution of the United States derives its power FROM the consent of the governed. The Socialist/Communist that have taken over Washington, DC, NEVER ask for nor do they want CONSENT for their treasonous activities.

Example: W. Cleon Skousen, former Assistant to FBI Director J. Edgar Hoover, discovered 45 objectives the Communists were striving to achieve to overthrow America for world government. When you understand these objectives, then you will comprehend WHY the militia began to rise to protect the country from tyranny [because of the Ruby Ridge, WACO, and Oklahoma City episodes], WHY The Republic of Texas movement started for Texas to become an independent nation, WHY Arizona has drafted legislation to secede from the Union if Martial Law is called or the Federal Government begins to confiscate guns in violation of the 2nd Amendment, and WHY the Southern Party has risen to take the South back into one political camp to preserve their Southern "Bible Belt" heritage!

Out of the 45 objectives listed in the Congressional Record, I will mention only a few:

11) Promote the United Nations as the only hope for mankind. If its charter is rewritten, demand that it be set up as a one-world-government with its own independent armed forces. [Guess who would control the armed forces? By agreement between Russia and the U.S. Secretary of State, it would ALWAYS be a

Communist - which has held true to this moment. No wonder Senator Jesse Helms from North Carolina went to the Security Council on January 20, 2000, and basically said back off or the U.S. will withdraw.]

12) Resist any attempt to outlaw the Communist party.

13) Do away with loyalty oaths.

14) Capture one OR both political parties. President Bush was a Republican while President Clinton is a Democrat.

15) Use technical decisions of the courts to WEAKEN basic American institutions by claiming their activities violate civil rights.

16) Get control of schools. Use them to foster socialism and current Communist propaganda. Get control of teacher's associations - such as the National Educational Association [NEA].

17) Infiltrate the press and gain control of ALL major means of communication - such as radio, TV, and motion pictures. Use these agencies to destroy the morals of the nation.

18) Continue discrediting American, especially Southern "Bible Belt," culture, by degrading ALL forms of artistic expression - nude movies, books, perverted art, etc.

19) Eliminate all laws governing obscenity by calling them "censorship" and a violation of free speech and free press.

20) BREAK DOWN cultural standards of morality by promoting pornography in books, magazines, motion pictures, and TV.

21) Present homosexuality, degeneracy, and promiscuity as "healthy, natural, normal."

22) Infiltrate the churches and replace REVEALED BIBLICAL RELIGION WITH "SOCIAL" RELIGION. DISCREDIT THE BIBLE and emphasize the need for intellectual maturity which does not need a "religious crutch."

23) Eliminate prayer or ANY phase of religious expressions from the schools.

24) DISCREDIT THE AMERICAN CONSTITUTION BY CALLING IT INADEQUATE - OUT OF STEP.

25) Discredit the American founding fathers.

26) Belittle all forms of American culture and DISCOURAGE the teaching of American history to eliminate knowledge of our God given heritage.

27) Support ALL socialist movement to give CENTRALIZED CONTROL over any part of the culture - education, social agencies such as housing, welfare programs, mental health clinics, the Federal Government in Washington, DC.

28) Infiltrate and gain control of big business. Create a monopoly in the market place for favored businesses they control.

29) Discredit the family as an institution. Encourage promiscuity and easy divorce to break down society.

Now do we begin to understand WHAT has happened to our culture in the last 50 years? No wonder the spotlight has been placed on the corruption of our federal representatives and senators who are selling our birthright inheritance down the socialistic path into oblivion!

Sincerely,

David J. Smith

Oh, great. More blacks and hispanics are just what we need to drive the final nails into ham radio's coffin. You HAVE to be kidding! Do you REALLY want the airwaves to become the RF equivalent of Haiti?

"Brother" Lloyd,
Do you really want to sound like a 'nut-case'? I hope
so, your doing a fair job of it with this stuff. If you
want to convince me of anything, don't quote an editorial
with out substantiation, otherwise, it's just an opinion.
How do YOU differentiate between 'conspiracy' and a bad case
of 'paranoia'?
'Doc

>Without the ARRL there would be no amateur radio

In the whole world? Pretty powerful organization...

>With the buying and selling of spectrum, without
>the ARRL who would defend the amateur bands.

Who would write the world's most popular software
without Microsoft? Answer: someone else.

ARRL has pretty much of a monopoly. Other organizations have tried to compete over the years, but just couldn't make it. If ARRL were to somehow suddenly disappear, I'm sure there would be others rushing in to fill the vacuum...

I hope you didn't injure your brain, Attorney Sohl.

"every contract, combination in the form of trust or
otherwise, or conspiracy, in restraint
of trade or commerce among the
several States, or with foreign
nations."

A meeting of a "non profit" publishing house, which sends countless, annoying proposals to the FCC, ever aimed at increasing the number of amateurs.

A group joined by foreign manufacturers, who without policies aimed at lowering standards to try to get new hams, can threaten not to adevertise.

A group of foreign manufacturers who drove all but one company out of business, that exist in two different countries, have two different economies and wage systems, yet arrive at nearly identical prices for all radios small, medium and large with the one remaining US company.

A group of 4 or 5 companies that, no matter what the initial features, have identical entry level radio prices, once apples are compared to apples.

And all this occurs under the supervision of one of two major chain stores.

If you retort that's competition, you'll have failed. That occurs without group meetings of iron triangles.

And your dual PhD in Economics and Legal Philosophy is from where ?
Universite du ROTFLMAO ?

Sorry, the ARRL CEU pogram, I forgot.

>

You go to make a big mistake, unless you don't care about HF anymore.
The 847 has no SWR meter, a cheesier tuning knob, not as good dsp, needs
IF filters to do any better, has no tuner, and the two worst parts:

Poorer receiver performance as per ARRL and also a noisy T/R relay.

[Enter Chip Margelli threatening to "forward this to counsel" like the
last time]

http://www.en.com/users/rayd/ft-847/wwwboard/wwwboard.html

Of course, he is a patron of the alternative lifestyle, according to his
other pages, so if that sort of thing bothers you, don't bother going.

Ironically, he's also a bit of a Nazi when it comes to free speech,
letting people know he doesn't want anything negative about radios on
there.

Do as I say not as I do (not that I'd want to).

Like so many amateurs.

Not even close. God is not mocked. In this case, even Brother John is not mocked.

Good dialect, though. Add in a little bogus tongues-speaking and you could do a real number on Robert Tilton. And you could even post his toll free number for all the donors to call in a generous pledge to keep the yacht in tip-top shape.

Meantime, be nice to Brother John. He has good friends in high places. And I don't refer to Mr. Hollingsworth.

From: n9ejs@frontiernet.net
Message-ID: <8d8je6$rt9$1@nnrp1.deja.com>
Source record: 114168

All of sudden my HTX-202 speaker/mic doesn't key the HTX-202. It was working great before that. I've checked continuity from the tip of the mic plug up through the PTT switch, on over to the mic itself, and it looks o.k.
I transferred the spkr/mic to another HTX-202 and it doesn't key that one either, so apparently it's a problem within the spkr/mic. Can some one please help?

73 George, N9EJS

P.S.: The internal mic in the HTX-202 itself works o.k.

Cleaner and Greener Cars at
http://www.earthday.net/action/greencar.stm
****
Dear Friends:

The signs of auto pollution are everywhere -- we all know that the Los Angeles skyline looks like a bad case of ring-around-the-collar. Even worse, more of America is following LA's dubious lead. Houston just surpassed Los Angeles as the smoggiest place in the U.S.

Not only is smog ugly, it's got some nasty side affects as well. All those noxious chemicals are destroying our:

*Air
*Water
*Health

AND emptying our wallets every time we stop for a fill up.

We deserve to live in a world where we can see what's on the horizon! It seems the automakers are having a hard time seeing the future of auto technology through all that smog.

The technology exists TODAY to produce cars that can help clean up our environment, and save us cash at the pump, but they won't produce them unless we ask for them!

So visit Earth Day Network today, and give American automakers a new direction. Tell them to produce cleaner, greener cars for the future of our environment.

Send your FREE postcard today for the environment!

http://www.earthday.net/action/greencar.stm

Please help this campaign by forwarding this message to anyone you know: friends, family, colleagues -- concerned about environmental issues. Don't forget your mom, your dad, your brothers and sisters, your college buddies, your coworkers, and your favorite car buff! Thanks!

While you're at it, enter to win a Toyota Prius - a clean, green car. Enter at

Ten-TEC, etc? Oh, not the manufacturers at all.
Well how about the distributors besides AES?

>A meeting of a "non profit" publishing house, which sends countless,
>annoying proposals to the FCC, ever aimed at increasing the number of
>amateurs.

So tell us. Exactly what went on there that
violates the law? You have the agenda?
The minutes, a tape recording?

>A group joined by foreign manufacturers, who without policies aimed at
>lowering standards to try to get new hams, can threaten not to
>adevertise.

Speculating some more I see.

>A group of foreign manufacturers who drove all but one company out of
>business, that exist in two different countries, have two different
>economies and wage systems, yet arrive at nearly identical prices for
>all radios small, medium and large with the one remaining US company.

Still speculating I see.

>A group of 4 or 5 companies that, no matter what the initial features,
>have identical entry level radio prices, once apples are compared to
>apples.

More speculation.

>And all this occurs under the supervision of one of two major chain
>stores.

Still more.

>If you retort that's competition, you'll have failed. That occurs
>without group meetings of iron triangles.

When did group meetings get banned?

>And your dual PhD in Economics and Legal Philosophy is from where ?
>Universite du ROTFLMAO ?

Well your "speculation" is just that, speculation.
Last I heard, the feds still required evidence of
Sherman Act violations, not speculation and
spin based on "oh my, they shouldn't ever be
talking to each other".

Cheers,
Bill K2UNK

1408. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 2000-04-15 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8d8qmr$628$1@news.hawaii.edu>
Source record: 114179
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the

group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

n0vfp@aol.comnospam (Lloyd) wrote:

> Would you learn to keep your stupid comments to yourself for once.

So what you are saying is, "it's okay for you (lloyd) to mouth off and make comments about other people's posts, but it's not okay for anyone else to make comments about yours." Is that it? Well, don't hold your breath. You are about to become my hobby.

> What in the hell have i ever done to piss you off?

Wow, where to start!?!

Well, for openers there's your spamming with conspiracy theory, new world order, militia, rapture, and other nonsensical trash on this newsgroup. It's offensive in its message, it's inappropriate in this venue, and you don't even do the courtesy of citing the source of the material.

Then there's your proselytizing about so-called Christian beliefs and ideals while at the same time spewing your agenda of hate and anti-semitism.

Of course, we can't forget your post in January where you said you were done with all that because you didn't want people making fun of you, but within twenty minutes you were back at it.

How about your "south will rise again" crap that you posted last summer? Those of us who believe in America find that offensive, particularly from someone born and raised in the north.

Then we have your "I know what's going on" posts such as "I know for a fact he's (WB2OTK) getting a NAL." Which, of course, never happened. We've "marked your words" so many times you've practically overtaken RG8 stair in unfulfilled prophecies.

You consistently, without fail, pick losers to deify and celebrate. Contrary to what you may think, it doesn't take someone with some intelligence more than a week (less if one feels like dredging through a lot of Deja files) to figure out who the stand-up folks are and who the losers are in this newsgroup.

You pretend to be some sort of player, some experienced guru, some knoweledgable veteran of life, and you can't even walk the walk. You can hardly put two sentences together without mangling the words (congratulations; you almost did it above except for capitalizing "I").

That's all stuff that's offensive and maddening to the great majority of normal people who make up most of the population. Hey, don't take my word for it; don't forget you were voted the "Number One Idjit" in Big Guy One's Idjit List Poll by members of this newsgroup (you probably thought it was a compliment when he changed it to "Rocket Scientist List").

Now here's the personal stuff:

On at least three different ocassions I set aside my dislike for you and what you espouse, and offered you some kind words and sound advice on how to deal with certain situations and to explain why you get some of the responses you do.

For that effort, I received zero, nada, zip, goose egg, zilch response from you. No thanks, no "kiss my ass," no by-your-leave. No acknowledgement that you would implement changes, discard suggestions, reconsider positions, nothing.

When I asked you to document some claim you made, you harshly told me you didn't need to tell me anything, and that at a time when you didn't even know me, and at the same time as you were attempting to badger someone else into publishing details of their personal life that were clearly none of your or our business.

You told me you were "going to expose me for the fool that I am on the newsgroup" when you had neither the resources nor the evidence nor an eligible candidate for any such thing.

You accused me of poor internet behavior, and when I pointed out the error in your assertion, you failed to acknowledge your shortcoming or even respond in any way.

But, you haven't pissed me off. You don't have the resources to do that. All you've done is provide a cornucopia of opportunity to tweak you, bait you, expose you, manipulate you, and generally hold you up to the contempt you have earned in the year I've seen your act.

It's easy, it's fun, it beats playing shuffleboard as I relax in the Florida sun basking in retirement. I don't think you realize how overmatched you are. So just keep posting your juvenile troll spam, and be prepared to be skewered each time within a few hours. Unless you want to make some changes. The choice is yours.

Well, I for one did wait for the restructuring of the licensees at the suggestion of the entire VE team in my local area. I don't take offense to being called a "welfare general" I just take pity on a poor soul that feels he has to blast the rest of us and not have the balls to post his name or call. I sign mine willingly.

Wayne Mikel KE6DJE (Welfare General to be)

John wrote in message <38f90012.31044132@news.mindspring.com>...

Hi Cecil -
Domesticated animals do not need to hunt their natural enemies to survive because they are fed by their owners. Thus pet house cats can be taught to live in peace with pet mice. In a similar manner civilized men (and women) can live in peace without resorting to clubbing each other over the head in order to achieve the control formerly required for survival.
Dogs will fetch, cats will attack strings, monkies will play...all using energy for no real purpose other than to exercise their bodies in preparation for uses that might no longer be necessary for their survival...but are amusing to the humans who observe them...and encourage such behavior.
Hobbies, like fox hunting, are remnants of the past for those who don't need to hunt for food in order to survive in the 21st century. Like the pet pussy-cats, we have all become somewhat domesticated, although we still can harbor some of our ancestral primative urges, which are no longer needed for our survival.
Yep we are supposed to be civilized now-a-days but there will always be some of us who cling to the primative urges of our primative ancestors and follow relatively unnecessary hobbies like outdoor barbequing, living in tents, using out-houses, gun collecting...and ham radio.
As for death wishes... I admit that they can exist in some people...but most people seem to be programmed for survival at all costs. If everyone who had a "death wish" did himself in, we would not be here today to discuss anything.

Hams need MORE license classes,

> a bed in the grass.

Hi Cecil -
The physical rituals of animals can be tactical. Cats never take
the shortest direct path to a destination when they stalk because their
prey and their enemies must be fooled by their unexpected approach.
They also circle their beds before retiring. They also circle their
litter boxes when time permits.

Then why do dogs bark at a full moon? Do they sense something that we
can't understand or it it just a hobby with them...like hams who are
expecting to bounce their signals off the moon?

Why do cats wag their tails when they are angry and dogs wag their
tails when they are happy? What would people do if they had tails?
Some might use them to send signals if they didn't have an ISP.

Ham Radio Brothers and Sisters in Christ:
Let us give thanks unto God for the Salvation he has sent
to Ham Radio! Soon the bands will ring with holiness
and every frequency shall proclaim Jesus as Lord!
For I have had a VISION while on the road to Dayton!
Yea, verily, brothers and sisters, for I was travelling on the
Road to Dayton when suddenly, there was a great corona
glow from my 20 meter mobile whip, and it did nearly
blind me, and I did pull over and get out of the mobile,
and I did look upon the corona, and The Son of God
did shine from within it! On his right stood
Hiram Maxim, holding the Holy Handbook, and
on his left stood Marconi and Morse, Protectors of
the Faith of old. And the Lord spake unto me, saying:
"John, my good and faithful servent, know ye my
servent Riley? He is a powerful warrior in the faith.
Seek ye him. Then go forth unto all the bands,
preaching in my name. And where thou dost encounter
the heathen, rise ye up, and call upon my servent Riley,
and he shall call down the holy Fire from Heaven, and
they shall be consumed. Now go forth!"
So Almight GOD has called me to my duty, and
I come to you brothers and sister, to join my,
I mean our holy army, and go forth with our
OO brethren and slay the unbelievers, and smite
them from our holy bands, that you may be
seen as holy in my, I mean His eyes.

Amen and Amen.

Brother John, KC3AU

(This ministry can only continue with your kind donations.
Give as the spirit leads. Good in the callbook, Amen)

the English version does not, but then again, it hasn't been updated
since 1996 and there have been changes to the license classes

Next time you talk to a JA who has knowledge, ask his/her. The rules
were updated in late 1996/early 1997. It has to do with the fact that
having no code, they are not in compliance with the various treaties.

It was a hot topic at last years DX dinner at Dayton, which several
members of the JARL attended. It is from them that the information was
gathered. It is common knowledge amongst the Japanese that Class 4
licenses are essentially their form of CB.

Several years ago it was addressed in the JARL newsletter

That's the first time I've mentioned DeSoto's book. I usually quote
from early issues of QST. They're all available on CD now.

That book was written by someone who had lived through that era and
had first-hand access to all available records. You yourself can
peruse the early issues of QST to read the press releases regarding
the minute-by-minute accounts of what took place at each of the
international conferences. You can also go to a research library
containing government documents and read the minutes from each
and every international radio conference. Our U.H. library contains
such a government depository. A goldmine for the amateur historian.

>Whatever you do, don't tell him about the other books that are out
>there. You don't want to upset him.

Please, tell me any other titles you might know of on amateur radio
history. I'm only aware of about a half dozen books devoted exclusively
to amateur history. Dozens of other book on general radio history don't
don't contain specific details pertaining to amateurs.

Awaiting your list of books,
Jeff KH6O+

And I see "radiosigs's," or AF2Y's, _ENDLESS_ attacks on restructuring as...

1. An attempt to get attention for AF2Y.
2. An attempt to belittle others to make AF2Y feel superior.
3. An attempt to ignore the ligitimate arguments of others.
4. An attempt to avoid any ligitimate discussion on this subject.
5. An attempt to spread discontent in the ham radio community.

You've posted many threads on this subject, AF2Y. And, whenever the argument in any one of those threads goes against you, you avoid those arguments by posting still other threads.

For example, the issues you raise in this thread have already been addressed in other threads you've posted (and posted to). And myself, and many others, have already responded to those issues. But, instead of accepting those responses (which you did not agree with), here you are posting still another thread with the exact same issues.

In other words, you have no desire for an honest debate to a logical conclusion. Instead, you seek satisfaction by fanning the flames of discontent with endless tirads.

I hope others in the ham radio community will eventually wise up and ignore your endless garbage. That is certainly what I intend to do.

Yes, and that was my comment. I said that these old timers who go on and on about the new folks not knowing a damn thing and see the current exams as easy have 30 years of reading QST and experience to base that judgement on. Of course, when they were new...

Not so much of a loss. I'm just making my little Pinnochio dance for us.

Maybe, but you seem to be ever at the ready to disattribute relatively simultaneous discovery and invention in the old land line telegraphy history.

W4CSC, no, federal court isn't first. Before doing that, you have to exhaust the other remedies:

1. Communicate directly with Riley by telephone or letter.

2. Ask for a public retraction.

3. Bring the appropriate agency action(s).

There is no guesswork or speculation about it. Another instance:
Due to the ARRL's lobbying work in Congress demanding that amateurs
be allowed back on the air after WWI, House Joint Resolution
Number 217 was passed ordering the "Secretary of the Navy to remove
the restrictions on the use and operation of amateur radio stations
throughout the United States..." Without that joint resolution,
the Navy would have remained in control of the RF spectrum.
See pages 27 and 28 in "Fifty Years of ARRL."

Ham Radio Brothers and Sisters in Christ:
Let us give thanks unto God for the Salvation he has sent
to Ham Radio! Soon the bands will ring with holiness
and every frequency shall proclaim Jesus as Lord!
For I have had a VISION while on the road to Dayton!
Yea, verily, brothers and sisters, for I was travelling on the
Road to Dayton when suddenly, there was a great corona
glow from my 20 meter mobile whip, and it did nearly
blind me, and I did pull over and get out of the mobile,
and I did look upon the corona, and The Son of God
did shine from within it! On his right stood Saint
Hiram, holding the Holy Handbook, and
on his left stood Marconi and Morse, Protectors of
the Faith of old. And the Lord spake unto me, saying:
"John, my good and faithful servent, know ye my
servent Riley? He is a powerful warrior in the faith.
Seek ye him. Then go forth unto all the bands,
preaching in my name. And where thou dost encounter
the heathen, rise ye up, and call upon my servent Riley,
and he shall call down the holy Fire from Heaven, and
they shall be consumed. Now go forth!"
So Almighty GOD has called me to my duty, and
I come to you brothers and sister, to join my,
I mean our holy army, and go forth with our
OO brethren and slay the unbelievers, and smite
them from our holy bands, that you may be
seen as holy in my, I mean His eyes.

In the name of The Father, and Riley, and Me,

Amen and Amen.

Brother John, KC3AU

(This ministry can only continue with your kind support.
Give as the spirit leads. Good in the callbook, Amen)

Ham radio will prosper because of all the new users..... After reading all these posts about ham radio being ruined because more people are going to enjoy this hobby, I still have not seen any proof as to how the new licensees are going to hurt the hobby. Just because they may not be able to.. or maybe because they choose not to learn some dits and dahs at speed that is acceptable to a few... Does that mean they dont have anything to offer Ham radio??? Ham radio will be around a lot longer than those few who can do code at 20+ wpm..... This stupid argument will pass and we will all enjoy the hobby... Those who are giving up their AARL memberships and whatever else they are giving up are hurting themselves because the new members will pick up the slack. Maybe the oldies will then owe us newbies..... :)

Hi,

I just recently got into amateur radio. I currently own a Kenwood TH-22AT handheld 2 meter. A friend of mine and I are trying to rig our Kenwood's up so that we can use them to talk to each other on motorcycle road trips.

We tried buying the Kenwood headset with VOX but that worked horribly. All kinds of wind noise even though we have full face helmets and wind shields.

I've heard that earmics work great for noisy conditions, but I'm having trouble finding suppliers. Anyone know where I can get a decent quality earmic with PTT suitable for mounting on a motorcycle handlebar? So far I've found Cavcom (www.cavcominc.com). They're apparently one of the best earmic companies but their cheapest system costs like $600. Ouch! Plus the PTT does not look suitable for mounting on a motorcycle. So I'm looking for something a bit cheaper.

I'm also interested in any other products that are suited to motorcycle riding (throat mics, etc.).

Thanks,
Jeff Wilson

This is but one piece of a part of our history we have yet to come to grips with: the reality is that we came a whole lot closer to marching in straight lines and saluting Fearless Leader in the name of anti-Bolshevism than anyone cares to admit.

Source record: 113935

There was once a medical student specializing in pathology who truly wanted to excel in his studies. Without fail, he would daily visit the school's path lab following his classes to do extra work. One evening he uncovered a cadaver only to notice a cork plugging it's rectum. Curious, he removed the cork only to hear, "CQ contest , I just can't wait to call CQ contest ..." Startled, he replaced the cork.

Curiosity soon got the best of him and he once again removed the cork. Again he heard the tune, "CQ contest , I just can't wait to call CQ contest ..." He could stand it no more. He replaced the cork, covered the cadaver and raced upstairs to his professor's office. He persuaded the man to Accompany him back to the lab. Once there, the student again uncovered the cadaver and displayed the corked rectum.

The professor looked unfazed. When the student removed the cork, the same soundemanated, "CQ contest , I just..." The professor looked bored and started to walk away. The student was aghast at this
casual response. He said to the professor, "Don't you find this amazing?" The professor replied, "Not really, almost any asshole can call "CQ Contest"

Source record: 113945

I seek INTELLIGENT replies only. If you're a half wit or no wit, go respond to someone else because this posting is serious-no Groucho or Winchell.

I see restructuring doing this:
1. Inflating numbers to impress the ITU
2. Easing the FCC's clerical and statistical work
3. Acting as a "cash cow" for the ARRL
4. Acting as a "cash cow" for ham equipment retailers
5. Creating considerably more work for Riley Hollingsworth necessitating a substantial raise which if not given will put him squarely back into law instead of policing

I see no tangible benefit to ham radio per se insofar as bettering, refining, upgrading and making it more acceptable to and appreciated by the public at large. I see nothing which will help establish a clearer perception of it and a definite distinction recognized by the public between it and CB.

If I'm wrong, tell me about it.
AF2Y

I am hoping someone can help me with this problem. I am trying to program the alphanumeric memory names into this radio. I have followed the manuals instructions exactly and the radio will not do what it is supposed to. This is the way I have been doing it, as the manual says:

1. Put radio in memory recall mode
2. Select desired channel
3. Switch OFF power
4. Hold MN button and Power button simultaneously to turn back ON

At this point the radio is supposed to display a blinking digit in the first numeric position, and there are instructions to program this position and advance to the next one, but instead, the radio powers up to regular memory mode and displays only the frequency and channel # as it did before turning power off. I have a valid frequency programmed here, so that is not the problem. It's just that MN+Power On does not give me the blank display for alphanumeric programming - just shows me the frequency just as if I had Powered on without pressing the MN button. I have tried this many times - I know I'm pressing the correct buttons in the correct sequence.

Do I have a faulty MN button, or has it been somehow deactivated? I cannot figure out what is the problem here. I'm in Memory recall mode with a frequency programmed into that position. What am I doing wrong?

I would be much appreciative of any help.

Casey Brown

I saw "Erin Brockovich" and loved it. It didn't use ham radio at all but rather Julia Roberts's endowments in an excellent film, a true story, about chromium poisoning of an entire community in California. I believe it's R rated so kids keep away and most of the scatterbrains on this board who wouldn't understand it anyway. I liked it so I'm promoting it.

How about looking in the ARRL Repeater Directory.

Don't forget to apply for your temporary license a few months in
advance. Costs about $75. No, it isn't Canada. There is no reciprocal
licensing with Mexico.

: I AM CURRENTLY USING A MFJ-949E TUNER FOR HF AND HAVE GREAT DIFFICULTY
: IN CONSISTANTLY GETTING MY MUTIBAND(40-10 METER) DIPOLE TUNED.
: IT TUNES WELL ON ALL BANDS AT TIMES AND AT TIMES I CAN NOT GET IT TO
: TUNE AT ALL.

I have used several of these tuners and found the basic design quite satisfactory. However the second one I purchased had some bad solder joints in it. I finally went through it with a soldering iron, touching up every joint, and in the end it worked fine. It's a pretty easy job, since all the wire is pretty heavy -- not like touching connections on a miniaturized digital device.

I had similar problems with an MFJ Antenna Bridge, and the solution was the same. I purchased both of these units more than 5 years ago, and MFJ's quality control may have improved since then. But, at the time I concluded (and may have written here) that MFJ products should be approached like Heathkits assembled by people with unknown skills: trust the design but be wary of the quality control during assembly.

Now, as to determining whether the problem is your tuner or your antenna: wires and connectors that have been out in the weather for a while can develop lots of problems that may mainfest themselves inconsistently, depending upon current and recent weather conditions. One of the nice features of the MFJ tuner is the built in dummy load. I suggest you try matching your transmitter to the dummy load a number of times on all bands and see if the settings are consistent. Any inconsistency surely indicates a problem within the MFJ unit and should be all the grounds you need to justify a return under warranty or a quick run through it with a soldering iron. If you find it matches consistently with the dummy load you won't have proved the tuner is without fault, but this indicates a closer look at your antenna or tests with an alternate antenna could be useful.

Yes, do a browser search for " Winlink " .. winlink stations
require special software on your pc in order to automatically
upload/download messages from winlink stations to and from
your own mobile/portable/marine station.. this is an internet
based service..

Installing lights at Wrigley Field IMPROVED baseball generally by allowing day workers to see games on Chicago's north side. It compromised nothing nor did it lower the standards of our national pastime. The 3 pointer in basketball REWARDED the shooter because it's so much more difficult to score from that distance. Installing running water and TV in homes IMPROVED OUR QUALITY OF LIFE which is what it's all about anyway. How can you equate the outlined improvements to the what the ham radio freebie artists are getting? If for instance ham radio represents life in general, how can opening the door to lazy bums improve it? Welfare is fine for those who ACTUALLY need it while every administration should do all it can to REDUCE the number on it for the good of the country. The idea is not to make it easier to get welfare but just the opposite. To provide job incentives to get people OFF the dole. What the FCC and ARRL did was to make welfare fashionable-to reward laziness and incompetence and to up the handouts to equal what a hard working person earns. It's the most disgusting, self serving and counterproductive measure ever foisted upon us who take pride in our achievements and unless anyone can prove to me that the ARRL was not a willing partner in this travesty, my membership ending this month, ENDS.

Ok, serious replies:

>I see restructuring doing this:
>1. Inflating numbers to impress the ITU

The USA is the leading influence in the ITU already--it
doesn't need to "impress" them with anything.

>2. Easing the FCC's clerical and statistical work

Two problems:

1. With the level of computerization involved, there would be
no discernable difference in this area. That is, the same personal
data (name, address, etc.) needs to be entered and a given license
level must be noted. From that point, the processing, sorting, etc.,
would be completely automatic.

2. Theoretically, this _could_ reduce the amount of paperwork
by either: (i) reducing the processing time needed for medical waivers
on code (which represent only a very small percentage of all
applications) or; (ii) reduce the number of times a file must
(potentially) be upgraded by reducing the number of classes of license
any given individual could ultimately advance to. Both of these end
results, however, could _more_ easily be achieved by having simply
changed the license term from 10 years to 12 years (which would NOT
have resulted in very much debate or complaint from existing hams or
organizations). In addition, the cost of processing all the comments
filed, as well as the costs of preparing for the restructuring changes
themselves would have caused _far_ more work than the changes saved.

>3. Acting as a "cash cow" for the ARRL

Complete straw dog. This represents prejudice against the
arrl, not any real commentary on the license restructuring. The FCC
did _not_ implement a rules change to make money for a private
organization.

>4. Acting as a "cash cow" for ham equipment retailers

Same complaint as above. For someone who asked for Intelligent
replies to what you stated was a serious post, you are remarkably

willing to post disingenuous concerns and destractors void of any
validity or appropriateness to the issue.

>5. Creating considerably more work for Riley Hollingsworth necessitating a
>substantial raise which if not given will put him squarely back into law
>instead of policing

In (2) above you claimed this was a way of cutting clerical
costs for the FCC--now you claim it is a way of increasing the salary
of an FCC official (which, btw, is impossible on this basis--he is a
civil service employee, which means his salary is set by his grade
level--the only way he can increase it [other than cost-of-living and
seniority increases, which every civil service employee receives] is
to be promoted--which is largely based on seniority as well).

>I see no tangible benefit to ham radio per se insofar as bettering,
>refining, upgrading and making it more acceptable to and appreciated by the
>public at large.

And others _do_ see such a benefit--and a potential for growth
that will benefit the ARS as a whole.

> I see nothing which will help establish a clearer
>perception of it and a definite distinction recognized by the public
>between it and CB.

Was that a stated intent of the restructuring? No where I read
was this stated as a purpose. There _is_ however a pretty clear
distinction between the two services. To become a legal CB user, you
need only visit any Radio Shack (or comparable) store, purchase a
radio and mag mount antenna, set the antenna on your roof, connect the
radio to your battery and the antenna, and begin transmitting. At that
point you have just as much legal right to communicate as does a user
who is an expert in radio theory, federal communication law, and
spends his free time working with REACT. To legally enter Ham radio by
the easiest path, however, requires that you (1) study enough morse
code to pass a 5WPM test on reception; (2) study radio theory,
communications regulations, operating procedures, and electronics to
the extent necessary to pass a written test on the subjects. Only
after you have successfully completed this sequence can you legally
install a radio in your home or car, connect it to an antenna and
(observing far more rules than are required of a CB operator) transmit
signals on within whatever sub-set of the Amateur spectrum you have
demonstrated sufficient knowledge to be granted operating privileges.
There's not a lot of similarity there--if the public don't perceive
those distinctions, don't blame the FCC or the arrl, blame the local
hams and clubs for not publicizing that difference by maintaining a
presence at local events. It isn't the responsibility of the FCC to
gain public respect for our hobby--it's our own responsibility as
hams.

>If I'm wrong, tell me about it.

Ok, you're wrong, and I've told you about it.

Stop blaming the FCC and the arrl for change--that's as useless as blaming the economy for changes in your work place. Instead, do something _productive_: put serious pressure on VECs to produce more challenging tests with vastly increased numbers of questions in the pools (preferably ones with well designed questions written in a manner designed to preclude or reduce memorization). It isn't the speed of a ham's code that makes him or her a "good ham." It's the amount of knowledge and operating skills s/he brings to the hobby. Increase the difficulty of the more advanced tests (while keeping the Technician class test fairly basic--although not "memorizable" to encourage people to "try out" the hobby)) and you'll produce that result without any NEED for out dated high speed code testing. Whether a person enjoys cw (and thus develops his/her skills and speed) or never uses it has no effect at all on that person's contributions to ham radio--whether or not s/he understands the principles does.

Ok, it's _your_ turn to take an Intelligent (versus opinionated or unreasonably prejudiced) look at the problem and respond from common sense and logic instead of emotion.
